Federal Roofs

link light weight

with High Strength

WHEN you roof with Federal Cement Tile, you effect substantial savings on the steel super-structure or frame.

That is due to Federal Tile's light weight.

Because these pre-cast slabs are quality controlled, accurately reinforced with wire mesh, and thoroughly cured under uniform temperature conditions, they link this light weight with high strength.

And you are sure of the same permanent freedom from repairs that Federal Roofs have been providing on industrial and public buildings of every type for a quarter of a century.

Made of concrete, these roofs are fire-proof and rust-proof. They are also freeze-proof and sun-proof. They are unaffected by gases, by smoke, or by acid fumes.

Let us tell you the full story of Federal Roofs, and of the engineering and erection service that goes with them. Your request will be given prompt, courteous attention without placing you under any obligation.

Federal Interlocking Tile for pitched surfaces have a non-fugitive, red color and require no painting. When used with Federal Glass Insert Tile for top-lighting an ideal "daylight roof" is obtained. Other styles include Flat and Channel Slabs for roof decks

Volume 96 NEW YORK, JUNE 24, 1926 Number 25

A Concrete Bridge Novelty

REFINEMENTS of design far beyond anything ever attempted in this country are revealed in the Swedish reinforced-concrete bridge described on p. 1022 of this issue. These lie particularly in the use of hinges, the provision for elastic movement and the dependence upon interwoven hooping to add strength at critical points. All of these details, however, have been tried out by American engineers, though few of them have been convinced that such details give results adequate to pay for the labor and cost involved and many, besides, doubt the practical consummation of the theoretical gain. It is in the excessive variation of the proportions of the mix, however, that this structure is distinctly strange to Americans. A small variation between foundation and superstructure concrete is common here and an occasional bridge will be found with a weak lean mix for filling concrete, but to vary proportions at every place that the stress sheet shows a different demand for strength or elasticity is carrying dependence on the knowledge of concrete behavior pretty far. The usual explanation of the difference between European and American practice in structures has been that over there labor is cheaper, materials more expensive and machinery rarer than here, but with changing times Europe must be approaching America in the relative costs of these items. The more plausible explanation of such differences as the Swedish bridge shows is that European engineers are more inclined to bend practice to theory than the American, who might be said to use theory mainly to justify practice.

How Precedent Is Built Up

PATENT validity, particularly where structural patents are concerned, is built up largely on the precedent of acceptance by earlier so-called infringers. The technique of the patentee has been fairly well established. First, of course, he has to get a patent and then to have it upheld in the lower courts. This is fairly simple, for up till quite recently at least the Patent Office has been unable to distinguish between invention and design in a static structure, and lawyers both on and off the bench have been equally dense. Armed by the law, then, the patentee seeks first a few amenable infringers, who to avoid difficulty and to save money, admit infringement and pay nominal damages. The patent thus becomes well established, the record of admitted infringement impressive and the chance remote of there arising an accused infringer bold enough to start anew the fight against the grant of a government monopoly to what, to all engineers familiar with the processes of design, is merely the exercise of normal engineering thought. The system by which such patents are promoted is pernicious but difficult to combat, because the individual as a rule finds it cheaper and easier to surrender than to fight. A peculiarly flagrant case has just come to hand. A public commission, against the advice of its engineers, has just paid over a large royalty, because the individual members of the board had been led to believe by certain legal decisions that they were personally responsible for any damages awarded a contesting patentee after a successful infringement suit. The patentee now has this successful claim to wave before any other public body it chooses to intimidate and will continue to have it until some one has courage enough to fight, and perhaps luck enough, patent courts being what they are, to win a suit based not on superficial legalities but on the obvious engineering fundamentals involved in this particular patent.

Small City Paving

STREET resurfacing is a problem that all cities have to face. Increasing traffic, both as to amount and as to weight, is playing havoc everywhere. But the burden of replacement is falling more heavily upon the town or small city than it is upon the good sized city where a fair percentage of so-called permanent pavement had already been placed before the motor became so omnipresent. Asphalt, concrete and brick pavements give way to some degree under the continual wear of the rubber tire, as million dollar annual budgets for street work in such cities as Cleveland and Pittsburgh testify, but such pavements are marvels of permanence compared to the old waterbound or even oilbound macadam which made up the majority of the street surfaces of the minor city ten years ago. These second-class roads are going to pieces fast and their replacement means just that, not merely repair. In consequence many a town of 10,000 is faced today with the necessity of spending a million or more in street construction, if it would modernize its street system. This means bond issues added to already overburdened indebtedness, or the alternative of piecemeal surface repair out of current funds with the continual prospect of the evil day approaching when the repair system will not suffice. City fathers in such places need the courage to foresee the inevitable and to plan a systematic reconstruction, within the permissible financial capacity of the town, so that in some given time they will have permanent streets to replace the simple roads which sufficed for the village or town in the days of the horse-drawn vehicle. Trying to make those old roads over into modern streets merely by a surface treatment is as hopeless as trying to brush back the rising tide.

City Planning By Convention

NEW YORK CITY is going to try to plan for its future growth by convention rather than by experts or by officials. The mayor has appointed a committeee of nearly five hundred men and women who are to report on what the city must do, physically, to keep pace with its growing needs. Among those who will deliberate are numbered the gentleman who directs the destinies of the city's most authoritative political organization, a boxing commissioner, some theatrical impresarios, and a miscellaneous collection of "business

men." But there are, too, more than a sprinkling of competent engineers, architects and housing experts, who will furnish a leaven of real knowledge. The main work is to be done in committees and doubtless there will be a sufficiency of expertness on each of these to make their conclusions of real merit. The whole scheme has considerable appeal, especially for a large city, because by wise selection a cross-section of the city's directing thought is bound to be enlisted in favor of what the committee eventually reports. City planning does not require so much the brilliancy of thought to conceive as the persistence and confidence to put through. Plenty of our cities have wise plans made by those who know how to do just this but they are now merely dusty papers on forgotten shelves. Possibly the mayor of New York has hit upon a way to make a city plan effective. If he has he is entitled to a patent, on the grounds of novelty.

Cost-Plus Comes Back

THE cost-plus contract for certain important drainage work in St. Louis, Mo., described in our last issue, is a significant return to a method of contracting construction which was virtually killed in public works practice by the war. It was the lot of the cost-plus contract to be accused of all the extravagances and wastes of war construction. However unjust this was perceived by the thinking engineer to be, few had the courage to combat popular prejudice. This has been particularly true of public works engineers. Indeed following the charges of fraud and the suits for restitution against the war contractors a public works engineer risked his position, and almost his reputation, if he advocated cost-plus contract construction. The distrust of the method even extended to private construction and cost-plus contracting which had been steadily growing in favor began speedily to decline. Only the reputation of a few outstanding contracting organizations which had made the practice a fundamental of their operations kept it alive. Gradually, with the return to more normal conditions, there has been a return to favor with private owners of cost-plus construction. It still remains in scant favor in public works construction and it is this fact which magnifies the action of the St. Louis board of public service. It is not now the occasion to discuss cost-plus contracting. All its phases have been contended time and again by its disciples and its opponents. When the St. Louis experiment is recorded as we expect it will be, there will be new facts to guide opinion. For the moment, however, it can be said that cost-plus contracting possesses advantages under many conditions which make it well worth an owner's most careful attention.

A Re-invigorated Movement

FROM the evidence furnished by its convention at Philadelphia last week, the American Association of Engineers has reached a stable and sound condition. The membership, which for a time was sagging steadily and at an alarming rate, now is not only maintaining itself but is growing; expenses have been reduced below income and a saving is made; in addition, the divergence of purpose that marked previous conventions has been overcome. These are signs of excellent augury. They are important not only to the friends of the Association, however. The year's development—for the past year was the time of reform—should serve to demonstrate to all engineers the profession's needs. It makes manifest the demand for professional as contrasted with technical activities.

"Professional welfare work"—not a very graphic term at best—describes something that is not contained in technical discussions of stresses or the like and yet is a practical business necessity of the engineering community. It concerns the engineer as a man who must live, who must live efficiently, and who must work out many puzzling problems arising from the intermixture of ethics, technical skill and business exigencies. There was a time when such work was decried as uncalled for, as being below the level of a self-respecting society, but the passing days have made this view obsolete. Today it is clear that there is proper scope for society work in this field. The technical societies, hitherto inclined to ignore its necessity, can hardly continue long to look askance upon it under present conditions. The time may have come for them to consider seriously the possibility of co-operating with the Association, in order that technical activities and professional activities may be worked out in helpful conjunction.

The plain fact is that more than 6,000 men of the profession are engaged in the new work, and—after some initial confusion—remain grouped together in orderly, well managed array. These men are soberly intent upon bettering professional life in its administrative, ethical, social and public-service phases. They can achieve success unaided; but they will do so more quickly, and will help the profession more effectively, if their work is understood and is sympathetically supported by the technical societies. Much remains to be done in developing the purpose of the professional movement and centering it on suitable objectives. The ultimate value and need of the work, however, is no longer in doubt.

Train Control Again to the Fore

ONCE more a passenger train running at a high rate of speed at night has plowed its way into the rear sleeping cars of a stalled passenger train ahead of it with an appalling loss of life. Once more the human element in the system built up to prevent such catastrophes has failed to function. At this writing it is not known definitely in what way. Possibly it will never be known because two of the three men primarily responsible are dead, victims of their own or their fellow's carelessness. The rear flagman of the standing train says that he went out 700 ft. (an entirely inadequate distance with such high-speed trains), put down torpedoes and lit a red flare before returning to his train which was just ready to move off when the accident happened. Lacking positive evidence to the contrary, this statement must be accepted as true.

If it is true, then the evidence against the present method of protecting trains is more damning than ever. Usually there are only two men on the front end of a passenger train responsible for the observation of danger signals. This time there were four. If none of these four men neither saw the red flare on a dark night, nor heard the detonation of the torpedoes, nor smelled the tell-tale odor of the latter, then indeed some additional method of protecting trains is necessary. An additional means is available in automatic train con-

trol. It may not be infallible, but certainly it can be counted upon to act in a great majority of emergencies such as this.

The railroad companies have opposed train control installation on account of the high cost and because its development is largely in the experimental stage and future developments may necessitate expensive changes. But the railroads, particularly those which operate high-speed passenger trains as close together as were these two passenger trains last Thursday night, are not as poor as they were when the first order for the installation of automatic control was issued. There is no reason now why the installation of automatic train control devices on the more important railway lines should not be pressed with vigor. It is sometimes claimed too, that such precautions would induce a false sense of security which would render more fallible the already fallible enough human element. But this is, at least, to be proved.

The responsibility for the recent accident is assumed to rest with some member of the train crews. How long will it be before the moral responsibility for a similar accident is shifted to the directors of the company which operate such high speed passenger trains without providing the additional protection of automatic train control?

Engineering as an Aid to the Farmer

THE farmer has a hard row to hoe. He puts in long hours to produce vital supplies which he sells at a low figure for city dwellers working short hours at high wages, who in turn produce goods which the farmer is compelled to buy at high prices, or go without. He has to struggle to get, keep, and pay such labor as he and his family cannot supply with their own hands. His business is so organized, largely by its very nature, that he has long periods of seasonal idleness, a fundamental drawback to efficiency of production. Farming, the oldest of the productive activities of man, remains the least affected by those modern methods which have increased man's productivity, and in so doing have likewise increased his capacity for consumption, and his ability to pay for that increase.

Other great industries have met changed conditions by large scale production, are drawing on great pools of capital by labor-saving machinery, by scientific research, and by utilizing to the full the services of the engineer. Many things conspire to keep the farmer behind the other classes of producers in such modern adaptations. Millions of capital en masse do not exist for the farmer as for the manufacturer, or the transporter, or the distributor of goods. Up to the safe mortgage limit, land or chattel, he can borrow money, but only as an individual. His is indeed a large class of highly individualized and widely scattered persons. He has made his gestures toward co-operation, and they are becoming gradually more effective, in spite of the fact that those who represent him sense his political power more than they seek his individual prosperity, with the result that his accomplishments in co-operation are most notable where they perhaps do him the greatest harm in the long run, that is, in getting class legislation.

No wonder then that he or those who represent him are continually exploring new economic wildernesses in the vain hope that somewhere, somehow, will be found the formula of escape. Free silver in the nineties and equalization fees in this year of grace bear little resemblance as basic means, but the ends sought are precisely the same; they both represent the struggling effort of the agricultural producer to lift up this one great essential of living to the same scale and base as its eternally warring brother, industrial production. All such efforts are expedient. They can affect, if at all, only the temporary relation of the two great divisions of human activity. In the long run, the pendulum now setting high toward industrialism will turn, and the demand for food and clothing from a factory-covered world will increase the attractiveness of the business of raising the wherewithal for this food and clothing.

Meanwhile there is a gradually growing appreciation of the long-time efficacy of engineering as a saving grace. Economics as exemplified in what is called business may alter earlier results, but those most deeply interested in agriculture appreciate that for the long-time pull it is science which will win out. In scientific research the farmer has had far more done for him than any other great producer. How far he has gone in utilizing the numberless data and conclusions placed at his disposal is another matter; not far, probably, compared with the producers in the industrial field. For the most part, however, this application of science has been highly specialized. It has not until recently recognized any engineering relation, but within the past two decades this has been changed. The science of agricultural engineering is growing up, and that science is slowly making its impress on the struggling industry toward which it is directed. The article in this issue by Professor Ayres is an interesting exposition of how this agricultural engineering has grown, and how its development in our schools is progressing.

It would be instructive to know how much the present plight of the farmer is due to his lack of appreciation and use of engineering services. When it comes to employing competent engineers, what percentage of the farmers of the country, even co-operatively, have ever paid a dollar to an engineer, except for surveying? Where it has been done, it has been generally for laying out drainage or irrigation work, or perchance roads, and generally through governmental agencies at that. Indirectly the farmer gets the benefit of a large amount of engineering and other technical service, through the purchase of farm and house equipment, but he does not recognize that as engineering. The forward looking farmer is fully appreciative of the advances that have been made by the scientific agriculturist. That the engineer, too, has something to offer has not as yet made much progress in his consciousness. And yet, to cite only one fairly remote example, those efforts to market his products which are slowly going forward under the head of co-operative plans, are at bottom merely engineering devices, or they are subject to those investigations, analyses and actions that form the basis of engineering operation.

If the farmer as a class will gradually get away from the idea that some kind of magic formula or legal device will act as substitute for scientific development he will, helped out by the normal swing which is bound to come toward his industry, move even faster than he is now moving toward that equality of reward with the industrial producer which he now so eagerly seeks, and which in a properly balanced world he must have.

Laying Intake Through Earth Dike Under Service

Intake for New 90-m.g.d. Filters for Denver Water-Works Put Through Marston Lake Embankment in Cofferdam, but Subaqueous Pipe Placed by Divers from Barges

IN CONNECTION with Denver's new 70-m.g.d. mechanical filtration plant recently installed on the north side of Marston Lake, a 90-in. reinforced-concrete intake pipe was laid through a 40-ft. dike out into the lake, a distance of nearly a quarter of a mile, and a screen house was constructed at the shore end of this line a few hundred feet from the aeration basins of the filter plant. At the start a short section of the pipe with concrete cutoff collars was laid in a cofferdam in the center of the dike and backfilled. The subaqueous pipe was brought down a track laid on the slope of the embankment into the water, transferred to a barge from which it was sunk in place and brought home by a diver. A cone-shaped frame on the upturned elbow at the intake end is covered by a conical screen guided to place by a chain from the frame paying through the top of the screen to the surface.

Marston Lake, being a 6,000-m.g. uncovered reservoir, is subject to a rather profuse growth of algae which thrive in clear shallow water under the action of sunlight. For that reason it was considered desirable to draw the water from a point some distance from the shore where there is always a considerable depth and where the growth of algae is minimized. The 90-in. intake will provide not only for the present capacity of the filter plant but also for future extensions.

The lake is roughly circular in shape with an average diameter of a little over one mile; and an earth embankment, the elevation of the top of which is 370, Denver datum, extends around most of its perimeter. The bottom of the lake at the new point of intake is below El. 320 so that the depth there at high water is more than 40 ft. and more than 20 ft. at proposed minimum low-water level. The elevation of the natural ground at the point where the new intake pierces the embankment is about 340 so that the embankment is approximately 30 ft. in height. Water in the lake varied all the way from 345 to 356 while the construction of the pipe line was in progress, the pipe being laid in from 12 to 20 ft. of water.

Screen House—The screen house is a concrete structure up to the level of the top of the embankment and has a brick superstructure. The concrete walls and floors are founded on bedrock which is approximately at El. 312 or about 30 ft. below the natural ground level. The structure is pear-shaped in plan, Fig. 3, inside dimensions on the major axes being 38 ft. and 44 ft. respectively. The structure is provided with the necessary concrete piers and steel and concrete appurtenances for three sets of traveling screens. These screens have a height of 60 ft. c. to c. of sprockets and are provided with screen baskets 8 ft. long. They are designed for a speed of travel of 6 ft. per minute. Two of the screens have No. 40 copper mesh wire and the third screen has No. 60 copper mesh wire.

As the ground was quite wet above bedrock, due to seepage through the embankment, a sheetpile cofferdam was driven down to bedrock around the location of the concrete structure before excavation was started and four 12x12-ft. wooden key piles were driven inside the cofferdam to afford a means of bracing during the progress of excavation and concrete construction. The sheetpiling was left in place and used as an outer form for the lower part of the concrete walls. The cofferdam, Fig. 2, was excavated with a clamshell bucket on a crane which also was used for handling concrete.

FIG. 1—DETAILS OF DIKE CROSSING

The pipe line is provided with a vertical elbow at the intake end, a 60-ft. valve in the embankment about 75 ft. from the south wall of the screen house and a steel breeches which connects with the 90-in. line where

FIG. 2—EXCAVATING FOUNDATION OF PEAR-SHAPED SCREEN HOUSE
Sheeting was driven to bedrock and used for outer form for concrete walls. Note proximity to toe of dike.

it enters the screen house and branches into two 54-in. down pipes provided with valves at approximately El. 325. Special steel reducers 6 ft. long, with ends of necessary shape for calking into the steel ends of the concrete pipe, provided for connection to the 60-in. flanged valve. The pipe line must act as a siphon when the lake is at a low level and provision is made for pumping the air out of the line at a high point near the screen house so as to start the action of the siphon. This necessitates an airtight pipe line in the first 200 ft. of pipe line laid south of the screen house. To provide for airtightness, welded steel cylinders of No. 12 gage steel made integral with the steel joint rings by welding were molded into the walls of the pipes when they were manufactured and the calked lead joints used in this design of pipe were also made airtight without difficulty. All pipe laid in the lake was manufactured in 12-ft. lengths weighing approximately 15 tons each or 8½ tons when submerged in water. For convenience in handling, the pipes laid on shore were manufactured in 6-ft. lengths. As the pipe laid by subaqueous methods operates under no head, having substantially the same pressure inside and outside, it was not found necessary to calk the joints or fill the joint space with mortar beyond the end of the section acting as a siphon. To prevent any tendency for the pipes to separate all pipes laid under water were provided with a pair of 1½-in. eyebolts at each end, which were driven into steel nipples molded into the concrete during manufacture, all of them being in the same plane. The pipes were laid with these eyebolts on the horizontal axis and 1½-in. bolts were inserted through the eyebolts by the divers and nuts screwed home.

Pipe Delivery—All pipe laid on shore was delivered by truck. It was the intention to load the subaqueous pipe on the laying barge from a dock but the lake level was considerably lower than was anticipated. Accordingly, a railway track of about 5-ft. gage was laid from the manufacturing yard down the east shore of the lake and out into the water several hundred feet. Each pipe was loaded on a low pipe car which ran on this track, Fig. 4, and which was pulled out into the lake by a hoisting drum on the barge to a point where the depth of water was sufficient to give flotation for the loaded barge. The pipe was then picked up by the barge and transported to the location of the pipe line where it was laid. The empty car was pulled back to the loading yard by a cable on the drum of the locomotive crane, this cable being eased off gradually to steady the car when delivering pipe.

Before delivery, each subaqueous pipe was provided with a heavy strap-iron band placed around the pipe at its center of gravity and to facilitate handling, a pair of eyes was welded on top of the band near the 45 deg. points. From the pipe handling device on the barge a Y-shaped bridle was hung which consisted of a pair of short eyebars, the ends of which engaged the

FIG. 3—PEAR-SHAPED SCREEN HOUSE FOR THREE TRAVELING SCREENS

eyes on the pipe band and were secured by steel pins to which ropes were fastened so that they could be easily removed after the pipe was laid and the load slackened off. The steel bands were left in place on the pipes.

FIG. 4—CRANE DELIVERS PIPE TO RAILROAD DOWN SLOPE
Flat car carrying pipe near water edge let down slope with cable. Barge will pick up between pontoons when pipe far enough out for barge to get it.

According to the specifications the first stage of the work was to be the construction of a cofferdam in the main body of the embankment and this cofferdam was to be excavated and the pipe laid and fully protected by the necessary concrete cutoff walls and earth backfill before the water face of the embankment was disturbed. Percolation of water along the sides of the cofferdam during construction or along the pipe after it was laid might readily develop a condition of erosion which could undermine the embankment. The cutoff walls were to be extended out 8 ft. beyond both sides of the cofferdam and at right angles to it by driving full length interlocking sheetpiles made structurally intact

FIG. 5—LAYING BARGE WITH PIPE READY TO LOWER
Four spuds steady barge which is pulled to final position by lines moored to buoys. Four guy ropes were fastened on each side of the pipe at both ends. Laying rig supported on transverse track. A chain block fastened to the sling gave a longitudinal motion and four guy ropes provided slight adjustment in alignment.

with the cofferdam. As soon as the cofferdam excavation was completed sheet piles, 8 or 9 ft. long, were to be driven across the bottom below subgrade along the line of a cutoff wall and when the pipe was laid a concrete collar or curtain was to be placed around it, bonded to the sheetpiles in the bottom and to sections of piling on the inside of the cofferdam interlocking with the walls so as to give an impervious cutoff wall at least 32 ft. wide and approximately the same height.

Before any cofferdam work was started a wide prism of earth was excavated from the top of the embankment its full width down to elevation 360.

The first cofferdam was made up of a single row of steel sheetpiles forming a complete box about 17 ft. wide and 40 ft. long, the north end being about 30 ft. from the south wall of the screen house which is at the down-stream toe of the embankment. It was provided with the necessary corner pieces and six crosses so that the steel piling in the cutoff walls could be made structurally intact with the concrete collars around the pipe. Twelve 12x12-in. timber piles about 40 ft. long were driven inside of the cofferdam at the corners and along the sides, which served as a framework for the timber bracing of the cofferdam, and the 12x12-in. rangers framed on these posts also supported heavy cross-timbers which served as a mat for the crane used in excavation, piledriving and pipe laying. Six pipes, 6 ft. long or 36 ft. of pipe, were laid in this cofferdam and three combined concrete and sheetpile cutoff walls 33 ft. wide, were constructed across it. Reinforced-concrete struts were placed between the concrete collars so that they could act as retaining walls to take care of any

FIG. 6—THE 6x16-IN. SILL WITH ANGLE BARS AND WEIGHTS

unbalanced pressure which might develop during backfilling or while the embankment was settling.

The second cofferdam had practically the same dimensions in plan inside as the first and was constructed in substantially the same manner, but a double row of steel sheetpiles were driven around the portion which was out in the water, the space between the two rows of piling being filled with impervious material. In addition to the 60-in. valve, which with the reducer occupied a space of about 14 ft., four pieces of pipe, 6 ft. long, were laid in this cofferdam. One low cutoff wall was constructed on this cofferdam and a concrete valve chamber, 6x10 ft. in plan inside, was built over the 60-in. valve.

A third cofferdam was constructed out in the water so as to drop the pipe line down about 7 ft. in a distance of 36 ft. This cofferdam was built in extension of the second cofferdam in water varying in depth from 10 ft. to 15 ft. Only a single row of sheetpiles was used in this cofferdam. It was protected from seepage by a large piece of heavy canvas which extended completely around the outside of it, and placed around the bottom of the cofferdam acted effectively as a water seal.

All piling in the first cofferdam and the inner row

of the second cofferdam was left in place. The outer row of piling in the second cofferdam and all sheetpiles in the third cofferdam were pulled with the crane. All concrete pipe and steel specials laid in the cofferdams were concreted in the full width of the cofferdams from subgrade up to a point 8 in. above the top of the pipe.

Piling 32 ft. long, similar to that described for the screen house cofferdam, was used for the cofferdams through the embankment and it was driven with a steam hammer, the leads for which were supported

FIG. 7—CONCRETE ELBOW AND GUIDE FOR SCREEN

from the boom of the crane. Most of the excavation was done with clamshell and orangepeel buckets. A 10-ton crawler crane was used for piledriving, excavation, pipe laying and backfilling.

Pipe Laying in the Lake—The improvised barge, Fig. 5, used for the delivery and laying of the subaqueous pipe, consisted of twin rectangular timber pontoons, each 26 ft. long and 9 ft. wide with an overall depth of 34 in. They were provided with watertight decking to prevent waterlogging. They were fastened together with a space of about 9 ft. between them so as to give a few inches clearance for a 90-in. pipe, which has an outside diameter of 8 ft. 4 in. Across the barge a heavy gallows frame was constructed on top of which an 18-in.-gage track was placed for the geared pipe-handling rig. Astern of the twin pontoons, with its axis on the longitudinal axis of the barge, a third pontoon was fastened. This supported a steam hoisting engine which furnished power for driving the propellers, one of which was placed at the stern of each of the twin pontoons and which also drove a counter shaft which furnished power for the laying rig and the winch heads used to operate the spud and mooring lines. The main anchor was operated by one of the drums. The barge had a very narrow freeboard and drew nearly 33 in. of water with its fixed load and the maximum movable load of about 15 tons. In taking on a pipe from the delivery car the barge was anchored in position astraddle of the railway track and the partially submerged pipe resting on the delivery car was pulled in between the twin pontoons.

Four long spud posts were provided, one at each corner of the barge; they were raised and lowered by manila ropes wound on winch heads. These spuds served effectively in steadying the barge while at anchor and were very useful when manipulating the barge into exact position. The barge was also equipped with a removable boom and pile driver leads. In loading or laying pipe, the barge was brought to approximate position on its own power and pulled to final position by lines moored to buoys, which were shifted as the work progressed. Very careful manipulation was required as the barge had to be brought to exact alignment and distance within a few inches when laying pipe.

In order to minimize the difficulties of laying by making the pipes go together easily, special care was taken to keep on exact grade and line. Before a pipe was laid, a wooden sill 16 in. wide and about 6 in. thick, Fig. 6, was placed in the bottom of the lake at right angles to the pipe line a foot or so back of the point where the end of the bell was to come. The sill was provided with an angle-iron leg at each corner and when lowered into the water was weighted down by means of removable saddles fastened to lead weights, guides being used to bring the sill to the proper position after which it was rammed to exact grade by means of two specially devised tampers made up of

FIG. 8—SCREEN FOR TOP OF ELBOW LET DOWN ON GUIDE CHAIN

Guide chain from frame pays through ring at top of screen. A second chain on screen enables screen to be pulled up for cleaning. Both chains are attached to a buoy.

angle irons and pieces of sheetpiling. Before the sill was lowered exact soundings were taken to determine the contour of the lake bottom so that a sill of necessary thickness could be provided or blocking nailed on the underside of the sill to fill up depressions. In case the sill was driven below exact grade, it was an easy matter to nail a scab on top while in position under water.

The pipes were laid bell end forward and in laying the spigot end was carefully aligned on the bell of the pipe last placed by means of four guy ropes fastened on each side of the pipe at both ends. The pipe-handling or laying rig which was supported on a transverse truck gave a motion in two directions, that is, up and down and sideways. A chain block fastened to the sling gave a longitudinal motion to the pipe and the four guy ropes provided for slight adjustments in alignment, so that it was a relatively simple matter to bring

the pipe home to exact position. When this was done, the diver entered the tie bolts through the eyebolts at the ends of the pipe and placed the nuts on them, after which they were tightened up by means of a ratchet wrench operated either by the diver or by a rope from the barge.

Line which was on a tangent was carried by means of range poles on shore and in the lake, it being occasionally checked up with a transit. Grade was carried by water level corrected for changes in gage height, or when the lake was rough, by rod measurements from pipes already in place.

After pipe laying was finished, pea gravel was spilled along either side of the pipe line through slots in the sides of gravel boxes transported along the center line by the barge. The gravel was well worked under the haunches of the pipe by the divers so as to insure a firm and permanent foundation.

Conical Screen—A precast reinforced-concrete elbow, provided with a spigot joint ring to engage the bell of the last pipe, was installed at the end of the pipe line. This elbow, which weighed nearly 20 tons, was lowered into place by the barge. Just before lowering, a conical screen frame consisting of six heavy brass rods with a ring at the point of the cone was placed in position on top of the open end of the elbow, the feet of the brass rods fitting into holes left in the concrete during molding. A chain fastened to the ring of this frame serves as a guide for the screen which was installed later. The screen, Fig. 8, which is also conical in shape and which is made up of brass rods braced or soldered together, has openings 1 in. square in the clear. There is a hole in the brass casting at the top of the screen and a brass clevis provides a means of fastening the screen to the chain by which it is handled. When the screen was lowered into place, the guide chain on the screen frame was passed through the hole in the brass screen casting and the screen dropped readily into exact position with its bottom ring on top of the concrete elbow. The ends of both chains are fastened to the buoy which marks the end of the intake and the screen can be easily raised for cleaning.

Laying of pipe in the lake was started at the end of March, 1925, and finished early in May so that the job of laying 98 pieces of pipe took about 30 working days. Five pieces of pipe were frequently delivered and laid in one day, but wind, which is prevalent in Colorado at that season of the year, interfered materially with the progress of laying, not only because of the roughness of the water but because of the danger of the barge being grounded in the shallow water on the east shore where the pipe was loaded.

The Lock Joint Pipe Co. handled all pipe manufacture, pipe laying and cofferdam construction with its own forces; and Stearns-Roger Manufacturing & Supply Co. of Denver constructed the screen house. The total amount of the contract for the pipe line and the screen house was about $315,000.

Burton Lowther, chief engineer of the Denver municipal water-works, was in general charge of all water-works construction for the city and Walter A. Sumner was resident engineer on this job. James H. Fuertes, of New York, was designing and consulting engineer and was represented on the job by Fred H. Weed, resident engineer.

Compromise Arrangements Made in Railway Plans in Oregon

Interstate Commerce Commission Authorizes New Construction—Does Not Order All Lines Requested by State

CONFLICTING plans for new railroad construction in Oregon have been before the Interstate Commerce Commission for nearly two years. Beginning with the request of the Oregon Public Service Commission that the Interstate Commerce Commission order the construction of some 400 miles of railroad in the central portion of Oregon (*Engineering News-Record*, Oct. 16, 1924, p. 635) and followed by several applications from individual railroad companies for authority to build lines in the same region, the matter has become one of more than usual interest not only because of the large mileage involved but also because the commission was asked to order the construction of a considerable mileage of railroad, which in the opinion of the railroad companies concerned was not warranted on the basis of the revenue in view. Because of these circumstances, the Interstate Commerce Commission decided to consider both the complaint of the Oregon Public Service Commission and the application of the railroad companies at one time. This has been done and on May 3 the commission issued an order, outlined briefly in our issue of May 27, p. 875, dismissing the complaint of the Oregon Public Service Commission and authorizing the construction of about 360 miles of railroad, the authorization being conditioned upon the granting of certain operating rights among the railroads concerned.

In the eastern half of Oregon is a great plateau region about 4,500 ft. above sea level reached only by a few stub-end railroad lines and hardly any highways. The center of the region is semi-arid, but in the north and west it contains large stands of timber and in the south and east are many settled areas. The Oregon commission sought not only to open up this area for development by the construction of an east and west line of railroad and a north and south line across it, but also by these lines to provide a new route to carry the products of western Oregon to the eastern market. These products now move over the lines of the Great Northern, Northern Pacific, or Chicago, Milwaukee & St. Paul to the north and eastward, or southward and eastward over the lines of the Southern Pacific by way of Roseville, Calif., and Ogden, Utah. The Oregon commission sought the construction of an east and west line from Oakridge to Crane, which would give a new route to the east at least 420 miles shorter than the route by way of Ogden, and the construction of a north and south line between Klamath Falls and Bend, with a connection to Oakridge, which would give an additional north and south route and would increase the competition in the region around Klamath Falls which now is tributary to the Southern Pacific and its controlled lines only. Moreover, the Oregon Commission requested that the Interstate Commerce Commission order the joint use of the new railroad by the major railroad systems with which they connected in order to increase competition.

The new lines proposed by the Oregon commission would connect with the Great Northern and Union Pacific systems on the north, with the Southern Pacific on the west and south, and with the Union Pacific system on the east. In order to establish the new route for

products of western Oregon across the state, the Southern Pacific would have to turn over to the Union Pacific freight which it now handles southward and eastward through Ogden, and the Union Pacific, the Great Northern and the St. Paul would be required to turn over freight to the Southern Pacific to be routed to the new transcontinental route. The railroads were actively opposed to any such arrangement and the Interstate Commerce Commission, in its decision, stated that the construction by the Union Pacific of its line across the state from Crane to Oakridge (as proposed when construction of this line was started, the Union Pacific then being affiliated with the Southern Pacific) is not economically feasible now that the two systems are independent. On the other hand, the commission considered that the construction of additional north and south

EXISTING AND PROPOSED RAILWAY LINES IN OREGON

lines is economically justified and desirable from a point of developing the territory, but it expressed itself as being opposed to the construction of paralleling lines and as favoring the joint use of certain lines, at least until there is sufficient traffic developed to require the construction of additional lines.

In view of these considerations, the Interstate Commerce Commission declined to order the large amount of new construction requested by the Oregon Public Service Commission but authorized the railroad companies to build lesser amounts as follows:

Oregon, California & Eastern Railway Co.—The Oregon, California & Eastern Railway Co. is authorized to construct a line from its northerly terminus at Sprague River north 63 miles to Silver Lake, with a branch from a point on this line 20 miles north of Sprague River in a northwesterly direction along the Williamson River approximately 15 miles, and another branch from Sprague River southeasterly 65 miles to Lakeview. Authority to build these lines is given upon the condition that the Oregon Trunk Ry. be granted the right to operate either over the Southern Pacific line from Paunina to Klamath Falls or over the tracks of the O., C. & E. Ry. to Klamath Falls from a connection on the proposed Williamson River branch described above.

Oregon Trunk Ry.—The Oregon Trunk Ry. is authorized to construct a line of railroad from Bend by way of Paunina to the nearest practical point of connection with the Oregon, California & Eastern Ry. But there is the condition that if the Oregon Trunk Ry. shall be granted the right to operate over the Southern Pacific from Paunina to Klamath Falls it shall construct only from Bend to Paunina. Construction by the Oregon Trunk Ry. south of Paunina or by the Oregon, California & Eastern Ry. is not to be commenced until a copy of the agreement for operating rights is filed with the commission.

Central Pacific Ry.—The Central Pacific Ry. (Southern Pacific System) is authorized to construct a line of railroad from a point near Klamath Falls southeast to Cornell, Modoc County, Calif., a distance of 36 miles, and thence southeast to a connection with the Nevada-California-Oregon Ry. at Alturas, Calif. As the latter line is narrow-gage it will have to be widened and improved to fit it for part of a main line route.

In addition the Southern Pacific Co. is authorized to obtain control of the Oregon, California & Eastern Railway Co. by purchase of its capital stock upon the condition that the Oregon Trunk Ry. shall be granted rights to operate over either the Natron cutoff line or the Oregon, California & Eastern line into Klamath Falls. The Southern Pacific Co. also is authorized to acquire control of the Nevada-California-Oregon Ry. Co. by purchase of its capital stock.

The Southern Pacific Co. estimates that the total cost of this work will be $19,741,000. This includes purchase, rehabilitation and extension of the Oregon, California & Eastern, purchase and changing the gage of the Nevada-California-Oregon and the new extension from Klamath Falls to Alturas. In addition to this it is now spending nearly $40,000,000 in the construction of Natron cutoff and Black Butte cutoff.

The construction of these lines satisfies part of the requirements of the Oregon Public Service Commission, in that a new and shorter route to the East will be provided from Eugene over the Natron cutoff to Klamath Falls, thence by the new line of the Southern Pacific to Alturas and south over the reconstructed line of the Nevada, California & Oregon Ry. to Wendel. Moreover, the Interstate Commerce Commission, by refusing to comply with the request of the Oregon commission that it order the construction of certain railway lines and then attempting to satisfy the requirements of the latter commission by approving the construction of lines which the railroads were anxious to build, avoided raising the question of its authority to order the construction of any railroad against the wishes of the railroad company so ordered. This action by the commission is reasonably certain to insure the early construction of some or all of the lines now authorized, whereas, had the commission ordered any or all of the railroads to build lines which they were unwilling to build, the whole matter in all probability would have gone to the courts on a test of the constitutionality of the order and construction would have been postponed indefinitely.

Action by the Railroad Companies—Following the publication of this order by the Interstate Commerce Commission, the presidents of the Great Northern Ry. Northern Pacific Co. and the Southern Pacific Co. met to discuss the conditions established by the commission, but have not yet reached any definite agreement.

A Problem in Plant Layout On Saturated Sand

Open Dredging an 82-Ft. Caisson 63 Ft. Deep in Sand Below Tide Level Calls for Pile Foundation for Plant

THE PROBLEM of locating a construction plant on sand constantly wet and certain to move as construction proceeded was interestingly solved recently in sinking a circular caisson 82x63 ft. on the shore of Jamaica Bay on Long Island. Each plant unit was put on a pile foundation and was kept outside a danger zone assumed as a ring 20 ft. wide all around the caisson. The arrangement is indicated by Fig. 1 and the general view Fig. 2 shows the nature of plant and structure.

Conditions of Site—The structure is the first of three 80-m.g.d. units of the new Jamaica sewage treatment

FIG. 1—COMPACT CONSTRUCTION PLANT LAYOUT FOR OPEN CAISSON SINKING JOB

plant for the Borough of Queens, New York City. Each of these units consists of a grit chamber and a circular pit in which are to be housed two 26 ft. diameter fine screens and the pumping plant. Following the completion of the three screening and pumping units, an activated sludge plant will be constructed further to treat the sewage.

At the site, the ground is about a foot below mean high water in the adjacent Jamaica Bay. The sand is continuously saturated. The construction plan determined on, therefore, was: (1) For the shallow grit tank foundations, to keep down the water level by well points and pumping and to concrete in the dry, and (2) for the deep circular screen pit to sink a circular caisson by open dredging and seal the bottom under water. The saturated condition of the site is indicated by the fact that for the grit chamber, a reinforced-concrete structure 96x40 ft. in plan being built in open excavation to El. —23.5, over 200 well points entirely surrounding the structure are connected to a pump discharging 4,500 g.p.m. continuously. Aside from being the direct opposite of the construction procedure used on the caisson the grit chamber work presented little of interest. Indeed the caisson sinking was ordinary except for usual exacting care always necessary.

Plant Layout—Success in sinking the caisson was really a task of careful plant layout. First, the possibility of cave-ins around the caisson as it was being dredged out required that all structures be placed outside a possible danger zone. The contractor determined that this zone should be 20 ft. wide entirely around the structure (Fig. 1). Second, it was desirable to have as few structures as possible. Third, since it was

FIG. 2—GENERAL VIEW OF CONSTRUCTION PLANT

necessary to place the 1,600 yd. in the concrete bottom by a continuous pour, the plant had to have a capacity and operating efficiency to take care of this maximum requirement. The estimated time for this operation was 48 hours.

Two stiff-leg derricks with 70 and 90-ft. booms were so located that the dredging buckets could cover the entire structure. Next the sand and stone storage piles and the concreting plant were placed at equal radial distances from the base of the 70-ft. derrick, marked *A* in Fig. 1. At the same time the concreting plant was placed as close as possible to the edge of the danger zone. The radial distance was chosen so that the boom at a fixed inclination would slightly clear the storage bins above the concreting plant. By this arrangement sand or stone can be transferred from the storage piles to the concreting plant bins by merely swinging the derrick thus eliminating slow and costly "booming."

The location of all of these structures having been satisfactorily determined, there remained the 100-ft. concreting tower. It was not possible to place this directly in front of the mixer discharge and keep outside of the danger zone. It was offset as shown in Fig. 1, and although the flat inclination that was thus obtained from the mixer discharge chute to the tower hopper caused some inconvenience, the arrangement as a whole worked satisfactorily. Counterweight chutes reached all of the caisson wall except a small section on the far side. Guying the tower also presented a problem. Wires across the caisson site would interfere with the derrick booms if carried to dead men. A 40-ft. gin pole was finally erected directly across the caisson and one guy wire fastened to it. A second wire was fastened to a leg on the tower foundation structure and the others were carried to dead men.

From a cement shed of 5,000-bag capacity an inclined

cableway track leads to the charging platform of the concreting plant. This track extends out the opposite end of the shed (Fig. 1) so that trucks can unload onto the flat cars which can then be pulled to the unloading point (either the shed or the charging platform) by the cable. The cable is operated by the tower hoist which is located in the adjacent boiler house. This is the only steam hoist on the job, the others being 75 and 40-hp. electric hoists. The concrete mixer is also run by an electric motor. The concreting plant is usual, consisting of storage bins, measuring hoppers and a 1-cu.yd. mixer. The concreting tower hopper also has a capacity of 1 cu.yd.

FIG. 3—SECTION OF CAISSON WALL

Most of the structures, as shown in Fig. 1, were constructed on piles. The piles near the edge of the danger zone were driven to grade and the wisdom of this procedure was demonstrated when two of the expected cave-ins all but left several of the piles hanging in air. The piles were capped about 10 ft. above the original ground as the contract requires a final sand fill to this elevation. An exception was the concreting tower whose pile substructure was capped practically flush with the ground in order to get the required drop from the mixer to the tower hopper.

All materials are brought in by truck, a corduroy road being built up to the sand and stone storage piles. The loads are dumped on the end of the road and transferred to the piles by the bucket of derrick *A*.

Sinking the Caisson—The section of the caisson shown in Fig. 3 indicates the type of cutting edge used. It was tapered down to 6 in. and heavily reinforced as shown but no steel shoe was used. Wooden forms in sections 8 ft. high and 8 ft. long were placed and removed by the derricks. A total of 2,000 cu.yd. of concrete was poured in the walls.

The first step was to pour an 8-ft. lift of concrete that usually took about 6 hours. The weight of the caisson caused some settlement but the greater part of the sinking was accomplished by dredging, which procedure required the remainder of the week with an average daily sinking of about 1 ft. Derricks *A* and *B* worked together on the dredging, depositing the sand just outside of the danger zone. One man with a 2-in. hose washed the material further away from the work. This resulted in a very low material handling cost. It would have been advantageous to leave the sand in the piles for use in the final fill but the excess weight was felt to multiply the dangers of cave-ins. Construction joints, as shown in Fig. 4, consisted of a keyway and two steel dowel plates. Their use has resulted in an exceptionally watertight structure.

No attempt was made to keep the water out during sinking. Much more than the actual volume of material in the caisson was dredged out for as the pressure on the inside of the caisson was reduced by the removal of material, the sand and water from the outside pushed under the toe. These cave-ins were rather frequent and several times encompassed the whole danger zone but no trouble other than the extra dredging resulted.

TYPE OF CONSTRUCTION JOINT USED
Steel is in place for forms to be raised

The bottom, of mass concrete 16 ft. thick in the center and 7 ft. on the sides, was poured through a tremie hung from the drop line of derrick *B*. On this continuous pour the plant functioned even better than expected and the 1,600 cu.yd. of concrete was poured in 35 hours. Final operations consisted in pumping water from the structure and in the construction of the floors and cross walls to carry the screening and pumping equipment.

Personnel—The Jamaica treatment plant has been designed by the Queens Bureau of Sewers, F. Seely, Assistant Engineer. The Awixa Corp., Islip, N. Y., with Claire D. Schlemmer, president and general manager, is handling the part now under construction.

Concrete Encased Steel Beams Investigated

An extensive series of tests is now in progress at Ohio State University on the strengthening effect of concrete encasement of steel beams. In part these tests parallel those carried out at McGill University a year or two ago, where it was shown that concrete of the usual dimensions and arrangement of haunch encasement applied to concrete floorbeams of buildings or bridges for fireproofing or weather protection purposes acts in full co-operation with the steel as reinforced concrete. This effect was also brought out in certain of the stress measurements on stringers of highway bridge floors by Prof. A. H. Fuller at Iowa State College. In the Ohio tests, a number of old I-beams and built plate girders, some of them badly corroded and weakened in service, were encased in concrete by surrounding them with steel mesh and applying gunite. The elastic behavior as well as the failure loading of the beams showed a great strengthening effect of the concrete. New beams gave a similar result. Tests with poured concrete encasement are also in progress.

Progress and Opportunities of Agricultural Engineering

Thirty-Nine American and Two Canadian Universities Now Offer Instruction—Fields of Service, Opportunities and Occupations of Graduates—Economy of Farm Machinery

By Q. C. Ayres

Associate Professor of Agricultural Engineering, Iowa State College, Ames, Iowa

ORTHODOX readers of *Engineering News-Record* are beginning to ask questions about agricultural engineering. They are beginning to wonder why it has weathered the storms of twenty years' existence as a distinct branch of the parent profession. They revile the editor of "Random Lines" for his grant of immunity and yet are mildly curious to know the reason why. What can agricultural engineers do, they ask, that could not be done as well or better by specialists from the civil, mechanical or electrical fields? Why have leading educational institutions all over the country accorded it such whole-hearted recognition and support? Where do professional graduates in this subject continue to find satisfactory employment year after year?

FIG. 1—DISTRIBUTION OF AGRICULTURAL ENGINEERING SUBJECTS AT FOUR AMERICAN UNIVERSITIES

	General Eng'g.	Ag Eng'g.	All Eng'g.	Science	Gen. Ag.	Cultural	Elective	Military
Average	34.1	22.6	56.7	14.7	11.1	9.1	5.3	2.9
Univ. Minn.	25.2	28.6	53.8	15.3	8.6	8.1	11.4	2.8
Iowa State	29.3	26.4	55.9	13.6	19.0	6.3	2.7	2.7
Univ. Neb.	40.0	22.3	62.3	12.8	5.6	8.8	7.2	3.3
Ia. State Ag.	41.8	13.1	54.9	17.0	13.1	13.1	....	2.8

The purpose of this article is to answer these and similar questions which are believed to be of particular interest at a time when agricultural problems are arousing nation-wide attention. The article is not intended as an appeal for converts. Rather is it a mere recital of facts regarding a movement whose record of accomplishment plainly entitles it to a better understanding among engineers.

Origin—Geographically, the movement has centered in the Middle West. Nebraska led off in 1904 by offering simple work in engineering as service courses for agricultural students. From this modest beginning, educational work has spread rapidly until in 1926 such courses were offered in 39 colleges and universities in the United States and two in Canada. During this period 78,000 agricultural students have received specialized instruction. The 1924-25 enrollment was 5,000.

The first full four-year professional course leading to the degree, Bachelor of Science in Agricultural Engineering, was initiated at Iowa State College in 1909. Nebraska and others quickly followed. Today, nine institutions offer degree courses, and such work is on the point of adoption at six others. Altogether, 276 students have received the bachelor's degree in agricultural engineering, 27 the master's degree, and 16 the professional degree of Agricultural Engineer. These figures take no account of the more than 300 old-line engineers who have specialized in this subject for years and are uniformly enthusiastic.

A typical division of subjects in the professional course at representative institutions is shown in Fig. 1. The aim has been to ground the student in the fundamercial sciences and give him sufficient training in general engineering and agriculture to engender a sympathetic attitude and enable him to combine and apply appropriate principles of both.

Functions of Agricultural Engineers—In order to explain the field and functions of agricultural engineers, the following definitions are necessary: Agriculture is the industry engaged in the production of raw material for food, shelter and clothing to fill the needs of the human race. Engineering is the art and science of organizing and directing men, and controlling forces and materials of nature for the benefit of the human race. Agricultural Engineering is the art and science of engineering identified with, and applied to, the industry of agriculture.

FIG. 2—ORGANIZATION CHART, DIVISION OF AGRICULTURAL ENGINEERING, U. S. BUREAU OF ROADS

FIG. 3—EFFECT OF MACHINERY ON PRODUCTION PER FARM WORKER, U. S. CENSUS OF 1920

Agricultural engineering, being functional in character and organization, is comparable to mining engineering in its relationship to the older branches of the profession. Just as the mining engineer needs to be both engineer and metallurgist, so the agricultural engineer is both engineer and agriculturist. One is no more a hybrid than the other. In general the purpose of agricultural engineers is to serve the farmer by increasing the productive capacity of the individual farm worker and to assist in applying the income from the surplus produced for those things which contribute to his general well being.

Old-line engineers will not render such service because the field is financially unattractive and they have little time and sympathy to devote to this work even if it should become so. This does not mean that agricultural engineers are poorly paid. On the contrary, their income ranks well above the average for the profession, mainly because they work indirectly through industrial organizations and state and federal institutions, and because competition is not severe. As an example of how some of them function, the organization chart of the Division of Agricultural Engineering, Bureau of Public Roads, United States Department of Agriculture, is shown in Fig. 2.

Fields of Service—The six principal divisions of the agricultural engineering field are: (1) Farm machinery—mechanical equipment used in agriculture; (2) power used in the conduct of agricultural operations; (3) farm structures—rural architecture and the grouping and design of farm buildings; (4) farm and home utilities—water supply, sewage disposal, heating, lighting, ventilation and home equipment; (5) land reclamation—drainage, irrigation and land clearing; (6) power farming—where the use of power and mechanical equipment on a large scale is of major significance.

The introduction and development of farm machinery has been the most important factor in the development of American agriculture. The use of labor-saving machinery increases the productive capacity of the farm worker and makes possible a higher standard of living. The productive capacity of the farm worker has been increased three-fold in 75 years. That a direct relation exists between the value of farm machinery in use and value of crops is clearly indicated in Fig. 3. Fig. 4 shows the number of workers in agriculture that have been released for other pursuits by the use of improved machinery since 1850.

Power is applied by means of farm machinery to farm operations to replace or increase the effectiveness of labor. Fig. 5 shows that power bears the same relation to production per farm worker as does farm machinery. If animal power is included, the total primary power used in agriculture is 40,000,000 hp. which exceeds by 10,000,000 hp. the power used in all manufacturing industries of the United States.

Under normal conditions about 40 per cent of the building construction of the United States is upon the farm. The value of farm buildings comprises 14.7 per cent of the fixed capital of the farms of the United States, which was $77,925,989,073 as reported in the census of 1920. The distribution of this wealth is indicated in Fig. 6. Furthermore the health of livestock and the quality of dairy products is dependent in large degree upon housing conditions and sanitation of barns. Not only that, but the health and comfort of rural life in general depends to a great extent on sanitary, labor-saving and comfort-giving conveniences in farm homes.

Land Reclamation—Any further increase in the productive farm land area of the United States, when

FIG. 4—AGRICULTURAL WORKERS RELEASED BY FARM MACHINERY SINCE 1850

FIG. 5—RELATION BETWEEN HORSEPOWER AND VALUE OF CROPS PER AGRICULTURAL WORKER

needed, must come almost entirely through reclamation of now worthless land by clearing, drainage or irrigation. The potential increase in farm land average by the reclamation of large tracts totals 170,000,000 acres, divided as follows: Cut-over land reclaimable by

FIG. 6—DISTRIBUTION OF FIXED CAPITAL OF FARMS, U. S. CENSUS OF 1920

clearing alone, 50,000,000, and by both clearing and drainage, 60,000,000; reclaimable by drainage and by irrigation, 30,000,000 each. This represents a possible increase of 32 per cent in our present farm land area by the application of engineering methods.

According to the census of 1920, 53,024,975 acres of improved farm land were actually benefited or made of more value for agricultural purposes by direct drainage and 65,495,038 acres were provided with outlet facilities by organized drainage enterprises. In 1920, 33,598,699 acres of arid land were included in irrigation enterprises of which 18,218,549 acres were actually supplied with water in 1919. In addition, 39,110,357 acres of farm land were reported as needing drainage in the same census. Much of this occurs as small wet spots in cultivated fields, the elimination of which by drainage would lower the cost of production, make fields uniform and increases the acre-yield. As one line of tile is usually sufficient, no other kind of reclamation offers such large returns on the money invested. During the period from 1910 to 1920, it is estimated that 5,000,000 acres of land have been reclaimed by clearing off second-growth trees and stumps. The land reclamation situation is shown graphically in Fig. 7.

Opportunities for Graduates—Of these several fields, each has drawn its quota from graduates in agricultural engineering. A survey recently concluded by the writer disclosed the facts shown in the accompanying table. A comparatively large percentage of graduates who have gone into education is worthy of note since it emphasizes a wholesome trend in the early years of development and expansion of any profession. It should also be noted that only about 16 per cent are now engaged in some line of work not directly associated with agricultural engineering, which is approximately the normal defection as ascertained by the Society for the Promotion of Engineering Education. A majority of these are working in related lines such as municipal, sanitary and highway engineering. The tabulated data do not show the effects of a definite agreement recently consummated between the colleges and implement manufacturers, whereby the latter agree to absorb a certain number of graduates each year into their organizations.

FIG. 7 — POTENTIAL INCREASE BY ENGINEERING METHODS OF FARM LAND AREA OF THE UNITED STATES

Another significant activity that augurs well for the future is the co-operative project launched about two years ago by the National Electric Light Association, The American Society of Agricultural Engineers, and various power companies and individual farmers in many states. Briefly, the purpose of this investigation is to discover ways and means of increasing the electric power consumption of individual farms to the point where it will become profitable for central stations to supply them with high-line current. In a study of this kind, the trained agricultural engineer is obviously indispensable.

The consulting field in agricultural engineering is as yet scarcely touched. There are a few engineers, however, who have enjoyed a lucrative practice in this field for some years. Their clients usually are wealthy owners of rural estates and holding companies engaging in agricultural operations on a large scale. On the whole, there is ample reason to believe that agricultural engineers will continue to perform ever more valuable service and that they will continue to grow in the respect of their colleagues and of the public.

Skew Arches Investigated by Means of Hard-Rubber Models

EXPERIMENTAL study of skew arches is in progress in the laboratory of Prof. George E. Beggs at Princeton University, Princeton, N. J., for the committee on concrete and reinforced concrete arches of the American Society of Civil Engineers. An interesting test arrangement and method is used. The test arches are made of hard vulcanized rubber, and their strain relations are being studied by an effectively planned application of the principle of virtual displacement. In its general nature, the experimental arrangement is a close analogue to Professor Beggs' "Deformeter," used for investigating continuous structures by means of plane models. The skew arches under test have a span of about 20 in. and a rise of 8 in., and in dimensioning are precisely similar to the skew arches tested by the Bureau of Public Roads at Washington on 7-ft. spans; skews of 30 deg., 45 deg. and 60 deg. are represented.

The test arch is set upon two bed plates or abutment plates mounted on a very heavy and rigid structural steel supporting frame. The one abutment plate is fixed to this frame, while the other is supported by six adjustable rods (arranged to apply the six reaction components required for equilibrium), each of which has two short, flexible sections of $\frac{1}{16}$-in. diameter to enable it to act as a frictionless rocker support. In each of these rockers is a turnbuckle adjustment, so that by suitable manipulation of these turnbuckles it is possible to shift the abutment sideways, toward or away from the other abutment, or vertically up or down, or to rotate it in one of the three moment planes. The motion of the abutment with reference to the fixed abutment is measured by dial gages, giving readings to 0.001 in. Seated vertically on the top surface of the arch at 55 co-ordinate points are light vertical rods bearing against similar dial gages at their upper ends and footing on the arch by means of steel pins (phonograph needles) set in shallow pits in the outer surface of the arch.

To investigate the strain relations of the arch, these extrados dials are first set to zero reading; then a determinate movement of a few hundredths of an inch is given to the movable abutment, or a corresponding rotation; then the extrados dials are again read. Their readings represent the vertical displacement of the arch caused by the applied movement of the abutment, or, in other words, the effective leverage of the arch structure between the abutment and the particular point at which the reading is taken. The same ratios, then (by virtue of the well-known reciprocal theorem), represent the force ratio between a vertical load applied to the arch at the point considered and the abutment reaction in the direction of the movement applied in the experiment. Thus, in a few "runs" it is possible to obtain complete sets of influence values for the arch reactions. Completion and discussion of the results will probably take several months, and in the meantime an analytical study is being carried out for comparison with the experimental results, with a view to determining the applicability and limit of precision of the theory.

New South American Transcontinental Railway

Renewal of work on the new Argentine-Chilean transcontinental line, headed for the Pacific port of Antofagasta, is reported as probable under the new Argentine government, which is favorable to railway development. The construction of the Argentine portion of the line, in which much American machinery and equipment was used, was described in *Engineering News-Record* of Aug. 30, 1923. Soon after that time, political changes and the impossibility of getting the Argentine Congress to take any action or to vote funds, caused first a reduction and eventually almost complete stoppage of work. For some time the rail-head has remained at Puerta de Tastil and the only work of importance done since then has been the completion of all tunnel work as far as the Abra de Chorrillos. Grading is ready for some 80 miles ahead of the present rail-head and there has been finished a little more than 70 per cent of the work, as regards cost. The amount of heavy grading, tunnel and viaduct work to be completed is small, although the heaviest bridge on the line is yet to be constructed. this is the Munal viaduct, 787 ft. long and 246 ft. high. The Chilean government has approved the Barros-Jarpa Noel treaty which assures the initiation of the work on their section as soon as this treaty is ratified by the Argentine government.

Concrete Bridge Designed for Elastic Movement

Swedish Railroad Bridge in Cold Climate Uses Steel Hinges, Different Concrete Mixes, Large Expansion Joints, and Expansion Slide Plates Under the Floor

By Charles R. King
Member, Institution of Civil Engineers, London, England

THE PECULIARITY of the reinforced-concrete railway bridge of the Swedish State Railways which crosses the River Ore about 85 miles northwest of Stockholm near the town of Krylbo, consists in the mechanical jointing together of eight separate monolithic sections, Fig. 1, each subdivision being further designed to permit in itself elastic movements under temperature variations and loads. All the transverse gaps in the structure for permitting elastic movement in vertical and horizontal directions were made watertight by a system of layers of lap-jointing, which is in turn covered with pliable materials, the whole resembling fish scales. Besides the mechanical jointing in the sections composing the bridge, the concrete itself is constituted of a mosaic of different strengths, in order to resist or to yield, according to the local needs. The various proportions, the locations of which are indicated on Fig. 3, were determined by an elaborate series of tests made in connection with the design.

Durability under severe conditions of climate and rolling loads is the main purpose of such refinement in construction. The bridge is located at 60 deg. north latitude, and subject, therefore, to a very wide range of temperatures. The main arch span is about 295 ft., and the whole bridge is built on a grade of 1.1 per cent. A

FIG. 1—SKETCH SHOWING INDEPENDENT SECTIONS OF BRIDGE

large amount of centering was necessary as shown in Fig. 2, this falsework, in fact, costing nearly three times as much as the arch itself.

The bridge was designed by Prof. Otto Linton, of the University of Stockholm under the general conditions drawn up by the director of roads and waterways, Rolf Moberg. The construction work was carried out by the engineering firm of Kreuger & Linton.

Foundations and Piers—The two piers on the east bank of the river are supported on a concrete pile foundation. Wooden piles were used under the river abutments supporting the falsework.

The concrete cap on top of the piles for the east bank river pier No. 4 measures about 60x55 ft. and stands with a slope of 1:6.8 from the horizontal line as planned with regard to the thrust from the main arch ring. The reinforcement in this cap consists of a crossed steel-rail mat on the bottom and 1-in. round bars set at an angle of 45 deg. in both the longitudinal and transverse directions in the main body of the cap. This detail, as well as others hereinafter referred to, is shown in Fig. 3.

The east bank piers are made hollow, are heavily reinforced, and are braced at various heights by transverse beams of reinforced concrete with their ends carried in wall mortises. The approach bridge walls on the east bank are also braced by three full height transversing walls.

FIG. 2—MAIN ARCH CENTERING UNDER FULL LOAD OF CONCRETED ARCH
The falsework cost nearly 3 times as much as the arch itself.

The west bank piers are carried on natural foundations. In the top of each of these piers is placed a 20-in. expansion gap 24 ft. deep, shown in Fig. 3.

Steel Hinges—The two largest arches in the structure are supported by six transverse rows of steel hinges. There are five hinges in each abutment course, each set held together by a steel pin, 3½ in. in diameter with a total bearing length of about 23 ft. 3 in. The halves of each hinge are similar, and are held together by their own weight, with a slight space between their knuckles to permit a small radius of rotation about the pin. This space is filled with natural tar for waterproofing.

The steel hinges are connected to the ordinary steel reinforcement by means of spiral reinforcement having coned diameters. There are nine spiral reinforcements to every five hinges in each main arch abutment; each crown hinge has eight spirals as shown in the detail in Fig. 3 and also in Fig. 4. The smaller arch, about 106 ft. in span, is similarly hinged but with smaller fittings.

To make the line of hinges on the main arch abutment waterproof, particularly from snow and rain draining down the arch extrados, the foot of the arch ring terminates with a concrete spur which projects into a niche in the pier wall. This leaves a joint which is filled with a plastic waterproof material.

Floor Slides—The bridge floor is rigidly attached only at the crown of the main arch, so that its two ends are free to move longitudinally on the main pier abutments under the guidance of steel expansion slides shown in detail in Fig. 3. The floor consists of four stringer beams and a trough of concrete filled with ballast to carry the railroad track. Under each beam is the ex-

FIG. 3—DETAILS OF ELASTIC REINFORCED-CONCRETE RAILROAD BRIDGE NEAR KRYLBO, SWEDEN

pansion slide consisting of a fixed plate that slides on a railhead 19½ in. long aligned crosswise to the direction of the floorbeam. The upper surface of this railhead is rounded so that the plate above it rests on less than 2 in. of surface. The bridge floor is thus free to deflect vertically from that point in accordance with the floor swing through a radius of 95 ft. 7 in. as struck from the center of the main arch abutment hinge. Beyond the limits of all possible longitudinal movements, there are stops on the upper bracket. Also, all lateral mavement is made impossible by cutting a slot through the middle of each supporting rail, into which engages a tongue cast in the center of the upper bracket.

The spandrel walls were also designed to permit free expansion movement of the floor. This object was attained by inserting break joints consisting of three different sized layers of waterproofing cutting into the walls by one-third of the thickness from each side as shown in detail in Fig. 3. In this detail, it is also noted that the reinforcement is crossed diagonally in an X-form.

This arrangement of steel is designed to permit a semi-pivotal movement in the surrounding concrete. The shortest spandrel wall nearest the arch center is provided at top and bottom with two breaks in continuity, but the other two deeper walls have such joints

FIG. 4—SPIRAL REINFORCEMENT AT BACK OF STEEL HINGES IN THE ARCH CROWN

only below the floor level, because the relative thinness of these latter walls, considered with regard to their height, was estimated to contribute to the necessary swinging movement.

Drainage and Waterproofing—Much care was exercised in the design of drainage and waterproofing details in the structure because of the several large openings used in its design.

Transversely, the bridge floor is of trough section draining towards the middle and longitudinally is divided into a series of cants. The ridge on these cants corresponds with the break in the concrete for permitting temperature movements. This is shown in detail in the upper part of Fig. 5. Here the mass concrete was first covered with a layer of asphalt, and then a layer or cap of 1:3 concrete was run on a wire mesh. The break, or vertical gap, through the three layers is then covered, first with a sheet of tarred felt, then with sheet lead and finally is covered by a sheet of tarred felt.

The floor drains in the valleys have domed caps the flanges of which are seated in tar on layers of tarred felting that extend upward under the sheet of pliable tar which latter is covered by the cap of 1:3 concrete.

FIG. 5—WATERPROOFING AND DRAINAGE DETAILS

See lower part Fig. 5. The drain head sockets into a cast-iron drain pipe bedded in the mass concrete of the floor, but it is cased externally with zinc sheeting to waterproof the concrete. The outlet pipe drains into a pressed metal gutter, shown longitudinally in Fig. 3. The arch ring abutments are drained from their sides, as the hinges placed there require special precautions. The smaller hinged arch is drained direct from the floor above, which in this case forms part of the arch. The hollow piers, 4 and 5, have drain courses at their deepest levels in case sleet or snow enter by the ventilation holes and tend to cause corrosion.

The arches on the west bank form part of the floor and are drained direct through from the ballast. The deep expansion gaps, which run down to the level of the springing of each western arch, are provided with drain courses and outfall pipes at their deepest level. The floor surface above these gaps is filled with natural tar for waterproofing.

Ohio River Regulation at Evansville

The Chief of Engineers has recommended a modification of the existing project for the improvement of the Ohio River, to protect a bend known as the Kentucky Peninsula and hold the channel of the river as it passes Evansville, Ind. This work involves the reforestation of the sloughs on the Kentucky Peninsula and on the bank as well as the bank protection, at an estimated cost of $200,000, provided local interests furnish without cost to the United States all land necessary for the purpose. The District Engineer fears that unless such work is done, the Ohio River in flood stage may cut its channels through the Kentucky Peninsula some six miles distant. This change in the channel would not only cut off Evansville but would probably materially change the sediment of the stream below. The recommendation by the Chief of Engineers has been approved by the Secretary of War.

Crossing Elimination and Road Relocation in California

Examples Selected from Recent Operations Indicate Methods Followed and Costs Involved

Removal of grade crossings and line improvement to avoid crossings has in California in common with other large road building states involved in recent years a number of major highway construction operations. From information got from the state highway commission a number of these operations are outlined here. They are of enough variety to indicate practices, though no attempt is made completely to catalog the work done or contemplated. Examples of elimination both by separating grades and by relocating to avoid crossings are included. In several instances some account of the economics and cost of the improvement has been possible.—EDITOR.

SINCE 1924 there have been completed or put under construction on California state highways 14 grade crossing eliminations costing about three-quarters of a million dollars. There are now planned for early elimination six major crossings. These are but a fraction of all crossings. In 1922 the state highway commission in conjunction with the Bureau of Public Roads and the State Railroad Commission made a study of grade crossings on state highways. A total of 573 crossings were investigated, 446 of which were outside the corporate limits of cities and the remaining 127 within the limits of cities but on state highway routes. A classification of these crossings was made as follows:

FIG. 1—RELOCATION ELIMINATES TWO GRADE CROSSINGS

FIG. 2—RELOCATION CUTS OUT SIXTEEN CURVES

Class I—Crossings possible of elimination by relocation. (This number is indefinite.)

Class II—Crossings of a primary highway and trunk line railway of two or more tracks, 24.

Class III—(a) Crossings of a single-track line and a primary or trunk highway or of any trunk line and secondary highway, 71; (b) crossings of a single-track line carrying a moderate traffic (not a transcontinental road) and a primary trunk or secondary lateral. Includes important suburban electric railroads, 58.

Class IV—(a) Crossings of unimportant single track steam or electric lines on which service is limited and primary trunk or secondary lateral highways, 124; (b) crossings of spur and switch lines with all highways, 114.

This classification it will be observed gives primary place to crossing elimination by highway relocation. One of the examples of relocation given indicates the possibilities where the occasion presents itself. However, relocation is a broader problem, usually, in which crossing elimination is one factor. The examples here given are presented in this broader aspect. The common crossing elimination involves grade separation and not relocation to avoid crossings.

Grade Separations—Of the 14 crossing eliminations previously mentioned two only were line relocations; three were overhead bridges and nine were subways. Fig. 3 illustrates and describes several of these crossings. The most expensive was that at Montebello in Los Angeles County, costing $200,000. Of seven proposed eliminations that are planned for the near future, one is an overhead crossing and six are subways. Of the latter, the most notable is the South San Francisco underpass, estimated to cost $250,000, described in *Engineering News-Record*, Nov. 12, 1925, p. 815. In respect to grade separation, the cost is usually borne jointly by the railroad company and the state, but counties and other political subdivisions often are willing to participate. Division of cost among the various participating bodies is affected by features pertinent to particular crossings and frequently is agreed to in advance, but in some instances it is necessary to have the State Railroad Commission determine the matter. In all instances official authorization for the project must come from the railroad commission.

The design of structures for grade separations is a duty of the bridge department of the highway commission. The plans, of course, have to meet with the approval of railroad engineers and the railroad commission. Generally the work is done by the state, but sometimes the railroad company desires to construct a portion of a subway or superstructure. Construction by railroad forces does not mean that the work is being done solely at the expense of the railroad. It means, merely, that a co-operative agreement has been reached

FIG. 3—TYPES OF GRADE SEPARATIONS ON CALIFORNIA STATE HIGHWAYS

1. Pisno, San Luis Obispo County—Overhead structure of reinforced concrete girder type over tracks of Southern Pacific; J. L. Webster, contractor; estimated cost $60,000. Part of important realignment project.
2. North Sacramento, Sacramento County—Subways under the tracks of the Western Pacific and Sacramento Northern railways made possible the removal of a dilapidated wooden trestle which crossed the railroad lines at grade. Lord Bishop, contractors; cost $59,000; completed in January, 1926.
3. Montebello, Los Angeles County—Largest subway on state highway system, located south of Montebello on Los Angeles-Whittier highway, one of the heaviest traveled state highways. Original narrow highway, crossing tracks of Los Angeles and Salt Lake Ry. (Union Pacific System) at grade, has been widened to 56 ft. and a modern structure built to eliminate the grade crossing. The subway has two one-way openings, each with 28-ft. clear width, dividing traffic into three lines each way. Subway was built by the railroad company, the highway commission co-operating at a cost of $200,000. Completed March, 1926.
4. Polaris, Nevada County—Crossing of two main line tracks of the Southern Pacific Co. and Truckee River was affected with one structure, an arch spanning the river, the tracks passing under the girder approach span. Proctor & Cleghorn, contractors, cost $53,000; completed October, 1925.
5. Hinton, Nevada County—Overhead structure in the Truckee River highway, crossing the tracks of Southern Pacific. T. H. and M. C. Polk, contractors; estimated cost $30,000.

for the work to be done by construction forces of the lines. The railroad commission as a general rule assesses at least 50 per cent of the cost of all grade separations to the public.

Road Relocation—As an example of highway relocation primarily to eliminate grade crossings, the new line of the National Old Trails route through Barstow as shown by Fig. 1 is notable. The old county road, shown in the illustration, followed a tortuous course through the town, crossing the main line of the Santa Fé railroad twice and passing through its freight yards. It had many right-angle turns and the view at two of the crossings was obstructed. Accidents were frequent. The grading of less than three miles of the state highway shortened the distance 1½ miles and eliminated the three railroad crossings.

For gains purely by curve elimination the relocation shown by Fig. 2 is selected. Here a relocation only two-thirds of a mile long cut out 16 curves. The new location required the construction of two bridges but in building these it was possible to provide for future traffic requirements to such advantage that this part of the cost cannot be charged wholly against the relocation. The old location involved three curves on which accidents were frequent and ofttimes fatal. Two of these curves were at the foot of 6 per cent grades and on the edge of streams as shown in the illustration. Although bad accidents have occurred at all of these curves there were so many more fatal accidents at the very sharp curves at the extreme left that this came to be known as "Death Curve."

Relocation from the point of view of traffic economies is represented by the new line of the Pacific Highway through Sacramento Canyon. An account of this project as given by H. S. Comly, division engineer, Redding, Calif., is as follows:

The original construction of the Pacific Highway between Redding and Dunsmuir in Shasta County was in 1915. In accordance with the situation then existing, engineers of the department were instructed, if possible, to build a road through the Sacramento Canyon at an expenditure of $4,000 per mile. It became apparent as soon as surveys were under way that this could not be done, and, after the work was completed to the lowest standard which would come within the meaning of the word "highway," a 17-ft. graded road had cost an average of $10,000 per mile. The grading was done between the years 1914 and 1917, and represents the 1915 standard of California mountain road construction.

In 1923, when the commission decided to complete the main trunk lines and interstate connections, it became apparent at once, because of the fact that the traffic had increased so rapidly during the previous eight years, that the Sacramento Canyon section of the Pacific Highway had been built on too low a standard. Placing of pavement on the crooked, narrow grade could not be considered. Decision was made for a bold relocation on standards which would fufill the demands of present and future traffic.

Surveys for reconstruction of the sixty-five miles of highway grade between Redding and Dunsmuir were started late in 1923. Construction work began in January, 1924. In 1925, 34 miles of old line had been reconstructed. On this portion, the distance has been shortened three miles, the new highway measuring only 31 miles. A location survey for the remainder of the canyon section is finished and shows a total saving of 6.5 miles. When the reconstruction is completed, the distance from Redding to Dunsmuir will be reduced from 65 to 58.5 miles, or 10 per cent.

Assuming the average cost of operating a motor vehicle to be 7½c. per mile, the shortening of distance will save every vehicle traversing this section of highway about 50c. per trip. Traffic now averages, throughout the year, about 1,000 vehicles a day and the saving is $500 a day or about $183,000 a year. Capitalized at 5 per cent, the saving in distance alone would warrant the expenditure of $3,660,000. The cost of construction, including bridging, will be about $2,750,000. Therefore the reconstruction more than pays for itself by the factor of distance saving alone, based on present traffic. The distance to be paved will be about 56 miles, and this will cost approximately $2,000,000. The shortening of distance will not only pay for the reconstruction but also a large part of the paving bill.

Estimated Cost (Ultimate)	Revision of Old Highway Dotted Lines	Relocation of Highway
Grading	102,000	93,500
Culverts	12,500	10,000
Stage Gravel	10,900	8,700
Conc. Pav't.	46,800	37,500
Salt Cr. Bridge		18,000
Totals	$172,200	$167,700
Length	8,220 ft.	6,591 ft.
Max. Grade	6.5%	6.5%
Deg. of Curvature	120.5°	58.0°
Min. Radius of Curvature	200 ft.	300 ft.
Rise & Fall	543 ft.	421 ft.

FIG. 4—RELOCATION REDUCES DISTANCE AND CURVATURE OVER 30 PER CENT

These figures are rather startling in view of the fact that they are based only on present day traffic. It may be conservatively estimated that traffic will more than double during the next five years, by which time it is hoped the paving will be completed.

Saving of distance is by no means the only important feature of this work. If it were possible to capitalize the improvement in width, alignment and grade, the figures would be even more surprising. The width of the completed roadway, including drainage ditches, will be 27 ft. on sidehill construction and 30 ft. where the construction is not so heavy, as compared with 17 ft. on the old grade.

The minimum radius of curvature will be 300 ft., as against 50 ft. on the original highway. The number

of curves will be reduced more than one-half. While the maximum grade will still be 6½ per cent, several miles of maximum grade will be entirely eliminated, and many more will be reduced to 4 per cent or less. The total ascent and descent will be greatly reduced by this means.

What advantage this means in increased speed, coupled with increased comfort and safety of traffic, in accidents prevented and lives saved, can not be estimated in dollars and cents; the advantage can not be denied, however.

In planning the reconstruction through the Sacramento Canyon, exhaustive investigations were made to insure attainment of the most satisfactory results. Various possible solutions of each problem were considered, preliminary lines run, projections made and comparisons of cost studied. These investigations and the final location, including plans, cost, on the average, $1,250 per mile, or 2½ per cent of the cost of the work. While it is not possible to arrive at an exact saving by reason of the excess preliminary cost, it is probable an expenditure of $500 per mile, over the minimum cost of surveys and plans, is saving not less than $2,500 per mile in construction. Besides this actual saving the most perfect final location consistent with the standards adopted has been arrived at and there is assurance that the alignment and grades are the best that can be worked out.

While a considerable part of the improvement is brought about by widening the existing roadbed and flattening or eliminating curves, there are many instances where a complete abandonment of the old highway has proved advisable and economical. A typical instance of this is illustrated by the accompanying sketch, Fig. 4, of the relocation over the Salt Creek divide, now under construction. As indicated in the tabulation accompanying the map, the ultimate cost of the improvement by complete relocation is less than by a simple line revision and widening of the existing highway, as indicated by the dashed lines. This is true despite the fact that a concrete bridge across Salt Creek has to be demolished and a larger one on a higher grade line built in its place. The relocation necessitated an 81-ft. cut at the summit, containing about 80,000 cu.yd. of excavation.

It also will be noted the use of curves of 300-ft. radius was not possible along the old highway, and that the line revision included two bad loops made up of curves of 200-ft. radius. The relocation has only two curves of less than 500-ft. radius, one of 300-ft. radius and another of 325 ft. The total curvature is reduced from 1,205 deg. by line revision, to 580 deg. by relocation. It will also be noted the relocation is 1,629 ft. shorter than the line revision in a distance of a mile and a half.

Compared to the highway of 1915, the relocation saves 0.6 mile in a distance of 1.9 miles, and reduces the number of curves from forty to fourteen. The improvement in width is denoted on the sketch which shows the relative width by exact scale. The rise and fall is reduced by 130 ft., and the length of maximum grade by about one-half mile.

Direction—The work described has been performed under the direction of the California Highway Commission, R. M. Morton, state highway engineer.

A.A.E. Convention Reveals Sound Internal Condition

Membership and Finances Again in Satisfactory Shape—Association Will Publish a Professional Manual

SATISFACTORY internal and administrative conditions were brought to light at the twelfth national convention of the American Association of Engineers, held last week at Philadelphia. Disagreement over internal policies has marked the conventions for several years past, but on this occasion it was quite absent, and at the same time the reports of the officials showed a stable condition of membership and finances—equally in contrast with conditions that had prevailed for several years.

Steps were taken to develop the work of the association in several important respects. A plan was adopted for publishing a professional manual of engineering. Special publications are also to be put out covering the rules of practice and decisions in practice cases worked out by the association. A service pledge was adopted. Life membership was instituted by the directors, and it was decided to create a permanent fund, to be built up by setting aside monthly 5 per cent of the association's income. The intention was expressed to develop further the association's employment service, though for the present no new offices (the two now existing are in New York and Chicago) will be created.

At present the total membership of the association is about 6,900, composed of 5,300 adult members and 1,600 student members. This figure represents an increase of about 1,200 over the minimum, reached six months ago. As membership records now are kept on a paid-up basis, the present total is believed to be free from inflation by overdue expirations. Equal improvement is shown in the finances. Careful management of the association's money affairs resulted in a gain of surplus of $7,500, as against a loss of $6,200 in the previous year, in the face of a reduced income.

Publication of *The Professional Engineer* practically covered its cost (with a fixed allotment from dues to cover subscription charge). The same is true of the employment service, which placed about 500 men in the 12 months.

Committee Reports—Arthur C. Richards presented, for the committee on services and salaries of engineers in public service, an encyclopedic review of cost of living, income and classification of services of engineering officials of cities, counties, states and the government. The report was presented only in brief abstract. A coordinate report was rendered on the subject of services and fees for practicing engineers by Paul Hansen. This presented a curve of proposed percentage fees recommended as minima, for work costing less than $1,000,000; it ranges from a maximum of 6 per cent for a $10,000 undertaking to 3½ per cent for $1,000,000, when design specifications and construction supervision are included; and from 4 per cent down to ¾ per cent for preliminary investigations and reports.

Reporting for the committee on permissible free public service, Victor H. Cochrane recommended that the association or its chapters should not undertake public service when the required work consists of development

of details and does not involve skilled professional opinion; when the required time and labor are such as to constitute a hardship upon those who would undertake the work; and when there are no individuals in the group having the specialized knowledge and skill for carrying out the service effectively.

The problem of engineering competitions was brought to the front by the report of the practice committee, which during the year considered one case of this kind. It suggested that the association draft a code to govern the conduct of engineering design competitions similar to the corresponding architectural codes.

Registration of engineers was less actively dealt with during the past year than previously. The committee on registration reported various local criticisms of registration laws. The report and the discussion bore particularly on the Pennsylvania law, which it was charged is badly administered; it is now before the court for a determination of its constitutionality, with a lower court decision against it.

Considerable active discussion on various questions concerning registration developed after reading of the report. O. Laurgaard, city engineer of Portland and chairman of the Oregon Board of Engineering Examiners, described the successive improvements of the Oregon registration law by amendment, and said that the state is now in a position to investigate violations and to use registration funds for prosecution of violators. He suggested making registration a condition of membership in engineering societies or in the association chapters, as has already been done in the charter of the new Portland Chapter of the association. The formation of societies of professional engineers is an undesirable development, he declared. Arthur C. Richards, of Altoona, referred to the fact that 25,000 engineers are now registered in the 27 states having registration laws, against a total membership in the four principal technical societies and the association of about 40,000, and a census enumeration of about 90,000 engineers. This slowness of development of the registration movement, and conditions arising from the grandfather clause, which were criticised by some members, are outweighed by the fact, Mr. Laurgaard stated, that through registration laws we are building the engineering profession of the future. Later the convention passed a resolution in favor of energetic continuance of the campaign for registration laws and their improvement.

A plan developed during the past year for the preparation of a professional manual of engineering was endorsed and adopted by the Board of Directors and by the convention. This manual is intended to assist business men, public officials, and the general public to a better understanding of the professional phase of engineering work and the reasons for professional standards, codes of ethics, practice rules, and fixed fees.

Organizational Affairs—It was decided to award a gold medal annually for the most significant achievement in welfare work during the year. The committee on award is to consist of two members of the association and three prominent engineers selected without regard to association membership.

The following service pledge was selected by the Board of Directors from among a number prepared by various members during the past year, the adopted draft being that of retiring president D. B. Steinman:

We dedicate ourselves to the service of mankind as members of the engineering profession.

We consecrate our professional knowledge and skill to the advancement of human welfare, safety, and progress.

As we benefit by the technical knowledge and public esteem won for the profession by the engineers who labored in the past, we shall ever strive to augment that heritage before passing it on to the engineers who are to follow.

We therefore affirm our guiding purpose:

So to live and work as to justify the trust and confidence reposed in the engineering profession.

To carry out professional engagements with generous measure of performance, and with fidelity toward those whom we understand to serve.

To foster a spirit of courteous consideration and fraternal co-operation within the profession.

To extend encouragement and a helping hand to younger engineers and to those in need.

To place service before profit, the honor and standing of the profession before personal advantage, and the public welfare above all other considerations.

Two minor changes in administrative system were instituted. The convention decided to elect each year a nominating committee, instead of leaving nominations for officers to the membership and to the directors. It adopted a slightly modified form of offering and voting amendments to constitution and by-laws.

Election of officers for the coming year resulted in the choice of C. J. Ullrich, of the engineering firm of McGonagle & Ullrich, Salt Lake City, as president, over George E. Taylor of West Virginia. W. R. Harris, of Cleveland, won in the contest for first vice-president, and Donald M. Baker, of Los Angeles, for second vice-president. The newly elected directors are: J. M. Buswell, C. W. Cross, V. H. Cochrane, C. S. McKee, H. G. Culverhouse, E. G. Haines, and J. Denison. The convention voted in favor of Tulsa, Okla., as the seat of the 1927 convention.

Addresses—Of a number of addresses of general interest that were a feature of the convention, the following may be noted. Mrs. L. M. Gilbreth, of Montclair, N. J., dealt with the subject of motion study as related to fatigue and other factors of efficiency. C. E. Chase, of Philadelphia, briefly outlined the principal elements of the new Delaware River bridge. Prof. D. S. Robbins, of Las Cruces, N. M., spoke on "New Scientific Knowledge of Interest to Engineers." Dr. Frederick H. Newell, of Washington, reviewed the history and progress of the association, while Morris L. Cooke, of Philadelphia, discussed the subject of "Giant Power." Visits to the Philadelphia subway construction work and other engineering and historical points of interest at Philadelphia, as well as trips to Atlantic City and to New York, including Coney Island, furnished entertainment and diversification.

President's Address—Dr. D. B. Steinman, retiring president, addressed the association on the subject, "Our Profession." His scholarly discussion of the subject dealt with the obligations to mankind and to the future which form the basis of engineering ideals. Developing this theme further, he indicated how the original purposes and the work of the association have been directed toward advancing these ideals and serving the profession and public.

[*Abstracts from the Address of Dr. Steinman will be published in an early issue.*—EDITOR.]

Hints That Cut Cost and Time For the Contractor and the Engineer

Remove Cast-Iron Column Carrying Ten Stories

REMOVAL of the lower portion of a cast-iron column in an old ten-story building was recently carried out in Philadelphia by simple methods in an interesting way. The building, 1013 Chestnut St., has cast-iron columns supported on grillage beams in concrete foundations below basement level. To construct a new store front in the first story it became necessary to remove one of the columns. The work was accomplished by the use of a system of steel diaphragms and timber shores for the temporary support of the column at second-floor level while the lower portion of the column was removed and new steel girders and columns were installed to span the store-front opening. The work was so planned and executed that the steelwork of the second floor was not disturbed.

Two short 36-in. built girders or diaphragms were attached to the sides of the column at the bottom of the second-floor beams by 55 1-in. tap bolts in each side. These diaphragms projected forward and back of the column, and served as brackets against which the upper ends of inclined shores could be butted. The shores were 12 x 12-in. timbers tied together with two 12-in. channels. The inclined brace on the street side rested upon the foundation wall of the building, while the other one was framed to 12 x 12-in. timber posts resting upon timber sills on the ground. By wedging the channel tie the shores were lifted sufficiently to take the load of the column. After the shoring was in place, half of the cast-iron column was burned off and the inner one of two transverse girders under the diaphragms was erected, together with two columns supporting it upon a reinforced-concrete girder built on the old footing pier. The old column was then burned through and removed and the outside girder with its supporting columns was erected, completing the new steelwork. This steel frame was jacked up by jacking at the base of the columns, to take the load of the column resting on the girders and relieve the timber supports. The 2½-in. slabs under the new columns were grouted with alumina cement, and the jacks were held until the cement had set. Finally the ends of the diaphragms projecting on the street face of the building were burned off and the first-story section of the old column was completely removed.

The new girders are 17 ft. long, with webs 42 x ⅜ in. and flange angles 6 x 4 x ⅜ in. and two cover plates. They are supported at each end upon new 8-in. H-columns resting upon a new reinforced-concrete foundation girder, as shown by the drawing.

HOW AN UNDERPINNING PROBLEM WAS SOLVED IN PHILADELPHIA

CAST-IRON COLUMN SHORED, AND ITS NEW STEEL SUPPORT

The building is owned by Mayer Lichtenstein and Morris Haber. J. E. Feelstein was architect on the work, Fred W. Abbott was engineer and S. Yellin & Son, Philadelphia, were contractors.

Device for Measuring Aggregates at the Concrete Mixer

A DEVICE for measuring three sizes of aggregate by volume simultaneously at the concrete mixer has been developed and used successfully for some time in connection with the lining of tunnels on the reconstruction of the Yosemite Valley R.R. in the Merced River Canyon, Calif., by A. J. Novelli, engineer for the contractor on this work.

ARRANGEMENT OF AGGREGATE MEASURING DEVICE

This device consists of a series of boxes, one for each size of aggregate, placed under the hoppers, these boxes being adjustable for any volume required. The boxes are connected to the piston of a compressed air cylinder and are operated by a lever on a valve, controlled by the mixer-man. They have openings in the top and bottom, the former being open and the latter closed while filling, and vice versa when dumping.

After being filled the boxes are dumped simultaneously directly into the mixer by turning, at the mixer-man's station, a lever which operates the air cylinder. The boxes are returned to the filling position by reversing the lever, the time required for the entire operation being about 6 seconds. The aggregate in the hoppers is regulated by a spring attachment which prevents clogging and enables the boxes to move freely.

The cost of the device is somewhat more than for other types of volume aggremeters which is, however, believed to be more than made up by the saving in labor cost and the securing of accurate measurement.

For the foregoing data *Engineering News-Record* is indebted to Jerome Newman, consulting engineer on the work.

Reduction of Mud Balls in Rapid Sand Filters

By August V. Graf
Chief Chemical Engineer, St. Louis Water-Works

AT THE Chain of Rocks filter plant of the St. Louis water-works, the mud balls forming in the sand bed are disintegrated by jetting the sand from one end of the filter to the opposite end while wash-water is applied to the filter. This is accomplished by means of a hydraulic ejector. The pressure or nozzle end of the ejector is connected to a water plug with a 2½-in. water hose provided with standard pipe fittings. The discharge end of the ejector is fitted with standard pipe and fittings as required. The discharge pipe should be so assembled that it will act as a hanger for the ejector, thus enabling the latter to be held in the floating sand at any desired depth. At this plant the discharge pipe is carried horizontally from the ejector for a few feet, then with a 4-in. elbow and length of pipe the line is carried vertically, terminating in another 4-in. elbow and a long length of horizontal pipe extending toward the opposite end of the filter and resting on the concrete cross-beams. The vertical distance from the lower edge of the last length of the horizontal pipe to the edge of the spout on the ejector should be made such that, when the apparatus is hung on the cross-beams, the edge of the spout will be about 3 or 4 in. below the surface of the stationary sand. At the extreme end of the last length of horizontal pipe, the line is continued vertically downward for a short distance and there the discharge is reduced to 2½ in. with a 4x2½-in. reducer and a short 2½-in. nipple.

Under the discharge is placed a wooden box about 4 ft. high and 15 in. square, open at both ends and provided with three sloping screens, each 15x12 in. in plan. The screens are so arranged that one discharges onto another, while fastened to the top screen there is a small steel plate against which the discharge from the ejector impinges. This steel plate tends to further disintegrate the mud balls.

Underneath this box there should be suspended a ⅛-in. mesh wire basket 2½ ft. square by 6 in. deep, the bottom of which should be a few inches above the overflow edge of the wash-water troughs. This will retain

DETAILS OF HYDRAULIC EJECTOR

any small gravel that may come through the ejector. As fine gravel accumulates on this screen, it should be removed and scattered uniformly over the area of the filter while the wash-water is being applied. Without this screen fine gravel would tend to pile up underneath the box and cause an unevenness in the surface of the gravel bed.

When ready for jetting, the filter is first given a normal wash and then while the wash-water is still being applied, the apparatus is lowered into place. The rate of wash is then cut to about 5 gal. per sq.ft. per minute, which is continued for 15 min. after which the rate of wash is momentarily raised to 10 gal. in order to level the sand bed. At the Chain of Rocks plant this increase and decrease of wash-water is continued every 15 min. for 5 hr., after which the apparatus is moved to the next filter. The amount of wash-water used during the 5-hr. period amounts to about 1,430 gal. per sq.ft. of filter area. The ejector may be moved about by four men.

By thus jetting the sand in the filters once every six months, the mud balls are very considerably reduced and part of the coating of the sand grains due to softening of the water is removed.

How Cutoff Piles Looked Uncovered

IN addition to puddle core-walls, earth dams of moderate height are frequently supplied with sheetpiles to intercept any water that may course through a pervious stratum below the foundation layers. What one section of Wakefield sheetpiling cutoffs looked like was disclosed recently in the Southwest when the embankment was overtopped and the material washed away from 230 ft. of the sheeting, some of it showing 20 ft. of the piles. The piles were made up of 3x12-in. planks and were spliced to make up a 50-ft. length. They were driven through sand to shale, probably with a steam

From Job and Office

Hints that Cut Cost and Time

hammer without jets. That the work was absolutely a waste of time and money so far as preventing the passage of water needs no words to explain the accompanying illustration. "Overdriven, buckled, telescoped, broken, broomed, out of line the cutoff piles would hardly stop a dog, let alone water," said the engineer who handed the *Engineering News-Record* correspondent the picture with the injunction to preserve his incognito. In consequence it will be unavailing to write to the editor for "more details" but the designer

WAKEFIELD SHEETPILES UNCOVERED BY OVERTOPPED RESERVOIR

Splicing was one point of weakness but piles did not follow, were over-driven, broken, broomed and split. Concrete header on top broken up by the weaving of piles.

should think twice and learn local conditions before building up a false sense of security with sheetpiling of this length which may be driven under the same conditions as those in the illustration.

Cylinders for Concrete Samples Made Up on the Job

IN equipping the field laboratory for testing cement on the Balch project now being constructed by the San Joaquin Light & Power Corporation in California, a supply of cylindrical forms was required, in which to

FORMS FOR CONCRETE COMPRESSION SAMPLE

prepare 6 x 12-in. concrete cylinders as samples for compression tests. It was decided to make these cylinders in the machine shop on the job, and this was

From Job and Office

For Contractor and Engineer

done at a cost of $4 per cylinder as compared to a price of about $20 per cylinder that would have been paid for factory-made laboratory equipment.

Standard 6-in. pipe cut to lengths of exactly 12 in. was used for these cylinders. The first operation was to machine a smooth interior finish, after which a ¼-in. slot was cut along one side. Two pairs of lugs were then welded close to this slot and drilled for the ½-in. bolts used to draw the edges of the slot together. Each cylinder was calipered to give the exact cross-sectional area with the slot closed. The spring in the steel pipe, as it automatically opens the slot when the bolts are loosened, nicely separates the form from the concrete sample when the cylinder is removed.

Weighted Canvas Controls Quicksand While Concrete Is Poured

By R. J. Reigeluth

C. W. Blakeslee & Sons, New Haven, Conn.

BUILDING a tunnel on quicksand within 10 ft. of a power house wall may involve unique construction methods, for instance, keeping the trench filled with water while excavating and covering the quicksand with canvas, to form a base for the concrete mat.

In order to double the capacity of the Steel Point Power Plant of the United Illuminating Co., Bridgeport, Conn., a new intake tunnel was required. Property limitations along the harbor made it necessary to run this tunnel just outside of the power house within which large generators and turbines operate in exact alignment. During excavation quicksand was encountered at 18 ft. below high water level. Samples, on test, indicated a state of suspension which is very difficult to control. Working in this material required caution not to undermine the power house foundations.

The tunnel, 339 ft. long, was constructed in three parts. A cofferdam 15 ft. wide was built of 40-ft. steel sheeting driven 15 ft. below grade. The excavation inside the dam was carried down to elevation +5 by means of a clamshell bucket. At that point the bottom began to "boil." The excavated area was immediately flooded by reversing the pumps and a full head of water maintained at all tides to keep the material in equilibrium. Excavation was then continued to —5 by operating the clamshell under water.

When the excavation had attained sufficient depth, a diver leveled the bottom with a water jet. He then placed a 25-oz. duck covering over the entire bottom of one section and put 500-lb. precast concrete blocks on the canvas at regular intervals to hold it in place. A concrete mat 5 ft. thick was then deposited. After a period of twenty-one days the water was pumped out and the bottom was found to hold perfectly.

The canvas insured a full depth of concrete throughout the entire slab. Ordinarily depositing the concrete would have pushed a wave of sand ahead of it and made thin spots in the slab. It also prevented the wet concrete from mixing with the sand when it was deposited which would have decreased the strength. In addition, it provided an almost impervious membrane between the quicksand bottom and the concrete. This protected from blow-outs due to unbalanced pressure.

The contractors were C. W. Blakeslee & Sons of New Haven, Conn., the superintendent in charge being William Powell. Westcott & Mapes, Inc., of New Haven were the designing engineers, while E. J. Beugler of Cheshire, Conn., was consulting engineer.

Advantages Shown for Wire-Willow Mattress Over Basket-Weave Type

By F. Y. Parker

Assistant Engineer, War Department, Engineer Office, Kansas City, Mo.

THE increasing scarcity of weaving brush on the Missouri River between Kansas City and St. Louis has caused several types of experimental mattress to be tested. The type here described was more rapidly constructed and required not only less ballast but approximately one-third less willows than the standard basket weave type. Moreover bar-growth willows one season old were effectively used for weaving. Finally, the cost was about $2 less per 100 sq.ft. than that for the standard mattress.

MATTRESS OF WILLOWS WOVEN ON A NO. 9 WIRE MESH

The foundation or web of this mattress is No. 9 galvanized wire mesh 6 in. square and 54 in. wide. Through alternate top and bottom meshes brush was thrust on the forward weave and duplicated on the reverse weave through the open meshes; stiffening poles and cables were placed as usual. In weaving, the brush tops were downstream and each section of wire mesh was laid over the previous sections until the brush tops and wire sections were clipped together at the edges.

Two recent uses of this type mattress follow. In one instance an ordinary basket weave mattress had been constructed on a sand bar as a foot mattress to a private revetment. Subsequent high water deposited about a foot of silt over the top but a later shift of the channel eroded the bar, undermining the outer third of the mattress causing it to drop, and threatened rapid destruction of the revetment. The method of repair was carefully to wash the top silt from the mattress for 20 to 30 ft. shoreward, to cover the break with wire-willow mattress and then to reballast.

The other case was a foundation mattress for a 1,200-ft. dike. The mattress was constructed across a dry sand bar, the driving of the piling on the dike alignment being accomplished during the succeeding high water. The middle fifth of the 75-ft. mattress on the dike alignment was constructed wholly of brush, on each side of which was a strip of wire-willow mattress 30 ft. wide. The use of wire-willow mattress saved $1,200.

Letters to the Editor

This department aims to be a forum for the discussion of the views of engineers and contractors. The range of interest should be as wide as possible. Contributors are, therefore, asked to make their letters short.

Early Days of Separate Sludge Digestion

Sir—I was interested in the editorial in your issue of May 20, p. 797, entitled "Reversion to Type," and its discussion of the Cameron septic tank and the two-story tanks of the Lawrence Experiment Station, of Travis and of Imhoff. To recall what is now more or less ancient history but perhaps interesting to the present generation because of its age, allow me to present some of the old data.

In an article read before the American Public Health Association at Minneapolis, Oct. 31, 1899, I stated: "I believe a modification of the septic tank could be constructed intended to treat only the matters in suspension in the sewage and settled out daily while passing through ordinary settling tanks, flushing this accumulated sludge when necessary into a septic tank." And in the report of the Lawrence Experiment Station for 1899, I said: "The observation that the stronger the sewage entering a septic tank the greater the percentage of organic matter suggests the idea that where exceedingly large volumes of sewage are to be purified . . . the sewage could be passed through ordinary settling tanks so constructed that the sludge settling to the bottom of these tanks could be flushed into a septic tank and this sludge then be treated by septic tank action instead of attempting to treat the whole volume of sewage."

Such a tank was put in operation Nov. 15, 1899, and it was of the true two-story type. The Travis and Imhoff tanks were both based upon the operation and results of this tank, and this fact has been acknowledged by both of them: By Travis in a pamphlet published many years ago, and by Imhoff in a letter to the writer dated Sept. 9, 1912, and in a paper read by him before the International Congress of Demography and Hygiene held at Washington that year. The pertinent portion of Dr. Imhoff's letter is:

"I have to read a paper in Washington the 25th about sludge disposal. There is one very important thing I wish to ask you. My opinion about separate sludge digestion is (so far as I could ascertain from printed publications) that such sludge treatment first was tried by you, as published in your report of 1899 and 1900. Is your opinion still the same or do you know any other publication by engineers or chemists who tried it [separate sludge digestion] before you? Have you any other publications written by yourself in which is said anything about that question before 1903 when Travis wrote [on the same subject]?"

About 1912 some controversy arose between Imhoff and Travis in regard to their respective tanks and patents and the case was heard before the Imperial Patent Court of Germany. (See Report, Lawrence Experiment Station, 1913, pp. 272 and 273.) Portions of Claims 1 and 2 of the Travis patent follow:

"Claim 1—Process for the biological treatment of sewage by means of separate treatment of the solid and liquid constituents characterized by the following: The sewage passing through one or more closed or open settling spaces at such a speed as to permit the lighter particles to come to the surface and the heavier to sink to the bottom and to pass through openings in it with a portion of the liquid into a liquefying space situated below the settling spaces, in which they are partly decomposed and liquefied through biological action, whence the liquid passes out of the liquefying space over weirs to one or more filters through which it passes upward in known manner, etc.

"Claim 2—Apparatus for carrying out Claim 1 characterized as follows: Combining the settling chamber (a) and the liquefying chamber (b) in a closed tank in such a manner that the settling space arranged above the liquefying space, etc."

The judgment rendered, in 1912, is in part: "It need not be settled here whether these differences are material or not, as it is clear that compared with the purification plant described in the report of the experimental station at Lawrence of the State Board of Health of Massachusetts, Boston, 1899 (31st annual report, p. 422), the protected process contains nothing new, which is contended by the claimant. The purification process there employed according to this report is exactly the same as that of the patent attacked. The sewage was passed through ordinary settling tanks and the sludge collected at its bottom was at the same time flushed into a septic tank, where alone it was subject to septicization. The defendants contend, however, from the fact that only ordinary settling spaces are mentioned in the Boston report, and that nothing is said about the continuous removal of the sludge out of the settling spaces, that it must be concluded that the process described in the report was only worked intermittently and that a continuous flow through the plant as in the case of the patent attacked, had not taken place. These contentions are, however, not justified, etc."

Certain claims of the Emscher Drainage Board acting for Imhoff were disallowed and the court stated in its final conclusion that "the division of the official costs is justified by the consideration that each party has partly lost its case."

In this German case, testimony was given by the writer and a drawing of the Lawrence tank of 1899 also presented.

It was of course true as Travis claimed that sewage was not passing continuously through the upper section of the Lawrence tank, that is, was not flowing twenty-four hours.

As I stated in the beginning of this letter, this is at the present time more or less ancient history but it is perhaps well once in a while to make clear how much the various modern processes of sewage purification owe to the Lawrence Experiment Station which for 38 years has been giving to the world information concerning this and other sanitary subjects.

H. W. CLARK,
Chief Chemist, Massachusetts Department of Public Health and Director of the Lawrence Experiment Station.

Boston, Mass.,
June 8, 1926.

Do Standard Specifications for Quality Improve Practice?

Sir—I was very much interested in your editorial comment (*Engineering News-Record* of June 3, p. 885) on Dr. Mathews' criticism of standardization of specifications. I have for a number of years been associated with committees engaged in the preparation or revision of standard specifications. I have served as a member of one sectional committee of the American Engineering Standards Committee that has just completed its work after about 4½ years' discussion, most of which has been by correspondence, and am still actively serving on another similar A.E.S.C. committee that has been functioning since 1923, most of whose work has been accomplished by round-table discussion, but whose task is still uncompleted. The general question that you have raised in your editorial, namely, "Are standard quality specifications worth while when measured in terms of the ultimate result?" is one to which I have given considerable thought during the course of my activities along the above lines, and there is much that can be said pro and con on the subject.

There is, however, one general thought that has always recurred to me in my own analysis of the matter, which is that structures must be designed according to some specification and it is essential that the materials of which they are to be constructed meet the requirements of such specification. If there are a number of manufacturers whose products meet these requirements, all of which are being manufactured under different specifications, it is logical to conclude that there must be one best specification for the purpose, or one which will permit manufacturing methods involving the greatest economies and which consequently, barring the question of possible price control, should result in the lowest possible selling price. The A.E.S.C., in the consideration it is now giving the matter of "Guaranteed Quality under Specifications" has expressed the thought in these words: "Putting manufacture more on the basis of generally known characteristics interpreted in the terms of specifications and grades might, on account of the extension of mass production, permit the manufacture of a large quantity of staple goods that could be sold on a wide market because of their known quality and presumably high value in relation to price. Moreover, it would seem that the manufacturer would be placed in a better position with respect to his purchases of the raw materials and constituent parts entering into his products."

The question, therefore, resolves itself into one of economics. If the preceding analysis is sound then the logical conclusion would seem to be that standard quality specifications, acceptable to the majority interests, are justified and desirable. This would enable a manufacturer to produce in advance of actual requirements, during otherwise slack periods, many materials for which he was reasonably assured of a future demand, and thus operate his plant in the most efficient and economical manner; the economies could then be reflected in lower prices to the consumer, at the same time assuring him better deliveries, and would assure the designer of structures a reasonable uniformity of material regardless of the source of supply.

I believe that the question of standardization must be looked at from the broader point of view before judgment is passed. To me, it has always seemed to be a matter of trying to secure the maximum benefit to the greatest number of interests concerned. It has never been my understanding that it was ever the thought of those advocating standardization of specifications that, once a certain specification had been standardized, such for example as has been done in the case of portland cement, all further attempt to improve the physical or other characteristics of that product should cease. The compilation and general acceptance of such a specification merely mean that a measuring stick has been set up by which that particular material is to be gaged and tested. Such a specification is not necessarily permanent in character, but simply constitutes a goal which all manufacturers of that product must reach if they would remain in business and beyond which all should strive to pass as far as they can. Standards are always subject to revision as expediency requires, but this is no reason why the industry should not have the advantages of them in the meantime. Modern business is founded upon the principle of "the survival of the fittest" and the manufacturer or business man who is content to sit quietly back and be satisfied with past performances is soon scheduled to pass out of the picture in these days of keen business competition, or be absorbed by his more progressive competitors.

Quality specifications, if their purpose is not properly understood and they are not used accordingly, would certainly tend, as you stated, to straitjacket progress. On the other hand, quality specifications, especially when prepared under the supervision and most careful scrutiny of such agencies as the A.E.S.C. sectional committees, certainly meet the immediate requirements of the maximum number concerned and are acceptable to the remainder. When the necessity arises, there is a procedure available for their revision but they are protected against frequent changes merely to suit the ideas of a few individuals, and it is in this way that manufacturing is stabilized to the fullest extent.

The advantage of nationally recognized standards in connection with the marketing of goods for foreign trade is of considerable importance, and would undoubtedly tend to reduce trade disputes and litigation arising from misunderstandings which are due largely to the differences in trade practices and industrial conditions in the two countries involved.

Rather than "exalting and hall-marking" the mediocre, quality specifications will generally be found to have the effect of barring from the market goods below a certain minimum standard, unless such goods are sold at prices duly reflecting their want of the standard quality.

Newark, N. J. HOWARD H. GEORGE,
June 10. Assistant to Chief Engineer, Public Service Production Co.

[If in this last paragraph, our correspondent means to say that standard specifications tend to eliminate goods *above as well as below* the set standard, then we are not far from being in hearty agreement with him. But perhaps this very point is at issue; if so, we must leave its discussion to a later occasion.—EDITOR.]

Trusses in Commodore Perry Hotel

Sir—In your June 10 issue, p. 956, there appears a letter criticising the use of steel trusses in hotel design to carry upper stories above large public rooms, and referring especially to the Commodore Perry Hotel, being erected in this city. As I am responsible for the structural design of the Commodore Perry, I am writing to give your correspondent and readers such data as are necessary to consider in forming an opinion regarding the propriety of the design.

Trusses are used, as stated by your correspondent, to carry the upper stories over public rooms. These trusses will have all members and connections solidly enclosed in concrete. The trusses are not walled in, as your correspondent assumes, but are accessible from a low story serving as a pipe gallery.

The use of heavy girders and trusses to transfer the loads from upper-story columns beyond the limits of large rooms in the lower stories is frequently required in modern architectural practice. When such construction is resorted to the most careful attention should be given to fireproofing methods. GEORGE V. RHINES,

Toledo, Ohio, Mills, Rhines, Bellman & Nordhoff,
June 16, 1926. Architects.

Schenectady Sewage Chlorination Studies

Sir — Mr. Cohn's Schenectady experiments on sewage chlorination, reported in your issue of June 10, p. 943, indicate that the influent to trickling filters can be relatively heavily chlorinated without materially impairing the efficiency of the filters. Experience elsewhere has resulted in impaired filter efficiency. It is probable that immature or overloaded filters would have their efficiency diminished. It is also improbable that the filters at Schenectady would have continued to function efficiently had the heavy chlorination been maintained. The results do indicate that by intermittent heavy doses of chlorine or hypochlorite the moth flies may be kept from becoming too prevalent and that continuous application of small quantities of chlorine will minimize odors.

The cost of the chlorination treatment has not been referred to by Mr. Cohn. If the minimum quantity used in the experiments, 4 p.p.m., were to be applied continuously, the additional cost of treatment would be about $2.50 per m.g., assuming chlorine at 10c. per lb. If chlorination permits higher rates of treatment this increased cost would be offset to the extent that capital charges were reduced. As regards intermittent application of hypochlorite in single large doses during the fly season, the purchase of the chemical would not materially increase the cost of treatment.

On the whole the experiments have been distinctly encouraging and it is to be hoped that research will be continued, not only at Schenectady but elsewhere, along the lines begun by Mr. Cohn. H. P. EDDY,

Boston, Mass., Consulting Engineer.
June 12, 1926.

Sir—Mr. Cohn's tests emphasize one important property of the trickling filter, namely its ruggedness and ability to withstand inhibitory influences and temporary overloads. In our studies on the treatment of industrial wastes at Chicago we have found the trickling filter more adaptable to variations in strength and composition of such wastes than the activated-sludge process.

The continuous use of liquid chlorine at the rates found necessary at Schenectady would be quite extensive, costing probably from $3 to $4 per m.g. The Schenectady sewage is comparatively weak, and the tank effluent used in these tests was quite dilute, with an oxygen demand of only 64 p.p.m. and 40 p.p.m. suspended solids. With even a moderately strong, stale sewage the cost of continuous application of chlorine would be prohibitive, unless a very acute emergency might exist with regard to odors and flies. The most practical solution of the fly problem seems to be the application of chlorine as calcium hypochlorite. The cost of this treatment should be far less than the cost of continuous application of liquid chlorine. While hypo would not eliminate odors, it would probably lessen them by reducing the tendency toward pooling and by removing excessive growths of surface films.

As to the effect of nitrification, I do not believe the tests have demonstrated conclusively that the large amounts of chlorine applied toward the end of the tests, in October, would not be harmful to the normal working of the beds. In order to apply more than approximately 10 p.p.m. of chlorine it was necessary to divert a large proportion of the flow from dosing tank *B* to dosing tank *A*. The rate on filter *A* was thus increased to about 5 m.g.d. per acre while the rate on the chlorinated filter *B* was reduced to less than 1 m.g.d. per acre. This light loading helped filter *B* to withstand the excessive amounts of chlorine. Even with the increased loading filter *A* produced more nitrate than filter *B* from Oct. 8 to 16. The results indicate a very

light loading on the Schenectady filters, with nitrification at its maximum at the time of the tests. During August and September the tests demonstrated that the filters could stand up to 10 p.p.m. chlorine with an almost sterile influent. The pronounced unloading of filter *B* may have been without significance during the period of the tests, but it seems likely that nitrification and stabilization could not be continued long with a sterile influent and a filmless, partially-sterilized filter bed.

The absorption of chlorine was quite variable. With 6 p.p.m. chlorine applied, there was practically none at the filter nozzles; with 10 p.p.m., about 2 p.p.m. at the nozzles and traces in the effluent; with 25 to 30 p.p.m. applied, less than 5 p.p.m. at the nozzles and 0.2 p.p.m. or less in the effluent. It would be interesting to know whether the analyses indicate an appreciable oxidation of the nitrogen or carbonaceous compounds in the Imhoff effluent by these large amounts of chlorine. The absorption of 20 to 25 p.p.m. ought to show a considerable oxidation.

F. W. MOHLMAN,
Chief Chemist, Sanitary District of Chicago.

Chicago, Ill.,
June 14, 1926.

Sir—The fact that Mr. Cohn finds but a slight decrease in efficiency with applications of chlorine is encouraging but constitutes only a step in the direction of increasing efficiency and consequent elimination of nuisances. Psychoda fly control was the initial object of the study, and was apparently attained, although "visual observation" is often a poor, unconvincing measuring stick.

The statement is made that the nitrifying bacteria in the beds were affected by the increase in chlorine strength and it is assumed that they soon became accustomed to the new conditions. This would mean that these organisms were readily able to adjust their physiological activities to poisons. It is well known that poisons, in suitable concentrations, may be stimulating as well as toxic to bacteria, but this does not mean that the bacteria are accustomed to the poisons. The general theory is that disinfection is chemical in nature, gradual and not an instantaneous process, probably highly complex in regard to reaction between cell and disinfectant. It was pointed out by Ricket in 1892 that poisonous salts, added to bacterial suspensions, were at different concentrations (a) indifferent, (b) stimulating, (c) inhibitive, (d) toxic (Comt. Rend., vol. 114, p. 1492; also see Falk & Winslow, Jour. Bact., Jan., 1926.). It may be, therefore, that the bacteria did not become accustomed but were reacting towards the chlorine in one or more of the four ways indicated. Evidence for this reasoning may be found in the nitrates curves, which show reasonable similarity but fairly persistent lower values for the chlorinated effluent, except, perhaps, with the higher applications. It is possible that the chlorine was active in the following ways: indifferent, stimulating, somewhat inhibitive, but practically never toxic to the organisms if they were affected at all. More likely, with lower chlorine application the chlorine was absorbed before it reached the nitrifying organisms, because we have shown that nitrification takes place mostly in the bottom of the beds (N. J. Ag. Exp. Sta. Bull. 390). The curve for residual chlorine in Mr. Cohn's paper indicates that no residual chlorine was present until rather high quantities were added. It seems therefore than the chlorine was absorbed by the colloidal material present in the influent and by the organic material present in the top layers of the beds. Since the flies breed only in the few top inches of the bed, the film nearest the top, being most affected, is removed and the larvae washed out.

Another question is whether other than nitrifying bacteria were not affected. In this respect it is extremely interesting to note that the amount of colloidal material increased and stability decreased with the increase in chlorine. If, in addition, the absence of odor is kept in mind it seems clear that chlorination inhibited the activities of or was actively toxic to the putrifying organism carried on the beds with the sewage and those present in the top layers. Our laboratory studies show that colloidal material is continuously produced and further broken down by bacterial action. But different organisms under different conditions will accomplish the work. If putrefactive organisms perform the initial work and they are inhibited or killed off, the colloidal material, which adsorbs or absorbs the chlorine, remains unattacked and passes out. At the same time the biochemical oxygen demand should be higher in the treated material and no direct relation should exist between stability and B.O.D., for portions of the colloidal material are coming through in different stages of decomposition. Stability as such, however, should be lower in treated samples. At the same time, when the partly attacked material is completely checked in its decomposition by the chlorine, B.O.D. values should be higher. This was actually the case near the end of the experiment.

Mr. Cohn's large-scale experiments are a step in the right direction to increase the efficiency of the beds. The aim is to decrease protozoa and fungi to an efficient minimum and increase the bacterial population to an efficient maximum. This apparently can be done. Numerous laboratory experiments show that protozoa and fungi can be decreased, at the same time increasing or decreasing the numbers of bacteria at will, with different concentrations of poisonous substances. The following is cited from a series of experiments on selective killing in tank liquid:

Material	P.P.M.	Bacteria Million per C.C.	Protozoa per C.C.
$CuSO_4$	0	34	11,300
$CuSO_4$	1	67	7,800
$CuSO_4$	2	68	5,000
$CuSO_4$	10	140	5,000
$HgCl_2$	0	32	11,200
$HgCl_2$	1	97	3,800
$HgCl_2$	2	78	5,500
$HgCl_2$	10	55	2,200

The author has not considered the effect of temperature on the rapidity of the action of chlorine. It is possible that more chlorine should be added in the early and late parts of the season to obtain results than during midsummer; also the results obtained during the beginning of September might not be comparable with the results from middle October.

WILLIAM RUDOLFS,
Chief, Sewage Investigations Laboratory.

New Brunswick, N. J.,
June 12, 1926.

Sir—The paramount objection raised to chlorination of tank effluent prior to filtration, as practised at Schenectady, seems to be the great cost of the treatment. It should be borne in mind that the study at excessive chlorination rates was made solely to ascertain the quantity of gas required to destroy the nitrification efficiency of the units. It is evident to the writer that change of rate of filtration, as carried out during the latter portion of the study, has a distinct effect on nitrification, but the fact still remains that the treated beds withstood the short test with remarkable fortitude.

Having determined last year that ordinary rates of chlorination had no apparent deleterious effect on the filters, plans are now being made to chlorinate this summer at a rate of about 4 p.p.m. in order to ascertain the benefit of such treatment on psychoda, odors and bed surface and nozzle conditions. Such a treatment would cost about $2.25 p.m.g. of sewage and would not impose an excessive burden upon a plant that was in need of such control work.

A one-month run just completed indicates rather definitely that chlorination of raw sewage can be carried out more economically than chlorination of the effluent from the Schenectady tanks. Application of liquid chlorine in dosages of roughly 5 p.p.m. gives promise of producing a definite chlorine residual at the effluent of the tanks; that is in excess of the residual chlorine obtained in the tank effluent after direct chlorination in the dosing tank, at similar rates of application. If this holds true, the chlorination of raw sewage can be carried out cheaper and will have the advantage of reducing septic tendencies in the Imhoff tanks themselves and will overcome the production of odors at the dosing tanks that results from the agitation of the liquid on going over the weirs and steps of the chamber. It is tentatively planned to chlorinate all of the raw sewage entering the Schenectady tanks at a rate that will give a residual chlorine at the effluent weirs and to ascertain the effect on both the tanks and the filters. It may be found that such work can be carried out much cheaper than last year's study would indicate, and may thus overcome the objections of lack of economy that are raised.

MORRIS M. COHN.

News of the Week

CURRENT EVENTS IN THE CIVIL ENGINEERING AND CONTRACTING FIELDS

Engineering Educators Meet at Iowa University

Educational Research Results—Board of Investigation and Co-ordination Presents Valuable Report

Convention Report by Donald D. Curtis, Department of Mechanics and Hydraulics, State University of Iowa

The Society for the Promotion of Engineering Education held its thirty-fourth annual convention meeting at the State University of Iowa, Iowa City, June 16 to 18. The attendance was 312, with more than eighty institutions, thirty-eight states, and Canada and Brazil represented. The sudden and untimely death of Dean Wm. G. Raymond of the State University of Iowa on June 17 cast a heavy cloud over the atmosphere of the gathering; all following social features were abandoned, save some functions for the ladies and the annual banquet.

The meetings were unusually fruitful and stimulating. The character of the papers was such as to lead to spirited and thought-provoking discussion, in most cases limited only by the time available. It was a feature of the early sessions that the president called the papers strictly to the time limit, and stopped discussion immediately on expiration of the scheduled time.

As always, the joint meeting of Deans and Administrative Officers and Teachers of English, although a preliminary meeting, was well attended. The group's discussion was summarized by Professor Nelson as pointing to two objectives, training the engineer to speak and write clearly and forcefully, and fostering regard for literature. For the first of these, the consensus of opinion was that in addition to the formal courses, as ordinarily given, the full co-operation of all departments in demanding correctness in expression, oral and written, was essential to successful mastery of English by the student. For the second, the recommendation was to permit election of literature courses.

Educational Research Results

Almost exclusively the set program was devoted to results and interpretation of the findings of the research started some years ago to co-ordinate engineering colleges. The amount of energy expended and the body of fact and finding, theory and synthesis, presented was tremendous. Dean Marston, reporting as chairman of the A.S.C.E. committee on Engineering Education, gave composite results of questionnaires sent to some 1,500 members of A.S.C.E., A.S.M.E., and A.I.E.E. From these, it was apparent that there was a general appeal for broadening of college courses and a tendency to hold to the engineering course but to have it include some business training. Some less than half the replies indicated a preference for functional division in courses as opposed to technical division, that is, sales, design, and such as opposed to civil, mechanical, and such.

That guidance of high school students in choosing engineering as a career should be furnished by conferences of high school teachers and teachers of engineering, addresses on engineering to high schools, distribution of especially prepared literature to high schools, and dissemination of information by various means, such as radio and extension, was the contention of a portion of a paper on engineering students and graduates. It was pointed out that less than half the students entering upon technical courses had any conception of their chosen field.

The matter of elimination of engineering students has attracted a good deal of attention as evidenced by the repeated queries as to how to remedy the situation in which the eliminations are so numerous as at present, with the too-frequent accompanying personal injury to students. Dean Seashore, State University of Iowa, offered the preliminary placement examinations, which are yearly being improved, as the means by which the student may be warned in advance of entering a course for which he is unfitted. By this method, the matter is handled in a kindly way, the student being shown by

Engineering Fifty Years Ago

From *Engineering News*, June, 1876

Notes

THE Erie road has completed the laying of a third rail between Buffalo and Elmira.

* * *

The Canadian Government is soliciting bids for the construction of sections of the Pacific Railway between Lake Superior and the Pacific Ocean, contractors to receive lands or proceeds of lands at the rate of 20,000 acres, and cash at the rate of $10,000 per mile, together with interest at the rate of 4 per cent per annum for twenty-five years from the completion of the work, or any further sum which may be stipulated in contract.

* * *

The Hudson River Tunnel Company, which has been delayed more than a year by injunctions, has again resumed operations at the shaft in Jersey City.

Much New Construction for Federal Reclamation

$7,431,000 Appropriated Includes Some New Projects in Oregon, Montana and Utah

From the text of the Reclamation Appropriation Bill, just made public, it appears that large appropriations were made for the construction of new projects. The total carried by the bill is $7,431,000 from the reclamation fund, and the sums of $35,000 and $15,000 respectively for contributing to Yuma levee maintenance and for investigations of arid, semi-arid, swamp, and cutover timberland in any of the states with respect to development. Separate bills further make appropriations of $25,000 to continue co-operative study of irrigation along the Columbia River.

New Projects

Appropriations for new projects contained in the main appropriation bill include the Owyhee, Vale, and Baker projects in Oregon, an extension of the Sun River project in Montana, and the Echo reservoir and associated work of the Salt Lake Basin project in Utah. The appropriation for Owyhee is the balance of $315,000 appropriated in 1924 and reappropriated a year later; for Vale, the unexpended balance of $500,000 appropriated a year ago, with authority to purchase an interest in the existing Warm Springs storage reservoir and for the construction of drainage works for the Warm Springs and Vale projects. For Baker, the unexpended balance of the 1925 appropriation is appropriated; for Echo reservoir, the unexpended balance of the 1925 appropriation, and for Spanish Springs division of Newlands project, the unexpended balance of $500,000 appropriated in 1925. A similar appropriation is made for the completion of the works on the Kittitas Division of the Yakima project.

Repayment Provisions

An important proviso made in respect to the new projects is that no money shall be expended until satisfactory contracts have been made with irrigation districts for repayment of the cost of the works; that all landholdings over 160 irrigable acres shall have their sale prices fixed by the Secretary of the Interior and shall not receive water if not sold at such price unless half the construction charges against such land have been paid; that operation and maintenance charges shall be paid in advance each year, but that the first year's operation charges after public notice shall be paid as part of the construction cost; that the state authorities may co-operate with the United States in promoting the settlement of the projects, and in securing and selecting settlers. Generally, the significant change over prior laws is the allowing of repay-

ment of construction cost in 40 years instead of in 20 years as heretofore, this cost to bear no interest.

Of the old projects, partial abandonment of some divisions is provided for: On the Uncompahgre project, Colo., the Secretary is authorized to investigate the feasibility of discontinuing operation of any parts of the project and removing the water users thereon to other lands. A similar provision is made for the Frannie division of the Shoshone project, Wyo., with the further provision that after Dec. 31, 1926, no government money shall be expended for operation or maintenance of this division. No money is appropriated for the King Hill project, but operation or construction is authorized at the expense of the district, for sums to be contributed in advance.

Passenger Trains in Rear End Collision Near Pittsburgh

Shortly after midnight on the morning of June 17 the Cincinnati Limited of the Pennsylvania Railroad bound for New York, ran into the rear end of the Pittsburgh - Washington express near Gray station on the Pennsylvania Railroad 3 miles east of Blairsville, Pa. The Pittsburgh-Washington train had stopped to repair an air hose and was just about to proceed when the accident happened. The three rear sleepers were telescoped and the end of the club car badly smashed, resulting in the death of sixteen persons.

Very meager reports as to the cause of the accident are available at this time, but from statements of the crew it appears that the Cincinnati Limited ran by the fixed signals set against it and warning signals put out by the flagman of the standing train. As the engineer and fireman of the leading locomotive and the engineer of the second locomotive were killed, it is not known how they came to run by the signals set against them, or failed to observe the flare and torpedoes which the rear trainman of the standing train states that he placed 700 ft. back of his train.

Decision on New Highway Into San Francisco Announced

The California Highway Commission on June 8 authorized advertisement for bids on the proposed $280,000 underpass at South San Francisco that will provide a connection with existing roads for a new highway route down the peninsula. The new highway has been partially completed under the direction of the Highway Commission with funds provided by the City of San Francisco. The underpass was decribed in *Engineering News-Record*, Nov. 12, 1925, p. 815.

The underpass is designed with side walls that will ultimately support a total of 16 railroad tracks. For the present decks are to be placed for a total of only 7 tracks, the remainder to be added as needed. The cost of the structure is to be apportioned as follows: Southern Pacific R.R., 23.7 per cent; California Highway Commission, 71.2 per cent; and belt Line Ry., 5.1 per cent.

Dean Raymond Dies at Iowa University

William Galt Raymond, dean of the College of Applied Science at the State University of Iowa, Iowa City, died at the University hospital Thursday morning, June 17.

Dean Raymond was born in Princeton, Iowa, in 1859, studied engineering at the University of Kansas and graduated from Washington University with the degree of civil engineer in 1884. Before graduation he worked as an assistant engineer on railway construction and after graduation began teaching at the University of California where he was an instructor in civil engineering from 1884 to 1890. From 1892 until he went to the University of Iowa in 1904 he was Professor of Geodesy, Road Engineering and Topographic Drawing at Rensselaer Polytechnic Institute. Mr. Raymond began his work at Iowa University as Professor of Civil Engineering, becoming Dean of the College of Applied Science when that was organized in 1905.

Dean Raymond's activities were not confined to his college work. He practiced as a consulting engineer and wrote a number of books, some of which, such as his "Plain Surveying," have been standards of engineering instruction for many years. He also took an active part in technical society activities, being a past president of the Society for the Promotion of Engineering Education, which organization was holding its convention at the University at the time of his death; was a past president of the Iowa Engineering Society and a member of the American Society of Civil Engineers and the American Railway Engineering Association. During the war he served on the Iowa State Board of Conciliation for the adjustment of public utility rates.

The degree of Doctor of Laws was awarded to Dean Raymond by Washington University in 1905, and the degree of Doctor of Engineering was awarded to him by Michigan University in 1919.

Allegheny County Opens New 7th St. Bridge

On June 17 the new 7th St. bridge over the Allegheny River, in Pittsburgh, built by the County of Allegheny, was opened to public traffic. This is the first of the three downtown bridges (6th, 7th and 9th Sts.) which are being rebuilt at the order of the War Department to give greater vertical clearance and better arrangement of piers for navigation. The structure is of the self-anchored type. The foundations were built by The Foundation Co. and the superstructure by the American Bridge Co., to designs made by the county Department of Public Works.

Failure of Sunnyside Reservoir Due to Seepage

On the morning of Aprli 28 a break 30 ft. wide occurred in the west wall of the Sunnyside reservoir which is part of the municipal water supply system of Salt Lake City. The reservoir is an artificial basin formed partly by excavation and partly by fill, and is lined with 6 in. of concrete. The dimensions are 140x205 ft. at the bottom, the depth is 30 ft. and the side slopes 1½:1. At the time of failure the water was 23 ft. deep.

Failure is ascribed to leakage which apparently started near the center of the west side and traveled through the embankment diagonally until it encountered the outlet, overflow and washout pipes. From that point it naturally followed these pipes through the fill section. Slight leakage had existed for some time. The first indication of more serious trouble was a small stream of murky water coming through the valve well which was observed by the caretaker. He immediately reported this to the water works department and opened the outlet gate. Forty minutes later the wall was out and the reservoir empty.

The natural ground line intersects the western slope, where the failure occurred, midway between the top and bottom. With the exception of a layer of hardpan 2 ft. thick, about 10 ft. below the ground surface the material is very fine sand.

$12,000,000 Asked for Montreal Harbor Improvements

A government bill to authorize a loan, not to exceed $12,000,000, to the Montreal Harbor Commission, in connection with a big development program, has been introduced in the Canadian House of Commons. The minister of marine and fisheries stated that the current program of the harbor board included $5,400,000 for wharves, piers and basins, $3,155,000 for a grain elevator, $1,342,000 for railways and electrification, $800,000 for dredging, $322,000 for shops and buildings $300,000 for permanent sheds, $155,000 for plant and the remainder for miscellaneous purposes.

Resolutions Against Oil Pollution Adopted by Conference

Delegates of a dozen nations to the International Conference on Oil Pollution of Navigable Waters held at Washington, D. C., beginning June 8, adopted a proposed convention, effective when 5 of the 12 participating nations have signed the agreement. The convention provides for the establishing of areas not less than 50 nor more than 150 miles from shore into which oil or oily substances shall not be discharged from any craft other than war vessels that carry oil or use it as fuel. The limitation as to the amount oil that may be discharged is fixed at "0.05 per cent of crude, fuel or Diesel oil" or enough "to form a film visible to the naked eye."

WASHINGTON NOTES

PRESIDENT COOLIDGE, on June 22, signed the bill appropriating $165,000,000 for highway construction over a period of two years.

THE House has passed the bill authorizing payment of the expenses of three delegates representing the United States at the International Sanitary Conference meeting in Paris, to revise the International Sanitary Convention of 1912.

A SUPPLEMENTAL appropriation of $50,000 for the establishment of a master scale for checking the large scales in use by the railroads and some industrial plants has been asked by the Bureau of Standards. It is contended that there now is no adequate check on the scales used in weighing the $4,500,000,000 worth of freight which the railroads handle each year.

THE House Committee on Irrigation and Reclamation has approved a bill authorizing the Secretary of the Interior to pay assessments against government property on reclamation projects for municipal improvements. The Comptroller General ruled recently that assessments for paving, sewers or similar improvements may not be paid even if the property is benefited without legislative authority.

THE Portland Electric Power Co. of Portland, Ore., has applied to the Federal Power Commission for an amendment to its license which will allow it to take up the second stage of its development on the main fork of the Clackmas River in Clackamas County, Ore. A tunnel 22,000 ft. long will carry the water into the Oak Grove reservoir. An additional 37,500 kw. is to be installed in the Oak Grove power house.

THE Public Lands Committee of the Senate has approved a bill giving the consent of Congress to the opening of negotiations by Idaho, Washington, Wyoming and Oregon looking to a compact with respect to the division of the waters of the Snake River and its tributaries. Any agreement before becoming binding must be approved by the legislature of each state concerned and by Congress.

The Secretary of the Interior in reporting on the bill declares he is "heartily in accord with the plan of adjusting differences relating to the division of the waters of interstate streams by means of compacts between the states involved."

The Committee also approved a similar agreement between Wyoming and South Dakota for the division of the waters of the Belle Fourche and Cheyenne Rivers.

IN CO-OPERATION with the Secretary of War and the Secretary of the Navy the House Military Affairs Committee and the Naval Affairs Committee have prepared a bill intended to encourage the development of aviation. The committees regard the bill as a promising step in the development of aviation for defense and "as a most useful means for fostering the aircraft industry and promoting the art of aviation."

It is planned to throw open the doors of competition to all designers and inventors "even to all those with but limited financial strength." Nationwide competitions are to be staged and provision made to reward those who bring forward ideas of real merit.

Another objective of the bill is to develop a private air craft industry. A plan is worked out to insure remunerative prices to a large number of producers. The committee does not want to see two or three large manufacturers get all the contracts. Conspiracy among bidders to prevent competition is heavily penalized.

CONSTRUCTION ROAD IN FISH CREEK CANYON

IN LOCATING a construction road to the site of the Horse Mesa dam in the Salt River Canyon, Arizona, engineers of the Salt River Valley Water Users' Association selected a route via the precipitous Fish Creek canyon which enters the main canyon some four miles below the dam site, traversing a region heretofore practically inaccessible. The road winds in continuous curves around bold pinnacles and cliffs where the remnants of ancient cliff dwellings are found, and for several miles threads a canyon whose scenic features rival the Grand Canyon of the Colorado.

The location was made possible by entering a narrow notch near the head of the canyon and then carefully working out a zigzag descent into the canyon with sharp curves just outside the "switchback" class. Having thus descended abruptly to a level below the sheer cliff faces, it was possible to locate on a bench cut for most of the remaining distance through the canyon. To the truck driver on this job, being on the brink of a precipice is daily routine.

The picture shows one of the zigzags in the road where it enters Fish Creek Canyon.

Engineering Educators Meet at Iowa University

(*Concluded from p. 1037*)

the actual evidence that he is unqualified; his aptitude may lie in some particular direction which will be shown in the examination results.

EXTENSION AND CO-OPERATIVE COURSES

Extension courses have been studied by comparison with work in residence, and the conclusion from this study is that, properly administered, such courses may be made to furnish a ready means of keeping the graduate up to date and growing in his field, as well as offering opportunity to men who cannot for some reason attend college. A surprising bit of evidence in the findings is the fact that a large part of the students who had taken work both in residence and in extension considered the influence and personality of the teacher more intense and helpful in extension courses than in residence courses.

Co-operative courses, half of the time being spent in college and half in industry in short-period alternation, have proved valuable in giving the student a perspective of actual working conditions. In many instances such courses permit, through having only half the students in residence at one time, more efficient use of space and equipment in the college. Often the co-operative plan has permitted the utilization of equipment for research which would have been far beyond the means of the institution, the students being granted the use of the facilities of the industry served.

Two dominant notes were sounded throughout the whole discussion whenever teacher requisites were mentioned; the first and more insistent was "can the teacher teach"; the other was "is the teacher qualified as a leader in research and industry." All seemed to agree that the teacher was the most important factor in the effectiveness of any curriculum. One institution considers four chief points, in the order named, in selecting members to its instructional staff—scholarship, teaching ability, professional standing, and aptitude or training in the humanities. Another paper suggested the advisability for the training of teachers in a summer course of a month's duration, with suitable arrangements made for instruction, expense of the young instructors who would attend, scope of the training, and other details.

CURRICULA

In the presentation of the study relating to curricula, the subject of foreign languages evoked a good deal of spirited discussion. Dean Cooley championed the cause of the study of language for the practical reason of possible invasion of foreign fields, and precipitated a warm debate. The findings of fact show that foreign languages are not so much admission requirements as formerly, nor so much required courses of study in engineering colleges. In the course of the discussion some members held that foreign languages had never been demonstrated to have had enough more value than various other so-called cultural subjects to warrant their inclusion to the exclusion of the other courses.

BOARD OF INVESTIGATION

Probably the most important single feature of the convention was the report of the Board of Co-ordination and Investigation. Associate Director Hammond's summary of the fact-gathering stages set forth such a mass of careful, thorough, all-inclusive evidence as to be almost unique in the history of engineering education. Chairman Scott reported on some of the administrative phases of the work. Noteworthy in his statement were the encouragement and appreciation expressed by the various bodies concerned, and their admonition to proceed to the application of the principles evolved from the study.

Director Wickenden made analysis and recommendation on the basis of the facts found in the investigation. His report, throughout, was constructive rather than destructive. The present order, by it, would not be destroyed, or crippled by serious alteration, but rather would be strengthened and amplified until engineering education was more balanced and stabilized in all institutions. By the report, the four year course, with simplification and unification of subject matter, may be confidently expected to give a good general training upon which to build an intense technical knowledge by graduate study, extension courses, or post-scholastic education. The technical engineer of today is called upon to be thoroughly trained in one field and intelligent in several allied fields. This demands broad general training followed by education along with practice. The report repeatedly stressed the fact that concerted action by the colleges is necessary to insure real progress now. It is evident that the colleges alone cannot solve the problem of engineering education, but that the industries, the engineering societies, and the colleges must work together to meet their mutual obligations and serve their mutual interests. In the early fall, a group of deans and executive officers will meet to formulate a program of action to reach practices making for further co-ordination in engineering education.

Because of the death of Dean Raymond, the convention was hastened to a close a half day sooner than had been scheduled by presenting some of the matters of business on the evening which was to have been devoted to the banquet and by cutting short the final discussion period.

The officers for the coming year are: O. M. Leland, Dean of Engineering, University of Minnesota, president; H. W. Tyler, Massachusetts Institute of Technology and W. S. Rodman, University of Virginia, vice-presidents; F. L. Bishop, Dean of Engineering, University of Pittsburgh, secretary; W. O. Wiley, treasurer; Miss Sada A. Harbarger, Ohio State, W. K. Hatt, Purdue, E. R. Hedrick, University of California, R. A. Seaton, Dean of Engineering, Kansas State Agricultural College, J. W. Votey, University of Vermont, and S. M. Woodward, State University of Iowa, council. The next convention of the society will be held at the University of Maine, Orono, Maine.

Cement Association Takes Over Research Work

After June 30 the work of the Structure Materials Research Laboratory, which has been carried on by the Portland Cement Association in co-operation with the Lewis Institute at the building of the latter, 1951 West Madison St., Chicago, will move to the new P.C.A. building, 33 W. Grand Ave., Chicago. The work there will be continued as the Research Laboratory of the Portland Cement Association. Duff A. Abrams continues in charge of the laboratory.

Overflow Indicates Silting Up of Pescadero Cut

On June 14 telegraphic dispatches from Calexico stated that about half the flow in the Colorado River was pouring through a 600-ft. break in Pescadero levee which extends to the southwest beyond Pescadero Cut and along its north side. The break was not considered a menace to Imperial Valley lands because the river is now at a comparatively low stage and the Saiz and Volcano Lake levees stand as a second line of defence some distance to the west and north of the overflowing waters.

Significance attaches to the break, however, because it occurs with a flow of only 65,000 or 70,000 sec.ft. while in June, 1922, the year in which the Pescadero Cut was put in service, a flood of 112,000 sec.ft. followed this route without overflow. It is believed that a considerable silting up of this route has occurred, probably just below the Pescadero Cut itself. The present situation has given rise to speculation as to what might occur in a heavy flood. The flood of 1916 amounted to about 240,000 sec.ft.

Moffat Tunnel Commission Sells More Bonds

Unforeseen difficulties existing in boring the Moffat Tunnel have increased the cost beyond the upset price of $6,720,000 laid down by the Colorado Legislature in 1922 when it ordered the tunnel driven. Little preliminary investigation along the line of the tunnel was or could be made in the way of borings on which to base cost estimates. A new 5½ per cent loan of $3,500,000 just negotiated is the second supplemental loan, the first being for $2,500,000. Much of the added cost is chargeable to timbering required by the nature of the work encountered and by other normal developments of the work, but aside from some water flows there have been no serious difficulties. J. Vipond Davies, consulting engineer, states that work is proceeding satisfactorily and conditions encountered are normal.

Progress as of May 15th was reported as follows: Pioneer tunnel, east portal 15,459 ft., west portal 12,413 ft., leaving 4,511 ft. between the headings; main tunnel, east portal 14,868 ft., west portal 12,038 ft. The railroad tunnel has been enlarged to full size 13,239 ft. at the eastern end and 6,760 ft. at the western end.

Engineering Societies

Calendar

Annual Meetings

AMERICAN SOCIETY FOR TESTING MATERIALS, Philadelphia, Pa.; Annual Meeting, Atlantic City, N. J.; June 21-25, 1926.

AMERICAN SOCIETY OF CIVIL ENGINEERS, New York, N. Y.; Summer Meeting, Seattle, Wash., July 14-16; Annual Convention, Philadelphia, Pa., October 4-9, 1926.

NEW ENGLAND WATER WORKS ASSOCIATION, Boston, Mass.; Annual Meeting, Providence, R. I., Sept. 14-17 1926.

INTERNATIONAL CITY MANAGERS' ASSOCIATION, Lawrence, Kansas; Annual Convention, Colorado Springs, Colo., Sept. 21-23, 1926.

The Providence (R. I.) Engineering Society at its June 8 meeting elected the following officers: President, Francis B. Marsh; vice-president, R. Leslie Fletcher; secretary, A. W. Meyer; and treasurer, C. T. Morey.

The Council of the Affiliated Technical Societies of Boston held its annual meeting June 7 and elected for the ensuing year the following officers: Chairman, Frederic A. Eustis; vice-chairmen, Lewis E. Moore and Frank A. Marston; and treasurer, Alfred Kellogg.

The San Francisco Section of the American Society of Civil Engineers at its bimonthly meeting on June 15 elected R. A. Monroe secretary-treasurer to succeed Harold B. Hammill. A. Kempkey presented the paper of the evening which described the Gordon Valley project that provides a water supply for the city of Vallejo.

Personal Notes

DR. CHARLES TERZAGHI, during the past year special lecturer on soil mechanics at Massachusetts Institute of Technology, has been appointed associate professor at the Institute.

THORNDIKE SAVILLE, professor of hydraulic and sanitary engineering at the University of North Carolina, has been given a year's leave of absence from the University and from his work for the North Carolina Department of Conservation and Development. Professor Saville, who recently made a brief trip to Venezuela for the International Health Board of the Rockefeller Foundation in company with Dr. H. H. Howard, Director for the West Indies for the Rockefeller International Health Board, has been "loaned" to the government of Venezuela to organize and for the time to administer a Bureau of Sanitary Engineering. The Venezuelan government has control of many municipal affairs, including water supply, sewage, garbage and malaria control. Professor Saville will investigate and plan additional new water supplies for some of the larger cities of Venezuela. He will take with him an assistant engineer from this country, but otherwise his staff will be supplied by the Venezuelan government. He will sail for Venezuela with his family July 3.

A. J. BOZE has been appointed county highway engineer for Adams County, Wisconsin, to succeed John McGregor, resigned.

FRANK BURTON has tendered his resignation as commission of the building department of the city of Detroit, in order to go into private practice in Detroit. Mr. Burton has been building commissioner in Detroit for the past five years; he is also president of the Building Officials Conference.

W. K. SEITZ, lately city engineer of St. Joseph, Missouri, has resigned his former position to become city manager of Melbourne, Florida.

MAJOR GENERAL HARRY TAYLOR, the retiring Chief of Engineers, expects to remain at his desk until the very end of his term. He will turn the office over to Major General Edgar Jadwin, his successor, on June 28, but he will have to remain on duty for several days to dispose of the various matters he has been handling personally. General and Mrs. Taylor will leave shortly for an extended European tour.

THOMAS T. TOWLES, formerly with the Department of Public Works, Richmond, Va., and prior to that with the du Pont Engineering Co., has recently taken a position as engineer in the structural division of Stone & Webster, Inc., Boston, Mass.

MAJOR M. P. FOX of the Corps of Engineers is in Brûssels to attend the Navigation Congress. While in Europe he will visit various navigation works.

H. R. WAKE, of the engineering staff of the Aluminum Company of Canada, has been appointed town manager of Arvida, the new industrial town on the Saguenay River.

A. D. C. BLANCHARD, hydraulic engineer of the New Brunswick Electric Power Commission, has resigned and will join the staff of the International Paper Co., Grand Falls, N. B.

G. S. SMITH has been appointed assistant division engineer of the Colorado division of the Missouri Pacific R.R.

FRANK A. BARBOUR and G. GALE DIXON announce the dissolution of the partnership of Barbour and Dixon, consulting engineers, Boston, Mass. Mr. Barbour will practice in his own name, as prior to the partnership, specializing in hydraulic and sanitary engineering, with offices in the Tremont Building, Boston. Mr. Dixon joins the engineering staff of the Mahoning Valley Sanitary District, at Youngstown, Ohio.

F. M. RANDLETT has been promoted to the position of Pacific Coast Manager of Robert W. Hunt Co. Mr. Randlett was formerly district manager in the Pacific Northwest, with headquarters at Portland, Ore., and Seattle, Wash., and previous to that time was for many years chief engineer of the Water Department of Portland, Ore.; he served previously in the engineering department of the New York, New Haven & Hartford R.R. and with Stone & Webster, Inc.

WILLIAM B. GESTER, who established the San Francisco office of Robert W. Hunt Co. in 1903, continues his association with that company in the capacity of consulting engineer, with headquarters at San Francisco.

J. H. MANNING, vice-president of the division of engineering and construction, Stone & Webster, Inc., Boston, will shortly transfer his headquarters to the New York office of the company at 120 Broadway.

EDWARD E. WALL, formerly director, public utilities, for the city of St. Louis and for many years water commissioner has opened an office as consulting engineer in the Merchants-Laclede Building, St. Louis.

VERNE E. ALDEN, assistant to general superintendent of Consolidated Gas, Electric Light & Power Co., of Baltimore, Md., for the past eight years and prior to that in electrical design work with the Westinghouse Electric & Manufacturing Co. at East Pittsburgh, Pa., has joined the mechanical division of Stone & Webster, Inc., at its Boston office.

C. F. LOWETH, Chicago, Ill., chief engineer of the Chicago, Milwaukee & St. Paul Ry., received the degree of doctor of engineering from Rose Polytechnic Institute, Terre Haute, Ind., June 10.

GEORGE L. ALDEN, head of the mechanical engineering department of Worcester Polytechnic Institute, Worcester, Mass., received from this institute June 18 the degree of doctor of engineering. Professor Alden has been engaged during the past few years in developing the new hydraulic laboratory for Worcester Polytechnic Institute, which was opened recently.

Obituary

CHARLES G. YOUNG, consulting engineer, New York City, former president of the C. G. Young Engineering Co., died suddenly at a place near San Juan, Porto Rico, June 16, after returning from work on an engineering project in Santo Domingo. Mr. Young was born in Bath, N. Y., in 1866, was educated at Haverling Academy, and was engaged for a number of years in electrical engineering work. From 1902 to 1909 he was construction manager for the White-Crosby Co. and the J. G. White Co. Since 1909 he had been president of the company bearing his name, engaged in consulting engineering and construction work, investigations and plans for public utilities, in this country, South America, Europe and Asia.

From the Manufacturer's Point of View

A Point of Contact
Between Maker and User of
Construction Equipment and Materials

Concrete Road Yardage

For May the square yardage included in concrete pavement contract awards, according to the Portland Cement Association were: 8,910,678 for roads; 4,619,195 for streets; and 507,250 for alleys; or a total for the month of 14,037,123 sq.yd.

The accompanying table summarizes the statistics for the current year:

SQUARE YARDS OF CONCRETE PAVEMENT AWARDED DURING 1926

Month	Roads	Streets	Alleys	Total All Classes
Jan.....	2,161,415	1,410,201	57,218	3,628,834
Feb.....	2,726,611	2,010,941	274,836	5,012,388
March..	4,662,885	3,050,630	224,879	7,938,394
April....	8,758,195	4,324,729	479,763	13,562,687
May....	8,910,678	4,619,195	507,250	14,037,123
Totals	27,219,784	15,415,696	1,543,946	44,179,426

Relative Wear of Floorings

Experimental work at the Mellon Institute of Industrial Research, Pittsburgh, instituted by tile manufacturers, has resulted in some comparative data on wood and other flooring materials.

Pressure was applied on the different materials by a wheel shod with leather surfaces and fine sand was constantly fed between the leather and floor material to imitate the effect of dirt ordinarily found in some amount on all floors. After a test period of similar duration in each case, the material was weighed to determine the percentage loss by abrasion. Following is a list of the materials tested and the amount of wear under the test:

Material	Average Per Cent Loss
Vitreous tile	4.57
Marble	23.18
Maple wood	23.79
Rubber	20.59
Linoleum	56.57
Oxychloride cement	50.10
Neat Portland cement	16.79
Asphaltic composition	80.11
Cork tile	45.93

It will be noted that vitreous tile resisted wear most effectively. The test conditions were perhaps not entirely representative of actual practice, as mortar of cement and sand, rather than neat Portland cement, is usually employed for floor surfacing, and the wood floors were tested without the protection of varnish or other floor finish, such as is almost invariably applied in practice.

National Training School for Apprentice Tile Setters

Under the auspices of the Associated Tile Manufacturers, a training school for apprentice tile setters is under way at Dunwoody Institute in Minneapolis. A few years ago an experimental course was conducted at Dunwoody by the tile manufacturers but there followed a period during which the progress was slow.

The new school is planned for four courses, the first beginning on June 1. Each course is 13 weeks. The other courses will start in September and December of this year and in March, 1927. There are about 20 apprentices in the course now under way. It is the intention of the school to show that instruction can be given in a way that will shorten the apprenticeship term, turn out good workmen and yet not overcrowd the ranks of the trade.

Business Notes

GENERAL ELECTRIC CO., Schenectady, N. Y., announces that it is aiding in the manufacture of two new oil-electric locomotives that are to be applied to industrial and short line freight service. The Red River Lumber Co. plans to place a 100-ton oil-electric locomotive in service on a line 15 to 20 miles in length. Maximum grades are of 2 to 3 per cent. The Utah Copper Co. will soon place a 60-ton unit in service at Bingham, Utah, for hauling waste cars on the upper levels at its mine. The 100-ton locomotive is similar to those used by the Long Island and Great Northern Railway. The smaller locomotive is like those of the Central Railroad of New Jersey, B. & O., Lehigh Valley, D. L. & W., Reading and the Erie. These oil-electric locomotives are being developed jointly by the American Locomotive Co., Ingersoll-Rand Co. and General Electric Co.

FAIRBANKS STEAM SHOVEL CO., Marion, Ohio, has been purchased by the Osgood Co., of the same city. The purchasers are prepared to furnish from the records and drawings now in their possession repair parts for Fairbanks machinery and equipment that is now in the field. Charles Melvin, who was connected with the Fairbanks Steam Shovel Co. for 24 years, has been retained by the Osgood Co. and placed in charge of the department for handling service and repair parts on Fairbanks machines. All owners of dredges or other Fairbanks equipment are requested to write to the Osgood Co., giving the present location of their machinery.

TIMKEN ROLLER BEARING CO., Canton, Ohio, announces the following changes in its personnel: H. E. Gilmore promoted to manager of the St. Louis branch, following several years' experience at the Chicago branch; G. W. Curtis promoted from industrial equipment engineer to district manager of sales, industrial division, for the Milwaukee territory. S. M. Weckstein succeeds Mr. Curtis as industrial equipment engineer. G. W. Richards and A. R. Spicacci are appointed assistants to Mr. Weckstein.

FREEMAN W. STOWE, formerly sales engineer with the Sivyer Steel Casting Co., Milwaukee, has become associated in the same capacity with Deemer Steel Casting Co., New Castle, Del.

ARMCO CULVERT & FLUME MANUFACTURERS ASSOCIATION is celebrating this year the 30th anniversary of the invention of the corrugated culvert. In the thirty years the original design has remained unchanged. The first corrugated culvert manufactured by the inventor, James H. Watson, was recently removed from under a public highway near Crawfordville, Ind., where it had been placed in 1896. It is now on display at the association's research laboratory at Middletown, Ohio.

A. W. CLAUSSEN, formerly assistant engineer of the National Underwriters Laboratories, Chicago, has joined the organization of the McWane Cast Iron Pipe Co., Birmingham, Ala., as research engineer, with headquarters in Birmingham.

WESTINGHOUSE ELECTRIC & MFG. CO., East Pittsburgh, Pa., announces that Francis Hodgkinson, for many years chief engineer of the South Philadelphia Works, has been appointed the consulting mechanical engineer for the organization as a whole. At the same time the office of chief engineer has been discontinued, and a new position, manager of engineering, announced. Appointed to the new position is A. D. Hunt, for many years a member of the engineering staff of the company.

Equipment and Materials

Tandem Roller Powered by Gasoline Engine

Embodying several new details in addition to the change from steam to gasoline power, a new tandem road roller manufactured by the Galion Iron Works & Mfg. Co., Galion, Ohio, is available in 5, 6, 7, and 8-ton sizes. A Hercules four-cylinder motor is used, mounted in a rigid chassis frame. The gearing to the driving roll is a simple spur gear arrangement. The roller has two speeds each way, of 2 m.p.h.

and 3½ m.p.h. Gears, shafting and bearings are inclosed in a cast-iron case, while the entire mechanism is inclosed in a sheet metal housing. Both hand and power steering gear are provided, the latter being driven directly from the crank shaft of the engine. Other features are adjustable scrapers on the rolls, phosphor bronze bearings for the axles, and sprinkling, cooling, and gasoline tanks of large capacity.

Sidewalk Protection Bridge Uses Standardized Steel Frame

For protecting sidewalks around buildings under construction or repair, the Patent Scaffolding Co., New York City, has developed a standardized

FIG. 1—SIDEWALK BRIDGE AT STEVENS HOTEL, CHICAGO

steel frame sidewalk bridge. The illustrations show the installation around the new Stevens Hotel in Chicago where 1,000 ft. of this sidewalk bridge is being used. The rental value on this job is about $5,000 a month. The bridge may be either purchased outright or rented from the company. It is claimed to be cheaper than wood scaffording, easier to erect, and more pleasing in architectural appearance.

The bridge is suitable for any desired span and the columns may be shifted to miss obstructions, driveways, etc.

FIG. 2—DETAIL OF COLUMN CONNECTION TO CROSSBEAM

The adjustable span feature is made possible by the clamp connection between the column and the crossbeam. There are no connections that require the drilling of bolt holes.

The unit consists of cross beams of 8-in. I-sections to which are clamped 4-in. steel pipe columns connected in a longitudinal direction by 1½-in. steel pipe. A wooden nailing strip is bolted to the bottom of the cross beam for attaching to the wooden stringers resting on the sill. Wooden panel balustrades are erected between the columns as is usual in all other sidewalk bridges.

New Fordson Roller Convertible Into Three Different Sizes

By means of an arrangement for bolting heavy disks to the wheels, the Wehr Co., Milwaukee, has produced a Fordson road roller which can be made into a three- a four or a five-ton machine. Disks bolted to the rear wheels make it a four-ton roller, and to both the front and rear wheels convert it to a five-ton machine. A feature is that the scarifier has been located ahead of the center of gravity. This means, it is claimed, that the pressure required to force the teeth into the ground does not lessen traction by lifting up on the drive wheels.

The frame is of 8-in. channel steel, and a 3-in. diam. steel shaft is used on the front axle. The equipment is 12 ft.

4 in. long, and 5 ft. wide, and has a 9-ft. wheel base. The width of the rear rolls is 16 in., while the diameter of the rear rolls is 42, and the diameter of the front rolls 30 in. There are seven teeth in the scarifier, 4½ in. apart, having a 7-in. ground clearance when raised.

New Line of Vertical-Screw Testing Machines

A patent was granted Feb. 16, 1926, for the new line of testing machines that has recently been introduced by the Riehle Brothers Testing Machine Co., Philadelphia, Pa. The rotating screw feature on the old designs has been retained, so that no part of the machine projects below the base line. This makes a saving in foundation costs, and permits the installation of a testing machine in many locations, where otherwise it would be impossible.

The machine embodies the three pulling-screws feature, with which it is impossible to load the machine so that each of the three screws does not carry its share of the load. A single screw has been placed on the center line of the machine toward the front or weighing-beam, and the other two screws are spread equidistant from the center line at the back of the machine. This arrangement is said to be most convenient for conducting tests, since the operator is in full view of the specimen at all

times, and the other witnesses of the test can make observations from any one of three points.

In all of the newer designs of this machine the space between the pulling screws has been widened so that there is more table room and additional space for the placing of specimens and instruments for making observations. The load is indicated on a micrometer dial-screw beam up to full capacity of the machine without the use of end weights. The poise is propelled either manually or automatically, and an autographic recorder can be used to produce a stress strain curve.

The illustration shows one of this type of testing machines of 1,000,000 lb. capacity in the laboratory of Ohio State University. This machine has an opening between screws of 38½ in. A similar machine is now being constructed for the American Steel Foundries of the same capacity, but having a clear space of 74 in. between the screws.

Publications from the Construction Industry

Steel Cross Ties — CARNEGIE STEEL Co., Pittsburgh, has issued the ninth edition of its booklet on steel cross ties, which is divided into three sections—mine ties, ties for portable tracks, and ties for steam and electric railroads.

Silent Chain Drive—LINK-BELT Co., Chicago, in its book No. 812, shows the use of its silent chain drive for machine tools. Illustrations and examples of its use under many conditions are given, so that this book supplements the company's book No. 125 which contains list prices, methods of figuring drives, and

complete information about the details of the product.

Gears—FOOTE BROS. GEAR & MACHINE CO., Chicago, has issued a 600-page book containing a catalog of its complete line of gears and speed reducers, and much engineering information on the same, besides mathematical tables and other information on mechanical engineering subjects. It is indexed by subjects on each page, and has a complete cross reference index in the back. It comprises in fact a treatise on modern speed reduction units and industrial gearing, and should be a valuable reference book.

Drill Carriages—SULLIVAN MACHINERY CO., in its Bulletin No. 81-L describes its drill carriage which was developed by D. J. O'Rourke, formerly in charge at one of the portals of the Moffatt Tunnel, and now on the company's staff.

Lumber Waste Prevention—NATIONAL LUMBER MANUFACTURERS' ASSOCIATION, in its "National Lumber Handbook" for June, 1926, publishes descriptions of the prize winning devices in its recent waste prevention contest. Text and drawings explain the devices in detail. Conditions for the 1926-1927 contest are also given.

For Brinell Machines—MOREHOUSE MACHINE CO., York, Pa., has issued a pamphlet dated June, 1926, describing its proving ring for calibrating Brinell hardness testing machines. These proving rings developed by the Bureau of Standards have just been put on a commercial basis, this pamphlet announces.

Power Shovels and Cranes—KOEHRING CO., Milwaukee, Wis., has recently issued a 1926 edition of its catalog and specifications on its size No. 1 shovels, cranes and draglines. Extra complete specifications are given together with photographs and descriptions of the most important of the machine details. Dipper dimensions are considered rather more fully than has heretofore been the practice.

Rock Asphalt—ROCK ASPHALT CORP., Cherokee, Ala., in its 16-page booklet on "Good Roads, How They May Be Made To Last," gives a description of Cherokee Rock Asphalt, telling what it is, how it is used and its advantages in the construction of pavements. Illustrations are given of the company's quarry, plant, testing laboratory and still others of the rock asphalt in use on new and repair road work.

Air Compessors—BUHL CO., Chicago, devotes two new bulletins, Nos. 102 and 103, to its stationary and portable air compressors. Photographs and specifications are given for both types.

Wire Rope—BRODERICK & BASCOM ROPE CO., St. Louis, devotes the May issue of its monthly house organ to a special fiftieth anniversary number. The growth of the company is outlined and the 50-year development of wire rope in a number of industries is considered on separate pages.

Business Side of Construction

FACTS AND EVENTS THAT AFFECT COST AND VOLUME

This Week's Contracts—Week Ago—Same Week Last Year

THE money value of contracts reported in the present issue of *Engineering News-Record* is here compared with the figures for corresponding weeks. Minimum costs observed are: $15,000 for water-works and excavations; $25,000 for other public works; $40,000 for industrial and $150,000 for commercial buildings.

Money Value of Contracts Let—Entire U. S.

Week Ending	Public Work	Private Work	Total Contracts
June 24, 1926	$19,894,000	$23,717,000	$43,611,000
June 17, 1926	29,497,000	27,896,000	57,393,000
June 25, 1925	24,917,000	30,685,000	55,602,000
Heaviest Week			
1926, Mar. 11	13,029,000	73,613,000	86,642,000
1925, Sept. 3	16,215,000	69,424,000	85,639,000
January 1 to date			
1926	511,956,000	850,525,000	1,362,481,000
1925	498,288,000	640,071,000	1,138,359,000

Railways Use Quarter of U. S. Steel Output in 1925

Less Fuel, Lumber and Cement and More Steel and Ballast Required Than During 1924

Fuel, materials and supplies purchased by the Class I railroads of the United States during the year 1925, amounted to $1,392,000,000, a gain of 3.6 per cent over the year preceding and a drop of 19.9 per cent compared with 1923, according to a report of the Bureau of Railway Economics issued May 31, 1926.

These purchases were made directly by the carriers and not through contractors doing construction, equipment building, or other work for the railways.

Of the total output of the nation, the railroads purchased during 1925, the following percentages: bituminous coal, 28 per cent; fuel oil, 20 per cent; forest products, 20 per cent; steel, 25 per cent.

Fuel purchases in 1925 were 2.6 per cent below those of the previous year, yet owing to improved locomotives and other factors, the carriers hauled 6 per cent more freight during the period, as measured in net-ton miles.

Iron and steel requirement for 1925 amounted to $419,254,603, of which $97,728,989 was for rails and $321,525,614 for other iron and steel products. Total steel expenditures increased 15 per cent compared with the year preceding and were 9.8 per cent under 1923. Rail purchases alone were $18,000,000 in excess of 1924 requirements.

Forest products cost the railroads $170,305,031 in 1925, a decrease of 5.8 per cent compared with the preceding year and 26.8 per cent under 1923.

Fewer switching, bridge and cross ties were used in 1925 than in 1924, owing, it is claimed, to increased use of creosoting and other preservative methods. The total timber and lumber footage purchased, however, increased 9.2 per cent during the year.

The carriers required a smaller amount of cement but over 50 per cent more ballast comparing 1925 with the year preceding.

This Week's Special Tabulation of Unit Prices

7. Concrete Masonry

The following unit prices on concrete (1 : 2 : 4) in place are included in the low bidders' estimates on various subway jobs, 1922 to date:

Location	Date	Cu. Yd.	Price per Cu. Yd.
Flushing, N. Y.	Oct. 1922	24,560	$14.75
Brooklyn, N. Y., Bushwick Ave.	Dec. 1922	7,630	15.00
Rochester, N. Y.	May 1923	4,000	21.00
Philadelphia, Pa., Broad St.	July 1923	10,000	15.75
Brooklyn, N. Y., Fourth Ave.	Oct. 1923	20,000	15.80
Brooklyn, N. Y., Sect. 2, R. 70	Apr. 1924	32,660	16.00
Brooklyn, N. Y., Sect. 6-C, R. 8	Oct. 1924	28,050	18.00
Philadelphia, Pa., Broad St.	Oct. 1924	73,000	22.00
New York, N. Y., Sect. 3-A, R. 78	Jan. 1925	29,000	20.00
New York, N. Y., Sect. 2, R. 78	June 1925	29,000	20.00
New York, N. Y., Sect. 6, R. 78	July 1925	47,000	23.00
Philadelphia, Pa., Broad St.	Aug. 1925	63,200	20.00
New York, N. Y., Sect. 1, R. 5	Sept. 1925	21,730	21.00
New York, N. Y., Sect. 4, R. 102	Oct. 1925	29,000	22.20
New York, N. Y., Sect. 3, R. 102	Dec. 1925	27,000	23.00
New York, N. Y., Sect. 2, R. 102	Dec. 1925	23,000	24.00
Sect. 8, R. 78	Mar. 1926	24,450	22.00
Sect. 5, R. 102	Mar. 1926	33,100	22.00

May Borrowings For State and Municipal Improvements 30 Per Cent Under Same Month Last Year

BONDS marketed during May totaled $132,339,182 compared with $109,046,923 of the preceding month and $190,585,636 of May, 1925, according to the *Commercial and Financial Chronicle*. The figures for May, 1925, include the $60,000,000 New York City bonds.

The placings for May, 1926, were augmented by the Detroit, Mich., awards of $22,088,000 and the $18,822,000 bonds of Baltimore, Md., both for general improvement.

Several of the other large issues follow:

$10,082,000 4¼s of Westchester Co., N. Y.; $5,000,000 4½s of Chicago Sanitary District, Ill.; $4,395,000 4s of Boston, Mass.; $4,096,000 4½s of Jersey City, N. J.; $3,351,000 4½s of the State of Georgia, and the $3,500,000 5¼s of the Moffat Tunnel Improvement District, Colo.

In the accompanying table, the rates ranged from 4 to 6 per cent. Most of the placements called for a premium while a few awards went at par or below.

REPRESENTATIVE PUBLIC BOND SALES, MAY, 1925

State	Purpose	Amount	Rate per Cent	Sold For	Basis	Dated	Maturity	Purchased By

Steel Output Heavier Than a Year Ago—Demand Slower

Production of steel ingots for the first five months of this year was 7 per cent greater than for the corresponding period in 1925, according to the American Iron and Steel Institute.

The calculated output, all companies, for May, 1926 was 3,945,336 tons as against 4,123,941 in April and 3,454,971 tons during May of last year. The trend in production is very similar to that of 1925, in that both years show a drop in February, a recovery during the month following and a decline from March to the end of May.

Steel Ingot Output—All Companies

	1926 Tons	1925 Tons
January	4,150,469	4,193,281
February	3,801,776	3,752,352
March	4,488,362	4,194,340
April	4,123,941	3,583,676
May	3,945,336	3,454,971
Five months	20,509,884	19,178,620

Sales of fabricated structural steel for the first five months of this year, totaled 1,024,000 tons, according to the Department of Commerce. This represents about 5 per cent of the steel ingot output for the same period. Last year, structural steel sales for the first five months amounted to 1,000,400 tons or 5 per cent of the steel ingot tonnage produced during those months.

Steel demand, as indicated by unfilled orders on books of the U. S. Steel Corporation, shows a downward tendency similar to that in evidence during the first five months of 1925, with the exception that February of last year gained slightly over the month preceding, while the decline has been consistent since Jan. 1, 1926. Decreased shipments during May prevented the drop in unfilled orders from being more abrupt.

Unfilled Orders On Books of U. S. Steel Corp.

Last Day of	1926 Tons	1925 Tons
January	4,882,739	5,037,323
February	4,616,822	5,284,771
March	4,379,935	4,863,564
April	3,867,976	4,446,568
May	3,649,250	4,049,800

Cement Movement Jan. 1 to June 1 Lighter Than in 1925

Cement is following its regular seasonal characteristics as to production, shipments and stocks, but on a larger scale than at this time last year.

A comparison of the cement movement, Jan. 1 to June 1, 1926, with the same period last year, shows a smaller volume of output and demand thus far in 1926. The drop of one per cent in demand has been met by a cut of 5 per cent in output, thus serving to prevent a tendency toward price decline.

The following is according to the Bureau of Mines:

	Production Bbl.		Shipments Bbl.	
	1925	1926	1925	1926
Jan.	8,856,000	7,887,000	5,162,000	5,672,000
Feb.	8,255,000	7,731,000	6,015,000	5,820,000
Mar.	11,034,000	10,355,000	10,279,000	9,539,000
Apr.	13,807,000	12,401,000	14,394,000	12,961,000
May	15,503,000	16,467,000	16,735,000	17,950,000
Five Months	57,455,000	54,841,000	52,585,000	51,942,000

Mill stocks, for the entire country, amounted to 21,157,000 bbl., May 31.

Weekly Construction Market

THE recent rise in steel and the comparative steadiness of brick and cement have not served to completely check the downward trend in the construction materials' market. Lumber is weak, with the possible exception of long-leaf yellow pine, but the declining tendencies are marked in materials other than the four just mentioned. Douglas fir timbers dropped $2 per M. ft. at Seattle during the past week. Linseed oil continues to move in an upward direction; prices advanced 2c. in Denver and Chicago and 6c. per 7½-pound gallon at New York, since June 17.

Prices are firm with upward tendencies in steel plates and reinforcing bars. Mill quotations dropped 10c. on blue annealed, 25c. on black and 30c. per 100 lb. on galvanized sheets during the last week. Pittsburgh prices on the principal hot-rolled products are: bars, $2 per 100 lb. in carload lots or better; shapes and plates $1.90 per 100 lb., f.o.b. mill. Pig iron declined $1 per ton at Cincinnati, New York, Chicago and Pittsburgh during the week.

Strikes and other building trades labor troubles are in force in seventeen cities throughout the country. During the last week, hoisting engineers in Kansas City, who had been on strike since May 10, returned to work at the old scale of $1.12½ per hr., with a rate of $1.19 to become effective Sept. 1, 1926. The engineers, together with the carpenters, had demanded $1.25; the latter are being hired back at $1.12½ per hr. in many instances, on an open shop basis, with little disorder reported.

Beginning July 1, Chicago bricklayers will receive $1.62½ per hr., against the old rate of $1.50. Plasterers have already been granted a similar advance.

	New York	Atlanta	Dallas	Chicago	Minneapolis	Denver	San Francisco	Seattle	Montreal

Explanation of Prices—Prices are to contractors in carload lots unless other quantities are specified. Increases or decreases from previous quotations are indicated by + or — signs. For steel pipe, the prevailing discount from list price is given; 45-5% means a discount of 45 and 5 per cent.

New York quotations delivered, except sand, gravel and crushed stone, alongside dock; common lump lime in 280-lb. bbl. net and hydrated lime, f.o.b. cars; tile "on trucks"; linseed oil and cast-iron pipe f.o.b.
Labor—Concrete laborers' rate, 93¾c.; building laborers, 90⅝c.

Chicago quotes hydrated lime in 50-lb. bags; common lump lime per 180-lb. net. Lumber, sand, gravel and stone f.o.b.; price on fir is quoted instead of pine.

Minneapolis quotes on fir instead of pine. Brick, sand and hollow tile delivered. Cement on cars. Gravel and crushed stone quoted at pit. Common labor not organized.

THIS limited price list is published weekly for the purpose of giving current prices on the principal construction materials, and of noting important price changes on the less important materials. Moreover, only the chief cities are quoted.

Valuable suggestions on costs of work can be had by noting actual biddings as reported in our Construction News section.

The first issue of each month carries complete quotations for all construction materials and for the important cities. The last complete list will be found in the issue of June 3 the next on July 1.

Denver quotes on fir instead of pine. Cement "on tracks"; gravel and sand at pit; stone on cars; lime, brick, hollow tile and lumber on job. Tile price is at warehouse. Linseed oil, delivered in wooden bbl. Common lump lime per 180-lb. net.

Atlanta quotes sand, stone and gravel per ton instead of cu.yd. Common lump lime per 180-lb. net.

Dallas quotes lime per 180-lb. bbl. Steel, cement, cast-iron pipe and crushed stone f.o.b. cars, other materials delivered.

San Francisco quotes on Heath tile, size 5½ x 8 x 11½. Prices are all f.o.b. warehouses except C.-I. pipe, which is mill price plus freight to railway depot at any terminal. Common lump lime per 180-lb. net. Lumber prices are to dealers in yards at San Francisco, for No. 1 fir, common.

Seattle quotes on Douglas fir (delivered) instead of pine. Lump finishing lime per 180-lb. net. Brick and hollow building tile delivered. Hydrated lime in paper sacks. Sand and gravel at bunkers.

Montreal quotes on fir lumber. Sand, stone, gravel and lump lime per ton. Stone and tile are delivered; sand, gravel, lime and cement on siding; brick f.o.b. plant; steel and pipe at warehouse. Hollow tile per ft. Cement price is in Canadian funds (the Canadian dollar stands at 100.156). Bag charge is 80c. per bbl. Discount of 10c. per bbl. for payment within 20 days from date of shipment. Steel pipe per 100 ft. net; 2½ in., $37.83.

Business Briefs

Call money quoted at 4¼ per cent, June 22; year ago 4½ per cent.

Time loans: Sixty-ninety days, 4⅛; four-six months, 4¼ per cent.

Commercial paper: Best names 4 per cent; other names, 4¼ per cent.

CONSTRUCTION NEWS

Engineering News-Record, Jan. 7, 1926

Some of the Week's Large Projects

AMONG the announcements for the current week of proposals, bids desired and received and contracts awarded, are the following big jobs:

Proposed Work

Hospital buildings, Los Angeles, Calif., Bd. Supervs., Los Angeles Co., had plans prepared, first unit, $5,750,000.

Refinery and warehouse, Brooklyn, N. Y., American Sugar Refining Co. plans building, $5,000,000.

Hotel, New York, N. Y., Hotel Properties, Inc., having plans prepared, $2,500,000.

Hotel, Miami Beach, Fla., G. R. K. Carter, pres., having plans prepared, $[illegible],500,000.

Office, Brooklyn, N. Y., Montague-Court Corp. having plans prepared, $2,350,000.

Courthouse, Newark, N. J., Essex Bd. Freeholders, having plans prepared, $2,100,000.

Hydro-Electric plant, Sand Springs, Okla., C. Page plans plant, $2,000,000.

Club and hotel, Miami, Fla., All States Society Assn. having plans prepared, $2,000,000.

Cotton mill, Kannapolis, N. C., Cannon Mfg. Co. plans mill, $2,000,000.

Hotel, St. Louis, Mo., H. J. Rush having preliminary plans prepared, $2,000,000.

Hospital and nurses home, New York, N. Y., Lincoln Hospital having plans prepared, $1,750,000.

Theatre, store and office, Los Angeles, Calif., Warner Bros. had plans prepared, $1,500,000.

Apartment, Chicago, Ill., M. S. Plotke having plans prepared, $1,500,000.

Bids Wanted On Big Jobs

Factory, Port Ivory, N. Y., Proctor & Gamble soon takes bids, $3,000,000.

Theatre, San Antonio, Tex., Famous Players-Lasky Corp., about Jan. 20, $1,500,000.

Dormitories, Totowa, N. J., Jan. 12, B. G. Lewis, Comr., $1,000,000.

Jail, Jersey City, N. J., Jan. 28, Bd. Freeholders, Hudson Co., $1,000,000.

Large Contracts Let During Week

Irrigation work, Mexico City, Mexico, Mexican government to J. G. White Eng. Corp., N. Y. C., $30,000,000.

Sewage treatment plant, Cleveland, O., to Mellon-Stuart Co., Pittsburgh, Pa., $2,659,211.

Office, Detroit, Mich., A. Kahn, archt., to H. G. Christman Co., $2,500,000.

Cement plant, St. Stephens, Ala., Santa Rosa Portland Cement Co., to H. K. Ferguson Co., Cleveland, O., $2,500,000.

Storm drain, Los Angeles, Calif., Bd. Pub. Wks. to P. R. Gadd, $2,324,000.

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Good Pipe Joints

Has it occurred to you why so many water works men are using Leadite for making joints in all sizes of cast iron water mains?

There are many sound reasons.

The most important reason is that experience has proven Leadite joints are good joints and improve with age.

The other reasons relate to saving in the cost of material and labor.

Leadite facilitates rapid completion of the work.

Leadite saves money from every angle of pipe laying.

Anyone can make Leadite joints; Leadite is very easy and simple to handle.

Yarn the joint, pour it full of molten Leadite, and the joint is finished.

If you have never tried Leadite, do not pass up a good thing without investigating it.

Give Leadite a trial.

Leadite resists electrolysis.

Leadite does not corrode or rust.

Leadite has been successfully tested and used for over 30 years.

Thousands of miles of pipe jointed with Leadite are in service.

The up-to-date water works man specifies and uses LEADITE.

Laying 36-in. c. i. Water Mains With Leadite Joints

LEADITE saves at least 75%

LEADITE is the pioneer self-caulking material for c. i. pipe

Be Sure It Is LEADITE and Accept No Imitations

THE LEADITE COMPANY, Inc.
1511 Land Title Building, Philadelphia, Pa., U. S. A.

Waterworks

PROPOSED WORK

Mass., Lowell — Plans new waterworks. $100,000. S. Keerney, city engr.

N. Y., Woodlawn (Sta. Buffalo)—Western New York Water Co., Electric Bldg., Buffalo, making plans 16 m.g. p.d. filtration plant, 1 m.g. stand pipe, distribution mains, etc., here. To exceed $200,000.

N. C., Hickory — Western Power Co. granted permission to City to construct waterworks plant, on Catawba River, which is controlled by them. $100,000.

Fla., Homestead—Made plans 20 mi. 6 and 8 in. c.i. mains in various streets. $300,000. C. W. Murray, consult. engr.

Fla., Miami Beach — Voted $750,000 bonds, waterworks.

Miss., Okolona — City takes bids on or before Feb. 5, 100,000 gal. steel standpipe, on 125 ft. steel tower. A. C. Rowe, city clk.

O., Avon Lake—Bd. Comrs. Lorain Co. (Elyria) made plans and soon take bids mains in Sewer Dist. 1. $250,000. G. B. Gascoigne, Leader-News Bldg., Cleveland, engr.

O., Cincinnati—Hamilton Co. plans 6,700 ft. 4 and 6 in. c.i. mains, etc. in Water Supply Line 32, Dist. 1, Brockwell Park Sub-division. $15,010. L. C. Boyatt, Court House, engr.

Ill., Collinsville—Plans election in January, $40,000 bonds, repairing and improving waterworks, incl. 14 in. additional main from Jefferson Ave. to water tower, etc.

Wis., Racine—Water Dept., F. M. McElroy, mgr., soon takes bids c.i. mains, pig lead, specials, curb boxes, curb cocks, etc.

Kan., Eldorado — Defeated $400,000 bonds, for reservoir, gravity flow line, etc. Will probably resubmit soon. Black & Veatch, Mutual Bldg., Kansas City, engrs. Noted Oct. 15.

Kan., Lenexa—Election Jan. 12, $42,000 bonds, new waterworks. Shockley Eng. Co., 800 Graphic Arts Bldg., Kansas City, Mo., engrs. Noted Sept. 3.

Neb., Dawson — Soon takes bids 35,000 gal. tank for waterworks. $22,000 bonds voted. Noted Dec. 17.

Mo., St. Louis—Soon takes bids rein.-con., rubblestone and cut stone filtration plant of 20 units, 80 m.g. daily capacity, piping, etc., at Howard's Bend Waterworks Plant on Missouri River. $1,225,000. E. E. Wall, City Hall, dir. Noted Oct. 8.

Ark., Searcy—Making preliminary plans new mechanical filter plant, pipe line, pumps and wash water tank. $70,000. C. W. Watson, city supt. Engineer not announced. Noted July 23.

Tex., Amarillo—Making plans 3,000,000,-000 gal. storage reservoir, 15 mi. south west of here, 12 in. concrete flow line, 5 m.g. rein.-con. distributing reservoir, 6 shallow wells, six 1,000 g.p.m. deep well and two 3,000 g.p.m. horizontal pumps, Chicago or Des Moines, 500,000 gal. tank on 100 ft. tower. $1,750, 00. Kiersted & Stringfellow, 611 Interstate Bldg., Kansas City, Mo., engrs. H. B. Jones, city engr. Noted Mar. 19.

Tex., Canyon—Election Jan. 11, $15,000 bonds, additional mains, pumping equipment, etc. C. M. Harrison, mayor.

Tex., Nacogdoches—Election soon $45,000 bonds, waterworks improvements. Address W. I. Baker, mayor.

Tex., Toyahvale—Koch & Fowler, engrs., Central Bank Bldg., Dallas, making plans complete waterworks and sewerage systems and disposal plant, here, for Timber Mts. Development Corp., c/o L. I. Starling, pres., 301 Fidelity Union Bldg., Dallas. $50,000.

Okla., Davenport—Election Jan. 6, $25,-000 bonds, waterworks extensions, incl. 8,860 ft. 4 and 6 in. c.i. mains, well, pump, fire pump and equipment, etc. Gantt-Baker Co., 1116 West Main St., Oklahoma City, engrs.

Okla., Sperry—City Council making plans new waterworks. $40,000. Engineer not selected.

Calif., Inglewood — Defeated $65,000 bonds, extending waterworks. Noted Nov. 19.

Calif., Riverside—Making plans approximately 8 mi. 42 in. pipe line for water supply. L. Nafzger, city engr.

BIDS DESIRED

N. Y., Long Island City—Jan. 12, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains Douglaston Parkway, Winchester Blvd., Braddock, Jamaica, and East Williston Aves., 255th St., Bee and Little Neck Rds., here.

N. Y., St. George — Jan. 12, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Beach, Bryant, Carlton, Cromwell, Fiedler, Fremont, Greeley, Kingsley Sts., here. Former bids withdrawn. Noted Dec. 17.

N. J., Vineland—Jan. 18, by Bd. Institutions & Agencies, Trenton, B. G. Lewis, comr., 50,000 gal. steel water tank and tower, at New Jersey Home for Feeble Minded, here. A. B. Mill, State Office Bldg., Trenton, engr.

Md., Towson — Jan. 4, by Comrs. Baltimore Co., Court House, mains, etc. as listed in Proposal 9-W, in Metropolitan Dist. A. E. Walden, ch. engr.

Fla., Ft. Lauderdale—Davenport & Rich taking bids 18 mi. 2- to 16-in. c.i. mains, etc., in Westwood Heights sub-division. $120,000. City appropriates $40,000 toward cost. J. H. Rhein, Ft. Lauderdale, engr.

Mich., Detroit—Dept. Pub. Wks., G. H. Fenkell, genl. mgr., taking bids 6- to 36-in. c.i. mains; adv. E. N.-R. Jan. 7.

Minn., St. Paul—Jan. 18, by C. J. Ries aud. Ramsey Co., 2 tubular wells for pumping water into Lakes Josephine and Gervais. Plans later pump houses and pumping equipment.

Tex., Abilene — City Comn. taking new bids waterworks settling basin. $18,000. Former bids rejected. O. K. Hobbs, city engr. E. P. Shoch, c/o State University, Austin, consult. engr. Noted Dec. 10.

Tex., Port Arthur — Jan. 21, by City Comrs., City Hall, water purification plant. Former bids rejected. Burns & McDonnell Eng. Co., Interstate Bldg., Kansas City, Mo., engrs. Noted Dec. 31.

BIDS RECEIVED

Wis., Milwaukee—Central Bd. Purchases, Dec. 30, couplings, meter, corporation and curb cocks, from Mueller Mfg. Co., Decatur, Ill., $12,344; 500 fire hydrants, from R. D. Wood & Co., 400 Chestnut St., Phila., Pa., $39,860; stop cock boxes, covers, top sections, bases and middle sections, from W. P. Taylor Co., 218 Ellicott Bldg., Buffalo, N. Y., $6,112; gate and tapping valves, from Chapman Valve Mfg. Co., 650 West Lake St., Chicago, Ill., $31,130; 45,000 lb. liquid chlorine, from Pennsylvania Salt Mfg. Co., 1000 Widner Bldg., Phila., Pa., $4,156, all for Water Dept.

Tex., Kemp—Waterworks and sewers in various streets, from W. H. Cramer, 3710 Oak Grove St., Dallas, $59,627; surface reservoir for same, from W. P. O'Connor, Preston Rd., Dallas, $22,400. Noted Dec. 17.

CONTRACTS AWARDED

N. J., Belmar — City Council, c.i. mains, etc. along D St. between 5th and 15th Sts., to J. T. Smith, Spring Lake, $69,078.

Mich., Detroit — Dept. Water Supply, 198,200 lin.ft. 6 in. and 240,200 lin.ft. 8 in. centrifugal pipe f.o.b. Detroit, to United States Cast Iron Pipe & Fdry. Co., Pearl St., Burlington, N. J., $0.72 and $1.02 per lin.ft. respectively; 2,000 tons 12 in. Class "C" c.i. pipe to Lynchburg Fdry. Co., Peoples Bank Bldg., Lynchburg, Va., $45.30 per ton; 2,000 tons 12 in. and 4,000 tons 16 in. class "C" c.i. pipe, to B. Nicholl & Co., 294 Madison Ave., New York City, N. Y., $45.32 and $45.12 respectively.

Kan., Wellington—Waterworks, to Panhandle Constr. Co., Lubbock, approximately $370,000.

Neb., Grand Island—H. E. Clifford, city clk., two 700 hp. water tube boilers, 2 mechanical stokers, etc., to Kent Eng. Co., 423 South 5th St., Minneapolis, Minn. $57,-600. Noted Dec. 3.

Mo., St. Louis—Bd. Pub. Serv., 208 City Hall, 170 tons 12 in. c.i. pipe, to Natl. Cast Iron Pipe Co., Tarrant City, Birmingham, Ala., at $47.60 per ton; 233 tons special castings, to G. J. Fritz Fdry. & Mchy. Co., 2018 South 3rd St. at $77.50 per ton; 400 fire hydrants and 465 valves and boxes, etc., to Amer. Fdry. & Mchy. Co., 11th and Hebert Sts., $43.58 each and $16,124 respectively; standard guage railroad with switch tracks, etc., at Howards Bend, St. Louis Co., to E. C. Bowman, Hall and Breman Aves., $12,517. Noted Dec. 24.

Mo., Senath—City Clerk, 75,000 gal. tank on tower, pump house, 2 deep wells with turbines, also sewage disposal plant and 3.4 mi. 8- and 12-in. vitr. clay sewers, etc., to Queal Constr. Co., Mayfield, Ky. Engrs. est. $65,000. Noted Dec. 17.

Ark., Hot Springs — Hot Springs Pub. Utilities Co., 200 m.g. convex type rein.-con. reservoir, 330 ft. long, 53 ft. high and 33 ft. wide at bottom, to Sanderson & Porter, 72 West Adams St., Chicago, Ill.

Ark., Paris—Comrs. Waterworks Impvt. Dist. 4, 360,000 gal. capacity filter plant 56 x 56 x 11 ft. rein.-con. settling basin, etc., to Pioneer Constr. Co., New York Life Bldg., Kansas City, Mo., $47,832. Noted Dec. 3.

Tex., Abilene—Cast iron pipe, to Amer. Cast Iron Pipe Co., Praetorian Bldg., Dallas, $56,304.

Tex., Ft. Worth—To U. S. Cast Iron Pipe & Fdry. Co., Magnolia Bldg., Dallas, 6 in. De Lavaud pipe, $173,883, 8 in. $53,146, and 10 in. $26,820; to Amer. Cast Iron Pipe Co., Praetorian Bldg., Dallas, 12 in. Class "B" or De Lavaud pipe $9,648 and 20 in. $62,816; to Barney Smith Mchy. Co., Joseph Bldg., Dallas, 6 in. Vogt valves, $9,408; to Rensselaer Valve Co., Dallas, Corey fire hydrants, $32,368. Grand total $358,441. Noted Dec. 24.

Tex., Frost—W. Smith, mayor, pipe line for waterworks improvements, to Municipal Excavator Co., 800 North Crawford St., Dallas, $29,463. Noted Dec. 31.

Tex., Port Arthur — City, J. P. Logan, mayor, centrifugal pumps for filtration plant, Contr. 3, to Allis Chalmers Mfg. Co., Maison Blanche Bldg., New Orleans, La., $14,375; filter equipment, Contr. 2, to Robert Filter Mfg. Co., Darby, Pa., $29,-770. Noted Dec. 31.

Tex., Wellington — C. C. Small, mayor, waterworks extensions, incl. 14,080 universal and 18,975 ft. 6- to 10-in. c.i. pipe, etc., to Panhandle Constr. Co., Lubbock, $43,-159. Noted Oct. 1.

Okla., Tulsa — Water Impvt. Dist. 5 of Tulsa Co., 25 mi. 4- to 10-in. Class 150 De Lavaud c.i. mains, to H. L. Cannady & Co., 1122 South Lewis St., $151,500. Noted Dec. 3.

Okla., Turley—City, Waterworks Impvt. Dist. 3, 4 and 6 in. c.i. pipe, to L. G. James, Vinita, $32,846.

Sewers

PROPOSED WORK

Conn., New Britain—Making plans 6- to 12-in. sewers in Maple Hill Section. $100,-000. L. A. Oldershaw, 259 Main St., engr.

N. Y., Akron—Soon takes bids sewerage system. To exceed $100,000.

N. C., Salisbury—See "Unclassified."

Fla., Clearwater — See "Streets and Roads."

Fla., Homestead—Made plans 20 mi. 8- to 24-in. vitr. sewers in various streets. $350,000. C. W. Murray, consult. engr.

Fla., Miami—Plans sewers in Miami Rd., Southwest 1st Ave., 8th, 9th, 10th, 11th and 12th Sts., 1,100 ft. 54 x 30 in., 355 ft. 42 x 30 in., 350 ft. 36 x 30 in., 650 ft. 36 x 24 in., 320 ft. 34 x 24 in., 350 ft. 28 x 18 in., 655 ft. 28 x 15 in., 325 ft. 24 x 18 in. and 640 ft. 24 x 15 in. concrete sewer (rectangular section), 2,160 ft. 12- to 24-in. vitr. pipe, etc., $90,000; in Southwest 8th St., Southwest 3rd, 2nd and 1st Aves., 700 ft. 24 x 42 in., 700 ft. 30 x 24 in., 450 ft. 42 x 48 in., and 550 ft. 28 x 18 in. concrete sewer (rectangular section), 3,500 ft. 12- to 24-in. vitr. pipe, etc., $75,000. C. S. Nichols, Highland Park, Miami, engr.

Fla., Miami — Soon takes bids storm sewer, 1st St. between 2nd Ave., 1st, 2nd and 3rd Sts., in Bay Shore Dist. (downtown), 800 ft. 72 x 42 in. rein.-con., and 1,100 ft. 72 x 36 in. vitr. clay pipe, etc. $90,000. C. S. Nichols, Miami, engr.

Fla., Miami Beach—Voted $430,000 bonds, sanitary sewers and $805,000 bonds storm sewer in various streets.

O., Cincinnati—Hamilton Co. plans sanitary sewers in Sewer 16, Dist. 1, Brockwell Park Subdivision, 10,041 ft. 6- to 10 in. vitr. clay and 1,525 ft. 8 in. c.i. pipe, 13 manholes, etc. $31,644. L. C. Boyatt, Court House, engr.

Mich., Detroit—Dept. Pub. Wks. making plans 30,000 lin.ft. 10 ft. cylinder in Emerson Rd. from River Rouge south of Michigan Ave. to Schoolcraft Ave., $1,800,-000; 5,200 lin.ft. 12½ ft. in Emerson Rd. from Schoolcraft Ave. to Grand River,

See proposal advertisements on page 220, Advertising Section.

Noted Dec. 24.

N. C., Durham—City, 8- to 12-in. sewers in various streets, from Hughes-Keegan Co., Real Estate Exch. Bldg., Richmond, Va., $117,398. Noted Dec. 24.

O., Cleveland—Bd. Comrs. Cuyahoga Co., 3,500 ft. 8 and 36 in. sewers in Mayfield Rd. and Belrose Ave., from Joseph Co., Prospect-Fourth Bldg., segmental block $24,151, brick $24,431, and concrete $23,956. Noted Dec. 17.

Wis., Milwaukee — J. H. Fowles, secy. Metropolitan Sewerage Comn., 508 Market St., Dec. 30, equipment for Mud Creek low level sewage booster station, from Yeomans Bros. Co., 1433 Dayton Ave., Chicago, Ill., $9,700. Noted Dec. 24.

Wis., Milwaukee—Dept. Pub. Wks., R. E. Stoelting, comr., Dec. 30, 3rd section storm sewers in 26th St. between Prairie and Cherry Sts., also McKinley Blvd. and Cold Springs Ave. between 26th and 30th Sts., from Hoag & Rollins Co., 719 West Liberty St., Louisville, Ky. $286,826. Noted Dec. 24.

Wis., Milwaukee—Dept. Pub. Wks., R. E. Stoelting, comr., Dec. 28, 1st section storm sewers in 26th St. and 26th St. extension from North Menomonee Canal to Grand Ave., from Wenzel & Henoch Constr. Co., 498 27th St., $332,198. Noted Dec. 24.

Calif., Glendale—From B. D. Zaich, 220 West 56th St., Los Angeles, 25,488 ft. 8 in. vitr. sewer $1.15 per ft., and 14,000 lin.ft. house sewers $0.99, etc., total approximately $50,000.

Calif., Long Beach—Sewer in Esther St. (Pump Dist. 8), 53,155 ft. 8 in. pipe and 16,777 ft. cement pipe, etc., from R. N. Nikcevich, 208 Roycroft Ave., $161,229. Noted Dec. 10.

Calif., San Diego—From DeWaard & Son, Granger Bldg., sewers in Ocean Beach and Pt. Loma Heights, 2,963 lin.ft. 8 in. cement pipe $1.20 per lin.ft. 7,270 lin.ft. 6 in. cement pipe $1.10 336 lin.ft. "B" flexible joint cast iron pipe 8 in. diam., etc. $7,996, total $25,905.

CONTRACTS AWARDED

N. Y., Brooklyn — J. A. Guider, pres. Brooklyn Boro, Boro Hall, **(e. e. means engineers estimate)**, sewer in Nostrand Ave., to Peconi Constr. Co., 170 18th St., 78% e. e. $13,143, in East 12th St., to Nazzaro & Guerriero, West 9th St., 70.94% e. e. $8,594, in Autumn and Sutter Aves., to R. Iovine, 62% e. e. $600, in East 14th St., and repairing sewer in Raymond St., to Manmill Constr. Co., 2035 Douglas St., 64% e. e. $4,844 and $4,240 respectively. Noted Dec. 31.

Pa., Overbrook (Phila. P. O.) — Boro Council, Saw Mill Trunk Sanitary Sewer, 10,200 ft. 33 and 36 in. rein.-con. pipe, etc., to R. H. Thomas, 332 Boquet St., Pittsburgh. Noted Nov. 19.

Pa., Phila.—Dept. Pub. Wks., Bureau of Engineering main sewer in Rowland Ave. and discharge pipes in South East Sewage Pumping Station and Eagle Creek, to V. S. Campellone, 812 West Venango St., $6,767 and $3,000 respectively; intercepting sewer along Tacony Creek, to Municipal Paving Co., 702 Catharine St., $84,785; branch sewers in Coleman and Woolsten Sts., to J. J. McHugh, 1617 Race St. $2,031 and $4,886 respectively, 52nd St., to A. Mattia, 310 North 65th St. $2,935, Lebanon St., to F. S. Buckins, 4050 Kensington Ave. $5,000, and Sanger St., to McIntyre Constr. Co., 6811 North Franklin St. $1,702. Grand total $111,106. Noted Dec. 31.

N. C., Durham — For 70 siphons, to Pacific Flush Tank Co., 149 Bway., New York City, $1,750; 370 manhole covers and dust pans to Carolina Fdry. & Machine Co., Winston-Salem, $3,308; pipe, to Pomona Terra Cotta Co., Winston-Salem, $34,866. Grand total $39,924.

O., Cleveland—A. K. Hoare, comr. Purchases & Supplies, Southerly Sewage Treatment Plant, in East 49th St. and Canal Rd., (exclusive of covered sludge beds and intercepting sewer), 200,000 cu.ft. brick, 42,000 cu.yd. concrete, 200,000 cu.yd. excav., 2,000 tons reinforcing, 900 tons c.i. pipe, and 97,000 cu.yd. crushed stone, to Mellon-Stuart Co., Oliver Bldg., Pittsburgh, Pa., $2,659,211. Noted Nov. 12.

Mo., Senath—See "Waterworks."

Tex., Abilene—Sewers in various streets, to R. J. Estep & Co., Wilson Bldg., $31,037; sewer pipe, to San Antonio Sewer Pipe Wks., Bedell Bldg., San Antonio, $8,317. Noted Dec. 10.

Tex., Nacogdoches—J. Thackwell, engr., Lufkin, sewerage system and disposal plant, to E. L. Dalton, 319 Wilson Bldg., Dallas, $31,000. Engrs. est. $35,000. Noted Dec. 24.

Calif., Los Angeles—For North Outfall Sewer, Sect. 37, pre-cast concrete pipe, to G. W. Kemper, P. O. Box 156, Alhambra, $34,955.

Calif., Los Angeles — Constructing Boyle Heights Storm Drain 3, to Francisco & Ellington, 1250 West 5th St., $596,000. Noted Dec. 31.

Calif., Los Angeles—Bd. Pub. Wks., Dec. 23, 115,000 ft. Jefferson St. Storm Drain, to P. R. Gadd, Spring Arcade Bldg., $2,324,000. Noted Nov. 12.

Calif., Victorville — Directors Victorville Sanitary Dist., lateral sewers in various streets, to F. W. Secombe, San Bernardino, $29,950. Noted Dec. 24.

Ont., Forest Hill—Village, 4,500 ft. 45 in. concrete sewer in tunnel, to J. Maguire Contg. Co., Ltd., 196 Spadina Rd., Toronto, $55,000. Noted Dec. 10.

Ont., Toronto—East York Twp., 925 ft. 12 in. sewer in Gatwick Ave., to Murphy Contg. Co.; 8 Wychwood Park, 323 ft. 12 in. sewer in Frater Ave. and 410 ft. 12 in. in Woodbine Ave., to Mitchell Constr. Co., 55 Greenside Ave.; 300 ft. 24 in. and 1,080 ft. 27 in. in Gowan Ave. to Nat. Contg. Co., 9 Garnock Ave.; 2,365 ft. 12- to 21-in. sewer in King Edward Ave., 400 ft. 18 in. in Wallington Ave., 925 ft. 12 in. in Epsom Ave., and 535 ft. 12 in. in Keene St., to Dept. Pub. Wks. by day labor Engs. est. $100,000.

Bridges

PROPOSED WORK

Pa., Manayunk (Sta. Phila.) — Montgomery Co. (Norristown), plans bridge over Schuylkill River, here. $500,000.

See proposal advertisements on page 220, Advertising Section.

BUSINESS street, residence avenue or country highway, they are all the same from the viewpoint of the *Tax-Payer's Pocketbook.* Only one type of pavement available at reasonable first cost has repeatedly proved its ability to *outlast the bonds issued to pay for it*—VITRIFIED BRICK.

Think this over—name any street or road in your neighborhood *not paved with brick* which has given even 20 years of service. And then recall the fact that here in the United States there are brick pavements in use which were laid 35 to 45 years ago, while Holland is using brick pavements built at Napoleon's order.

Which, to your mind, is the economical policy in paving—to build with "cheap," short-lived materials which will require continuous repair and may not last even 10 years—or to pay an only slightly higher first cost for vitrified brick and get a pavement that will outlast the bonds and may even outlive you?

VITRIFIED Brick PAVEMENTS

OUTLAST THE BONDS

NATIONAL PAVING BRICK MANUFACTURERS ASSOCIATION, ENGINEERS BLDG., CLEVELAND, OHIO

Bridges (Continued)

North Carolina—State Hy. Dept., Raleigh, making plans rein.-con. bridges on Project 931 and 932, Graham Co., $100,000; on Project 664, Richmond Co., $35,000; on Project 479, Wake Co., $35,000; and on Project 240, Johnston Co., $100,000. C. M. Upham, Raleigh, engr.

North Carolina—State Hy. Comn., Raleigh, making plans rein.-con. bridges, etc., on Project 303, Bladen Co. $50,000. C. M. Upham, Raleigh, engr.

North Carolina—Carolina Power & Light Co., Raleigh, plans rein.-con. bridge to replace bridge over Yadkin River, at Swift's Island, which will be made impassable by proposed development. $300,000. P. A. Tillery, genl. mgr.

Fla., Miami—Making plans 5 bridges over Miami River, one at Southeast 2nd Ave. $500,000, one at Southwest 2nd St. $350,000, one at Northwest 2nd St. $350,000, one at 12th Ave. $340,000, and other 17th Ave. $340,000. Howard, Harrington & Ash, Kansas City, Mo., consult. archts.

Kan., Holton — Jackson Co. soon takes bids Straight Creek Bridge, 70 ft. truss span, 20 ft. wide, at Sta. 439 plus 30; Muddy Creek Bridge, 90 ft. truss span, 20 ft. wide, at Sta. 71 plus 80; and Spring Creek Bridge, 80 ft. truss span, 20 ft. wide, at Sta. 317 plus 80, all on Federal Aid Project 291-D. Kansas Eng. Co., 601 Kansas Ave., Topeka, engrs. P. W. Wright, Court House, co. engr. Noted May 7.

Kan., Independence — Montgomery Co. making plans one 120 ft. and three 100 ft. span concrete bridge, on Federal Aid Project 199, Sect. C. H. K. Hibbard Co., Independence, engrs.

Tex., Cold Springs — See "Streets and Roads."

Tex., Georgetown — See "Streets and Roads."

Tex., Madisonville — See "Streets and Roads."

Tex., New Braunfels — City and Comal Co. plan 2 span, 90 ft. steel, rein.-con. and timber bridge over Comal River, on Highway 46. $50,000. J. G. Morgan, c/o City Hall, engr. Noted Aug. 27.

Okla., Enid—See "Streets and Roads."

Calif., Los Angeles—City Council plans to issue $500,000 bonds, for bridges.

BIDS DESIRED

Miss., Jackson—See "Streets and Roads."

Miss., Waynesboro — See "Streets and Roads."

Mich., Detroit — Jan. 19, by Wayne Co. Road Comn. Real Estate Exch. Bldg., housing and enclosure walls for concrete and stone double leaf trunnion bridge over River Rouge, at Dix Ave. H. A. Shuptrine, 1103 Real Estate Bldg., engr. Noted May 28.

Wis., Milwaukee—See "Bids Received."

Kan., Eldorado — Jan. 14, by Clerk Butler Co., two 25 ft. and one 29½ ft. deck girder span bridge, three 8 x 30 ft., eight 8 x 30 ft. and three 6 x 28 ft. box culverts, on Federal Aid Project 239-D. E. S. Elcock, Court House, engr. Noted Dec. 17.

Kan., Eureka — Jan. 15, by Greenwood Co., one 120 ft. concrete arch and two 40 ft. deck girder span bridge, 1,365 yd. concrete, 97,887 lb. reinforcing and 6,255 lb. structural steel; two 18 ft. span bridge, 190 yd. concrete and 5,569 lb. steel; and two 16 ft. span bridge, 254 yd. concrete and 4,434 lb. steel. R. L. Marlin, Eureka, co. engr.

Texas—See "Streets and Roads."

Tex., San Antonio—Feb. 3, at office judge Bexar Co., 215 ft. rein.-con. girder type bridge over Leon Creek $75,000, 86 ft. rein.-con. girder bridge over Medio Creek $27,000, two 129 ft. rein.-con. girder approaches and remodeling present 150 ft. steel truss bridge over Medina River $29,000, all foregoing on Quintana Rd. in Precinct 1; 93 ft. concrete girder bridge over Calaveras Creek, on Elmendorf-Adkins Rd., in Precinct 4, $25,000; 117 ft. concrete girder bridge over Calaveras Creek, on Elmendorf-Lavernia Rd., in Precinct 4, $30,00. A. C. Pancoast, 102 Turner St., San Antonio, co. engr.

BIDS RECEIVED

N. Y., New York—Dept. Plants & Structures, Municipal Bldg., Dec. 28, reconstructing High Bridge over Harlem River, between Manhattan and Bronx Boros, from P. T. Cox Contg. Co., 154 Nassau St., $1,481,400. Noted Dec. 10.

Md., Baltimore—Bd. Awards, 800 ft. steel and concrete bridge, Smith Extension from Falls Rd. to east end of South Ave., from J. L. Robinson Constr. Co., 1130 West Lafayette Ave., $246,585. Noted Dec. 17.

Ill., Rockford—W. Shimmin, chn. Finance Com., Dec. 17, 800 ft. rein.-con. bridge over Rock River, from Powers & Thompson Constr. Co., Joliet, $279,400. Noted Dec. 3.

Wis., Milwaukee—Central Bd. Purchases, fabricating and delivering structural steel for Huron St. Bridge, from Milwaukee Bridge Co., 1400 34th St., $28,320. Work will be done by city forces.

Wis., Milwaukee—Dept. Pub. Wks., R. E. Stoelting, comr., Dec. 30, reconstructing new pile and concrete bridge abutment and timber protection pier at Cherry St. Bridge, from E. E. Gillen Co., 288 East Water St., $26,690. Noted Dec. 31.

Tex., Breckenridge — See "Streets and Roads."

CONTRACTS AWARDED

Fla., Bradenton — Comrs. Manatee Co., Long Boat Inlet Bridge, 675 ft. long, pile trestle, between Long Boat and Anna Maria Keys, to R. H. Parks Co., Punta Gorda, $30,795.

Tennessee—State Dept. Highways & Pub. Wks., Nashville, 3 rein.-con. bridges each over 20 ft. span, and reconstructing overhead crossing, on Buford-Pulaski Rd., to Globe Constr. Co., Evansville, Ind., $39,795; and 2 rein.-con. bridges on Buford-Maury Co. line Rd., to W. L. Hailey & Co., Nashville, $13,396; both on Federal Aid Project 40-C, Giles Co. Noted Dec. 11 under "Streets and Roads."

Ohio—See "Streets and Roads."

Ohio — Dept. Highways & Pub. Wks., Columbia, steel bridge on Sect. "J" Hamden-Andover Rd., Ashtabula Co., to Reedy Bros., Warren, $26,833; rein.-con. box culverts on Sect. "K" Gallipolis-Pomeroy Rd., Gallia Co., to Miller Bros., Gallipolis, $23,109. Noted Dec. 31.

Indiana—J. D. Williams, dir. State Hy. Comn., Indianapolis, **(r.c.a. means rein.-con. arch, r.c.g. rein.-con. girder, S. R. State Road, s.t. steel truss, r.c.s. rein.-con. slab, e.p.g. encased plate girder and e.e. engineers estimate)**, 1 r.c.a. and 1 r.c.g. on S. R. 1-I, Johnson Co., also s.t. and 1 r.c.g. on S. R. 11-L, Noble Co., to R. H. King, Danville, $30,522 and $34,705 respectively, e.e. $38,942 and $35,065 respectively; 1 s.t. on S. R. 7-K, Huntington Co., and 2 s.t. on S. R. 7-L, Allen Co., to Tharp & Tharp, Fountain City, $27,277, e. e. $31,775; 1 r.c. on S. R. 46-L, Noble Co., also 1 s.t. and 1 r.c.g., S. R. 11-K, Whitley Co., to D. Jenkins, 501 Market Ave., Terre Haute, $20,692, e.e. $24,620; 1 r.c.g. and 1 s.t. on S. R. 4-A, Greene Co., to F. Wright, Bloomfield, $9,600, e.e. $12,070; 2 s.t. on S. R. 21-L, Adams and Allen Counties, also 1 s.t. on S. R. 44-M, Clinton Co., and 1 r.c.g. on S. R. 44-N, Carroll Co., to Burk Constr. Co., New Castle, $16,765 and $15,195 respectively, e.e. $21,657 and $18,963 respectively; 1 s.t., 1 r.c.g. and 1 r.c.s. on S. R. 22-D, Monroe Co., to E. C. Wright, Bloomfield, $29,412, e.e. $37,635; 1 e.p.g. and grading on S. R. 22-G, Marion Co., to M. Balch Constr. Co., 906 Majestic Bldg., Indianapolis, $43,040, e. e. $57,485. Grand total $227,209. Noted Sept. 17.

Wis., Milwaukee—See "Bids Received."

Mo., St. Louis — Terminal R.R. Assn., Union Station, approximately 360 ft. rein.-con. and steel extension to Jefferson Ave. viaduct, etc., to Fruin-Colnon Constr. Co., Merchants-Laclede Bldg. Engrs. est. $350,000. Noted Oct. 15.

Tex., San Antonio—I. Ewig, city engr., Dec. 28, 1 span 85 ft. rein.-con. and steel bridge, 55 ft. across San Antonio River, on 4th St., to Pryor & Jeffrey, c/o Builders Exch. Bldg., $26,631. Noted Dec. 24.

Okla., Olathe—See "Streets and Roads."

California—See "Streets and Roads."

Ont., Toronto—Canadian Natl. Rys., New Union Station, bridge over Don River, and Queen St. and Eastern Aves. subways, general contract, to Dufferin Constr. Co., foot Bathurst St.; structural steel, to Hamilton Bridge Wks. Ltd., General Assurance Bldg. Engrs. est. $500,000. Noted Dec. 3.

Dams

PROPOSED WORK

Okla., Sand Springs—See "Buildings—Industrial."

Calif., Auburn—See "Excavation, Dainage, Irrigation, Levees, River, Harbor."

Railways

PROPOSED WORK

North Carolina—See Buildings—Industrial under "Reidsville and Proposed Work.

North Carolina — High Point, Denton & Thomasville R.R., High Point, C. F. Tomlinson, pres., plans extending 16 mi. lines from High Point to Greensboro.

Wyoming—Union Pacific R.R. Co., 1416 Dodge St., Omaha, Neb., plans grading road bed and laying 10 mi. track between Yoder and newly developed sugar fields. R. L. Huntley, ch. engr.

BIDS DESIRED

Missouri—See "Contracts Awarded."

CONTRACTS AWARDED

Missouri — Terminal R.R. Assn., Union Station, St. Louis, H. J. Pfeifer, ch. engr., will construct twenty-one 1,000 ft. storage tracks for pullman and passenger coaches on both sides Jefferson Ave., etc. by day labor. $650,000. Noted Oct. 15.

Excavation, Drainage, Irrigation, Levees River and Harbor

PROPOSED WORK

Ill., Chicago—Bd. Local Impvts., Room 207, City Hall, rejected bids Dec. 21, South Water Street Impvt., Sect. 9, incl. excavation, 300 ft. 7 x 7 ft. new dock construction, piles, sheeting and 12 caissons. Will readvertise. Noted Dec. 17.

Mo., St. Louis—Soon takes bids extending Hurdle Dikes 10, 11 12 and 13 into Missouri River at new Howards Bend Waterworks Plant about 8 mi. upstream from St. Charles. $200,000. E. E. Wall, City Hall, dir.

Tex., Dallas—Levee Dist. 1, c/o J. H. Prince, Wilmer, member, Dallas Co., voted $50,000 bonds levee improvements. Noted Dec. 17.

Tex., McAllen — Water Dist. 3, Hidalgo Co., voted $75,000 bonds, concrete lateral canals, addition improvements eliminating seepage, etc. Address I. G. Cook, pres.

Oklahoma — Owner, c/o J. Steen, pres. First Natl. Bank, Boswell, making surveys reclaiming and draining approximately 20,000 acres in Choctaw, Atoka, Bryan, Johnson and Coal Counties. $150,000 or more.

Calif., Auburn—Camp Far West Irrigation Dist., making plans granite concrete storage dam, 75 ft. high, 600 ft. long on bottom and 230 ft. long on top, and approximately 20 mi. canal. $100,000 or more. M. C. Polk, Chico, engr.

BIDS DESIRED

N. J., Ocean City—Golder Constr. Co., 263 South 15th St., Phila., Pa., taking bids 1,000,000 cu.yd. hydraulic fill for land development, here.

Mich., Detroit—Jan. 11, by G. A. Dingman, drain comr., Wayne Co., County Bldg., dredging Brady and Minnock Drain, 8,272 ft. deep with 2 ft. bottom width.

BIDS RECEIVED

N. Y., St. George — M. Cosgrove, comr. Docks, Pier "A," foot Battery Pl., New York City, dredging north side Pier 6, at Arrietta St., here, from Morris & Cummings, 15 Moore St., New York City, $10,011. Noted Dec. 31.

CONTRACTS AWARDED

N. Y., St. George — M. Cosgrove, comr. Docks, Pier "A" foot Battery Pl., New York City, dredging north side Pier 6, at Arrietta St. here, Contr. 1870, to Morris & Cummings, 15 Moore St., New York City, $10,011. Noted Dec. 31.

Fla., Miami—Golden Isles Corp., Lawyers Bldg., 37 Northeast 1st Ave., dredging 3,000,000 cu.yd. sand, etc., creating 10 islands in Biscayne Bay, also waterways, and deepening Pearl Harbor, to United Dredging Co., 233 Bway., New York City, N. Y., $1,000,000.

Ill., Danville — Comrs. Feather Creek D. D. 2, Vermilion Co., 99,129 cu.yd. excav. in open ditch, etc., to N. J. Cole, Greenville, O. Noted Dec. 10.

Arkansas—Chute Drainage Dist., Crittenden, Lee and St. Francis Counties, c/o H. Brinkley, chn., approximately 350,000 cu.yd. earth excav. for drainage canals, etc., to W. E. Callahan Constr. Co., Ry. Exch. Bldg., St. Louis, Mo., at $0.114 per cu.yd.

Ark., Jonesboro—Bay-St. Francis D. D. 29, Craighead Co., 1,848,500 cu.yd. excav. in levees and 1,284,800 cu.yd. excav. in ditches, etc., to A. J. O'Meara, Dyersburg, Tenn., $343,501. Noted Nov. 19.

Mexico — Mexican Government, Mexico City, irrigating 5,000,000 acres, etc., in various cities, to J. G. White Eng. Corp., 43 Exchange Pl., New York City, N. Y. $30,000,000.

Mexico, Tampico — Mexican Govt., Dept. Communications, Mexico City, dredging 100 meter channel in Panuco River from Fiscal wharf to East Coast Oil Co., near here, to United Dredging Co., Tampico, approximately $200,000.

See proposal advertisements on page 220, Advertising Section.

INDUSTRIAL

Do You Know The Winning Features?

EFFECTIVE and economical operation requires both speed and the great strength necessary for continuous operation. The INDUSTRIAL WORKS has given thorough study to the conditions under which these machines must operate and has designed them with high speed and of greater strength and reliability than any other machine of this class on the market.

The type DC shown above exemplifies the results attained in the production of material handling machinery, which, on account of its power, strength and efficiency, will accomplish the work demanded of it, with the highest economy in the shortest time.

The winning features of the INDUSTRIAL type DC, and those which make possible its splendid achievements, are — extra large rollers in the crawling treads which hold the bearings high up out of the dirt; two speeds for travelling and hoisting; steering and propelling controlled entirely from operator's platform; independent friction clutches for each function; steel castings, bronze bushings; cut gears, and a host of other outstanding superiorities.

The DC is a crane, shovel, dragline, piledriver, clamshell, grapple, magnet, all in one, and it gives maximum efficiency in each service. Start the New Year right by specifying INDUSTRIAL equipment.

Book 120-A will be sent to you promptly upon request.

INDUSTRIAL WORKS · BAY CITY · MICHIGAN

Streets and Roads

PROPOSED WORK

Connecticut — State Hy. Dept., Hartford, plans rein.-con. paving, etc. about 5 mi. Meriden-Middletown Rd., 20 ft. J. A. MacDonald, comr.

New York—See "Unclassified."

N. Y., Buffalo — Supervs. Erie Co. plan widening 22 radial roads from here, and constructing 2 East and West trunk highways, etc. $27,000,000. G. C. Diehl, Ellicott Sq. Bldg., Buffalo, co. engr.

N. Y., Hamburg—Plans concrete or vitr. brick paving Buffalo St. To exceed $50,000. G. C. Diehl, Ellicott Sq. Bldg., Buffalo, engr.

New Jersey—Cape May Co. (Cape May C. H.) plans 3½ in. concrete paving road between Cape May and Atlantic City. $175,000. R. F. Smith, Marmora, engr.

North Carolina—Bd. Comrs. Currituck Co. Court House, Currituck, authorized $200,000 bonds concrete paving roads between Elizabeth City and Currituck Court House and from Sligo to Virginia State line. State Hy. Dept., Raleigh, in charge of construction. C. M. Upham, Raleigh, highway engineer.

North Carolina — State Hy. Dept., Raleigh, making plans grading and concrete or asphaltic paving 15.96 mi. Project 240, Johnston Co. $515,000, 13.17 mi. Project 307, Bladen Co. $395,000, 10.51 mi. Project 398 Robeson Co. $315,000, 5.15 mi. Project 465, Person Co. $160,000, 11.73 mi. Project 664, Richmond Co. $375,000, 13.36 mi. Project 685, Stanley Co. $428,000, 6.5 mi. Project 4870, and 7.95 mi. Project 479, Wake Co. $189,000 and $240,000 respectively; grading, gravel on broken stone paving 5.8 mi. Project 772, Watauga Co. $125,000, 6.86 mi. Project 715, Ashe Co. $140,000; grading and topsoiling 7.59 mi. Project 574, Moore Co., $34,000; clearing, grubbing and grading 16.3 mi. Project 931, and 6.5 mi. Project 932, Graham Co., $145,000 and $68,000 respectively. C. M. Upham, Raleigh, highway engr.

North Carolina — State Hy. Dept., Raleigh, making plans grading, concrete or asphaltic paving 13.46 mi. Project 3960, Robeson Co. $378,000, 5.618 mi. Project 471, Vance Co. $168,700, and 6.826 mi. Project 985, Swain Co. $939,400; clearing, grubbing and grading 4.699 mi. Project 838, Henderson Co., $45,500; grading and topsoiling 12 mi. Project 303, Bladen Co., $168,000. C. M. Upham, Raleigh, engr.

N. C., Durham — Plans paving various streets. $1,000,000. H. W. Kueffner, dir. Pub. Wks.

N. C., Salisbury—See "Unclassified."

Ga., Ashburn—Turner Co. election Jan. 16, $126,000 bonds, hardsurfacing various roads.

Fla., Clearwater—Pelleau Estates plans developing 400 acres, incl. streets and seawall $1,000,000; and sewers $300,000. R. F. Smallwood & R. W. Wakeling, Clearwater, archts.

Grade Raising, etc.—Galveston, Tex.—Bd. Comrs., Dec. 18, grade raising, 5,500,000 cu.yd. sand filling by dredge from Galveston Bay, from United Dredging Co., 323 Security Bldg., $29.97 per cu.yd. Noted Dec. 3 under "Streets and Roads."

CONTRACTS AWARDED

Platform Extensions—Brooklyn, N. Y.—Bd. Transportation, J. H. Delaney, chn., 49 Lafayette St., New York City, extending subway station platforms of Rapid Transit Railroads, here, to C. Meads & Co., 217 West 14th St., New York City, $365,000. Noted Dec. 17.

Subway—New York, N. Y.—Bd. Transportation, J. A. Delaney, chn., 49 Lafayette St., Dec. 31, constructing subway, Sect. 2, Route 102, along and under 8th Ave. from West 18th to 28th Sts., to G. H. Flinn, 17 Battery Pl. $5,020,000. Noted Dec. 24.

Borings—Phila., Pa.—Dept. of Pub. Wks., Bureau of Engineering, borings for Pennsylvania Terminal, West River Dr. between Spring Garden and South Sts., to J. N. Rulon, 1355 Colwyn St., $11,411. Noted Dec. 31.

Pier — Miami Beach, Fla. — See "Bids Desired."

Stadium—New Orleans, La.—Tulane University, concrete stadium, to O. M. Gwin, Union Indemnity Bldg., $249,900. Noted Dec. 3.

Heating and Ventilating, Rockford, Ill.—City, heating and ventilating in new Abraham Lincoln Junior High School, to Amer. Heating & Supply Co., Rockford, $148,000; plumbing, to Swords Bros., Rockford, $47,000.

Street Lighting System—Green Bay, Wis.—W. L. Kerr, city clk., bases and brackets for street lighting system on Bway., Walnut and Dousman Sts., to Green Bay Fdry. & Mchy. Co., South Bway., $3,850; installing same, to Outdoor Lighting Serv. Co., 6 North Michigan Blvd., Chicago, Ill., $19,775. Noted Dec. 17.

Street Lighting System—St. Louis, Mo.—Bd. Pub. Serv., 208 City Hall, 9,367 concrete lighting standards complete, 1,250,000 ft. trenching and backfill, 2,000,000 ft. No. 8 steel taped and 100,000 ft. primary 5,000 volt lead covered cable, etc., to A. M. Ryckoff, 527 Chemical Bldg., $1,229,771. Noted Dec. 24.

Transmission Lines — Arkansas—Arkansas Light & Power Co., Pine Bluff, will construct about 18 mi. 13,200 volt line, and 8 mi. re-insulated 66,000 volt line from Lewisville to Magnolia, by day labor. Private plans.

Speedway and Grand Stand—Webster, Tex.—Ship-Channel Development Co., c/o W. H. Myers, Rice Hotel, Houston, 1½ mi. speedway, 50 ft. wide, main grand stand 700 ft. long, 15,000 seating capacity, and secondary grand stand, 500 ft. long, etc., to Prince Speedway Constr. Co., c/o J. Prince, pres., Los Angeles, Calif., about $400,000.

Electric Transmission Line—Oklahoma—Oklahoma Gas & Electric Co., 112 North Bway., Oklahoma City, will build 63 mi. electric transmission line from Ardmore to Durant and from Ada to Sulphur, by day labor. $70,000. Byllesby Eng. Co., 231 South La Salle St., Chicago, Ill., engrs.

Swimming Pool—Santa Monica, Calif.—G. E. Naylor, 25th St. and Alta Ave., 25 x 60 ft., rein.-con. swimming pool, Brentwood Park, to A. Dick, 23 California Bank Bldg., $10,000.

Subway—Stockton, Calif.—City Council, Miner Ave. Subway, to Lewis & Green, Commercial Bank Bldg., $98,643. Noted Dec. 31.

Subways—Toronto, Ont.—See "Bridges."

Materials

PROPOSED WORK

Sand Grit, etc.—Long Island City, N. Y.—M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., rejected bids Dec. 24, 5,000 cu.yd. sand grit, 30,000 tons steam ashes, 350,000 gal. asphaltic macadam binder, and 600,000 gal. road oil for cold application. Will readvertise. Noted Dec. 17.

BIDS DESIRED

Road Oil—Miles City, Mont.—Jan. 25, by City, approximately 100,000 gal. road oil for streets. M. F. Mann, city clk.

Paving Blocks, etc. — Toronto, Ont. — Jan. 12, by T. Foster, mayor, City Hall, vitr. paving blocks, sewer brick, Portland cement, granite paving setts, iron and steel, rubber valves, hose, crushed stone and rubble stone, etc. $250,000. R. C. Harris, City Hall, engr.

Pipe, etc.—Toronto, Ont.—Jan. 12, by T. Foster, mayor and chn. Bd. Control, City Hall, 30 in. c.i. specials and 30 in. c.i. pipe, Tenders 74 and 75 respectively. $30,000. R. C. Harris, City Hall, engr.

BIDS RECEIVED

Sewer Pipe, Paving Blocks, etc.—Minneapolis, Minn.—F. S. Gram, city purch. agt., Dec. 15, 400 tons sewer castings, from Crown Iron Wks. Co., 1229 Tyler St. N.E., catch basins $55.70 per ton, manholes $51.90 per ton; 500,000 vitr. paving blocks, from Hydraulic Press Brick Co., 1250 Builders Exch. Bldg., $16.75 per M; vitr. sewer pipe, from Landers, Morrison, Christensen Co., 800 Builders Exch. Bldg., various sizes and prices; and segment block, from Red Wing Sewer Pipe Co., Red Wing, various sizes and prices. Noted Dec. 10.

CONTRACTS AWARDED

Paving Blocks—Long Island City, N. Y.—M. J. Shugrue, acting pres. Queens Boro, Queens Subway Bldg., 150,000 asphalt paving blocks for Dept. Highways, to Hastings Paving Co., 25 Broad St., New York City, $14,075. Noted Dec. 17.

Paving Blocks—Long Island City, N. Y.—M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., 50,000 asphalt paving blocks, to Hastings Paving Co., 25 Broad St., New York City, $87.50 per M; 50,000 wood paving blocks, to Southern Wood Preserving Co., 10 East 43rd St., New York City, $2,798; 25,000 vitr. paving blocks, to Terminal Supply Co., 350 Madison Ave., New York City, $1,485; 2,000 bags Portland cement, to Peace Bros., Inc., 57 North Lawrence St., Flushing, $1,360; and 864 lin.ft. 12 in. c.i. pipe, to J. Fox & Co., 233 Bway., $2,048. Noted Dec. 17.

See proposal advertisements on page 220, Advertising Section.

CONSTRUCTION NEWS

Engineering News-Record, Jan. 14, 1926

Some of the Week's Large Projects

AMONG the announcements for the current week of proposals, bids desired and received and contracts awarded, are the following big jobs:

Proposed Work

Telephone line extension, exchanges, etc., Southern Bell Tel. Co., Missouri, plan to expend, $14,000,000.

Pipe mill, Sparrows point, Md., Bethlehem Steel Co., proposed, $10,000,000.

Paving program, Georgia State Highways, plan to expend during 1926, $8,000,000.

Road improvement program, Virginia State Highway, plans to expend during 1926, $4,745,000.

Hydro-electric development, Oroville, Calif., making preliminary plans, $4,000,000.

Widening and paving streets, Miami, Fla., bond election Feb., 10, $3,200,000.

Apartment, New York, N. Y., 61st St., and Central Park West, preparing plans, $3,000,000.

High school, Queens, N. Y., preparing plans, $3,000,000.

Bank and apartment, Chicago, Ill., M. S., Plotke, having sketches made, $2,750,000.

Bridges over Miami River, Fla., bond election Feb. 10, $2,150,000.

Bank and office building, Detroit, Mich., J. B. Book, Jr., plans, $2,000,000.

Art school, New Haven, Conn., Yale University, plans prepared, $2,000,000.

Bids Wanted On Big Jobs

Second track construction, M.P.R.R. Co., Missouri, 23-mi., soon takes bids, $3,300,000.

Office building, Chicago, Ill., Holabird & Roche, archts., take bids Jan. 21, $3,000,000.

Apartment hotel, Detroit, Mich., Weston & Ellington, engrs. and archts., bids opened Jan. 13, $2,500,000.

Lock and dam, Starved Rock, Ill., bid received, $1,465,832.

Large Contracts Let During Week

Office building, New York, N. Y., awarded to Starrett Bros., Inc., $10,000,000.

Subway, New York, N. Y., Sect. 2, Route 102, awarded to G. H. Flinn, $5,026,608.

Store and warehouse, Atlanta, Ga., awarded to B. W. Constr. Co., $3,000,000.

Motors building, River Rouge, Mich., awarded to J. N. Blair Constr. Co., $1,500,000.

Apartment hotel, Los Angeles, Calif., awarded to L. A. Housing Corp. $1,500,000.

Pulp and paper mill, Fort Alexander, Manitoba, awarded to Carter, Hall, Aldinger Co., Ltd., Winnipeg, $1,500,000.

Where name of official is not given inquiries should be addressed to City Clerk, County Clerk or corresponding official.

Waterworks

PROPOSED WORK

Pa., Hollidaysburg—Boro Council, c/o H. L. Stultz, pres., plans election $78,800 bonds, storage reservoir and pipe lines, etc. D. A. McCloskey, boro mgr.

N. C., Roxboro—Town retained Spoon & Lewis, consult. engrs., 407-9 Amer. Bank Bldg., Greensboro, to prepare plans extending water and sewerage systems, street paving, etc.

Fla., Miami—Election Feb. 10, $600,000 bonds extending mains in various streets; also $750,000 bonds extending fire system, equipment and additions to high pressure system.

Tenn., Rutherford — Plans waterworks. $50,000.

Ill., Springfield—Plans mains in 18 blocks Keys Ave., 14th, 15th, 17th, Converse and Monroe Sts. $15,000. W. Seeley, City Hall, engr.

Wis., Williams Bay—O. J. Lee, village clk., making plans waterworks and sewerage systems. To exceed $15,000. W. G. Kirchoffer, 22 North Carroll St., Madison, engr. Noted Dec. 17.

Kan., Edwardsville—Election in January $25,000 bonds, new waterworks and sewers in various streets. Horner & Wyatt, 464 Bd. of Trade Bldg., Kansas City, Mo., engrs.

Neb., Rushville—Defeated $17,000 bonds, waterworks and distribution system. Noted Dec. 31.

Ark., Prairie Grove—Making preliminary plans waterworks and distribution system, gravity flow line type. $75,000. E. M. Ratliff, Stone Bldg., Fayetteville, engr. Noted Jan. 29, 1925.

Tex., Lometa—Voted $40,000 bonds complete waterworks. Address Mayor.

Tex., Wellington—Voted $200,000 bonds, waterworks extensions. C. B. Meyers, city secy. Engineer not selected.

Okla., Ft. Cobb—Defeated $40,000 bonds, waterworks. Noted Dec. 17.

Okla., Oklahoma City — Making preliminary plans 10 mi. c.i. mains in various streets. $125,000. B. M. Hart, city engr.

Okla., Okmulgee — Making surveys and borings storage dam and 5 mi. pipe line. L. F. Horza, 53 West Van Buren St., Chicago, Ill., engr. Noted July 23.

Ont., St. Catherines — Granthan Twp. making plans extending 15,000 ft. 6 in. and up, c.i. mains, etc. in various streets. $30,000. Rutherford & Smith, 24 Queen St., engrs. Noted Oct. 1.

Ont., Thamesford—City Council, J. A. Clark, chn., plans waterworks. $40,000.

Ont., Toronto—North York Twp., making plans extending 15,000-20,000 lin.ft. 6 in. c.i. mains, etc. in various streets. $50,000. James, Proctor & Redfern, 36 Toronto St., engrs.

Ont., Toronto—York Twp. plans 12,000 ft. 6 in. c.i. mains in Laxis and Yore Rds., Alywood, Glenhaven, Lonsborough, Richardson, Rosecliff and Westmount Aves. $25,000. F. B. Goedike, 40 Jarvis St., engr.

BIDS DESIRED

N. Y., New York — Jan. 20, by P. J. Dooling, comr. Purchase, Municipal Bldg., c.i. special and valve box castings, valves, hydrants, etc., to Dept. Water Supply, Gas & Electricity.

Pa., Mount Union — Jan. 29, by Boro. Council, C. R. Gracey, secy., Municipal Bldg., rock masonry dam at Singers Gap 6 mi. south of here, 4,000 cu.yd. earth and 7,000 cu.yd. rock excav., 3,500 cu.yd. rubble masonry and 7,500 cu.yd. cyclopean concrete; or Ambursen dam, 3,500 cu.yd. earth and 6,500 cu.yd. rock excav., 2,300 yd. concrete and 100,000 lb. reinforcing $80,000. D. W. Dillman, 91 Altoona Trust Bldg., Altoona, engr. Noted April 9.

Miss., Okolona—Feb. 5, by Town, 100,000 gal. steel standpipe on 125 ft. steel tower. A. C. Rowe, town clk. Noted Jan. 7.

O., Cincinnati—Jan. 21, by City Manager, 75 tons 4 in., 550 tons 6 in., 50 tons 8 in., 150 tons 10 in. and 50 tons 12 in. c.i. pipe to water distribution system. $50,000. C. Sherrill, City Hall, engr.

O., Dayton — Jan. 29, at office G. F. Baker, dir. Pub. Serv., City Bldg., Main Pumping Station and appurtenances, O. R. Hartzell, secy.; adv. E. N.-R. Jan. 14.

Ill., Northbrook — Jan. 19, by Bd. Local Impvts., Melzers Hall, watermains and sanitary sewers in various streets. $64,000. Consoer, Older & Quinlan, Marquette Bldg., Chicago, engrs.

Ill., Springfield—Jan. 18, by City Clerk, 17 m.g. centrifugal pump. Burns & McDonnell, 401 Interstate Bldg., Kansas City, Mo., engrs.

Wis., Milwaukee — Jan. 22, by J. W. Nicholson, dir. Central Bd. Purchase, 500 tons each 6 in. and 16 in. 1,000 tons each 8 and 12 in. Class C pipe, 125 tons special castings, 7 tons special 6 in. offsets, etc., for Water Dept.

Wis., Racine — Jan. 30, by Bd. Water Comrs., City Hall, filter plant with equipment, reservoir, wash water tank, c.i. pipe, valves, meters, wash water pump, etc. Alvord, Burdick & Howson, 8 South Dearborn St., Chicago, Ill., engrs.; adv. E. N.-R. Jan. 14. Noted Oct. 29.

Minn., Minneapolis—Jan. 18, by F. S. Gram, city purch. agt., hydrants, valves, etc., for Waterworks Dept. N. W. Elsberg, city engr.

Minn., St. Cloud—Jan. 19, by J. D. McKenzie, city clk., 2,030 lin.ft. 12 in. c.i. mains in various streets and 700 ft. 12 in. c.i. mains under and across Mississippi River. To exceed $15,000. A. W. Buckman, city engr.

Kan., Humboldt—Jan. 18, by City, C. H. Schaffner, city clk., reconstructing filtration plant, incl. aerator, mixing chamber, 2 filter units, house, 1 fully equipped 9 x 12 ft. filter, flow meter, etc. $14,985. E. T. Archer & Co., New England Bldg., Kansas City, Mo., engrs. Noted Nov. 19.

Neb., Dawson—Jan. 22, by C. W. Kimsey, village clk., waterworks, 35,000 gal. tank on 100 ft. tower to balcony erected on foundation, Alternate A, 40,000 gal. or Alternate B, 50,000 gal. tank on 100 ft. tower to balcony erected on foundation; 8,000 ft. 4- to 8-in. McWane precalked joint or DeLavaud Class 150 c.i. pipe, f.o.b. Dawson; 2,100 ft. 2 in. galvanized or c.i. pipe, f.o.b. Dawson, etc., Henningson Eng. Co., 12th and Harney Sts., Omaha, engrs. Noted Jan. 7.

BIDS RECEIVED

Wis., Wauwatosa—Bd. Pub. Wks., A. V. Brigham, secy., Jan. 4, from F. E. Kaminski, 745 46th Ave., West Allis, 1,370 ft. 6 in. mains in Lefeber Ave. at $2.19 per ft., 470 ft. 6 in. mains in 63rd St. $2.21 and 1,370 ft. 6 in. mains in 2nd Ave. $2.17; from A. H. Koch, 2917 Grand Ave., Milwaukee, 450 ft. 6 in. mains in Elm Lawn St. $2.30; from Shabart-Rauch, Inc., 1003 41st St., Milwaukee, mains in Wright St., 2,510 ft. 12 in. at $3.98, 35 ft. 8 in. at $6, and 110 ft. 6 in. at $5. Noted Dec. 24.

CONTRACTS AWARDED

N. C., Greensboro — City Council, new 500,000 gal. steel tower, also dismantling, removing and re-erecting old tower on new site, to Pittsburgh-Des Moines Steel Co., Curry Bldg., Pittsburgh, Pa., $29,114. Noted Dec. 24.

Tenn., Nashville — For 35,000 ft. 12- to 36-in. c.i. pipe, to U. S. Cast Iron Pipe & Fdry. Co., Amer. Trades Bldg., Birmingham, Ala., $41.32; hauling and laying pipe, also 2 m.g. motor driven pumps, to E. J. Merkle, Kansas City, Mo., $131,250 and $11,000 respectively; stokers for furnaces, to Riley Stoker Corp., 9 Neponset St., Wooster, Mass., $18,406; coal and ash handling machinery, to Jeffrey Mfg. Co., East 1st Ave. and North 4th St., Columbus, O., $21,000; fire hydrants, to Keith-Simmons

See proposal advertisements on page 131, Advertising Section.

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Pouring LEADITE Joints on line of 12-in. c. i. bell and spigot water main.

Durable Pipe Joints

The wise man builds for the future. Supply lines and distribution systems are usually permanent installations.

Durability and quality should be the first consideration of the product used for making joints in cast iron bell and spigot water mains.

LEADITE is a good product and the leader in its field, because it has gained and retained the recognition, support and patronage of such a great number of water works men for so many years.

LEADITE has been tested and used for over 30 years, under all pressures and conditions, by water works, railroads, mines, contractors and industrial plants thruout the country.

Thousands of miles of pipe have been laid with LEADITE joints, on all sizes from 4 in. to 60 in. in diameter.

LEADITE takes the drudgery out of pipe laying; saves time, money and labor; makes flexible joints; makes joints which will stand vibration under tracks, over and under bridges; makes joints which resist electrolysis; eliminates large bell holes; reduces trench pumping and other work incidental to caulking—LEADITE requires no caulking.

Every water works man abreast of the times knows about LEADITE. LEADITE is an interesting and familiar topic at water works conventions and wherever water works men congregate.

The up-to-date water works man specifies and uses LEADITE.

LEADITE saves at least 75%.

LEADITE is the pioneer self-caulking material for c. i. pipe
Be Sure It Is LEADITE
and Accept No Imitations

THE LEADITE COMPANY, Inc.
1512 Land Title Building, Philadelphia, Pa., U. S. A.

NO CAULKING

Waterworks (Continued)

Co., 414 Union St., $61.50 each. Noted Dec. 17.

Wis., Milwaukee—Central Bd. Purchases, meter cocks, couplings, corporation and curb cocks, to Rundle & Spence Mfgg. Co., 55 4th St., $12,456; 500 fire hydrants, to R. D. Wood & Co., 400 Chestnut St., Phila., Pa., $39,760; stop cock boxes, etc., to W. P. Taylor Co., 218 Ellicott St., Buffalo, N. Y., $6,112; gate and tapping valves, to Chapman Valve Mfg. Co., 650 West Lake St., Chicago, Ill., $31,130; and liquid chlorine, to Pennsylvania Salt Mfg. Co., 1000 Widner Bldg., Phila., Pa., $4,156. Grand total $93,-614. Noted Jan. 7.

Tex., Hedley—Waterworks, to J. Winslett, 1001½ Main St., Dallas, approximately $27,-000. Noted Dec. 3.

Sewers

PROPOSED WORK

Conn., Hartford — Takes bids in March new sewerage works, etc., one project for 7 in. conduit, $28,000. Total $56,000. R. N. Clark, city engr.

N. Y., New York — H. Bruckner, pres. Bronx Boro, 3rd and Tremont Aves., rejected bids Dec. 29, sewers in Truxton and Waring Aves. Noted Jan. 7.

N. J., New Brunswick—North Brunswick Twp., H. Van Dewater, clk., Parsons School, plans approximately 1 mi. sewerage system, and disposal plant, here. $150,000. R. P. Wilson, 46 Patterson St., engr.

N. C., Roxboro—See "Waterworks."

Ill., Decatur — Made plans and surveys Riverside Sewer Project, 6 mi. 36- to 84-in. sanitary and storm sewers in south and southeast section of city connecting Sanitary Dist. system at Jackson and Garrison Sts. extending to Lost Bridge, 11th and Williams Sts. $300,000. M. P. O'Brien, City Hall, and Pearse, Greeley & Hansen, 6 North Michigan Ave., Chicago, engrs.

Ill., Lincoln — Made preliminary plans 6,650 ft. 50- to 54-in. main sewer connecting with main Bubicon sewer, and 7 mi. 8 and 12 in. tile laterals in 262 acres, west side. $150,000. E. Tobin, City Hall, engr.

Ill., Peoria—Plans 4 mi. new and larger sanitary sewers in Loop Dist. $200,000. W. E. Backes, City Hall, engr.

Ill., Rockford—City made plans and election probably in April, $1,000,000 bonds for Rockford Sanitary Sewer Dist. of trunk line main sewers, laterals and sewage treatment plant embracing 46 sq.mi. B. C. Harvey, City Hall, engr. Noted Aug. 20.

Ill., Springfield—Plans 16 blocks sanitary sewers in 14th St. from Cornell Ave. to Bunn Park, 14th St. from Washington to Reynolds Sts., and 14th St. from Ridgely St. to Griffiths Ave., also 11th, 15th and Miller Sts. $25,000. W. Seeley, City Hall, engr.

Ill., Springfield — Sanitary Sewer Dist. plans sewage treatment plant to handle sewerage from East and West Side Interceptors. $565,000. Dawson & Walraven, City Hall, dist. engrs. Pearse, Greeley & Hansen, 6 North Michigan Ave., Chicago, engrs.

Wis., Beloit—Making plans concrete or vitr. storm sewers in 3rd St. and sanitary sewers in 10 streets, also booster station. To exceed $25,000. G. E. Heebink, City Hall, engr.

Wis., Brodhead — Plans election to exceed $25,000 bonds, sewerage system and disposal plant. J. W. Gardner, city clk. Engineer not selected.

Ia., Boone—Made plans sewage disposal plant. $100,000. Currie Eng. Co., Hamilton Co. Savings Bank Bldg., Webster City, engrs.

Ia., Winterset—Plans sanitary sewers in various streets. $30,000. Burns & McDonnell, 402 Interstate Bldg., Kansas City, Mo., engrs.

Neb., Elgin—See "Streets and Roads."

Okla., Ft. Cobb—Defeated $25,000 bonds, new sanitary sewerage system. Noted Dec. 17.

Okla., Oklahoma City—Takes bids about Apr. 1, 2 sewage disposal plants with auxiliary equipment, piping, etc. $950,000. B. M. Hart, City Hall, engr. Noted Dec. 31.

Calif., Los Angeles—Los Angeles Co. D.D. Impvt. 15, making plans approximately 26 mi. mains and laterals. To exceed $1,000,-000. F. Bates, 327 Bradbury Bldg., consult. engr. J. E. Rockhold, Hall of Records, co. surv.

Ont., Toronto — City Council plans vitr. tile sanitary and storm sewers in Hubbard Blvd., Power St., Craven and Manor Rds., Methuen, McRoberts, Hammersmith, Scarboro, Beach, Wineva, Bonfield and Selwood Aves. $65,000. R. C. Harris, Toronto, engr.

BIDS DESIRED

Pa., Phila.—Jan. 20, by Dept. Pub. Wks., Bureau of Engineering, main sewer in Rowland Ave. between Tudor and Bleigh Sts., and discharge pipes between Southwest Pumping Station at Eagle Creek. Former contract rescinded. G. H. Biles, dir. Noted Jan. 7.

Pa., Phila.—Jan. 20, by Dept. Pub. Wks., Bureau of Engineering, sewer and pumping station for South Phila. Impvt. Dist. south of Packard Ave. and west of Broad St.; also sewers in Wheatsheaf Lane. G. H. Biles, dir. Pub. Wks.

Ill., Northbrook—See "Waterworks."

BIDS RECEIVED

N. Y., Brooklyn — J. A. Guider, pres. Brooklyn Boro, Boro Hall, Jan. 6 (**e. e. means engineers' estimate**), sewers in Rutland Rd. and East 18th St., from Tomasetti & Co., Inc., 1133 60th St., 74% e. e. $10,143, and 67% e. e. $6,106 respectively. Noted Dec. 31.

Wis., Beaver Dam—W. A. Gergen, city clk., Jan. 4, extending sewers in 9 streets, 12,714 ft. 8- to 15-in. vitr. pipe and 3,096 ft. tunnel, 20- to 50-ft. deep, 27 manholes, etc., from Szukalski & Matke Co., 1089 American Ave., Milwaukee, $100,600. Noted Dec. 24.

CONTRACTS AWARDED

N. Y., New York — H. Bruckner, pres. Bronx Boro, 3rd and Tremont Aves., sewers in Wicham and Provost Aves., to F. Spedero, 3883 Taddington Ave., $6,403 and $4,236 respectively; in Hobart Ave., to Fiorello & Kock, 1895 Belmont Ave., $1,300; in East 251st, St., to A. Spedero, 3883 Taddington Ave., $7,651. Grand total $19,-590. Noted Jan. 7.

D. C., Wash.— Distr. Comrs., District Bldg., to A. McCandlish Co., 1215 Harvard St., sewers in vicinity Upshur St. and 12th Pl. N. E., $3,153; to Kirwan Eng. Co., Baltimore, in vicinity 5th and Grant Sts. N. E., $1,944 and in 5th and Tuckerman Sts. N. W. $2,949; to G. B. Mullin, 1296 Upshur St. N. W., vicinity Nevada and Nebraska Aves. N. W. $11,680, 9th St. and Concord Ave. N. W. $5,882, 4th St. between Rittenhouse and Sheridan Sts. N. W. $1,463 and 13th and S Sts. S. E. $1,723. Grand total $28,793. Noted Dec. 17.

O., East Cleveland (Cleveland P. O.)—Sewers and water-mains in Doanwood St., to Iafornaro Constr. Co., 2280 Murray Hill Rd., Cleveland, $30,409.

Calif., Glendale — To B. D. Zaich, 220 West 56th St., Los Angeles, 25,488 ft. 8 in. vitr. and 14,000 lin.ft. house sewers, etc. in Sewer Dist. 1, $49,905. Noted Jan.

Calif., Los Angeles — For 8 in. cement and 9,995 ft. house sewers in portion of 13th Ave., to P. J. Akmadzich, 821 Yale St., $31,995; also 6- to 10-in. vitr. sewer and 19,050 ft. house laterals in Wilshire Blvd. between Federal St. and Bundy Dr., to M. Miller, 208 West 2nd St., $67,500.

Calif., San Diego—Sewers in Ocean Beach and Pt. Loma Heights, to DeWaard & Son, Granger Bldg., $25,905. Noted Jan. 7.

Md., Baltimore—Bd. Awards, 800 ft. steel and concrete bridge, south of Smith Extension from Falls Rd. to east end of South Ave., to J. L. Robinson Constr. Co., 1130 West Lafayette Ave., $246,585. Noted Jan. 7.

See proposal advertisements on page 131, Advertising Section.

Quick-Hardening Concrete

Strong Concrete in *3 Days* with *Universal* Cement

Time often is the important item on new or repair work or for winter construction. In such cases, you do not want to wait the days usually allowed for concrete to harden. You do not need to. You can, with *Universal* cement, obtain quick-hardening, strong concrete in *3 days* by using the simple methods that thousands of laboratory tests and actual construction experience prove will give the desired results.

For example, with these methods and the proper precautions, a concrete pavement was built with *Universal* cement at Universal's Chicago Plant and put under heavy traffic when *less* than 3 days old. This has carried heavily loaded trucks for months without damage to the concrete.

Detailed information concerning the simple methods for obtaining quick-hardening, strong concrete in *3 days* with Universal cement will be furnished on request to

Universal Portland Cement Co.

Chicago Pittsburgh Minneapolis Duluth Cleveland New York

Concrete for Permanence

Bridges (Continued)

Ala., Mobile—Mobile Bridge Co., Meaher Bldg., foundations and superstructure for bridge over Mobile Bay, to Kansas City Bridge Co., Orear-Leslie Bldg., Kansas City, Mo.; steel work to Virginia Bridge Co., 3000 8th Ave. N., Birmingham. Total $840,000. Noted Nov. 19.

Illinois—State Dept. Pub. Wks. & Buildings, Div. Highways, Springfield, substructure for 90 ft. steel span, also 50 ft. and one 30 ft. concrete girder span, Route 30, Sects. 3-B and 8-B, Peoria Co., to Herrick Constr. Co., Carlinville, $20,363; superstructure for one 90 ft. steel span bridge, 77,900 lb. reinforcing on Route 30, Sect. 3-C, Peoria Co., to Clinton Bridge Co., 101 South 2nd St., Clinton, Ia., $5,702. Noted Dec. 31.

Illinois — Dept. Pub. Wks. & Buildings, Div. Highways, Springfield, bridge on Route 8, Sect. 44-B, Knox Co., to H. C. Homes, Macomb, $84,359; and bridge on Route 8, Sect. 42-B, Knox Co., to A. P. Munsen, Marion, Ia., $13,929. Noted Nov. 5.

Wis., Milwaukee—Dept. Pub. Wks., R. E. Stoelting, comr., new pile and concrete bridge abutment and timber protection pier at Cherry St., to E. E. Gillen Co., 288 East Water St., $26,690. Noted Jan. 7.

Kan., Marion — Marion Co., to Yancey Constr. Co., Abilene, bridges on Federal Aid Project 226-A, 100 ft. steel span, 30 ft. deck girder approaches, $17,967, Bridge 070, 120 ft. steel span $16,266, Bridge Y7P, two 12 ft. rein.-con. slab $1,791, and Bridge Y8P, two 20 ft. rein.-con. slab $2,594. Grand total $38,618. Noted Nov. 12.

Neb., Fremont — Chicago, Burlington & Quincy R.R. Co., 547 West Jackson Blvd., Chicago, Ill., will rebuild 100 ft. steel span bridge on concrete piers, etc., over Platte River, here, by day labor. $25,000-$30,000. A. W. Newton, Chicago, Ill., ch. engr.

Mississippi — State Hy. Dept., Jackson, plans improving 7.9 mi. Federal Aid Project

See proposal advertisements on page 131, Advertising Section.

BRIXMENT FOR PERFECT MORTAR

The architects who specify BRIXMENT *exclusively* for mortar are growing in number each day. They know that writing BRIXMENT into the specifications predetermines maximum and uniform strength, architectural charm and real economy. They know that BRIXMENT mortar is the one mortar that combines to such a high degree *all* the essentials of the best, most enduring masonry. BRIXMENT does not fade mortar colors, does not scale or pop and grows stronger with age. Especially adaptable to winter use. Interesting handbook and list of prominent BRIXMENT buildings on request.

LOUISVILLE CEMENT COMPANY, *Incorporated*, LOUISVILLE, KENTUCKY

BRIXMENT

Streets and Roads (Continued)

62, Wilkinson Co., $80,000; also 32.2 mi. Federal Aid Project 62, Marshall and Lafayette Counties, $500,000.

Indiana—Jan. 27, by J. D. Williams, dir. State Hy. Comn., Indianapolis, **(F. A. P. means Federal Aid Project and S. A. P.**

See proposal advertisements on page 131, Advertising Section.

INDUSTRIAL

THERE'S NO OTHER CRANE LIKE AN INDUSTRIAL

THIS is not our opinion, of course—as such it would have no weight. It is the opinion of the leading railroads and foremost industrial concerns in this country and abroad. Today INDUSTRIALS have become a necessity in modern industry. Their practicability is unquestioned — their economy a proven fact.

Like all INDUSTRIALS the type DC crawling tractor crane, shovel and dragline stands as the leader in its class. There isn't a machine anywhere that is built of finer material. The gears and pinions are all machine-cut and renewals are not necessary for many years.

The propelling and steering mechanism is the finest ever. It is possible to describe any kind of curve desired with the machine in narrow quarters, and it is entirely controlled from the operator's position with ease.

Large rollers in the crawling belts hold the bearings high up out of the dirt, two speeds for propelling and hoisting and a host of other engineering superiorities make it the choice of world industry.

Our booklet number 120-A will tell you the whole story. Ask for your copy.

INDUSTRIAL WORKS · · BAY CITY · MICHIGAN

Streets and Roads (Continued)

means **State Aid Project**), concrete, brick or bituminous concrete paving approximately 9.585 mi. F. A. P. 54, State Rd. 25, Steuben Co., 9.244 mi. F. A. P. 69-A, Rd. 10, Benton Co., 8.078 mi F. A. P. 76, Rd. 10, Vigo and Parke Counties, 5.596 mi. F. A. P. 78-A, Rd. 10, Knox Co., 5.04 mi. F. A. P. 78-B, Rd. 10, Knox Co., and 8.335 mi. F. A. P. 98-A, Rd. 7, Huntington Co.; grading, etc., 4.582 mi. S. A. P. 16-GA, Rd. 16, Spencer Co., and 4.659 mi. S. A. P. 16-GB, Rd. 16, Spencer Co.

Ill., Oneida — Ontario Twp. taking bids 60,000 gal. Illinois E. 2 and 3 specifications road oil on various streets. G. Peterson, comr.

Ill., Sycamore — Jan. 25, by Bd. Local Impvts., grading, curbing, guttering and rein.-con. paving 37,120 sq.yd. various streets. W. M. Hay, Leslie Bldg., De Kalb, engr. Noted Dec. 24.

Wis., Kenosha—Feb. 25, by C. M. Osborn, city mgr., rein.-con., sheet asphalt, asphaltic concrete or vitr. brick paving approximately 7.5 mi. various streets, 24 to 36 ft. R. M. Smith, City Hall, engr.

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Caulking Means EXPENSE---
No Caulking Means PROFIT

Making LEADITE Joints on 24 inch c. i. B & S Force Main

It is needless waste of time, money and labor to caulk cast iron bell and spigot water mains.

Why not turn this expenditure into a profit?

Use Leadite which is melted and poured into the joint.

Leadite forms a water-tight bond by filling every crevice of the joint from the yarn out to face of bell of pipe, without caulking.

Leadite means simplicity, efficiency and economy.

Water works all over the world use Leadite because it makes a good joint which improves with age.

Leadite resists electrolysis.

Leadite facilitates rapid progress of the work generally.

Leadite does not corrode or rust.

Leadite has been successfully tested and used for over 30 years.

Thousands of miles of pipe jointed with Leadite are in service.

The up-to-date water works man specifies and uses LEADITE.

LEADITE saves at least 75%

LEADITE is the pioneer self-caulking material for c. i. pipe

Be Sure It Is LEADITE and Accept No Imitations

THE LEADITE COMPANY, Inc.
1512 Land Title Building, Philadelphia, Pa., U. S. A.

NO CAULKING

Waterworks

PROPOSED WORK

N. C., Bryson City—Plans to issue $20,000 bonds, waterworks. W. T. Conley, city clk.

N. C., Four Oaks—See "Sewers."

N. C., Greensboro—Election soon $200,000 bonds, waterworks. C. T. Sherrill, city clk.

N. C., Wilmington — Plans water and sewer extensions. $35,000 bonds sold to finance same, also $30,000 for equipment.

Ga., Rome—Election in spring $300,000 bonds, waterworks, sewers and paving various streets. Robert & Co., Tuft Bldg., Atlanta, engrs.

Fla., Ft. Meade—Election Feb. 9, $35,000 bonds, extending mains in various streets.

Miss., Ocean Springs—See "Unclassified."

La., Monroe — See "Buildings — Educational, Religious."

Tenn., Nashville—Dept. Waterworks appropriated $18,000 meters and couplings, $31,600 chemicals for purification, $3,100 fire hydrants and $4,000 cleaning reservoir. H. E. House, mayor.

O., Cincinnati—Hamilton Co. plans 18,586 ft. 4 and 6 in. c.i. mains in Water Supply Line 29 Sanitary Sewer Dist. 3, (Golf Manor), $44,894; 43,332 ft. 6- to 10-in. c.i. mains, etc., in Water Supply Line 24, Sanitary Sewer Dist. 2, $105,776. L. C. Boyatt, Court House, engr.

Ill., Bloomington — Making preliminary surveys improving water and light plants, incl. Diesel engines, etc. Black & Veatch, Mutual Bldg., Kansas City, Mo., engrs.

Ill., Kewanee—Bd. Local Impvts., J. H. Andrews, pres., plans 6 in. c.i. mains in Rose St. from West to Washington Sts., Western Ave. from Washington to Adams Sts., Roseview St. from West to Adams Sts., Zang Ave. from Franklin to West Sts., West St. from Roseview to Prospect Sts., 11th St. from Grace Ave. to East St., and East St. from 10th to 11th Sts.; and 4 in. mains in Washington St. from Rose to Western Sts., and in Adams St. from Western to Prospect Sts. $15,000. J. G. Palmer, City Hall, engr.

Ill., Macomb—Voted $100,000 bonds, deep wells, extending mains, etc., in various streets. H. Holmes, Court House, engr.

Ill., Rockford — Plans 1 steam driven 3,500 cu.ft. air compressor, 2 deep wells with conduits and air lines at west end pumping plant, also extending and reinforcing distributing mains. $100,000. B. C. Harvey, City Hall, engr.

Ia., Allerton — Plans waterworks. $15,000. A. B. Cobb, city clk. Engineer not selected.

Minn., Minneapolis — E. L. Noyes, city clk., plans to sell $1,444,000 bonds, waterworks. N. W. Elsberg, city engr.

Minn., Minneapolis — F. S. Gram, city purch. agt., plans to purchase 5,000 water meters, for City. N. W. Elsberg, city engr.

S. D., Willow Lake—F. Peack, city aud., making plans waterworks, incl. sinking deep wells, installing pump equipment, distribution mains, etc. $20,000. Engineer not announced.

Tex., Hereford—Election Feb. 2, $7,500 bonds, pipe, fire hydrants, etc. for waterworks extensions. E. S. Ireland, City Hall, mayor.

Tex., Marshall — Election soon $50,000 bonds, extending mains, etc. in various streets. M. Ramsey, City Hall, city engr.

Okla., Calvin—Making preliminary plans new waterworks. $17,000. H. E. Davis, mayor. Engineer not selected.

Okla., Collinsville — Made preliminary plans 3 new high pressure boilers for water plant. $30,000 bond election in spring for same. Holway Eng. Co., Wright Bldg., Tulsa, engrs.

Okla., Henryetta—Plans election $200,000 bonds, impounding reservoir, filter plant, and main extensions, etc. Holway Eng. Co., 503 Wright Bldg., Tulsa, engr.

Okla., Kingfisher—Election Jan. 26, $690,000 bonds, waterworks improvements, incl. softening plant, 18 mi. pipe line, etc., also dam at Lugert. Benham Eng. Co., 512 Gumbel Bldg., Kansas City, Mo., engrs.

Okla., Spiro—Voted $15,000 bonds, 8,000 ft. 8 in. c.i. mains in various streets. Gantt-Baker Co., 1116 West Main St., Oklahoma City, engrs.

Calif., Laguna Beach — Voted $600,000 bonds, waterworks.

Calif., Oceanside—Plans 3 m.g. reservoir.

Calif., Santa Cruz — Plans to purchase 6,000 lin.ft. 12 in. or 246 tons Class "B" c.i. pipe. S. A. Evans, city clk. J. K. James, city engr.

Calif., Upland—Soon takes bids 5,600 ft. 12 in. steel pipe and ditch, 6,000 ft. 8 in. and 5,500 ft. 6 in. stand and black pipe and ditch, 2 m.g. concrete reservoir, etc. R. G. Manly, 336 East 9th St., engr. Noted Dec. 3.

Que., Quebec—Plans pumping station, for new section of city. $90,000. F. C. Baillarge, Quebec, engr.

Ont., Toronto — York Twp. plans 5,000 lin.ft. 6 in. c.i. mains, etc. in various streets. $17,000. F. B. Goedike, 40 Jarvis St., engr.

BIDS DESIRED

Mass., Springfield—Feb. 8, by Bd. Water Comrs., Municipal Bldg., 3,475 lengths 6- to 10-in. Class E pipe, reducers, tees, plugs, etc. H. M. King, supt.; adv. E. N.-R. Jan. 21.

N. Y., Willard—Feb. 24, by State Hospital Comn., Albany, additional watermains for fire protection for Willard State Hospital, here. S. W. Jones, Capitol, Albany, state archt.

Md., Salisbury — Feb. 11, by Salisbury Water & Sewer Comn., C. E. Harper, chm., water mains and appurtenances, Contr. 14. F. H. Dryden, ch. engr.; adv. E. N.-R. Jan. 21.

Calif., San Diego—Common Council, Jan. 11, from B. Noble, Spreckels Bldg., water system in Alta Vista, Homedale St., etc., 6,495 lin.ft. 4 in. c.i. pipe $1.50 per lin.ft., and 11,802 lin.ft. 6 in. c.i. pipe $1.80, etc., total $33,783.

See proposal advertisements on page 116, Advertising Section.

Eat Your Cake and Have It Too

THERE is an old saying that you cannot eat your cake and have it too, and it's true of most things. Nearly all commodities are consumed in use. Food is consumed. Clothing is consumed.

But there is a product used but not consumed. Cement is used in making concrete, and concrete is permanent. It grows stronger with age. It cannot rust, rot, or burn. It endures.

Concrete highways connect city and country. Concrete forms the base of well-paved streets and alleys. A grid-iron of hundreds of thousands of miles of concrete sidewalks in the United States makes walking easy. Railroads are large users of concrete. Modern buildings are of reinforced concrete. Concrete goes into many farm structures. Almost everything from chicken coops to skyscrapers rests on a concrete foundation.

The Universal Portland Cement Co. has shipped a total of 756 *million* sacks or about 36 *million* tons of cement. This would fill over a *million* box cars, making a train about 8,500 miles long and requiring 28,000 locomotives to move it. This is enough cement to build a system of permanent concrete roads radiating from Chicago to the capital of every state in the Union.

Practically all this Universal cement—756 *million* sacks—still serves a useful purpose. It has not been consumed but has been transformed into houses, industrial buildings, improved highways, water-power developments and other valuable improvements that form additions to the permanent, taxable wealth of the country as well as tools for production of additional wealth.

Universal Cement, unlike the cake one cannot eat and also have, is used but not consumed.

Universal Portland Cement Co.

Chicago Pittsburgh Minneapolis Duluth Cleveland New York

Concrete for Permanence

Waterworks (Continued)

CONTRACTS AWARDED

Mich., Detroit—Bd. Water Comrs., 4,500 tons 36 in. Class C c.i. pipe, to U. S. Cast Iron Pipe & Fdry. Co., Burlington, N. J., $42.60 per ton.

Ill., Golconda — For 2 water towers, 2 rein.-con. storage basin, 2 deep wells, 23,195 lin.ft. c.i. mains, pumping station, etc., to E. K. Ladd, Peotone, $139,000.

Ark., Fayetteville—For 1,200 gal. duplex pump with necessary equipment, to Fairbanks-Morse Co., 900 South Wabash Ave., Chicago, Ill.; also city will build 125 ft. concrete dam on White River, by day labor. E. M. Ratliff, Stone Bldg., engr.

Tex., Wellington — Extending mains in various streets, also additional pumping equipment, etc., to Panhandle Constr. Co., Lubbock, approximately $32,000.

Sewers

PROPOSED WORK

Conn., Bridgeport—Plans sewage disposal plant, Congress St. To exceed $25,000. J. A. McElroy, city engr.

Pa., Pittsburgh — Making preliminary plans sewers in Greenway Dr. $60,000. City Bureau of Engineering, Dept. Pub. Wks., engrs.

N. C., Four Oaks—Making plans sanitary sewers in various streets, $70,000; also water pump and motor, $10,000. J. B. McCrary Co., Citizens & Savings Bank Bldg., Atlanta, Ga., engrs. Noted Dec. 24.

N. C., La Grange—Plans to issue $50,000 bonds, sewerage system.

Ga., Atlanta—Plans election in March or April $2,000,000 bonds, sewers and removing Peachtree Creek disposal plant to point closer to river. W. Sims, mayor.

Ga., Rome—See "Waterworks."

Fla., Ft. Meade—Election Feb. 9, $65,000 bonds, sewers in various streets.

Miss., Ocean Springs—See "Unclassified."

O., Fairview—Takes bids in spring sewers in Lorain St., Sewer Dist. 1, and Elmore Ave. To exceed $25,000. E. H. Arnold, Town Hall, engr.

O., Geneva-on-the-Lake — Ashtabula Co. (Jefferson) made preliminary plans 2 sewage treatment plants at Red Brook, here. R. F. MacDowell, 1770 East 11th St., Cleveland, engr.

Mich., Detroit—Dept. Pub. Wks., making plans brick and concrete sewers in newly annexed districts, incl. 1,650 lin.ft. each in Buchanan, Otis and Toledo Aves. from Military to Junction Aves. $42,000 each, 2,400 lin.ft. Commonwealth Ave. from Grand River to Lysender Aves. $52,800, 2,000 lin.ft. Carr Ave. Sewer from Brainard to Canfield Aves. $44,000, all foregoing 5½ ft.; 1,700 lin.ft. each in Waveney Ave. Arm and in Southampton Ave. Arm from Kennsington to Cadieux Aves. $31,000 each, and 2,600 lin.ft. Seven Mile Rd. from Connors to Townline Rds. $47,000, all foregoing 3 to 4½ ft.; 5,000 ft. Sherwood-Winchester Sewer from Moran to Windfield Sts. $105,000, 5,000 lin.ft. Atlantic-Winchester Sewer from Lamont to Mound Aves. $105,000, and 3,000 lin.ft. Tex., Huntsville — See "Streets and Roads."

Dams

PROPOSED WORK

Okla., Lugert — See "Waterworks under Kingfisher."

Que., Hull—See "Buildings—Industrial."

BIDS DESIRED

New Zealand, Wellington—Mar. 23, by Secretary Pub. Wks., Supplies & Tenders Bd., automatic dam Sect. 182, complete dam and tunnel gates, etc., Sect. 181, at Mangahao Power Development.

CONTRACTS AWARDED

Md., Conowingo—See "Buildings—Industrial."

Ark., Fayetteville—See "Waterworks."

Railways

PROPOSED WORK

Illinois—Jacksonville—Havana R.R. Co., Jacksonville, granted permission by Inter-State Commerce Comn., rehabilitating 51 mi. of former Chicago, Pennsylvania & St. Louis R.R. line between Jacksonville and Havana. $550,000. A. Stevenson, 123 West Madison St., Chicago, pres.

Illinois — Wabash R.R., Exch. Bldg., St. Louis, Mo., plans 90,000 cu.yd. crushed rock ballast on Decatur Division, incl. 21 mi. from Poag to Worden, 27 mi. from Sibley to Mansfield, and 25 mi. from Ryan to Toledo. $100,000. R. H. Howard, ch. engr.

Minnesota—Minnesota Western R.R. Co., E. D. Luce, vice-pres., 2823 6th Ave., N., Minneapolis, soon lets contract 57 mi. railroad extension between Lake Lillian and Dawson. $1,500,000. J. Olson, c/o owner, engr. Noted Oct. 29.

Wyoming—Union Pacific R.R. Co., 1416 Dodge St., Omaha, Neb., plans approximately 4 mi. extension in Goshen Co., here. $182,028. R. L. Huntley, ch. engr.

Missouri—St. Louis-San Francisco R.R. Co., Frisco Bldg., St. Louis, making preliminary plans 174 mi. 100 lb. rails to replace 90 lb. rail incl. double tracks between Tower Grove and Pacific, 81.2 mi. single track between Pacific and St. Clair, 36 mi. single track between Jasper and Pratt City, Ala., and 57 mi. double track between Paola, Kan., and Kansas City, Mo.; rein.-con. and timber viaducts, grade crossing signals, etc., $157,000; train control devices between Afton, Okla., and Monett,

See proposal advertisements on page 116, Advertising Section.

INDUSTRIAL

DOES IT MEAN ANYTHING?

WHEN four hundred and twenty railroads all over the world use INDUSTRIAL CRANES, and keep on buying them; when one railroad alone owns 232 INDUSTRIALS—does it mean anything? Can a railroad's judgment be counted as worth while?

It is not for railroads alone that INDUSTRIALS are built; they are found in every branch of industry. There is an INDUSTRIAL for every need, in capacities ranging from 5 to 200 tons. Tell us your problems—our engineers are at your service.

The illustration shows an INDUSTRIAL crawling tractor crane which is also a shovel, dragline, pile driver, clamshell, grapple, magnet—all in one! And you can depend on it to give maximum efficiency in each service.

This type DC is operated by steam, gasoline, electric or Diesel power.

Ga., Rome—See "Waterworks."

Ga., Tifton—Election Feb. 11 (extended date), $70,000 bonds, paving various streets. Noted Nov. 26.

La., Monroe — Ouachita Parish election Feb. 2, $1,750,000 bonds, improving 97 mi. highway.

Tennessee — State Dept. Hys. & Pub. Wks., Nashville, plans probably concrete paving 9.5 mi. Cleveland-Hamilton Co. line Rd. Bradley Co. C. N. Bass, acting comr.

Tennessee—State Dept. Highways & Pub. Wks., Nashville, making surveys improving 10 mi. Greenville-Bulls Gap Rd., Greene Co., and 10 mi. Dandridge-Sevier Co. line Rd., Jefferson Co. C. N. Bass, acting comr.

Tennessee—State Dept. Highways & Pub. Wks., Nashville, plans improving 10 mi. Cookeville-Monterey Rd., $190,000 and 15 mi. Cookeville-Smith Co. line Rd., $240,000, both Putman Co. County Court, Putman Co. and Dept. Highways, Nashville, engrs.

Tenn., Blountville — Sullivan Co. and State Dept. Highways & Pub. Wks., Nashville, appropriated $20,000 each, improving Bluff City-Washington Co. line Rd. Work will be done under direction and supervision of State Hy. Dept. C. N. Bass, Nashville, acting comr.

Tenn., Clinton — Anderson Co. plans improving 4 mi. Briceville-Coal Creek Rd. To exceed $25,000.

Tenn., Dover — Stewart Co. plans constructing approximately 15 mi. Dover-Big Sandy Rd. To exceed $25,000.

Tenn., Erwin — Unicoi Co. appropriated $150,000, improving various highways.

Tenn., Greeneville — Green Co. appropriated $170,000, improving Andrew Johnson Highway.

Tenn., Kingston—Roane Co. voted appropriation $70,000, improving 11.5 mi. Kingston-Loudon Co. line Rd. Work will be done under direction of Tennessee Dept. Highways & Pub. Wks. C. N. Bass, acting comr.

Tenn., Knoxville — Plans curbing, grading, sidewalks 2 in. sheet asphalt paving 1,400 sq.yd., 6 in. concrete paving 19,000 sq.yd., and 5 in. asphaltic concrete paving 41,200 sq.yd. various streets. $378,000. W. W. Maynott, Knoxville, engr Noted Nov. 5.

Tenn., Lawrenceburg—Lawrence Co. and State Dept. Highways & Pub. Wks., Nashville, appropriated $21,000 each, bituminous surfacing Lawrenceburg - Columbia Rd. Work will be done under direction and supervision of State Hy. Dept., C. N. Bass, Nashville, acting comr.

Tenn., Linden—Perry Co. election May 8, $30,000 bonds, improving various roads.

Tenn., Maryville—Blount Co. appropriated $100,000, improving Maryville-North Carolina State Line Rd. via Deals Gap.

Tenn., Sevierville—Comrs. Sevier Co. appropriated $100,000, highway connecting East Tennessee with North Carolina through Indian Gap.

Ohio—Dept. Highways & Pub. Wks., Columbus, plans grading, paving, etc., 1,350 to 1,450 mi. highways during 1926. F. G. Schlesinger, dir.

O., Columbus—Making plans grading and concrete or bituminous macadam paving 1,375 ft. McKinley Ave. from Central Ave. to Darby St., 24 ft. $27,000. R. H. Simpson, City Hall, engr.

O., Fairview—Takes bids in spring sidewalks on Donald, Belvidere, Stanford, Elmore, Eastlook, Northwood, Woodstock, and Westwood Aves. To exceed $25,000. E. H. Arnold, Town Hall, engr.

O., New Philadelphia — Tuscarawas Co. plans waterbound macadam or bituminous macadam paving 2.8 mi. Divisions 3 and 4, New Port-Gilmore Rd., 18 ft. $100,000. G. Fiedler, Dover, engr.

O., St. Clairsville — Belmont Co. soon takes bids tar, amiesite and brick surfacing 11 projects. $147,280. E. M. Shirk, St. Clairsville, engr.

O., Upper Sandusky—Making plans grading and paving 653 ft. North Sandusky St., 26 ft., brick $27,000, concrete $24,500. City Engineer.

Mich., Detroit — Dept. Parks & Boulevards, 600 Marquette Bldg., making revised plans, grading, curbing, concrete and tile paving around Scott Memorial Fountain. $50,000. Former bids rejected. Cass Gilbert, 244 Madison Ave., New York City, N. Y., archt. Noted Oct. 29.

Ill., Galesburg—Knox Co. soon takes bids 600,000 gal. road oil on various roads. $40,000. H. M. Roy, Court House, supt. highways.

Ill., Kewanee—Henry Co. plans grading, curbing and vibrolithic concrete, rein.-con., brick or Warrenite-bitulithic paving 5 blocks Park and Willow Sts. $30,000. J. G. Palmer, City Hall, engr.

Ill., Metropolis — Making preliminary plans grading, curbing and concrete, brick, or asphalt paving various streets. $400,000.

Ill., Monmouth—Plans removing old pavement and grading, curbing and vitr. brick on concrete paving 9,791 sq.yd. South Main St., Paving Dist. 77. $52,077. H. Tolberg, Court House, engr.

Ill., Monmouth—Warren Co. takes bids in February, spreading 600,000 gal. road oil on various roads. $40,000. C. L. McClanahan, Court House, engr.

Ill., Peoria — Peoria Co. takes bids in spring, grading, bridging and paving 2 mi. Mount Holly Rd., 18 ft. $60,000. W. E. Emory, Court House, engr.

Ill., Peoria — Peoria Co. plans grading, curbing and brick or concrete paving 3 blocks West Nebraska St. from North to Elizabeth Sts., and 6 blocks West Nebraska St. from Elizabeth to University Sts., 20-70 ft. $60,000. W. E. Backes, City Hall, engr.

Ia., West Liberty—Made plans paving approximately 55,000 sq.yd. various streets. To exceed $132,427.

Kan., Newton—Making preliminary plans brick on concrete paving various streets. Shockley Eng. Co., 800 Graphic Arts Bldg., Kansas City, Mo., engrs.

Wyoming — State Hy. Dept., Cheyenne, plans improving 13.75 mi. Federal Aid Project 190, Deepwater Co., $180,000; and 47.7 mi. Federal Aid Project 191, Sweetwater Co., $560,000.

Missouri — State Hy. Dept., Jefferson City, making plans grading 60.7 mi. roads in Andrew Daviess, De Kalb, Franklin, Howard, Pettis, Pike and Ralls Counties; 30 ft. grading 55.5 mi. roads in Gentry, Lafayette, Linn, Newton, Saline, Vernon and Wayne Counties; 18 ft. gravel surfacing 88.15 mi. roads in Audrain, Bates, Bollinger, Caldwell, Howard, Howell, Greene, St. Clair, Stone and Wayne Counties; 9 ft. concrete paving 19.2 mi. roads in Daviess and De Kalb Counties; 18 ft. concrete paving 40 mi. roads in Andrew, Franklin, Pettis, Pike and Ralls Counties; 18 ft. rock asphalt and 18 ft. amiesite paving 1.5 mi. roads in Howard Co. B. H. Piepmeier, ch. engr.

Mo., Webb City—Election about Mar. 10, $25,000 or more bonds paving various streets. Engineer not selected.

Tex., Abilene—Taylor Co. making plans grading and bridging 6.63 mi. State Highway 1-A, $28,000; also 11.58 mi. State Highway 1 from Sta. 984-00 to Station

See proposal advertisements on page 116, Advertising Section.

Streets and Roads (Continued)

1595-70, $25,000. L. C. McCanlies, Abilene, engr.

Tex., Austin — Travis Co., making plans grading, bridging and bituminous paving 6.7 mi. Del Valle-Garfield Rd. 18 ft., $36,-735; also gravel, crushed rock and two course inverted penetration bituminous surfacing 13.85 mi. State Highway 29, 16 ft., $66,500. O. Leonard, Austin, co. engr.

Tex., Clairemont—Kent Co. made plans grading, bridging and bituminous macadam paving 17.378 mi. State Highway 83 from Clairemont to Garza Co. line, 18 ft. $325,000. L. M. Ferlet, Clairemont, co. engr.

Tex., Coleman — Coleman Co. making plans grading, hard paving, etc., 1.04 mi. Highway 23, 20 ft. $28,000. Address C. L. South, c/o Courthouse, judge.

Tex., Edinburg—Hidalgo Co. making plans graveling 55 mi. and hardsurfacing 159 mi. Monte Cristo, Weslaco, West Edinburg and East Edinburg Rds., South Mission Rd. to point near Madero, Jackson Rd. from intersection with Highway 12, Sharyland Blvd., etc., 16-18 ft. $3,500,000. P. S. Devine, Pharr, engr. Noted Jan. 7.

Tex., Henrietta—Clay Co. making plans concrete paving 7.14 mi. State Highway 5, Federal Aid Project 448-B, Unit 2, 18 ft. $260,000. D. M. Puckett, Henrietta, co. engr.

Tex., Port Arthur—Election soon $1,000,-000 bonds permanent paving various streets. W. O. Bower, City Hall, engr.

Tex., Seymour—Baylor Co. making plans grading and bridging 20.58 mi. State Highway 24, Federal Aid Project 454-A. $120,000. J. G. Rollins, Seymour, engr.

Tex., Sweetwater—Nolan Co. soon takes bids double bituminous surface treatment on sledged stone, caliche and macadam paving 15.22 mi. State Highway 1, Federal Aid Project 444-B, Unit 2. $348,000. J. A. Focht, Sweetwater, engr. Noted Nov. 12.

Tex., Tulia — Voted $65,000 bonds permanent paving various streets. Devlin Eng. Co., 119 Central Bldg., Amarillo, engrs.

Oklahoma—State Hy. Dept., Oklahoma City, making surveys grading, etc. 18 mi. Albert Pike Highway, 30 ft. $65,000. J. M. Page, highway engr.

Okla., Dover—Making preliminary plans grading, curbing, and concrete paving 9,000 sq.yd. Main St. $27,000. Engineer's name withheld.

Okla., Frederick — Voted $52,400 bonds vertical fibre brick paving 13,100 sq.yd. 7th and 9th Sts. Benham Eng. Co., Gumbel Bldg., Kansas City, Mo., engrs.

Okla., Heavener — Making preliminary plans grading and concrete paving 11,300 sq.yd. Main St. and Ave. C. $35,000. M. A. Stewart, mayor. Engineer not announced.

Okla., Hennessey—Plans grading, curbing and concrete paving 19,800 sq.yd. Main St. $68,350. V. V. Long & Co., 1300 Colcord Bldg., Oklahoma City, engrs.

Okla., Hobart—Making preliminary plans grading and concrete paving 9,740 sq.yd. South Main St., 40-30 ft. $29,250. V. V. Long, 1300 Colcord Bldg., Oklahoma City, engr.

Okla., Idabell—Making preliminary plans vertical fibre brick resurfacing 16,600 sq.yd. Main St. and Central Ave. $35,000. W. O. Campbell, city clk. Engineers name withheld.

Okla., Okarche — Making preliminary plans grading and concrete paving 9,400 sq.yd. Main St. $30,000. H. O'Reilly, mayor. Engineer not announced.

Idaho—State Hy. Dept., Boise, plans improving 2.739 mi. Federal Aid Project 79, Bannock Co. $123,000.

Oregon — State Hy. Dept., Salem, plans improving 11 mi. Federal Aid Project 126, Klamath Co. $87,000.

California—State Hy. Dept., Sacramento, plans constructing road to connect Maricopa, Kern Co. and Carpenteria, Santa Barbara Co. $2,000,000. Engineer not selected.

Calif., Berkeley — Plans paving 6th St. between University Ave. and Dwight Way, $50,000 or more; Sacramento St. between Dwight Way and south city limits, $75,000 or more; Alcatraz Ave. between Sacramento and Adeline Sts., $27,500; Euclid Ave. between Eunice and Regal Rd., $75,000 or more; Spruce St. between Cedar and Arch Sts., $70,000 or more; 7th St. between Dwight Way and Folger St., $80,000 or more; and portions of Berkeley Way, Walnut St., etc., to exceed $75,000. Noted Nov. 19.

Calif., Hermosa Beach — Making plans paving, etc. Camino Real from Pier Ave. to south city line. To exceed $75,000. Los Angeles Co. appropriates $30,000 toward cost. J. Rapier, city engr.

Calif., Oakland — Making plans paving, etc., Peralta St. from 7th St. to Emeryville city limits. $250,000. Alameda Co. appropriates $60,000 toward cost. W. W. Harmon, city engr.

Calif., Oceanside — Made preliminary plans paving, etc. various streets. $125,000 or more.

Calif., San Diego—Made plans improving 17th St. between F St. and Imperial Ave., 1,773 sq.ft. concrete sidewalk, 412 lin.ft. concrete curbing, 109,190 sq.ft. 1½ in. on 2½ in. asphaltic concrete paving, etc. F. A. Rhodes, city engr.

Calif., Santa Cruz—Made plans grading, concrete curbing, cement sidewalks, 5 in. concrete paving, etc. 124,426 sq.ft. Market St., Berkeley Way, etc. To exceed $25,000. J. K. James, city engr.

Ontario — Dept. Provincial Highways, Parliament Bldgs., Toronto, plans macadam, asphalt and concrete paving 131 mi. Kingston - Ottawa Highway. $2,000,000. R. M. Smith, 110 University Ave., Toronto, engr.

Ontario—Dept. Pub. Highways, Parliament Bldgs., Toronto, plans graveling and macadam paving 140 mi. road from Washago to North Bay. $1,000,000. R. M. Smith, 110 University Ave., Toronto engr.

Ont., Guelph — City Council plans concrete paving Yarmouth Rd. $35,000. H. S. Nicklin, City Hall, engr.

Ont., Toronto — City Council soon takes bids asphalt paving Close Ave., $8,816; also opening and grading lane between Millicent St. and Lappen Ave., $21,500. R. C. Harris, City Hall, engr.

Ont., Toronto — East York Twp. plans curbing, guttering and asphalt paving approximately 6,000 sq.yd. Danforth Ave. $25,000. G. R. Jack, 443 Sammon Ave., engr.

Loud Praise for Easy Operation

"The operators are loud in their praise for the ease with which it is handled (a 14 Ton Whitcomb Standard Gauge Locomotive) and its ready response to duty".

Whitcomb Locomotives have always been known for their easy handling and for the accessibility of parts in case of accidental breakage, and for the comfort which they allow the operator.

The cabs are always furnished with comfortable seats, all pedals and levers being in easy reach and all moving parts entirely enclosed.

Ask your locomotive operator what he thinks of "Whitcomb's". Let him help you to select the proper locomotive for your job.

Let us send you bulletins on "Whitcombs-Designed to Work—Built to Overwork".

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Caulking Means EXPENSE---
No Caulking Means PROFIT

Making LEADITE Joints on 24 inch c. i. B & S Force Main

It is needless waste of time, money and labor to caulk cast iron bell and spigot water mains.

Why not turn this expenditure into a profit?

Use Leadite which is melted and poured into the joint.

Leadite forms a water-tight bond by filling every crevice of the joint from the yarn out to face of bell of pipe, without caulking.

Leadite means simplicity, efficiency and economy.

Water works all over the world use Leadite because it makes a good joint which improves with age.

Leadite resists electrolysis.

Leadite facilitates rapid progress of the work generally.

Leadite does not corrode or rust.

Leadite has been successfully tested and used for over 30 years.

Thousands of miles of pipe jointed with Leadite are in service.

The up-to-date water works man specifies and uses LEADITE.

LEADITE saves at least 75%

LEADITE is the pioneer self-caulking material for c. i. pipe

Be Sure It Is LEADITE and Accept No Imitations

THE LEADITE COMPANY, Inc.
1512 Land Title Building, Philadelphia, Pa., U. S. A.

NO CAULKING

Ill., Toledo—Feb. 5, by Bd. Local Impvts., Village Hall, distribution system, incl. 10,575 ft. 6 in. and 11,692 ft. 4 in. c.i. Class B c.i. pipe, 29 fire hydrants, 36 gate valves and boxes, etc. Caldwell Eng. Co., Jacksonville, engrs.

Minn., St. Paul—Feb. 2, by A. E. Eggert, city purch. agt., 50 each 2 in. and 1.5 in. brass water gate valves, 62,000 lin.ft. seamless copper tubing, 2,000 lb. 40-60 solder in approximately 3 lb. pigs. G. M. Shepherd, city engr.

Neb., Ohiowa—Feb. 15, by J. P. Moor, city clk., Sect. 1, 35,000 or 50,000 gal. tank on 100 ft. tower to balcony, erected on foundation; Sect. 2, 11,016 ft. 4- to 8-in. Class "B" c.i., McWane, prechalked joint or DeLavaud Class "150" c.i. pipe; Sect. 3, 4,220 ft. 2 in. galvanized or c.i. pipe; Sect. 5, 8 or 10 in. well, approximately 200 ft. deep, etc. To exceed $15,000. Henningson Eng. Co., Natl. Bldg., Omaha, engrs.

Mo., Republic — Feb. 2, by City Clerk, improving waterworks, incl. tank on tower, pumping equipment and several miles mains. Gantt-Baker Co., Inc., 1116 West Main St., Oklahoma City, Okla., engrs. $65,000. Noted Nov. 12.

Mo., St. Louis—Feb. 4, by G. J. Dietz, supply comr., City Hall, 800 tons 36 in., 1,260 tons 20 in., 440 tons 12 in. and 165 tons 3- to 8-in. c.i. pipe.

Okla., Heavener—City, in market small 350 g.p.m. centrifugal pump against a 300 ft. head, for waterworks. J. H. Brannon, city mgr.

Calif., Los Angeles — Mar. 15, by Bd. Supervs. Los Angeles Co. Flood Control Dist., 165 ft. concrete dam and appurtenant structures, tunnels, spillways, etc., in Sawpit Canyon, 2 mi. north of Monrovia. L. E. Lampton, clk.; adv. E. N.-R. Jan. 28. Noted Dec. 3.

Calif., Mount Shasta (mail Weed)—Feb. 12, by City Trustees, extending waterworks,

See proposal advertisements on page 100, Advertising Section.

Save Time and Money on Your Winter Work

Make *Strong* Concrete in *3 Days* with *Universal* Cement

On some of your construction work in progress during these winter months, high early strength concrete is particularly desirable because:

It has sufficient strength to resist damage by freezing much earlier than ordinary concrete.

It requires protection from freezing for a *shorter* period which means a saving of expense.

It saves time where rush work is required.

You can, with *Universal* cement, obtain quick-hardening, strong concrete in *3 days* by using simple, inexpensive methods that thousands of laboratory tests and actual construction experience prove will give you these desired results.

For detailed information write to

Universal Portland Cement Co.

Chicago Pittsburgh Minneapolis Duluth Cleveland New York

Concrete for Permanence

Waterworks (Continued)

4,200 cu.yd. excav., 12,500 ft. 10 in. pipe with fittings, one 100,000 gal. or one 200,000 gal. tank, etc. H. B. Ream, city engr.

BIDS RECEIVED

N. J., Vineland — Bd. Institutions & Agencies, Trenton, B. G. Lewis, comr., Jan. 18, 50,000 gal. steel tank on tower, at New Jersey Home for Feeble Minded, here, from Pittsburgh-Des Moines Steel Co., 30 Church St., New York City, $6,700. Noted Jan. 7

W. Va., Wheeling—Mains in 8 projects, from G. J. Coffey Co., Wheeling, $40,597.

Mich., Detroit—Dept. Water Supply, 4,500 tons 36 in. Class "C" c.i. pipe, from U. S. Cast Iron Pipe & Fdry. Co., East Burlington St., Burlington, N. J., at $42.60 per ton.

Wis., Milwaukee—Central Bd. Purchases, Jan. 22, 3,000 tons 6- to 16-in. Class "C" pipe, from Glamorgan Pipe & Fdry. Co., 122 South Michigan Ave., Chicago, Ill. at $47.40 per ton; 125 tons special castings, from Amer. Cast Iron Pipe Co., 38 South Dearborn St., Chicago, Ill. $84 per ton; 70 offsets and 7 tons special offsets, from J. B. Clow & Sons Co., North Talman Ave. and West Lake St., Chicago, Ill. at $0.775 per lb. and $155 per ton respectively; and tapping sleeves, from B. Hoffmann Mfg. Co., 1819 St. Paul Ave., $0.09 per lb. Noted Jan. 14.

CONTRACTS AWARDED

N. Y., Long Island City—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Douglaston Parkway, Winchester Blvd., etc., to Gregory Contg. Co., 351 East 124th St., New York City, $117,474. Noted Jan. 21.

N. Y., St. George—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Beach, Bryant, Carlton, Cromwell, Fiedler, Fremont Aves., etc., to Knight & DeMicco, 448 East Tremont Ave., New York City, $25,215. Noted Jan. 21.

Tenn., Brownsville — City will improve waterworks, incl. relaying and extending mains, etc., in various streets, by day labor. $45,000. Noted July 16.

Tenn., Nashville—Auxiliary reservoir at Loves Circle, to Foster & Creighton Co., 4th and 1st Natl. Bank Bldg. Engrs. est. $100,000. Noted Dec. 17.

Mich., Detroit—Dept. Water Supply, five hundred 8 in. and five hundred 6 in. Detroit Water Supply gate valves, to Michigan Valve & Fdry. Co., 3631 Parkinson St., $28.20 and $20.95 each, respectively.

Ill., Lebanon—City Clerk for Bd. Local Impvts., 34,600 ft. 4 and 6 in. c.i. mains, 45 fire hydrants, 32 gates, valves and boxes, etc., to Merkle Contg. Co., Davidson Bldg., Kansas City, Mo., $50,001. Noted Jan. 21.

Wis., Menasha—J. F. De Caro, city clk., 1,884 ft. 6 in., 430 ft. 8 in. and 126 ft. 4 in. c.i. pipe, to Natl. Cast Iron Pipe Co., 122 South Michigan Ave., Chicago, Ill.; 5 hydrants, one 8 in. and seven 6 in. gate valves, to Darling Valve & Mfg. Co., Williamsport, Pa. Engrs. est. to exceed $15,000. Noted Dec. 31.

Calif., San Diego — Common Council, water system in Alta Vista, Homedale Sts., etc., to B. Noble, Spreckels Bldg., $33,783. Noted Jan. 21.

Sewers

PROPOSED WORK

N. C., Cary—See "Waterworks."

Fla., Miami—Making plans 22,950 ft. 10 in. vitr. sewers, replacing 23,850 lin.ft. sidewalks, curbing, guttering, and sheet asphalt paving, in Dist. 185, $150,000; 17,000 ft. 12 in. vitr. sewers, 17,000 lin.ft. sidewalk, curbing and guttering and sheet asphalt paving Dist. 186, $125,000; 800 ft. 15 in. vitr. sewers, 800 ft. curbing, guttering, sidewalk, etc., Dist. 187, and 400 ft. 18 in. vitr. sewer Dist. 188, $10,600. C. S. Nichols, Miami, engr.

Ala., Northport — Voted $40,000 bonds, sewers and water mains in various streets. Noted Dec. 17.

Tenn., South Pittsburg—See "Streets and Roads."

O., Portage — Soon takes bids sanitary sewers in Longmore allotment. $35,000.

Mich., Melvindale (Dearborn P. O., R. F. D. 2)—Making preliminary plans Palmer Ave. Trunk Sanitary Sewer, approximately 6,000 lin.ft. 14- to 33-in. circular concrete pipe. G. Jerome, 1331 Majestic Bldg., Detroit, engr.

Mich., Melvindale (Dearborn P. O., R. F. D. 2)—Plans trunk sewer in Prospect Ave., Sect. 1, 2,552 ft. 42 in. concrete circular pipe Sect 2, 4,227 ft. 33 in. and 36 in. pipe and Sect. 3, 3,125 ft. 27- to 33-in. pipe. $200,000. G. Jerome, 1331 Majestic Bldg., Detroit, engr.

Ill., Addison—Takes bids about Aug. 1, sewers, etc., in various streets. $50,000. E. Hancock, 2047 Ogden Ave., Chicago, engr. Noted Aug. 6.

Ill., Bellewood—Takes bids about June 1, combined sewers in various streets. E. Hancock, 2047 Ogden Ave., Chicago, engr.

Ill., Bensenville—Takes bids about June 1, storm water drains in various streets. $100,000. E. Hancock, 2047 Ogden Ave., Chicago, engr.

Ill., Elmhurst—Takes bids about Aug. 1, combined sewers in various streets. $400,000. E. Hancock, 2047 Ogden Ave., Chicago, engr.

Ill., Jonesboro — Takes bids about Mar. 13, disposal plant, mostly 8 and 10 in. sewers, etc. in various streets. $40,000. W. A. Fuller Co., 1917 Ry. Exch. Bldg., St. Louis, Mo., engrs.

Ill., La Grange—Takes bids about Apr. 1, 12- to 74-in. combined sanitary and storm sewers in various streets. $400,000. E. Hancock, 2047 Ogden Ave., Chicago, engr.

Ill., Morton Grove — Takes bids about June 1, sewers in various streets. $300,000. E. Hancock, 2047 Ogden Ave., Chicago, engr. Noted Aug. 6.

Wis., Milwaukee — Metropolitan Sewerage Comn., 508 Market St., J. H. Fowles, secy., making plans 2 mi. concrete main sewers in Burleigh St. and Grand Ave.

Mo., Brentwood (St. Louis P. O.)—Brentwood Sewer Dist. takes bids in March sewers in East Section, 42,600 ft. 8- to 21-in. pipe, 25,000 cu.yd. earth and 627 cu. yd. rock excav., 58,000 lb. c.i., etc.; West Section, 80,000 ft. 8- to 18-in. pipe, 42,900 cu.yd. earth and 3,000 cu.yd. rock excav., 10,000 cu.yd. fire clay, 108,200 lb. c.i., etc. $300,000. A. H. Beard Eng. Co., Manchester Ave, Maplewood, engrs. Noted Nov. 26.

Mo., Charleston — Voted $30,000 bonds, complete sanitary sewerage system. F. L. Wilcox, Chemical Bldg., St. Louis, engrs. Noted Dec. 24.

Mo., University (St. Louis P. O.)—City clerk takes bids about Feb. 1, approximately 9,000 ft. 33 and 36 in. sanitary sewers in Sect. B, River Des Peres, Public Sanitary Sewer Dist. $75,000. W. A. Heimbeucher, City Hall, engr.

Ark., Hot Springs—Takes bids probably in April or May sewers in Oaklawn Dist. Garland Co. Sewer Dist. 1, $50,000; in Crescent Ave. and vicinity, Sewer Impvt. Dist. 86, $10,000; and in Park, Magnolia, Amber, Mt. Ida, Aspian, Glade Polar, Russell and Florence Sts., Sewer Impvt. Dist. 87, $55,000. C. Smith, City Hall, engr.

Ark., Pine Bluff — See "Streets and Roads."

Tex., Alice—Voted $50,000 bonds, sewerage system. J. H. Briggs, Alice, engr.

Tex., San Saba—Plans election $60,000 bonds, sewers in various streets, and probably disposal plant. D. Chadwick, city secy.

Tex., Wellington—Plans sewer improvements, mains, probably disposal plant, etc. $110,000. Devlin Eng. Co., Amarillo, engrs. Noted Jan. 7.

Tex., Wichita Falls — Soon takes bids sewerage disposal plant, incl. 2 story settling tanks, trickling filters and secondary settling tanks. $300,000. Montgomery & Ward, 545 Harvey-Snider Bldg., engrs. J. H. Gregory, Johns Hopkins University, Baltimore, Md., associated engr. Noted Nov. 5.

Okla., Stillwater — Making preliminary plans new sewage disposal plant, Imhoff tank filters, motor driven pumps, etc. $30,000 bonds voted. J. M. McLendon, Stillwater, engr.

Ont., Toronto — East York Twp. soon takes bids vitr. tile sewers in Rosevear Ave. $5,181, Newman Ave. $2,262, Eastdale Ave. $11,863, Hamstead Ave. $6,899. Work involves 7,500 ft. 8 in., etc. pipe. G. R. Jack, 443 Sammon Ave., Toronto, engr.

Ont., Toronto — East York Twp. plans 4,245 lin.ft. 33 and 36 in. concrete pipe in Lumsden, Coxwell and Mortimer Aves. $168,830. G. R. Jack, 443 Sammon Ave., engr.

Ont., Toronto—York Twp. plans 8 in. vitr. tile sewers in Donald Ave. $6,460, Ossington Ave. $5,700, Snider Ave. $8,810, St. Clair Ave. $8,090, Allenvale Ave. $460, Almeda Ave. $4,895, Kersdale Ave. $5,150, and Alexander Ave. $3,398. F. B. Goedike, 40 Jarvis St., engr.

BIDS DESIRED

N. J., Spring Lake — Feb. 8, by Mayor and Boro Council, Boro Bldg., Washington Ave., M. O. Morris, clk., sanitary sewers, electric ejector station, etc. J. M. Braly, boro engr.; adv. E. N.-R. Jan. 28.

Mich., Grand Rapids—Feb. 17, by Director Pub. Serv., City Hall, constructing Silver Creek Drain, Contr. K-4. F. H. Locke, city mgr.; adv. E. N.-R. Jan. 28.

Wis., Chilton—See "Streets and Roads."

Mo., Clayton—Mar. 1, by J. Harnage, secy., Northwest Maplewood Sewer Dist., 500 cu.yd. rock and 16,500 cu.yd. earth excav., 1,700 cu.yd. channel change, 1,072 ft. 42 and 48 in. segmental block and 24,440 ft. 8- to 36-in. vitr. concrete pipe, also 56,300 lb. c.i., etc. A. H. Beard Eng. Co., 7370 Manchester Ave., Maplewood, engrs. Noted Nov. 26.

Mo., St. Louis — Feb. 16, by Bd. Pub. Serv., 208 City Hall, 2,830 ft. 8- to 51-in. vitr. clay, segmental block or brick sewers in North Baden Joint Sewer Dist. $30,000. W. W. Horner, 300 City Hall, engr.

Calif., Los Angeles—Feb. 2, by Los Angeles Co. Sanitation Dist. 4, 8,071 ft. 8- to 18-in. vitr. clay sewer in La Cienega Blvd. Trunk Sewer Dist. from 3rd St. to Cienega Blvd., etc. To exceed $25,000. A. K. Warren, Los Angeles, engr.

Ont., Hamilton—Feb. 4 (extended date), by F. F. Trealeven, City Hall, high tension equipment, transformers, 5 vertical motors, automatic switching equipment, etc. for Gage Ave. Sewage Pumping Station. W. L. McFaul, City Hall, engr. Noted Jan. 21.

BIDS RECEIVED

N. Y., St. George—J. Lynch, pres. Richmond Boro, Boro Hall, Jan. 20, temporary sanitary sewer in Sea View Ave. from Washington Ave. to Quincy St. to Liberty Ave., from J. J. B. La Marsh, 391 Fulton St., Brooklyn, $103,833.

N. J., East Orange—City, 2,810 lin.ft. 12- to 60-in. concrete sewers in Woodland Ave., from F. Greco, 54 Fairmont Terrace, $38,670. Engrs. est. $45,000.

Pa., Phila.—Dept. Pub. Wks., Bureau of Engineering, Jan. 20, main sewer in Rowland Ave. between Tudor and Bleigh Sts., from J. Lombardi, Lincoln Bldg., $7,123; discharge pipes between Southwest Pumping Station and Eagle Creek, from J. J. McHugh, 1617 Race St., $7,070; and understructure in Wheatsheaf Lane between Delaware Ave. and Delaware River, also sewers and pumping station in connection with South Phila. Impvt. south of Packer St. west of Broad St., from G. F. Dobbin, 1020 South 7th St., $30,804 and $30,828 respectively. Noted Jan. 14.

Wis., Milwaukee—Central Bd. Purchases, J. W. Nicholson, ch. buyer, Jan. 22, from Milwaukee Grey Iron Fdry. Co., 39th Ave. and Mitchell St., three hundred 4 flange frames and grates at $0.0275 per lb., four hundred 3 flange $0.03, 400 side inlet boxes $0.04 and 200 manhole covers and lids $0.044.

Calif., Los Angeles—Constructing Arroyo de la Sacatella storm drainage system, from C. R. Adams, Colfax, $767,000. Noted Dec. 10.

CONTRACTS AWARDED

N. J., Westwood — Mayor and Boro Council, sewage treatment works, to Kuchar Bros., Montclair. Noted Dec. 10.

Md., Baltimore—Bd. Awards, storm and sanitary sewers in Sewer Dist. J-4, as listed in Storm Water Contr. 90, to W. H. Thompson Constr. Co., Relay, $90,084. Noted Jan. 7.

Fla., Lake Wales—L. F. Kramer, mayor, sanitary sewer and disposal plant, to C. K. Horton, 2202 Clay St., Houston, Tex., $74,000. Noted Dec. 31.

Ala., Selma — Sanitary sewerage system, to Roberts & Co., Tuft Bldg., Atlanta, Ga., $250,000. Noted July 16.

O., Cleveland—Cuyahoga Co., 3,500 ft. 8 and 36 in. concrete sewers in Mayfield and Belrose Aves., to Joseph Co., Prospect-Fourth Bldg., $23,956. Noted Jan. 7.

Mich., Detroit—Dept. Pub. Wks., Lonyo Road Pumping Station, incl. 25 x 40 ft. concrete pump pit, pumps, etc., to R. D. Baker, 1631 Elmhurst Ave., $85,000.

Wis., Beaver Dam—W. A. Gergen, city clk., 3,096 ft. tunnel work, 20 to 50 ft. deep, for sewers in 9 streets, to Szukalski & Matke, 1089 American Ave., Milwaukee, $29,841. Noted Jan. 14.

Wis., Wauwatosa—Bd. Pub. Wks., A. V. Brigham, secy., concrete storm sewers in East North Ave., to Szukalski & Matke, 1089 American Ave., Milwaukee, $22,163; and vitr. sanitary sewers in 14th and 15th Aves., to Blunt Bros., Waterloo, Ia., and Janesville, $8,086. Noted Dec. 17.

Ia., Earlham—Sanitary sewerage system, to E. L. Royer Constr. Co., 442 Insurance Exch. Bldg., Des Moines, $35,700; disposal plant, to Repass Constr. Co., 3832 8th St., Des Moines, $9,985. Noted Aug. 6.

Mo., University (St. Louis P. O.) — For approximately 3,000 ft. 21- to 33-in. vitr. clay and 42- to 60-in. segmental block

See proposal advertisements on page 100, Advertising Section.

The ECONOMY of Concrete Pipe

INDEPENDENT Reinforced Concrete Pipe, because of their adaptability, low installation cost, small maintenance cost and great durability, make a remarkably economical, as well as the most efficient sewer material.

Past years have demonstrated beyond question that sewers can be built better and at lower cost with Independent Reinforced Concrete Pipe. Once properly installed an "Independent" sewer is good for generations of continuous service.

Independent Pipe are made in sizes ranging from 24 to 108 in. in diameter. The pipe are manufactured in the locality where they are to be installed. Local labor and local materials are used to the greatest possible extent.

Contractors are invited to phone, wire or write for estimates and complete data on any concrete pipe work. Municipal officials interested in low first costs, low maintenance and long service for their sewers are urged to send for our special booklet.

Independent Reinforced Concrete Pipe tend to make permanence and economy synonymous.

Fla., Sarasota—E. J. Bacon, mayor, taking bids approximately 1,800,000 cu.yd. dredging, etc., in Sarasota Harbor. J. M. Braxton, Harbor engr.; adv. E. N.-R. Jan. 28.

Fla., St. Augustine—Feb. 18, by City Bd. Trustees, reclamation marsh or submerged lands, etc. J. E. Craig, 427 King St.,

See proposal advertisements on page 100, Advertising Section.

INDUSTRIAL

WHY INDUSTRIAL SPELLS ECONOMY

THERE are two traits built into INDUSTRIAL crawling tractor cranes, shovels and draglines, that result in economy. Both of these qualities are known the world over. They are *Dependability* and *Durability*.

You can depend on an INDUSTRIAL being right on the job whenever you need it. And it stays right on the job for so long a time that it proves a true economy. The first cost of an INDUSTRIAL is surprisingly low—the final cost, the lowest.

The reason for the nation-wide popularity of INDUSTRIAL crawling tractors is the fact that they are the finest machines money can buy and they give greater service value per dollar than any other type.

For the whole story, write for Book 120-A

INDUSTRIAL WORKS · BAY CITY · MICHIGAN

Excavation, Drainage, Irrigation, Levees, River and Harbor (Cont.)

Jacksonville, consult. engr.; adv. E. N.-R. Jan. 28.

Kan., Garden City—Jan. 30, by Finney Co. Water Users Assn., C. A. Danner, pres., 9.75 mi. irrigation canals, 300,000 cu.yd. excav. $40,000. B. L. Allen, Garden City, engr.

Okla., Guthrie—Defeated $85,000 bonds, paving 14 blocks Vilas, Logan, 11th and Washington Sts., 30 ft. V. V. Long & Co., 1300 Colcord Bldg., Oklahoma City, engrs. Noted Jan. 7.

Okla., Wilson—Plans grading, curbing and concrete paving 14,720 sq.yd. various streets. $46,620. C. Coon, 1820 Bway., Oklahoma City, engr.

Washington—Feb. 16, by State Hy. Dept., Olympia, clearing, grading, etc., 3.1 mi. road from Jared north, Pend Orelle Co., State Rd. 6, and 1 mi. State Rd. 8, Skamania Co.; crushed rock resurfacing 7,100

SUBWAY—NEW YORK, N. Y.

Bids were opened by Board of Transportation, 49 Lafayette St., Dec. 8, for constructing Route No. 102, Sect. No. 3, along and under 8th Ave., from West 28th to West 37th Sts., (A) Rosoff Subway Construction Co., 331 Madison Ave.; (B) P. McGovern, Inc., 50 East 42nd St.; (C) Underpinning & Foundation Co., 342 Madison Ave.; (D) Coleman Bros., Inc., 80 Maiden Lane; (E) Heyman & Goodman, 236 West 116th St. The unit bids are as follows:

	A	B	C	D	E
200,000 cu.yd. earth excavation	$12.50	$14.00	$12.60	$12.50	$12.00
23,000 cu.yd. rock excavation	17.50	14.00	12.60	16.00	20.00
27,000 cu.yd. concrete masonry	23.00	27.20	27.00	23.00	24.00
155,000 sq.ft. rubbing of concrete	.12	.10	.15	.13	.10
3,800 cu.yd. protective concrete masonry	23.00	27.20	27.00	23.00	24.00
500 cu.yd. rubble stone masonry	15.00	14.00	20.00	13.00	15.00
10 cu.yd. dry rubble masonry	12.00	14.00	20.00	12.00	15.00
150 cu.yd. brick masonry	45.00	50.00	60.00	50.00	40.00
3,200 cu.yd. removal and disposal of old masonry	20.00	20.00	54.00	40.00	40.00
200 sq.yd. vitrified brick lining for sewers	7.00	7.00	7.00	6.00	6.00
100 cu.yd. hollow terra cotta brick or tile masonry	45.00	50.00	60.00	40.00	40.00
100 bbl. grout of Portland cement	6.00	8.00	5.00	7.00	6.00
20 sq.yd. resurfacing old concrete masonry	2.00	2.00	5.00	6.00	5.00
100 sq.yd. plastering on hollow tile at D. M.	2.00	2.00	2.00	2.00	2.00
20 cu.yd. broken-stone or gravel	7.00	6.00	5.00	5.00	7.00
12,300 sq.yd. waterproofing—1 ply	1.25	1.25	1.00	1.00	1.00
24,000 sq.yd. waterproofing—3 ply	3.00	3.00	3.00	2.50	3.30
100 sq.yd. waterproofing—5 ply	4.50	4.50	5.00	4.50	5.00
100 sq.yd. waterproofing—6 ply	5.50	6.00	6.00	5.50	6.00
100 sq.yd. waterproofing—dry ply	1.00	1.00	1.00	.90	1.00
600 cu.yd. one layer brick in mastic	50.00	55.00	50.00	55.00	50.00
400 cu.yd. two layers brick in mastic	46.00	55.00	48.00	50.00	50.00
2,200 lin.ft. 3-in. cast iron pipe and fittings	2.00	1.25	1.00	1.50	1.50
350 lin.ft. 4-in. cast iron pipe and fittings	2.50	1.50	1.20	2.00	2.00
450 lin.ft. 6-in. cast iron pipe and fittings	3.00	2.50	1.80	2.50	3.50
2,200 lin.ft. 8-in. cast iron pipe and fittings	4.00	3.00	2.40	3.50	5.00
100 lin.ft. 3-in. standard galvanized steel pipe	2.00	1.25	1.00	1.50	1.50
250 lin.ft. 4-in. standard galvanized steel pipe	2.50	1.50	1.20	2.00	2.50
50 lin.ft. 6-in. standard galvanized steel pipe	3.50	3.00	1.80	3.50	4.00
120 lin.ft. 8-in. standard galvanized steel pipe	5.00	4.00	2.40	5.00	7.00
50 lin.ft. 10-in. standard galvanized steel pipe	7.00	6.00	3.00	6.00	10.00
156,000 duct.ft. tunnel ducts	.25	.30	.40	.25	.30
360 conduit ft. 3-in. fibre conduits	.50	.30	.60	.50	.50
4,450 ton riveted steel, painted and erected—standard shapes	128.00	140.00	122.00	130.00	130.00
4,200 ton riveted steel, painted and erected—Bethlehem shapes	136.00	150.00	130.00	135.00	137.75
40 ton removal and disposal of old steel	50.00	30.00	100.00	100.00	100.00
3 ton arch. steel and iron—stairs, ladders, pipe railings, etc.	400.00	400.00	600.00	400.00	400.00
450 sq.ft. sliding doors with steel panels	6.00	6.00	7.00	5.00	6.00
4 exit covers	500.00	600.00	600.00	500.00	1,000.00
2,250 sq.in. cutting old steel	2.00	.80	.50	.50	1.00
28,800 hole drilling holes in old steel	.50	.25	1.00	1.00	1.00
2,200 removing rivets in old steel	.75	.20	.70	1.00	1.50
190 ton steel rods and bars built in concrete	120.00	100.00	110.00	120.00	120.00
9 ton miscellaneous iron castings	250.00	200.00	240.00	200.00	200.00
3,700 lb. special wire forms	.26	.25	.20	.20	.30
3,900 lin.ft. 1½-in. oak or ash handrail	.60	.60	.50	.70	1.20
6,300 sq.ft. steel gratings for ventilation	5.00	4.00	4.00	4.00	4.50
10,200 sq.yd. sidewalk restoration	3.00	2.00	3.60	3.00	3.00
9,400 sq.yd. street repavement—asphalt	5.00	4.50	4.00	5.00	5.00
5,000 sq.yd. street repavement—granite block	5.00	8.00	3.00	5.00	6.00
2,000 sq.yd. street repavement—Belgian block	4.50	7.00	3.00	5.00	6.00
100 lin.ft. 6-in. bluestone curb	4.00	2.50	3.00	3.00	3.00
2,300 sq.yd. street repavement—wood block	5.00	6.00	5.50	5.00	6.00
100 lin.ft. new 8-in. granite curb	6.00	4.00	6.00	4.00	8.00
350 sq.yd. upper 3-in. of concrete walls	2.50	3.00	6.00	2.50	4.00
18,800 sq.yd. temporary pavement of granite blocks	2.50	4.00	2.00	3.00	3.00
26,500 lin.ft. ¾-in. electric conduits in place	.40	.40	.20	.40	.50
50 lin.ft. 1¼-in. electric conduits	.60	.80	.40	1.00	1.00
10 lin.ft. 2-in. electric conduits	1.00	1.00	.60	1.30	2.00
11,000 lin.ft. 1-in. electric conduits	.50	.50	.30	.90	.80
10 lin.ft. 3½-in. electric conduits	2.00	2.00	1.50	3.00	5.00
1,650 cast iron outlet boxes	2.00	2.50	2.00	3.00	2.00
10 cast iron pull boxes—6x6x4 in.	8.00	6.00	6.00	6.00	4.00

See proposal advertisements on page 100, Advertising Section.

7,000 lin.ft. 8-in. mail tube	6.00	5.00	5.00	6.00	6.00
700 lin.ft. new 8-in. mail tube, straight pipe	18.00	10.00	6.00	8.00	8.00
300 lin.ft. new 8-in. mail tube, curved pipe	30.00	50.00	40.00	40.00	40.00
140,000 duct.ft. electric ducts and conduits	.50	.40	.35	.30	.30
70,000 lin.ft. 3½-in. steel pipe	.60	.40	1.00	1.00	1.50
25 service connections for electric conduits	50.00	100.00	100.00	80.00	100.00
25 service boxes on relocated duct lines	160.00	200.00	100.00	200.00	300.00
25 junction boxes on relocated duct lines	360.00	400.00	300.00	400.00	500.00
10 additional boxes on relocated duct lines	500.00	600.00	400.00	500.00	800.00
Extended totals including item 19-A	$5,886,506	$6,131,138	$6,202,625	$6,235,133	$6,295,545
Extended totals including item 19-B	5,888,106	6,138,138	6,205,725	6,223,633	6,295,595

*Totals include underpinning of buildings but units do not.

Streets and Roads (Continued)

cu.yd. Wallula-Touchet Rd., State Rd. 3, Walla Walla Co.; and crushed gravel surfacing 6,500 cu.yd. State Rd. 2, Wenatchee-Orondo Rd., Douglas Co. J. W. Hoover, highway engr.

Calif., Colusa—Colusa Co. making plans paving 6½ mi. East Side Rd., and 3½ mi. Prize-College Rd. J. M. Felknor, co. engr.

Calif., Colusa — Colusa Co. made plans paving 2⅝ mi. Grimes-Knights Landing Rd. J. M. Felknor, co. engr.

Calif., Monrovia — Plans sidewalks on various streets. $50,000 or more.

Calif., Petaluma — Making preliminary plans paving, etc., portions of East D and Wilson Sts. $25,000 or more.

Calif., Oakland — Made plans curbing, guttering, paving, and widening, etc., 22nd St. between western waterfront and Lake Merritt. $2,000,000. W. W. Harmon, city engr.

Calif., Oakland — Supervs. Alameda Co. rejected bids Jan. 11, roadways, walks, steps, walls, etc., at Highland Hospital. Noted Jan .21.

Calif., San Diego—Plans improving Upas, Redwood, Palm and other Sts., 12,184 cu.yd. excav., 49,450 sq.ft. concrete sidewalk, 10,312 lin.ft. concrete curbing, 450,842 sq.ft. 1½ in. asphaltic concrete on 4 in. concrete paving, 18,260 cu.yd. embankment, etc. F. A. Rhodes, city engr.

Calif., San Diego—Common Council plans improving Louisiana St., 3,732 sq.ft. concrete sidewalk, 77 lin.ft. concrete curbing 114,912 sq.ft. 1½ in. asphaltic concrete on 4 in. concrete paving, etc. F. A. Rhodes, city engr.

Calif., San Diego—Common Council rejected bids Jan. 11, improving Muir Ave., 33,264 sq.ft. concrete sidewalk, 6,200 lin.ft. 8 in. concrete curbing, 50 lin.ft. 6 in. concrete curbing, 125,593 sq.ft. 1½ in. asphaltic concrete on 3 in. bituminous paving, etc. Noted Jan. 21.

Calif., Ventura—Making plans probably concrete paving, etc., various streets. $500,000 or more. C. W. Pierce, city engr.

Ont., Chesley—City Council plans concrete paving various streets. $40,000. A. Krug, chn. com.

Ont., Hamilton—Making plans concrete paving Beach Rd. $69,000. W. L. McFaul, City Hall, engr.

Ont., Kitchener—City Council plans concrete paving various streets. $50,000. S. Shupe, city engr.

Ont., St. Catherines — Plans concrete paving St. Paul St., etc. $40,000.

Ont., Toronto—Plans bitulithic concrete paving Langley Ave., $19,867; grading lane between Lansdowne and McDonnell Aves., $8,100; and opening and grading lane between Manning Ave. and Clinton St., $1,200. R. C. Harris, City Hall, engr.

Ont., Toronto — Soon takes bids asphalt on 6 in. concrete paving Du Vernet Ave. from Glenmore Rd. to Woodbine Ave., $5,146; St. Paul St. from King to Queen Sts., $7,986; and Vanauley St. from Queen St. to Grange Ave., $59,535. R. C. Harris, City Hall, engr.

Ont., Walkerville — City Council plans concrete paving various streets and enlarging incinerator. $50,000. A. Calderwood, chn. com.

Que., Three Rivers — Plans concrete or macadam paving 1 mi. St. Cecile St. between St. Geneveve and St. Maurice Sts., 50 ft. $45,000. C. Gelinas, Three Rivers, engr.

BIDS DESIRED

New Jersey — Feb. 15, by State Hy. Comn., Trenton, grading and 3 sixty ft. span bridge and one small bridge, on Route 9, Sect. 18, Clinton Cutoff, Hunterdon Co. A. L. Grover, secy.; adv. E. N.-R. Jan. 28.

Pa., Kittanning — Feb. 26, by Supervs. Wayne Twp., Armstrong Co., rein.-con .paving 4,301 ft. County Aid Application 3033, 16 ft. C. M. Dickason, secy. Wayne Twp.; adv. E. N.-R. Jan. 28.

Pa., Phila.—Feb. 4, by Dept. Pub. Wks., Bureau of Engineering, Schedule A, asphalt paving 40,283 sq.yd. 11 streets; Schedule B, asphalt repaving 10,024 sq.yd. 52nd St.; Schedule C, redressed granite block paving 43,065 sq.yd. Erie, Girard, 4th, 12th, 19th, and 29th Sts.; Schedule D, grading 60,149 cu.yd. Holme Ave., etc. G. H. Biles, dir.

W. Va., Clarksburg — Feb. 9, by Court Harrison Co., concrete or bituminous macadam reconstructing 11 mi. Clarksburg-Buckhannon-Harrison Co. line Rd. $300,000. G. L. Coyle, Court House, co. engr. Noted Sept. 3.

North Carolina — Feb. 8, by State Hy. Dept., Raleigh, hardsurfacing roads in Beaufort, Wilson, Robeson, Person, Wake, Randolph and Swain Counties; topsoiling, sand clay, gravel or grading roads in Johnston, Bladen, Wake, Gaston, Mecklenburg, Richmond, Ashe, Watauga and Henderson Counties; adv. E. N.-R. Jan. 28.

Florida—Feb. 10, by Bd. Bond Trustees of Ocean Shore Impvt. Dist., at office Secretary, Daytona Beach, approximately 40 mi. paving roads, 20 ft. wide, and 300,000 cu.yd. earth embankment, etc., in Flagler and Volusia Counties. C. M. Rogers, Daytona Beach, engr.

See proposal advertisements on page 100, Advertising Section.

Swimming Pool—Des Moines, Ia.—See "Buildings—Commercial."

Gas Pipe Line — Texas — Houston Gulf Gas Co., Houston, making surveys gas line from Webb Co. fields to Austin, via Gonzales. $2,000,000. Private plans.

Oil Pipe Line, Texas — Amer. Refining Co., Wichita Falls, making plans 200 mi. 12 in. oil pipe line from fields near Wichita Falls to Carson Co. $4,500,000. Private plans.

Power Lines—Texas—West Texas Utility Co., G. W. Fry, vice-pres. and genl. mgr., Abilene, making surveys 125 mi. power line from Abilene to Junction, $100,000; 42 mi. line from Junction to Rock Springs, $50,000; and 33 mi. line from Junction to Mason, $40,000. Private plans.

Crushing Plant, etc. — Collado (mail Lobo), **Tex.** — Micolithic Co., c/o A. F. Fisher, 203 Cotton Exch. Bldg., Houston, plans stone crushing plant 500 ton daily capacity, quarry plant to handle 1,000 tons, and 5¾ mi. railway embankment and track. $200,000.

Transmission Line—Texas—Crystal City Electric Light & Ice Co., Crystal City, making plans power transmission line from Crystal City to River Spur. $30,000. Private plans.

Gas Pipe Line—San Antonio, Tex.—Seagraves & Moody, c/o M. Eskridge, c/o Brady Bldg., making plans 72 miles 12 in. natural gas pipe line from Colefield to San Antonio. $2,000,000.

Transmission Line, etc. — Oklahoma — Town of Aline made preliminary plans 30 mi. transmission line from Fairview to Cleo Springs to Aline, and distribution system in Aline, etc. $40,000. H. G. Olmsted, Oklahoma Bldg., Oklahoma City, engrs.

Electric Light System, etc. — Redland, Okla.—Made preliminary plans electric light system and 10 mi. electric transmission line to connect with Oklahoma Gas & Electric Co. high lines. $25,000. C. W. Geren, mayor. Engineer not selected.

Lighting System — Alhambra, Calif. — Plans street lighting system on Emory Park tract. $55,000.

Lighting Systems — Toronto, Ont. — Bd. Educ., 155 College St., plans electric lighting systems in schools not so equipped. $63,900. C. E. Dyson, 155 College St., archt.

Fire Alarm System—Jonquieres, Que.—Plans fire alarm system, incl. distribution table, switch board, alarm boxes, etc. $40,000. J. Smith, c/o Northern Electric Co., Montreal, engr.

BIDS DESIRED

Refrigerating Plant—New York, N. Y.—Feb. 2, by Bd. Trustees Bellevue & Allied Hospitals, J. J. McGrath, chn. at office General Medical Supt., 415 East 26th St., for refrigerating plant, etc. in power house of Bellevue Hospital, foot East 29th St.

Ash Handling Equipment, etc.—Detroit, Mich.—Jan. 30, by J. S. Foley, secy. Pub. Lighting Comn., 174 East Atwater St., ash handling equipment, boiler settings, etc., for power plant, foot Morrell St. Former bids rejected. Smith, Hinchman & Grylls, 800 Marquette Bldg., engrs. Noted Dec. 10.

Lighting System—Kenilworth, Ill.—Feb. 2, by Randolph Perkins Co., 38 South Dearborn St., Chicago, 370 ornamental street lights, concrete posts, etc. on various streets for Village. $118,000.

Gas Pipe Line — Corpus Christi, Tex. — J. P. Logan, mayor, taking bids 31,000 ft. 6 in. gas pipe line from city limits to Saxtet Wells. $28,000. J. T. Wright, city secy.

Transmission Line — Texas — See "Contracts Awarded."

Gasoline Stills—Port Arthur, Tex.—See "Contracts Awarded."

Swimming Pool — Inglewood, Calif. — Inglewood Union High School Dist., Grevillea St., taking bids 1 story, 78 x 110 ft., timber building, incl. 50 x 75 ft., rein.-con. swimming pool. G. A. Howard, Jr., 819 Story Bldg., Los Angeles, archt. $50,000. Noted Jan. 28.

BIDS RECEIVED

Subway — New York, N. Y. — J. H. Delaney, chn. Bd. Transportation, 49 Lafayette St., Jan. 22, subway Sect. 5, Route 102, along and under 8th Ave. from West 48th to 58th Sts., incl. spurs under private property from West 52nd St. to 54th Sts., from Heyman & Goodman Co., Inc., 236 West 116th St., (a) $6,641,678 (b) $6,627,053 and (c) $6,934,178. Noted Jan. 14.

Ornamental Lighting System — Los Angeles, Calif. — For 286 Marbalite posts and connections on Melrose Ave., from Newbery Electric Corp., 726 South Olive St., $85,782.

Ornamental Lighting System—Pasadena, Calif.—City Trustees, ornamental lighting system on Linda Vista Ave. between Iverness and Afton Sts., from Newbery Electric Corp., 726 South Olive St., Los Angeles, $47,902.

CONTRACTS AWARDED

Subway—Long Island City, N. Y.—Bd. Transportation, J. H. Delaney, chn., 49 Lafayette St., New York City, subway, Sect. 6-E-1, Route 8 along and under Wyckoff Ave. from Halsey St. to Cooper Ave., here, to Oakdale Constr. Co., 163 Wyckoff Ave., $1,345,778. Noted Jan. 14.

Swimming Pool — Topeka, Kan. — See "Buildings—Commercial."

Culverts — Wellington, Kan. — See "Bridges."

Transmission Line — Texas — Western Pub. Serv. Co., Bryan, will build 40 mi. power transmission line from Navisota to Madisonville, by day labor. $40,000. Private plans.

Grade Raising, etc.—Galveston, Tex.—Bd. City Comrs., grade raising, 5,500,000 cu.yd. sand filling by dredge from Galveston Bay, to United Dredging Co., 323 Security Bldg., $0.2997 per cu.yd. Noted Jan. 7.

Gasoline Stills—Port Arthur, Tex.—Gulf Refining Co., will build 20 high pressure gasoline stills, by day labor. $1,500,000. Private plans.

Materials

PROPOSED WORK

Road Oil — Watertown, Wis. — Bd. Pub. Wks., F. S. Weber, city clk., soon takes bids 100,000 gal. road oil.

BIDS DESIRED

Iron Castings—New Haven, Conn.—Feb. 5, by New York, New Haven & Hartford R.R. Co., malleable iron castings, required for 1 year beginning Mar. 1, 1926. N. M. Rice, vice pres.

Sand Grit, etc.—Long Island City, N. Y.—Jan. 29, by M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., 5,000 cu.yd. white sand grit, 23,000 tons steam ashes, 350,000 gal. asphaltic macadam binder, and 600,000 gal. road oil for cold application.

Sand Grit—New York, N. Y.—Feb. 4, by H. Bruckner, pres. Bronx Boro, Crotona Park, 3rd and Tremont Aves., 10,000 cu.yd. sand grit.

Bituminous Material — Pennsylvania — Feb. 2, by State Hy. Dept., Harrisburg, approximately 1,325,000 gal. bituminous material Specifications P. and J., and approximately 4,700,000 gal. Specifications C. D. and H.

Corrugated Metal Pipe — Pennsylvania.—Feb. 1, by State Hy. Dept., Harrisburg, approximately 41,000 ft. 12- to 36-in. corrugated and 5,600 ft. rein.-con. pipe, delivered at various points.

Crushed Stone — Pennsylvania — Jan. 29, by State Hy. Dept., Harrisburg, approximately 162,000 tons various sizes crushed stone delivered at various designated points.

Culvert Pipe—Mendenhall, Miss.—Feb. 1, by Supervs. Simpson Co., 1 medium size carload 18 in. culvert pipe. T. B. Durr, clk.

Piles—New Orleans, La.—Feb. 2, by Port Comn., 199 creosoted piles, 85 ft. long.

Road Oil—White Hall, Ill.—Feb. 2, by City Council, G. L. Thompson, city clk., 60,000 to 100,000 gal. road oil from 50 to 70% asphalt, shipped in 10,000 gal. tank cars. $6,500.

Paving Blocks, etc.—Milwaukee, Wis.—Feb. 1, by Central Bd. Purchases, 7,000 more or less sq.yd. 3.5 in. rectangular creosoted wood paving blocks, 16 lb. treatment.

Cement, etc.—New London, Wis.—Feb. 2, by C. J. Thompson, city clk., 9,000 bbl. Portland cement, 3,000 cu.yd. gravel, and 2,000 cu.yd. sand, for paving Mill St.

CONTRACTS AWARDED

Cement — Baltimore, Md. — Mayor and City Council, 10,000 bbl. cement to Natl. Building Supply Co., 210 Garrison Lane, at $2.75.

Cement—Missouri—State Hy. Dept., Jefferson City, 34,000 bbl., to Pyramid Portland Cement Co., 508 Insurance Exch. Bldg., Des Moines, Ia., at $2.55 and $2.56 per bbl.; 13,500 bbl., to Hawkeye Portland Cement Co., 606 Hubbell Bldg., Des Moines, Ia., prices ranging from $2.59 to $2.67; 313,050 bbl., to Missouri Portland Cement Co, Post Dispatch Bldg., St. Louis, $2.32 to $2.95; 157,800 bbl., to Marquette Cement Co., Cape Girardeau, $2.70 to $2.89; 384,250 bbl., to Great Western Portland Cement Co., Mildred, Kan., $2.53 to $2.63; 162,500 bbl., to Dewey Portland Cement Co., Dewey, Okla., $2.47 to $2.81; 164,550 bbl., to Ash Grove Lime & Portland Cement Co., Chanute, Kan., $2.40 to $2.85; 123,750 bbl., to Monarch Portland Cement Co., Humboldt, Kan., $2.47 to $2.70; 106,500 bbl., to Kansas Portland Cement Co., Bonnor Springs, Kan., $2.49 to $2.72; and 12,500 bbl., to Fredonia Portland Cement Co., Fredonia, Kan., $2.45. Noted Dec. 10.

The CONCRETE REINFORCING STEEL INSTITUTE

is a national organization of fabricators of reinforcing steel with warehouses in thirty-five leading cities.

This Institute has been formed to cooperate with Architects, Engineers and Contractors throughout the country in the advancement of reinforced concrete construction.

Indirectly, the Institute serves the owners of construction projects in this vast country of ours by its members' investment in plant and equipment in these thirty-five "service stations." Steel is fabricated and delivered to jobs *as needed.* Thus many projects begin to earn on capital invested, *earlier than anticipated,* through elimination of delays.

Among other activities, the Institute is supporting whole-heartedly the Elimination of Waste Campaign of the United States Government. Standard practice and elimination of waste in the building industry will do much to lower costs and widen the market to the advantage of all.

The Institute is in touch with the latest developments in reinforced concrete construction. This data is available to Architects, Engineers and Contractors. The Concrete Reinforcing Steel Institute offices are located at 160 North La Salle Street, Chicago.

CONSTRUCTION NEWS

Engineering News-Record, Feb. 4, 1926

Some of the Week's Large Projects

AMONG the announcements for the current week of proposals, bids desired and received and contracts awarded, are the following big jobs:

Proposed Work

Highway, Tennessee, State Dept. Highway & Pub. Wks. plans to expend $15,000,000 for roads and bridges.

Club, Chicago, Ill., Midland Club having plans prepared, $5,000,000.

Gas Pipe Line, Texas, Mid-Continent Oil & Gas Co. making plans, $4,600,000.

Reservoir, Cleveland, O., city plans 80 m.g. reservoir, $3,500,000.

Apartment, Miami, Fla., Davenport & Rich Investment Co. had plans prepared, $3,000,000.

Power plant, Bellows Falls, Vt., New England Power Co. having preliminary plans, $3,000,000.

Pipe line, Texas, Magnolia Petroleum Co. making plans for 350 mi. 8 in. pipe line, $3,000,000.

Sewer system, Seattle, Wash., plans bond election for sewers, $2,125,000.

Box and paper mill, Glendale, N. Y., Pequot Mfg. Co. plans 8 steel buildings, $2,000,000.

Office and Warehouse, Somerville, Mass., First National Store, Inc., having preliminary plans prepared, $2,000,000.

Cement plant, Cleveland, O., Universal Portland Cement Co. plans cement plant, $2,000,000.

Theatre and office, Detroit, Mich., W. Fox Film Corp. having plans prepared, $2,000,000.

Coliseum, Peoria, Ill., city plans bond election, $2,000,000.

Viaduct, Baltimore, Md., Baltimore & Ohio R.R. making plans for viaduct, $1,500,000.

Bids Wanted On Big Jobs

Bank and office, Washington, D. C., Coolidge, Shepley, Bulfinch & Abbott, archts., taking bids, $2,000,000.

Hospital, Newark N. J., Beth Israel Hospital soon takes bids, $2,000,000.

Apartment, Chicago, Ill., Hooper & Janusch, archts., Feb. 15, $1,750,000.

Large Contracts Let During Week

Office, New York, N. Y., Bricken Constr. Corp. by separate contracts, $10,000,000.

Subway, New York, N. Y., Bd. Transportation to Heyman & Goodman, Co., Inc., $6,641,678.

Office, San Francisco, Calif., Hunter, Dulin & Co. to Lindgren-Swinerton, Inc., $3,000,000.

Office and loft, Brooklyn, N. Y., Bush Terminal Co. to Turner Constr. Co., $2,000,000.

Plant, Chester, Pa., Ford Motor Co., to Rust Eng. Co., $2,000,000.

Apartment, Philadelphia, Pa., Parkway Apartment Corp. to B. Bornstein, $1,750,000.

Office, Philadelphia, Pa., Fidelity Mutual Life Ins. Co. to Turner Constr. Co., $1,500,000.

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Laying 20-in. c.i. bell and spigot water main across Schuylkill River with LEADITE joints.

Speed—Pipe Laying

Thousands of miles of cast iron water mains have been laid with LEADITE by large cities, towns, villages, railroads, mines, and industrial plants.

These pipe lines are laid under paved streets, under and over bridges, under railroad tracks, across streams, thru open country, in filter galleries—high and low pressures—under all conditions of water works construction.

This is the way some LEADITE users lay pipe:

1710 ft. 6 in. pipe laid in one day.
1665 ft. 6 in. pipe laid in 7½ hrs. with 6 men.
91 lengths 20 in. pipe laid in one day.
15 to 19 lengths 48 in. pipe laid in one day—laid one length in 7 minutes.
3860 ft. 6 in. and 8 in. pipe laid in 9 hrs. with 2 gangs.

You can do this.

The up-to-date water works man specifies and uses LEADITE.

LEADITE saves at least 75%.

LEADITE is the pioneer Self-Caulking material for c.i. pipe

Be Sure It Is LEADITE and Accept No Imitations

THE LEADITE COMPANY, Inc.
1512 Land Title Building, Philadelphia, Pa., U. S. A.

Wis., Wauwatosa—Feb. 12, by Bd. Pub. Wks., A. V. Brigham, secy., boring 1

See proposal advertisements on page 155, Advertising Section.

Strong Concrete in *3 Days*

Circumstances often make rush work essential.

An important bridge needs immediate repairs; an emergency in railroad construction demands attention without delay; a concrete foundation for machinery must be built and placed in use in the quickest possible time.

In hundreds of similar circumstances, time is vital—especially during winter months. You do not want to wait the number of days usually allowed for concrete to reach the desired strength. You do not need to. You can, with standard *Universal* cement, the same quality *Universal* you have always used, obtain quick-hardening, strong concrete in *3 days* by using simple methods that thousands of laboratory tests and actual construction experience prove will give you the desired results.

Detailed information on this time-saving concrete made with standard *Universal* cement gladly furnished on request to

Universal Portland Cement Co.

Chicago Pittsburgh Minneapolis Duluth Cleveland New York

Concrete for Permanence

Waterworks (Continued)

artesian well 1,000 ft. to 1,700 ft. more or less in depth. To exceed $15,000. J. E. Lowther, City Hall, engr.

Minn., St. Paul—Feb. 9, by A. E. Eggert, city purch. agt., seventy-five 5 in. single steamer valves, compressor type fire hydrants, two thousand six hundred and forty 12 ft. lengths 6 in. c.i. pipe, 1,125 disc type cold water meters, one thousand six hundred each ¾ in. brass corporation curb stops, also 200 bbl. Portland cement, for Water Dept.

Minn., Wanamingo—Feb. 15, by W. E. Buell & Co., engrs., 205 Davidson Bldg., Sioux City, Ia., waterworks, incl. 4 and 6 in. mains, also tank and tower, here, for City. $20,000. Noted Nov. 26.

Tex., Greenville—Mar. 3, by City, 3 m.g. filtration or purification plant. M. C. Hale, city clk.; adv. E. N.-R. Feb. 4.

Tex., Port Arthur—Feb. 11, by J. O. Herpin, city engr., 11,400 ft. 18 in. Class "A" B. & S. c.i. pipe, two 18 in. joints, three 18 in. valves, etc., for waterworks.

Colo., Ft. Collins—Feb. 9, at office City Clerk, City Hall, mechanical filter plant containing 6 filter units, 3,716 cu.yd. excav., 1,548 cu.yd. plain and rein.-con. 170,148 lb. reinforcing, 4,357 ft. 20- to 36-in. pipe in place, etc., $219,753; 52,399 ft. 20 and 24 in. and 11,656 ft. 27 in. pipe, etc., $502,536; also laying 63,644 ft. 4- to 24 in. c.i. mains in distribution system, $42,799; one 7,500,000 gal. reservoir, 521 cu.yd. formed concrete, 1,708 ft. 3- to 24-in. c.i. pipe, etc., $72,842. F. R. Montgomery, comr. Safety and ex-office mayor.

Wash., Wenatchee — Mar. 1, by City Comn., 12 m.g. steel and concrete filtration plant. $225,00. Shibley & Bovard, Securities Bldg., Seattle, engrs. Noted Jan. 28.

BIDS RECEIVED

Minn., Minneapolis — F. S. Gram, city purch. agt., Jan. 18, from Feils Brass & Machine Wks., 2450 West 48th Pl., Chicago, Ill., hydrants at $72.50 each, valves $22.50 each for 6 in., $35.25 for 8 in., and $69.50 for 12 in. Noted Jan. 14.

CONTRACTS AWARDED

N. J., Bound Brook—Bound Brook Water Co., M. Bush, mgr., will build 150,000 gal. wash water tank enclosed in 2 story steel building, by day labor. $16,000. C. Potts, 30 Church St., New York City, engr.

O., Norwalk—For 36 x 72 ft. filtration plant and six 70 x 250 ft. rein.-con. tanks, to H. C. Felver & Co., 7016 Euclid Ave., Cleveland. Engrs. est. $130,000.

Minn., St. Paul—G. J. Ries, aud. Ramsey Co., constructing tubular well at Lake Josephine, to McCarthy Well Co., Wabash and Eustis Sts., $5,100. Noted Jan. 7.

Sewers

PROPOSED WORK

N. Y., Edgemere (mail Far Rockaway) —M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., Long Island City, soon takes bids sewer from Beach 19th to Beach 36th Sts., here. $480,000.

N. Y., Williamsville — Soon takes bids sewerage system. To exceed $75,000. W. F. Sheehan, 5488 Main St., engr.

N. J., Camden—Making plans (1st unit) sewage disposal plant. $1,000,000. W. D. Vosbury, Market St., engr. Noted May 21.

Pa., Phila.—Dept. Pub. Wks., Bureau of Engineering, rejected bids Jan. 20, sewer and pumping station for South Phila. Impvt. south of Packard Ave. and west of Broad St. G. H. Biles, dir. Noted Jan. 28.

S. C., Conway—See "Streets and Roads."

Fla., Brookfield—Election Feb. 8, $90,000 bonds, sanitary sewers in various streets. S. Parrigan, Brookfield, engr.

Ia., Audubon—Soon takes bids sewage disposal plant, Imhoff tanks and 12,000 ft. 18 in. outlet sewers in various streets. $60,000. W. E. Buell & Co., 205 Davidson Bldg., Sioux City, engrs. Noted Oct. 29.

Kan., Herington — See "Streets and Roads."

Mo., Kansas City—Making plans sanitary sewerage system along east side of Blue River. $275,000-$300,000. Black & Veatch, 700 Mutual Bldg., engrs.

Okla., Chickasha—Voted $40,000 bonds, extending storm sewers in various streets. R. O. Bradley, Chickasha, engr. Noted Dec. 24.

Okla., Marland—Town Council making preliminary plans disposal plant and 4 mi. outfall sewers in all streets. $25,000. Engineer not announced.

Okla., Prague—Made preliminary plans 6 mi. outfall sewerage system, and disposal plant. $35,000 bond election in spring. H. W. Hartman, mayor. Engineer not announced.

Okla., Tulsa—Soon takes bids sewers in Dist. 240, Braden Dist. $50,000. C. Schultz, City Hall, engr.

Miss., Waverly—See "Streets and Roads under Mississippi."

Tennessee—State Dept. Highways & Pub. Wks., Nashville, takes bids about Feb. 27, 3 over 20 ft. span rein.-con. bridges, one over Crooked Creek, one over Cypress Creek

See proposal advertisements on page 155, Advertising Section.

IT'S MONEY IN THE BANK—TO BUY AN INDUSTRIAL

YES, we mean just that. For when you buy an INDUSTRIAL crane, the result is an almost unbelievable saving in labor costs, handling costs, maintenance costs and in every other way.

Like every INDUSTRIAL the crawling tractor crane pictured above is built of the finest materials money can buy; designed, planned, and executed by skilled workmen in our own shops. But more than that —into every machine goes a goodly portion of those intangible assets so essentially INDUSTRIAL, namely, Dependability and Durability.

Long after other equipment is on the scrap heap, your INDUSTRIAL goes on piling up the figures in your savings account. That is why it is money in the bank for you to own an INDUSTRIAL.

INDUSTRIAL WORKS · BAY CITY · MICHIGAN

Bridges (Continued)

and other over Snake Creek, between Selmer and Adamsville, McNairy Co. C. N. Bass, acting comr.

Tennessee—See "Streets and Roads."

O., Dover—Comrs. Tuscarawas Co. (New Philadelphia) soon take bids bridge over Baltimore & Ohio R.R. tracks from west bank of Sugar Creek to 5th St., here. $200,000.

Minn., Staples—Todd Co. (Long Prairie), Cass Co. (Walker), and Wadena Co. (Wadena), plan concrete and steel bridge over Wing River about 4 mi. northeast of here. $26,400.

N. D., Minot—Making plans replacing concrete and steel bridge between Central St. and 1st Ave. S. E. $25,000. A. D. Hagenstein, city aud.

Texas—Crockett Co. (Ozona) and Pecos Co. (Ft. Stockton) making plans 200 ft. steel truss span bridge, 18 ft., across Pecos River. $200,000. Address W. P. Kemper, Austin, highway engr.

Texas—Washington Co. (Brenham) and Waller Co. (Hempstead) making plans 600 ft. steel span bridge with rein.-con. approaches across Brazos River, on Highway 20. $300,000. Address G. G. Wickline, 912 West 22nd St., Austin, engr.

Tex., Barstow—See "Streets and Roads."

Tex., Decatur—See "Streets and Roads."

Tex., Groveton—See "Streets and Roads."

Tex., Memphis—See "Streets and Roads."

Oklahoma—State Hy. Dept., Oklahoma City, making preliminary plans 4 span 660 ft. steel truss bridge on pile piers at Lone Wolf, Kiowa Co., $35,000; made surveys 58 span 1,160 ft. creosoted pile trestle bridge, at Keno, Woods Co., $30,000, and 3 span 116 ft. rein.-con. bridge on concrete piers at Turpin, Beaver Co. $25,000. J. M. Page, highway engr.

Nevada — State Hy. Dept., Carson City, making plans Wadsworth Bridge, steel, Washoe Co. $38,500. G. M. Borden, highway engr.

Wash., Chelan—See "Streets and Roads."

Que., Grand Mere — City and Provincial Government, Quebec, plan bridge over St. Maurice River. $200,000. I. E. Vallee, Quebec, engr. Noted Aug. 14, 1924.

BIDS DESIRED

Pa., Phila. — Feb. 10, by Bureau Engineering, Dept. Pub. Wks., new 60 x 60 ft. steel and rein.-con. bridge, under railroad tracks at Rising Sun Ave. $150,000.

Virginia—See "Streets and Roads."

North Carolina — Feb. 8, by State Hy. Dept., Raleigh, rein.-con. bridges and culverts on Project 303, Bladen Co. $32,600, Project 838, Henderson Co. $28,800, Project 772, Watauga Co. $27,500, Project 664, Richmond Co. $30,000, Project 635, Gaston Co. $96,000, Project 479, Wake Co. $59,000, Project 465, Person Co. $31,900, Project 240, Johnston Co. $125,000. C. M. Upham, Raleigh, engr. Noted Jan. 7.

O., Dayton — Feb. 19, by G. F. Baker, dir. Pub. Serv., two 95 ft. span half thru steel girder bridge encased in concrete, 24 ft. roadway and two 7 ft. sidewalks over Wolf Creek at Williams St., 235 tons structural steel, 27 tons reinforcing, etc. $175,000. Harrington, Howard & Ash, Orear-Leslie Bldg., Kansas City, Mo., engrs.

Indiana—Feb. 16, by J. D. Williams, dir. State Hy. Comn., Indianapolis, **(s.g. means steel girder, S.R. state road, s.t. steel truss, e.p.g. encased plate girder, r.c.a. rein.-con. arch, r.c.b. rein.-con. box, and r.c.s. rein.-con. slab)** 2 s.g. and 1 s.t. on S.R. 1-D, Scott Co.; 3 s.t. on S.R. 22-1, Crawford Co.; 2 s.t. on S.R. 22-K, Orange Co.; 4 r.c.a. on S.R. 10-K, Vigo Co.; 1 e.p.g. on S.R. 40-G, Scott Co.; 1 s.t. on S.R. 34-D, Fayette Co.; 1 s.t. on S.R. 12-1, Owen Co.; 1 s.t. on S.R. 25-C, LaGrange Co.; 3 r.c.g. on S.R. 31-E, Putnam Co.; and 2 r.c.s., 3 r.c.b. and 3 r.c.g. on S.R. 39-A, Marion Co.

Michigan—Feb. 17, by State Hy. Dept. at office comrs. Shiawassee Co., Corunna. Bridge File No. 761,306 S. R., two 65 ft. spans. G. A. Dillman, Lansing, engr.

Nebraska—See "Streets and Roads."

Tex., Eagle Pass — See "Contracts Awarded."

California—Feb. 15, by Supervs. Alameda Co. (Oakland) reconstructing steel bridge over San Antonio Estuary between Alameda and Oakland. To exceed $25,000. Noted Jan. 21 under "Oakland."

BIDS RECEIVED

O., Stillwater—Commissioners Tuscarawas Co. (New Philadelphia) bridge over Baltimore and Ohio R.R. tracks, here, from Dover Tank & Plate Co., Dover, $27,454. Engrs. est. $35,000.

Mich., Detroit—Wayne Co. Road Comn., 1103 Real Estate Exch., housing and enclosure walls for concrete and stone double leaf trunnion bridge over River Rouge, at Dix Ave., from G. P. Cullen, Inc., 2940 West Lake St., Chicago, Ill. **(A)** $23,405 **(B1)** $42,336 **(B2)** $41,715 **(B3)** $40,780. Noted Jan. 7.

Texas and Oklahoma—E. P. Walsh, aud. Wichita Co., Wichita Falls, Tex., and J. M. Page, state highway engr., Capitol Bldg., Oklahoma City, Okla., Jan. 18, bridge over Red River between Burkburnett, Tex., and Randlett, Okla., from Austin Bridge Co., 1813 Clarence St., Dallas, steel girder type, $239,842; from Davis-Pace Co., 1306½ Young St., Dallas, concrete, $243,874. Noted Dec. 24.

CONTRACTS AWARDED

N. H., Nashua—City, Dept. Pub. Wks., rebuilding old bridge, on West Main St., to Blakeslee Rollins Co., 6 Beacon St., Boston, Mass., $157,500. Engrs. est. $150,000.

North Carolina — State Hy. Comn., Raleigh, to Sanford & Brooks Co., Charlestown, S. C., rein.-con. bridge, known as "Proposition 1," over Bogue Sound, on Project 203, 342 cu.yd. Class AA concrete at $38 per cu.yd., 7,888 cu.yd. Class A concrete $27.50, 16,600 lin.ft. untreated timber piling $0.71, 7,300 lin.ft. creosoted timber piling $0.85, 1,091,240 lb. reinforcing $0.053, etc., total $504,076; to Roanoke Iron & Bridge Wks., Roanoke, Va., bridge known as "Proposition 2," over Bogue Sound Channel, on Project 203, 20 cu.yd. Class AA concrete $75, 346 cu.yd. Class A concrete $33, 400 sq.yd. creosoted block paving $4.60, 27,000 lb. reinforcing $0.05, 560,000 lb. structural steel $0.083, etc., total $138,-450, both in Carteret Co. Noted Nov. 26.

Fla., Fort Lauderdale—Broward Co., 100 ft. steel and concrete draw bridge, to Champion Bridge Co., Ft. Lauderdale, $100,000. Noted Dec. 31 under "Streets and Roads."

La., New Orleans—Pub. Belt R.R. Comn., Municipal Bldg., test borings for Mississippi River Bridge, 2 mi. above city limits, to Southern Deep Well Drilling Co., 429 Patterson St., Algiers, $44,400. Noted Dec. 31.

Mich., Dearborn—Village, 70 ft. concrete T-beam bridge over River Rouge, at Brady St., to L. W. Kinnear, Inc., 1524 Clairmount Ave., Detroit, $34,950. Noted Dec. 24.

Kan., Eureka—Greenwood Co., one 120 ft. arch and two 40 ft. deck girder, also two 16 ft. and two 18 ft. concrete slab spans, etc., on Federal Aid Project 322-H, to Yancey Constr. Co., Abilene, $40,717.

Kan., Oswego—Labette Co., two 120 ft. and one 140 ft. span through arch bridge with 20 ft. roadway, 107,074 lb. steel bars, 93,100 lb. structural steel, etc., also one 120 ft. span through arch rein.-con. bridge, 46,-338 lb. steel bars, 24,766 lb. reinforcing, etc., on Parsons-Pittsburg Rd., to Sharpe Bros., Eldorado, $73,125 and $26,397 respectively.

Tex., Eagle Pass — Texas & Eagle Coahuila Bridge Co. will build 400 ft. rein.-con. and steel bridge across Rio Grande River, by day labor. $200,000. Private plans. Noted June 18, under "Texas."

Arizona—W. C. Lefebvre, highway engr., Phoenix, 1,660 ft. steel bridge over Gila River 615 ft. below Gillespie Dam, on Federal Aid Project 64-B, to Lee Moor Constr. Co., Tucson, $292,167. Noted Dec. 24.

B. C., New Westminster — Provincial Govt., Victoria, timber on piles protection pier for draw span of Fraser River Bridge, to Nichson Constr. Co. Ltd., Georgia Viaduct, Vancouver, $100,000.

Dams

PROPOSED WORK

N. Y., Perrysburg—City of Buffalo, City Hall, plans additional dam, at J. N. Adam Memorial Hospital, here. $75,000. W. H. Mosher, 700 Main St., Buffalo, engr.

California—See "Unclassified."

Quebec—Water Running Comn., Montreal, plans concrete dam at Lake Mekinae, Champlain Co. $500,000. O. Leferne, Quebec, engr.

BIDS DESIRED

N. C., Concord—Feb. 16, by Bd. Water Comrs., earth and concrete impounding dam, 30,000 cu.yd. embankment, 8,000 cu. yd. excav., 4,500 sq.yd. rein.-con. pavement, 80 cu.yd. concrete walls, 450 lin.ft. 16 and 30 in. pipe lines, rein.-con. gate shaft, etc. $33,000. G. C. White & Co., Durham, engrs.

Railways

PROPOSED WORK

California—City and San Francisco Co., San Francisco, soon take bids extending railway in Judah St. between 31st and 41st Aves., San Francisco. $30,000. M. M. O'Shaughnessy, city engr.

British Columbia—British Columbia Electric Ry. Co., 425 Carrol St., Vancouver, plans double tracking street car lines with permanent concrete road bed. $200,000. Work will probably be done by own forces. A. C. Eddy, 425 Carrol St., engr.

BIDS DESIRED

Texas—See "Contracts Awarded."

CONTRACTS AWARDED

Texas — San Antonio, Medina Lake & Western R.R., W. L. Williams, pres., Box 435, San Antonio, will build 40 mi. railroad from San Antonio to Medina Lake. Work will be done by separate contracts.

Ontario—Spruce Falls Pulp & Paper Co., Kapuskasing, grubbing, tracking, laying, etc., for 60 mi. railroad from Kapuskasing Sta. on Canadian Natl. R.R. to Smoky Falls on Mattagami River, to Morrow & Beatty, Peterborough. Engrs. est. $1,500,000-$2,000,000.

Excavation, Drainage, Irrigation, Levees River and Harbor

PROPOSED WORK

Vt., Bellows Falls — See "Building—Industrial."

Fla., St. Petersburg — Election Feb. 9, $235,000 bonds, improving harbor, incl. dredging entrance to channel and turning basin to 27 ft.; also $86,000 bonds, dredging Bayboro Basin to 19 ft. mean low tide.

Mich., Belle Isle (mail Tobins Harbor)—Dept. Parks & Blvds., Marquette Bldg., Detroit, making preliminary surveys restoring canals, incl. dams, electrically operated pumps, etc., here. $25,000. J. A. Stringham, Detroit, research engr.

Ill., Springfield—Made plans constructing Lake Springfield, incl. large dam, submerging approximately 10,000 acres land, constructing scenic highway around proposed lake of 50 mi., bathing beaches, parks, etc. $1,500,000. W. Seeley, City Hall, engr.

Tex., Galveston — Galveston Wharf Co., c/o E. E. Gossrau, 2324 Ave. B plans rebuilding Piers 23, 24, 25 and 26, and wharves, rein.-con., recently destroyed by fire. $1,500,000. R. M. Sias, 2324 Ave. B, engr.

Okla., Pauls Valley—Rush Creek D. D. 3, Garvin Co., made preliminary plans draining and straightening Rush Creek from Pauls Valley to junction with Washita River, 5 mi. away. $45,000. A. Rennie, Pauls Valley, engr.

Quebec—Dept. Pub. Wks., Ottawa, plans dredging 105 mi. navigable channel in River St. Maurice from Grand Mere to La Tugue. $50,000. B. Grandmont, Three Rivers, engr.

BIDS DESIRED

Fla., Fort Pierce — Feb. 10 (extended date), by C. C. Burry, city aud.-clk., fill, sea-wall, bulkheads, sewer extensions and other appurtenances. W. A. Smith, mgr.; adv. E. N.-R. Feb. 4. Noted Dec. 24.

O., Cleveland—Feb. 10, by City, dredging Cuyahoga River, also under and around bridges. $75,000. R. Hoffman, City Hall, engr. Noted June 11.

BIDS RECEIVED

Calif., San Francisco — Core borings along and near line of Hetch Hetchy Aqueduct, Coast Range Division, from International Diamond Drill Co., Hobart Bldg., approximately $18,884. Noted Jan. 21.

CONTRACTS AWARDED

Ia., Cedar Rapids—City Council, improving river front Red Cedar River, incl. rein.-con. retaining walls, to Allied Contractors, Inc., 1803 Douglas St., Omaha, Neb., $99,-556. Noted Dec. 24 under "Unclassified."

Ia., Council Bluffs—City, approximately 125,000 cu.yd. channel change, etc., in Indian Creek, to Boyne Constr. Co., Council Bluffs.

Minn., Minneapolis—A. P. Erickson, aud. Hennepin Co., constructing County Ditch 40, pump house, to R. H. Wessel, 463 Cleveland Ave. N., St. Paul, $4,956; installing 3 pumps, to W. H. Ziegler Co., 619 Washington Ave. S., $6,424; 7,840 cu.yd. excav. and pump pit, to Mikelson Cement Products Co., Albert Lee, $17,996; 97,057 ft. 5- to 36-in. drain tile, etc., to Owatonna Cement Tile Co., Owatonna, $17,-590. Grand total $46,966. Noted Dec. 31.

Calif., Carmichael — Carmichael Irrigation Dist., 6 mi. riveted steel pipe, 6- to 14-in. diam., to Sacramento Pipe Wks., 720 R St., Sacramento, $19,667; and three 75

See proposal advertisements on page 155, Advertising Section.

Detours cost money

COUNT up the times this year that you are thrown off your route by detours and note *how few* times it is caused by repair work on *vitrified brick pavements.*

There are brick pavements in use today laid more than a quarter-century ago which have not yet had a dollar of repair cost charged against them. Even though designed only for the easy burdens of light buggies, farm wagons and horse-drawn drays, scores of these veteran brick pavements have proved able to carry the modern 10-ton motor truck.

The paving material that holds upkeep and re-repair cost to a minimum and saves its community from detours is *vitrified brick,* the most economical pavement a community can buy.

Pave With **VITRIFIED Brick**

The Pavement that Outlasts the Bonds

NATIONAL PAVING BRICK MANUFACTURERS ASSOCIATION, ENGINEERS BLDG., CLEVELAND, OHIO

Excavation, Drainage, Irrigation, Levees, River and Harbor (Cont.)

kva. transformers, to General Electric Co., Rialto Bldg., San Francisco, $2,151. Noted Jan. 21.

Calif., San Francisco—Core borings along and near line of Hetch Hetchy Aqueduct, Coast Range Division, to International Diamond Drill Co., Hobart Bldg., $18,884. Noted Jan. 28.

Streets and Roads

PROPOSED WORK

New Jersey—Cape May Co. (Cape May) plans paving 3 mi. road from Ocean City to Cape May Point, 44 ft. R. F. Smith, Marmora, engr.

New Jersey — Ocean Co (Toms River) making plans concrete paving 1 mi. road in New Egypt, and 2 mi. road from Barnegat Bay Bridge, Toms River. J. M. Abbott, Toms River, engr.

N. J., Long Branch — Monmouth Co. (Freehold), plans 8 in. rein.-con. paving ¾ mi. Route 47, Rumson Rd., 20-30 ft., and 3 in. asphalt on 6 in. concrete paving 1.65 mi. Westwood and Cedar Aves., here. G. K. Allen, 60 Broad St., Red Bank, engr.

PROPOSED WORK

Park—Brighton (Boston P. O.)—**Mass.**—Park Dept., 33 Beacon St., Boston, plans reconstructing Rogers Park, here. $37,000. J. E. Murphy, 33 Beacon St., Boston, engr.

Golf Course—West Hartford (br. Hartford) **Conn.** — Webster Hill Club, W. W. Sherman, 272 Main St., Hartford, plans golf course, here. To exceed $25,000. Engineer not selected.

Tunnel—New York—Bureau Highways, Albany, making preliminary plans 900 ft. tunnel, 40 ft., to west approach new highway bridge over Hudson River, from Highland to Poughkeepsie. $190,000. A. W. Brandt, Albany, comr. highways.

Elimination of Grade Crossing—Guilderland Center, N. Y.—Pub. Serv. Comn., Albany, issued order prescribing method elimination grade crossing of county highway and West Shore R.R., by constructing 2 span 90 ft. plate girder bridge with two 20 ft. rein.-con. approach spans at each end, here. $108,700. State appropriates $10,578, Albany Co. $43,773, and railroad $54,350, toward cost.

Underground Cables—Deal, N. J.—Eastern New Jersey Power Co., Main St., Hightstown, plans underground cables through here. $30,000.

See proposal advertisements on page 155, Advertising Section.

Unclassified (Continued)

Pier and Sheds—St. Petersburg, Fla.—Election Feb. 9, $824,000 bonds, rein.-con. pier, also $432,000 bonds, transit sheds for Port of St. Petersburg.

Swimming Pool — Zanesville, O. — See "Buildings—Commercial."

Bathing Beaches, Parks, etc.—Springfield, Ill.—See "Excavation, Drainage, Irrigation, Levees, River and Harbor."

Swimming Pool, etc.—Des Moines, Ia.—Dept. Parks & Pub. Property, J. G. Rounds, supt., takes bids about Mar. 1, 85 x 150 ft., rein.-con. swimming pool, and 46 x 130 ft., brick and rein.-con. bath house. $40,000. Hennings on Eng. Co., Natl. Bldg., Omaha, Neb., engrs.

Swimming Pool—Kansas City, Mo.—See "Buildings—Educational, Religious."

Reptile Houses—St. Louis, Mo.—City, c/o Zoological Bd. Control, having preliminary plans prepared by J. Wallace, Zoo Grounds, 2 story and basement, rein.-con., brick and stone, Forest Park Zoo Grounds. $100,000.

Pipe Line—Texas and Arkansas—Magnolia Petroleum Co., Beaumont, making plans 350 mi. 8 in. pipe line from Beaumont, Tex., to Eldorado, Ark. $3,000,000. Private plans.

Gas Pipe Line — Texas — Mid-Continent Oil & Gas Co., Wichita Falls, making plans approximately 175 mi. 10 in. natural gas pipe line from fields in Carson Co. to Hutchinson Co. $4,600,000. Private plans.

Piers — Galveston, Tex. — Galveston Wharf Co., c/o E. E. Gossrau, 2324 Ave. B, plans reconstructing Piers 23, 24, 25 and 26, also rein.-con. wharves, recently destroyed by fire. $1,500,000. R. M. Sias, 2324 Ave. B, engr.

Transmission Line—Oklahoma—Town of Fargo voted $25,000 bonds, distribution system in Fargo, and electric high line between Fargo and Woodward. H. G. Olmsted, Oklahoma Bldg., Oklahoma City, engrs. Noted Jan. 21.

Power Development—California—Pacific Gas & Electric Co., 245 Market St., San Francisco, making plans rock-filled and concrete dam, 200 ft. high on Mokelumne River, at Salt Springs, approximately 1,000,000 cu.yd. rock fill; 25 mi. concrete lined canal and tunnel from dam to Tiger Creek; and power plant to have 40,000 hp. 1,200 ft. drop, Amador and Calaveras Counties. Eng. Dept. of Owners, engrs.

Launches, Tugboats, etc. — San Francisco, Calif.—Crowley Launch & Tugboat Co., Pier 14, appropriated $250,000 funds constructing six 125 ft. lighters, 40 ft. beams, 12 ft. depth, approximately $25,000; and 4 tugboats, $50,000 each.

Transformers, etc.—Kananaskis, Alta.—Calgary Power Co. plans four 20,000 kva. transformers, at Horseshoe Plant, here, $100,000; also reconstructing 3 power lines to carry 132,000 v. A. G. Gaherty, c/o owner, ch. engr.

Stack, etc.—New Westminster, B. C.—Brunette Lumber Co. Ltd., Sapperton, making plans smoke stack, patent burners and refuse carrying equipment. $75,000. Private plans.

Lamp Standards — Vancouver, B. C. — Plans ornamental 1 light lamp standards, etc. on various streets. $500,000. Work will probably be done by city forces. C. H. Fletcher, City Hall, engr.

BIDS DESIRED

Sanitary Work, etc.—Willard, N. Y.—Feb. 24, by State Hospital Comn., Albany, sanitary work, water supply, and electrical work, etc., for Willard State Hospital, here. S. W. Jones, Capitol, Albany, state archt.; adv. Feb. 4.

Swimming Pool—Jersey City, N. J.—See "Buildings—Educational, Religious."

Golf Course—Ft. Lauderdale, Fla.—See "Contracts Awarded."

Banana Unloaders—New Orleans, La.—Feb. 9, by Bd. Port Comrs., New Courthouse Bldg., 2 banana unloaders.

Gravel and Sand Washing Plant—Omro, Wis.—Feb. 8, by F. C. Steiner, comr. Winnebago Co., Oshkosh, 1 gravel and sand washing plant in gravel pit near here.

Transmission Line—Texas—See "Contracts Awarded."

Transmission Line — Oklahoma — See "Contracts Awarded."

Bulkheads — Los Angeles, Calif. — See "Contracts Awarded."

Wharf—Quebec, Que.—Taking bids extending Quebec-Lewis Ferry Wharf. $30,000. W. D. Baillarge, city engr.

BIDS RECEIVED

Subway—New York, N. Y.—Bd. Transportation, J. H. Delaney, chn., 49 Lafayette St., Jan. 29, subway, Sect. 4-A, Route 78, under and along St. Nicholas Ave. from West 141st to 149th St., from La Rocca Constr. Co., 576 Exterior St., **(a)** $4,705,064 **(b)** $4,680,064 **(c)** $5,215,064 and **(d)** $5,152,564. Noted Jan. 21.

Generators, etc. — Decatur, Ill. — City Council, Jan. 19, furnishing and installing two 625 kw. steam turbine generators with exciters, two 1,250 ft. surface condensers, and 2 switchboard panels, from Allis-Chalmers Co., 122 South Michigan Ave., Chicago, $51,825.

Bulkhead—Long Beach, Calif.—Rein.-con. bulkhead in Bay Shore Walk between 52nd and 65th Places, from N. E. Marsh, 237 Bimini Pl., Los Angeles, $37,000.

CONTRACTS AWARDED

Coal Pocket — Boston, Mass. — Gowdy Gum Co., 52 Everett St., Allston, coal pocket, to J. Gascoigne, 6 Beacon St. Engrs. est. $30,000.

Bulkhead—New York, N. Y.—Park Bd., F. D. Gallatin, pres., Arsenal Bldg., 64th St. and 5th Ave., concrete bulkhead along easterly boundary public driveway between 193rd and 198th Sts., to Ascher Eng. & Constr. Co., 51 West 66th St., $91,808. Noted Dec. 24.

Subway—New York, N. Y.—Bd. Transportation, J. H. Delaney, chn., 49 Lafayette St., subway Sect. 5, Route 102, under and along 8th Ave. from West 48th to 58th Sts., incl. spurs under private property from West 52nd to 54th Sts., to Heyman & Goodman Co., Inc., 236 West 116th St., $6,641,678. Noted Jan. 28.

Stadium—Newark, N. J.—Newark Baseball Club, 2 East 23rd St., New York City, 150 x 430 ft., crescent shaped oval, steel and concrete, etc., to T. J. Scully, foot Little St., Belleville, approximately $250,000.

Swimming Pool—Phila., Pa.—See Buildings—Commercial."

Underpass — Atlanta, Ga. — For 150 ft. underpass on Bell St. between Hunter and Decatur Sts., to Hadegon Constr. Co., Greenville, S. C. Engrs. est. $72,900.

Pier—Miami Beach, Fla.—Miami Beach Pier Corp., G. R. K. Carter, pres., 15 Ocean Dr., piling and 1st deck work complete for 600 ft. pier, incl. 1,000 kw. radio station, auditorium, 300 seating capacity, etc., to Frederick Snare Corp., 114 Liberty St., New York City, N. Y., $150,000. Noted Jan. 7.

Golf Course—Ft. Lauderdale, Fla.—City will construct golf course, incl. grading, excavating and clubhouse, by day labor. $250,000. J. B. Horne, city mgr.

Heating and Plumbing—Chicago, Ill.—See "Buildings—Commercial."

Street Signs—Peoria, Ill.—Synchronized traffic light system, incl. 4 "Stop and Go" signals at each of 13 loop intersections, to Central Illinois Light Co., 316 South Jefferson St., $35,000. Noted Nov. 26.

Repair Plants—Milwaukee, Wis.—Central Bd. Purchases, 6 road repair plants, to H. P. Andresen Co., 4450 Ravenswood Ave., Chicago, Ill., $3,500 each.

Transmission Line—Texas—Texas Central Power Co., c/o Frost Bldg., San Antonio, (Midwest Utilities Co., Chicago, Ill., owners) will build 75 mi. power transmission line from plant at Victoria to other towns, by day labor. $100,000. Address E. B. Neiswanger, vice-pres. at Victoria.

Gas Mains—Corpus Christi, Tex.—For 31,000 ft. 6 in. gas pipe from city limits to Saxet Wells, to W. L. Pearson & Co., 1st Natl. Bank Bldg., Houston, approximately $14,000.

Transmission Line — Oklahoma — Oklahoma Gas & Electric Co., 112 North Bway., Oklahoma City, will build distribution system in Ravia, and 9 mi. transmission line between Ravia and Troy, by day labor. $25,000. Byllesby Eng. Co., 231 South La Salle St., Chicago, Ill., engrs.

Bulkheads — Los Angeles, Calif. — City Harbor Bd. will construct bulkheads at Berths 185-184, Catalina Island Terminal, by day labor. $30,500.

Materials

BIDS DESIRED

Granite Curb—Charlotte, N. C.—Feb. 16, by Bd. Comrs., City Hall, approximately 100,000 lin.ft. granite curb. E. Read, city clk.; adv. E. N.-R. Feb. 4.

Paving Brick, etc.—Cleveland, O.—Feb. 11, by City, four million 4 and 5 in. paving brick, 5,000 tons cold patch mix, 1,500 tons asphalt filler, asphalt cement and paving pitch.

Brick—Chicago, Ill.—See "Waterworks."

Road Oil—Marshfield, Wis.—Feb. 11, by J. A. Schindler, city clk., 5 or more car loads road oil 50% to 60% or 60% to 65% asphaltic content.

Road Oil—Watertown, Wis.—Feb. 10, by F. S. Weber, city clk., approximately 100,000 gal. road oil 40% to 50% or 50% to 60% asphaltic content. Noted Jan. 28.

Brick, Sewer Brick, Cement, etc. — St. Paul, Minn.—Feb. 9, by A. E. Eggert, city purch. agt., 1,200 sq.yd. 3 in. vertical fibre brick, two thousand 3.5 in. creosoted wood and 1,500 sq.yd. sandstone blocks, 1,380 bbl. with these
New ARMCO

for

Multiple track drainage
Tunnel drainage
Side hill storm drains
Track pan drainage
Water station and industrial trackage
or wherever seepage, springs or other causes demand sub-drains.

Extensive tests have proved that drainage with the new Armco flexible sub-drain is a matter of seconds. Throw a quantity of water on the surface above one of these pipe and all but instantly you will have a free flow from the pipe. The track stays dry. Continuous operation is assured.

This unusual action has been secured by unusual construction. Water can enter at every corrugation, the full length of the pipe (for the pipe is perforated in each valley two-thirds of the way around the circumference of the pipe).

Filling in above these pipe with ballast gives an open course for the water all along the pipe—not just at occasional joints. What is more, the joints of this pipe can be made tight; solid materials cannot enter at these points. Then the bottom third of the pipe is a solid iron wall. Fine materials cannot ooze up from below and block the flow of water.

The pipe can be installed without traffic inter-

CONSTRUCTION NEWS

Engineering News-Record, Feb. 11, 1926

Some of the Week's Large Projects

AMONG the announcements for the current week of proposals, bids desired and received and contracts awarded, are the following big jobs:

Proposed Work

Hydro-electric Development, Seattle, Wash., City Light Dept. plan development, total, $14,000,000.

Road work, Des Moines, Iowa State Hy. Dept. plans road work in various counties, total $10,000,000.

Bridge, Rhode Island, Mt. Hope Bridge Comn., Providence, plan bridge, $6,000,000.

Street improvement, St. Louis, Mo., Bd. Pub. Serv. plans street work, $4,280,000.

Railway, Virginia, Louisville & Nashville R.R. Co. plans 13.87 mi., $5,287,000.

Railway, North Carolina-Southern Ry. plans grade reduction, $4,000,000.

Sewers, St. Louis, Mo., Bd. Pub. Serv. plans sewers, $2,789,900.

Paving, Milwaukee, Wis., Dept. Pub. Wks. plans paving, $2,500,000.

Theatre and office, Denver, Colo., United Theatres & Bldg. Co. having plans prepared, $2,000,000.

Dam, Texas, surveys being made for large dam and several smaller ones, $2,000,000.

Street improvement, New Orleans, La., Council plans street work, $2,000,000.

Hotel Tampa, Fla., Tampa Beach, Inc., plans building, $1,500,000.

Temple, Kansas City, Mo., Scottish Rite Temple Assn. having plans prepared, $1,500,000.

Office, Dallas, Tex., General Building Corp. having plans prepared, $1,500,000.

Clinic, Rochester, Minn., Mayo Clinic making plans, $1,500,000.

Bids Wanted On Big Jobs

Hall of Records, Newark, N. J., Mar. 3, by Essex Co., $2,100,000.

Bridge, Minneapolis, Minn., city soon takes bids, $1,100,000.

Large Contracts Let During Week

Terminal warehouse, Detroit, Mich., Coe Terminal Warehouse to Walbridge Aldinger Co., $3,000,000.

Waterworks, Ft. Smith, Ark., Ft. Smith Waterworks Dist. by day labor, $1,250,000 to $3,000,000.

Apartment, Chicago, Ill., Cornelia Building Corp. to Collins, Murphy & Jackson, $2,400,000.

Bank and Office, New York, N. Y., Oceanic Investing Co. to Caldwell-Wingate Co., $1,500,000.

Dormitories, Totowa, N. J., B. G. Lewis, Comr., for several contracts, total, $1,414,531.

Bridge, Washington, D. C., Arlington Memorial Bridge Comn. to H. P. Converse, $1,299,000.

Coliseum, Coral Gables, Fla., Coliseum Corp. to Thompson-Starrett Co., $1,000,000.

Lock and dam, Illinois, Dept. of Purchases and Construction, to Woods Bros. Constr. Co., $1,475,832.

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

A list of the Country's principal cities, large and small—

Is a list of the satisfied users of LEADITE.

Leadite Users are Leadite Boosters

EAST or West, North or South, take your pick of the cities—and you'll find many of them on the customer list of Leadite—

The country's principal cities, large and small—the country's representative water works engineers, construction companies and water works departments of industrial plants, railroads and mines are strong for Leadite for jointing cast iron water mains—

Are demonstrating what you will be able to do when you use Leadite—

What, for instance?—

You will do away with the need for caulking—or the need for digging out for large bell holes.

You will be able to use Leadite for all sizes of pipe from 4 in. to 60 in. diameter—under all pressures and conditions—

Give Leadite a trial.

Leadite resists electrolysis.

Leadite does not corrode or rust.

Leadite has been successfully tested and used for over 30 years.

Thousands of miles of pipe jointed with Leadite are in service.

The up-to-date water works man specifies and uses LEADITE.

LEADITE saves at least 75%

LEADITE is the pioneer self-caulking material for c. i. pipe

Be Sure It Is LEADITE and Accept No Imitations

THE LEADITE COMPANY, Inc.
1511 Land Title Building, Philadelphia, Pa., U. S. A.

See proposal advertisements on page 130, Advertising Section.

When Emergency Demands

Secure Strong Concrete in *3 Days*

In all types of concrete construction emergencies sometimes arise which demand immediate completion and use of the improvement.

On road, street and bridge repairs, railroad maintenance, mining improvements and industrial developments, rush work often is necessary.

In such cases, you do not want to wait the number of days usually allowed for concrete to reach the desired strength. You do not need to. You can, with standard *Universal* cement, the same quality *Universal* you have always used, obtain quick-hardening, *strong* concrete in *3 days* by using simple methods that thousands of laboratory tests and actual construction experience prove will give the desired results.

Detailed information on this time-saving concrete made with standard *Universal* cement will gladly be furnished on request to

Universal Portland Cement Co.

Chicago Pittsburgh Minneapolis Duluth Cleveland New York

Concrete for Permanence

Waterworks (Continued)

O., Dayton—For 5,030 tons pipe and fittings, to U. S. Cast Iron Pipe & Fdry. Co., 122 South Michigan Blvd., Chicago, Ill., $277,000.

O., Dayton—G. F. Baker, dir. Pub. Serv., City Bldg., new pumping plant, incl. concrete footings for pumps and motors, etc., to F. H. Smith, Inc., Winters Bank Bldg., $162,923. Engrs. est. $175,000. Noted Jan. 14.

See proposal advertisements on page 130, Advertising Section.

BRIXMENT FOR PERFECT MORTAR

The fact that over a period of ten years BRIXMENT has become the largest selling mason's cement in the world is one of the best indications that it has fulfilled every claim made for it. And a constantly increasing demand for BRIXMENT, summer and winter, is convincing evidence of its growing preference as an all-year-round mortar material. Literature describing fully its architectural, structural and economic superiority for brick, tile and stone masonry as well as for stucco mailed on request.

LOUISVILLE CEMENT COMPANY, *Incorporated*, LOUISVILLE, KENTUCKY

Cement Manufacturers for Ninety-five Years

BRIXMENT

Building Profits

WHEN you put an INDUSTRIAL crawling tractor crane on the job, it goes to work at once, building up the profits.

The first cost of an INDUSTRIAL is surprisingly low, and the great saving in labor, handling and maintenance makes the final cost the lowest. It pays for itself in so short a time and sticks to the job for so long a time—no wonder operators say, "It can't be beat."

This type DC is a crane, shovel and dragline. Think of buying three machines for but slightly more than the price of any one of other make!

May we send you further details?

Announcing

The Acquisition of the Nichols Patents for Making Centrifugal Concrete Products

This is to announce that the Nichols patents for making centrifugal concrete products have been acquired by the Nichols Centrifugal Products Corporation, with general offices at Detroit, Michigan.

This means that the Nichols Centrifugal Products Corporation is prepared: (1) to make centrifugal concrete products, such as pier and bridge piles, sewer pipe, water pipe, culvert pipe, lighting standards, poles and posts; (2) to furnish engineers manufacturing specifications and proposals for their requirements; and (3) to license manufacturers the right to operate and use our centrifugal machinery.

Inquiries solicited from those who may be interested

Nichols Centrifugal Products Corp.
8100 E. Jefferson Ave.,
Detroit, Mich.

Streets and Roads (Continued)

Entering an Era of Railway Prosperity—

ON EVERY HAND the evidence is clear that the railways of the United States have entered into an era of prosperity unparalleled since the days of the World War. Estimates of capital expenditures during the current year range from three-quarters of a billion to almost a billion dollars.

The spending of this vast sum will be in the hands of the men who will attend the convention of the American Railway Engineering Association in Chicago next month and who will look to the ANNUAL RAILWAY NUMBER of *Engineering News-Record,* Feb. 25, for authoritative and timely information regarding the methods, the equipment, and the materials they will need in carrying on the year's program.

The design, construction and supervision of the various projects fall within the scope of the every-day work of the civil engineers and contractors who constitute *Engineering News-Record's* 30,000 subscribers.

—And for whom the ANNUAL RAILWAY NUMBER, both in its editorial and advertising pages, will have a direct and a timely appeal, appearing, as it does, on the eve of the great Railway Convention and Equipment Exhibit in Chicago.

Your copy and cuts should be forwarded at once—last forms close

February 18th

Positive gear drive. Four speeds in either direction. Sizes built, 3½ to 25 tons in weight.
Write for catalogue

It's gear driven!
No chains or sprockets ANYWHERE to get out of order. Big power and a saving in maintenance and fuel alone which pays for the initial cost. In sizes up to 30 tons.

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

A list of the Country's principal cities, large and small—

Is a list of the satisfied users of LEADITE.

Leadite Users are Leadite Boosters

EAST or West, North or South, take your pick of the cities—and you'll find many of them on the customer list of Leadite—

The country's principal cities, large and small—the country's representative water works engineers, construction companies and water works departments of industrial plants, railroads and mines are strong for Leadite for jointing cast iron water mains—

Are demonstrating what you will be able to do when you use Leadite—

What, for instance?—

You will do away with the need for caulking—or the need for digging out for large bell holes.

You will be able to use Leadite for all sizes of pipe from 4 in. to 60 in. diameter—under all pressures and conditions—

Give Leadite a trial.

Leadite resists electrolysis.

Leadite does not corrode or rust.

Leadite has been successfully tested and used for over 30 years.

Thousands of miles of pipe jointed with Leadite are in service.

The up-to-date water works man specifies and uses LEADITE.

LEADITE saves at least 75%

LEADITE is the pioneer self-caulking material for c. i. pipe

Be Sure It Is LEADITE and Accept No Imitations

THE LEADITE COMPANY, Inc.

See proposal advertisements on page 120, Advertising Section.

Quick-Hardening Concrete

***Strong* Concrete**

in *3 Days* with

Standard *Universal* Cement

Urgent needs in construction often demand that your work be rushed to completion and placed in service as soon as possible. In such cases, you do not want to wait the number of days usually allowed for concrete to reach the desired strength. You do not need to.

A copy of the circular shown above on how to obtain quick-hardening, *strong* concrete in *3 days* with standard *Universal* cement, the same quality *Universal* you have always used, will be mailed you on request to

Universal Portland Cement Co.

Chicago Pittsburgh Minneapolis Duluth Cleveland New York

Concrete for Permanence

Waterworks (Continued)

2921 Main St., Buffalo, N. Y., six 4 in. discs, $158; and to Worthington Pump & Mchy. Corp., 115 Bway., New York City, six 6 in. disc meters $325. Noted Jan. 28.

Elephants and Motor Cars

INDUSTRIAL crawling tractor cranes are built like a fine motor car—a trip through our shops will prove this. The finest materials available go into them—nothing but good steel for the castings, gears all accurately machined or hand cut, bronze bushings throughout and a host of other big points—things that mean a lot to you. Nothing crude about these machines—smoother and easier in every function than anything you have seen.

But back of it all is a wealth of harnessed power. With all their fineness, smoothness and exacting workmanship there is that ruggedness, so characteristic of INDUSTRIAL crawling tractors. Like an elephant—patient, powerful and faithful to the last.

But more than that—after the motor car is worn out, and even after similar equipment is long since on the scrap heap, your INDUSTRIAL will go on—cutting down expenses and piling up the profits.

Let us tell you more about these "elephants." Write for book 120-A.

INDUSTRIAL WORKS · BAY CITY · MICHIGAN

Bridges (Continued)

Tex., Karnes City — See "Streets and Roads."

Tex., Quanah—See "Streets and Roads."

Okla., Pawnee — State Hy. Dept., Oklahoma City making preliminary plans 102 ft. steel truss bridge on concrete piers, Pawnee Co., here. $35,000. J. M. Page, highway engr.

Okla., Ponca City—City and Atchison, Topeka & Santa Fe R.R. Co., 80 East Jackson Blvd., Chicago, Ill., C. F. W. Felt, ch. engr., made preliminary plans viaduct over railroad tracks, at Grand Ave. $160,000. C. E. Morton, city clk.

Ont., London — Middlesex Co. making plans 2 concrete and steel highway bridges, on Hamilton Rd. $28,000. C. Talbot, County Bldg., London, engr.

Ont., Toronto—City Council plans replacing Winchester St. bridge with new 150 ft. concrete and steel bridge, 66 ft., on new site. $25,514. R. C. Harris, City Hall, engr.

Ont., Toronto—Plans 600 ft. steel and concrete bridge, 42 ft., over Rosedale Ravine, at North Glen Rd. $425,000. R. C. Harris, City Hall, engr.

BIDS DESIRED

Pa., Mercer—Mar. 8, by Comrs. Mercer Co., Bridge 610, French Creek Twp.; Bridges 2321 and 2327, Hickory Twp.; and Bridge 2634 Findley and E. Lackawannock Twps. F. P. Graham, Grove City, co. engr.; adv. E. N.-R. Feb. 18.

Pa., Phila.—Mar. 3, by Delaware River Bridge Joint Comn., Widener Bldg., G. Pinchot, chn., miscellaneous metalwork, Contr. 24, electrical equipment, Contr. 25, and wrapping cables, Contr. 26, all for bridge over Delaware River connecting cities of Phila. and Camden. J. K. Costello, secy.; adv. E. N.-R., Feb. 18.

Delaware—See "Streets and Roads."

Miss., Quitman—See "Streets and Roads."

Louisiana—Mar. 9, by State Hy. Comn., Baton Rouge, reconstructing and repairing bridge over Calcasieu River, on Lake Charles-West Lake Highway, State Project 461, Calcasieu Parish. W. B. Robert, Reymond Bldg., Baton Rouge, highway engr.

Ia., Denison — Feb. 23, by W. J. Weatmouth, engr., Denison, one 140 ft. truss and two 40 ft. I-beam span bridge, for Crawford Co.

Tex., Anderson—See "Streets and Roads."

Tex., Boston—See "Streets and Roads."

Tex., Carthage—See "Streets and Roads."

Tex., Linden—See "Streets and Roads."

Tex., Waxahachie — See "Streets and Roads."

California—Mar. 1, by State Hy. Dept., Sacramento, three 55 ft. span rein.-con. girder bridge on rein.-con. piers and abutments over Bear Creek at Briceburg, and 2 rein.-con. bridges, one over Slate Gulch, 3 mi. north of Briceburg, and one over Sweetwater Creek, about 4 mi. north of Briceburg, in Mariposa Co.; also 125 ft. open spandrel arch and nine 33 ft. girder approach spans rein.-con. bridge over Doney Creek, 1 mi. south of Antler, Shasta Co. R. M. Morton, Forum Bldg., Sacramento, highway engr.

BIDS RECEIVED

New Jersey—See "Streets and Roads."

North Carolina — State Hy. Dept., Raleigh, rein.-con. bridges, etc., on Project 303, Bladen Co., from J. S. Bowers, Whiteville, $27,718; Project 838, Henderson Co., from C. R. Willard & Son, Spartanburg, S. C., $25,435; on Project 664, Richmond Co., from Hobbs-Peabody Co., Charlotte, $25,752; on Project 635, Gaston Co., from P. S. Minus, Spartanburg, S. C., $102,641; on Project 479, Wake Co., from R. A. Loving Co., Goldsboro, $47,814; on Project 465, Person Co., and on Project 240, Johnston Co., from E. A. Wood & Co., Andrews, $26,052 and $115,002 respectively. Noted Feb. 4.

Missouri—State Hy. Dept., Jefferson City, Feb. 5, three 20 ft. rein.-con. slab spans, etc. over McDougal Branch, Newton Co. $4,140, from Kelly & Underwood, Granby, one 10 ft. rein.-con. slab span, etc. over stream $828 and one 60 ft. steel truss span, etc. over Robinson Creek, $7,443, both Vernon Co.; from J. P. Sparks, Kirkwood, two 8 ft. rein.-con. slab spans, etc. over stream, Wayne Co., $4,941 from D. C. Horton, Ft. Smith, Ark., two 10 ft. rein.-con. slab spans, etc. over stream, St. Clair Co., $1,436; from Stevens Bros., St. Paul, Minn., one 20 ft. rein.-con. slab span, etc. over West Dog Creek, Daviess Co., $7,530; from O. H. Schmidt, 3108 Jule St., St. Joseph, three 20 ft. rein.-con. slab spans, etc. over Turkey Creek, Linn Co. $4,647; from J. J. Bailey, St. Louis, three 20 ft., rein.-con. slab spans, etc. over Castor River, Bollinger Co., $4,016; from Independent Constr. Co., Pittsburg, Kan., two 10 ft. and two 12 ft. rein.-con. slab spans, etc. over stream, Vernon Co., $3,691; from H. Spitcaufsky, 3229 Victor St., Kansas City, four 20 ft., rein.-con. spab spans, etc. over Turkey Creek overflow $6,428, three 30 ft. rein.-con. deck girder spans, etc. over Elk Creek $6,525 and one 40 ft. rein.-con. deck girder span, etc. over Little Turkey Creek $5,613, all in Linn Co.; from Newton Constr. Co., Columbia, two 30 ft. rein.-con. deck girder spans, etc. over Panther Creek, St. Clair Co. $5,302, and one 40 ft. rein.-con. deck girder span, etc. over Mams Creek, Audrain Co., $4,806; from De Janett & Schrader, Sedalia, one 30 ft. rein.-con. deck girder span, etc. over Pipes Creek, Howard Co., $4,764; from K. McFarland, Kansas City, three 45 ft. rein.-con. deck girder spans, etc. over Sulphur Creek, Howard Co., $13,096; from M. E. Gillioz, Monett, two 8 ft. and one 20 ft. rein.-con. slab spans, etc. over stream $6,446, one 45 ft. rein.-con. deck girder spans, etc. over Turkey Creek $6,453, one 20 ft. rein.-con. slab span, etc. over Turkey Creek overflow $4,080, two 25 ft. rein.-con. deck girder spans, etc. over Fraziers Creek $5,516, one 30 ft. rein.-con. deck girder span, etc. over Wards Creek $3,605, one 40 ft. rein.-con. deck girder span, etc. over Bounds Creek $4,748, one 45 ft. and two 30 ft. rein.-con. deck girder spans, etc. over Bear Creek $7,824, all foregoing in Wayne Co.; from R. P. Harper Constr. Co., Chillicothe, twelve 10 ft. rein.-con. slab spans, etc. over stream $2,326, fifteen 20 ft. rein.-con. slab spans, etc. over Big Parsons overflow $17,772, three 20 ft. rein.-con. slab spans, etc. over Hickory Creek $4,792, three 30 ft. rein.-con. deck girder spans, etc. over Little Parsons Creek $6,184, three 30 ft. rein.-con. deck girder spans, etc. over Big Parsons Creek $6,226, four 20 ft. rein.-con. slab, two 80 ft. steel truss and twenty 20 ft. I-beam spans, etc. over Locust Creek overflow, $52,318, one 80 ft. steel and eighteen 20 ft. I-beam spans, etc. over Muddy Creek overflow $28,185, all foregoing in Linn Co.; from Vincennes Bridge Co., Vincennes, Ind., four 140 ft. steel truss spans, etc. over Castor River, Bollinger Co., $37,914; from Cook & Waddell, Ottawa, Kan., two 80 ft. steel truss spans, etc. over Clear Creek, Vernon Co., $20,936; from Finley Constr. Co., Nebraska City, Neb., one 86 ft. steel truss span, etc. over Contrary Creek, Buchanan Co. $9,904; and one 72 ft. timber pile trestle over Route 11, De Kalb Co., $1,035. Noted Jan. 28.

Okla., Davidson—State Hy. Dept., Oklahoma City, 280 span 5,423 ft. pile trestle bridge, Tillman Co., here, 358,720 ft. untreated and 56,200 ft. creosoted timber, 26,820 ft. wooden piling, etc., from Staley Bros., Wichita Falls, Tex., $95,110. Engrs. est. $125,000. Noted Jan. 1.

CONTRACTS AWARDED

N. Y., New York—Park Bd., F. D. Gallatin, pres., Arsenal Bldg., 64th St. and 5th Ave., concrete arch bridge and approaches, Boston Rd. and Bronx River, Bronx Boro, to Fox Reynolds Co., 81 East 125th St., $103,679. Noted Feb. 11.

Pennsylvania—Beaver Co. (Beaver), 4 river piers for bridge across Ohio River, between Ambridge and Woodlawn, to Dravo Contg. Co., Neville Island, Pittsburgh, $145,400. Engrs. est. $150,000. Noted Jan. 21.

South Carolina—State Hy. Dept. Columbia, treated timber bridge over South Edisto River, Federal Aid Project 212, Barnwell-Orangeburg Counties, to J. A. Peterson, Montgomery, Ala., $28,865; also con. substructure bridge over Catawba River, Federal Aid Project 269, Chester and Lancaster Counties, to J. S. Bowers, Whiteville, N. C., $101,796. Noted Nov. 5.

Georgia and South Carolina—State Hy. Dept., East Point, 4 bridges on Waynesboro-Swainsboro Rd., Federal Aid Project 387-B, Burke Co., to Howell Constr. Co., Marion Bldg., Augusta, $35,910; 3 bridges on Brunswick-Jacksonville Rd., State Aid Project 432-S, Camden Co., to G. S. Wright, Athens, $14,733; 11 span 1,433 ft. bridge over Savannah River between Elberton, Ga., and Calhoun Falls, S. C., Alberton Co., Ga., and Abbeville Co., S. C., to E. M. Williams, Monroe, Ga., $213,992, concrete culverts on Carnesville-Commerce Rd., Federal Aid Project 352-B, Banks Co., to M. R. Woodall, Inc., Walton Bldg., Atlanta, $8,096. Noted Jan. 21.

Mich., Detroit—Wayne Co. Road Comn., 1103 Real Estate Exch., fabricating and erecting steel framing for house, also stone and concrete for enclosure walls, double leaf bascule type bridge over River Rouge, at Dix Ave., to G. P. Cullen, Inc., 2940 West Lake St., Chicago, Ill., $66,206. Noted Feb. 4.

Kan., Hiawatha — See "Streets and Roads."

Tex., Houston—J. C. McVea, city engr., and Howe & Wise, consult. engrs., 816 1st Natl. Bank Bldg., rein.-con. bridge across Bray's Bayou, at Lawndale Ave., to B. H. Faber, Eagle Lake, for City and Harris Co. $48,392. Engrs. est. $60,000. Noted Dec. 17.

Oklahoma—State Hy. Dept., Oklahoma City, **(e. e. means engineers estimate)**, 34 span 560 ft. creosoted pile trestle bridge at Shattuck, Ellis Co. and 32 span 610 ft. pile trestle bridge at Edith, Harper Co., to L. Saunders, 619 West Main St., Oklahoma City, $27,490 and $29,238 respectively, e. e. $30,000 and $31,000 respectively; 3 span 144 ft. steel truss bridge on concrete piers at Comanche, and 3 span 250 ft. steel truss bridge on concrete piers at Duncan, both Stephens Co., to National Constr. Co., Lawton, $30,297 and $31,367 respectively, e. e. $34,700 and $35,000 respectively; 6 span 960 ft. steel truss bridge on concrete piers at Dover, Kingfiesher Co., to E. G. Fike & Co., Nebraska Bldg., Tulsa, $87,701, e. e. $100,000; 3 span 260 ft. steel truss bridge on concrete piers at Duncan, Stephens Co., to O. H. Pharoah, Okemah, $40,887, e. e. $47,000; 40 span 720 ft. pile trestle bridge at Waynoka, Major Co., to Woodward Constr. Co., Woodward, $31,843, e. e. $33,000. Grand total $278,823. Noted Jan. 21.

Idaho—Commissioner Pub. Wks., Pioneer Bldg., Lewiston, two 90 ft. steel span bridges, on North and South Highway, Federal Aid Project 9-E, Adams and Idaho Counties, to E. A. Webster, Hutton Bldg., Spokane, Wash., $30,391.

Calif., Santa Barbara — E. E. Haskell, city mgr., Feb. 4, 2 rein.-con. bridges, one over Mission Creek at Anapamu St., and other over Alisos Creek, at Quinientos St., to F. E. Marsh, 237 Bimini Pl., Los Angeles, $15,827 and $11,774 respectively.

See proposal advertisements on page 120, Advertising Section.

Entrance Driveway to new Chicago Union Station. Down this narrow "chute" every day is concentrated hundreds of tons of mail, express and baggage traffic, plus hundreds of taxis—in bad weather an endless grinding of chains.

The Ten-Point Performance of

VITRIFIED PAVING BRICK

in Industrial Service

1. *Long-wearing*
2. *Little or no maintenance cost*
3. *No cracking and crumbling*
4. *Non-rutting*
5. *Non-dusting*
6. *Non-absorbent*
7. *Non-skid—safe*
8. *Acid-proof*
9. *Easily cleaned*
10. *Easily lifted and relaid*

INDOORS—OUTDOORS
wherever traffic is heavy

Exact specifications for specific uses gladly furnished on request.

Where Traffic Is Brutal

THE selection of vitrified brick for the driveways of the new Chicago Union Station is no experiment. The brick pavements of the Pennsylvania Station, New York City, have already given 14 years of unflinching service.

For all outside service around industrial plants and warehouses—drives, platforms and loading yards—and all indoor service where heavy materials are moved or fabricated, the one right paving material is

VITRIFIED Brick

Pavements Stand Punishment

NATIONAL PAVING BRICK MANUFACTURERS ASSOCIATION, ENGINEERS BLDG., CLEVELAND, OHIO

Excavation, Drainage, Irrigation, Levees, River and Harbor (Cont.)

Tex., Brownsville—Cameron Co. Water Dist. 7 election soon $200,000 bonds, concrete lined canals and drainage. H. H. Banker, dist. mgr.

Ill., Galesburg—Bd. Local Impvts., Jan. 23, grading, curbing and vitr. brick on concrete paving 8 blocks Day St., 27 ft., from H. H. Gunther, 571 North Seminary St., $42,096. Engrs. est. $44,830. Noted Jan. 21.

JANUARY
leads them all

2602 reports, against 2371 in January, 1925.

$190,647,000 worth of contracts, against $171,099,000 in January, 1925.

These figures are for the United States alone.

In addition—$7,384,000 worth of Canadian contracts was reported.

The gain was consistent in practically all classes, as shown by the following figures for the United States:

	1925	1926
Water-Works	184	248
Sewers	150	137
Bridges	93	98
Waste Disposal	4	8
Excavation, drainage, etc.	51	62
Streets and Roads	538	582
Industrial Buildings	248	247
Commercial Buildings	869	969
Federal Government Work	72	95
Unclassified	162	146
	2,371	2,602

Steam Turbine Unit — Newport, Ark. — Arkansas Light & Power Co., Picron St., Little Rock, plans 1,500 hp. unit at plant, here. $140,000. R. E. Burton, Little Rock, engr.

Hydro-Electric Development—Tahlequah, Okla.—See "Buildings—Industrial."

Swimming Pool — Marysville, Calif. — Making plans rein.-con.. swimming pool. G. C. Sellon & Co., California State Life Bldg., Sacramento, archts. Noted Sept. 10.

Ornamental Lighting System — Long Beach, Calif.—Plans ornamental street lighting system on American Ave. between Ocean Blvd. and Anaheim Sts. To exceed $25,000. Pacific Electric Ry. Co., 610 South Main St., Los Angeles, appropriates $11,500 of total cost. R. D. Van Alstine, city engr.

Auto Subway—Oakland, Calif.—City and Alameda Co. plan automobile subway, foot of Goss St. $400,000. City and County appropriated $100,000 each, and Southern Pacific R.R. Co., 65 Market St., San Francisco, $200,000 toward cost. G. A. Posey, Oakland, co. surv. W. W. Harmon, city engr.

Ornamental Lighting System—Palo Alto, Calif. — City plans ornamental lighting system in El Camino Real (Mayfield Dist.) between Stanford Ave. and Page Mill Rd. $25,000 or more.

Piers, etc.—San Francisco, Calif.—State Bd. Harbor Comrs., Ferry Bldg., making plans constructing Pier 45, 1,200 ft. long, 382 ft. wide, concrete, providing 4 berths, 4 freight sheds and freight slip, $1,966,000; Pier 52 (inner unit) 650 ft. long, 376 ft. wide, concrete; 2 berths, 2 sheds incl. adjacent bulkhead wharf, $1,115,000; Pier 48 (inner unit) 600 ft. long, 376 ft. wide, concrete, $889,000; 150 ft. extension to Pier 41, on north side, $40,000; Pier 15, widening pier 30 ft., and reconstructing railroad track and new shed, $185,000. F. G. White, Ferry Bldg., ch. engr.

Storage Tank — Sausalito, Calif. — Lawrence Warehouse Co., 37 Drumm St., San Francisco, making estimates 1 m.g. steel alcohol storage tank, here.

Grain Elevator—Midland, Ont.—J. Playfair, having plans prepared rein.-con. grain elevator, waterfront. $500,000. Private plans.

BIDS DESIRED

Timber Flume, etc.—Brooklyn, N. Y.—Feb. 19, by Bd. Transportation, J. H. Delaney, chn., 49 Lafayette St., timber flume and signal tower foundations, at Coney Island Yard, Shell Rd., here.

Lighting System—Gouverneur, N. Y.—Mar. 18, by Bd. Light, Comrs., Municipal Bldg., street lighting and distribution system. L. C. Reynolds, 387 Castle St., Geneva, engr.; adv. E. N.-R. Feb. 18.

Lighting System — New York, N. Y. — Mar. 1, by Bd. Health, 505 Pearl St., L. I. Harris, pres., underground system, roadway lighting, etc. in various buildings, Riverside Hospital, North Brothers Island, Bronx.

Subway—New York, N. Y.—Feb. 26, by Bd. Transportation, J. H. Delaney, chn., 49 Lafayette St., subway Sect. 1, Route 102, under and along Greenwich and 8th Aves. from Bank to West 17th Sts.

Lighting System — Phila., Pa. — See "Streets and Roads."

Swimming Pool, etc.—Oakmont, Pa.—See "Contracts Awarded."

Culvert—Cleveland, O.—Feb. 26, by City, concrete culverts enclosing portion Doan Brook, in Wade Park. $25,000. R. Hoffman, City Hall, engr.

Transmission Line — Wisconsin — See "Materials under Wausau."

Transmission Line — Oklahoma — See "Contracts Awarded."

Wharf—Monterey, Calif.—Feb. 23, by A. J. Mason, city clk., Municipal Wharf 2, steel $262,000 available. F. B. Smith, 350 Holbrook Bldg., San Frnacisco, engr. Noted Dec. 24.

Grand Stand—Sacramento, Calif.—Mar. 2, by State Dept. Pub. Wks., rein.-con., brick and steel grand stand at fair grounds. G. B. McDougall, Forum Bldg., archt.

BIDS RECEIVED

Banana Unloaders—New Orleans, La.—Bd. Port Comrs., New Courthouse Bldg., Feb. 9, 2 banana unloaders, at Erato Street Wharf, from B. N. Davis, 1006 Tchonpitoulos St., $45,379. Noted Feb. 4.

Ornamental Lighting System—Los Angeles, Calif.—Ornamental lighting system on Hillhurst Ave. between Los Feliz and Hollywood Blvds., from D. S. McEwan, 127 Pier Ave., Ocean Park, $32,200.

Swimming Pool—Los Gatos, Calif.—D. M. Winning, city clk., Feb. 1, general contract 40 x 70 ft. tank and building, from J. D. Carlson, 235 Sierra St., San Jose, $14,168-$15,520. Noted Jan. 21.

CONTRACTS AWARDED

Borings—New York—Bd. Transportation, J. A. Delaney, chn., 49 Lafayette St., land and water borings, South St., Boro Manhattan, East River from Fulton St., Manhattan to Cranberry St., Brooklyn, Route 101 A-1, Agreement "EH," to E. J. Longyear Exploration Co., 710 Security Bldg., Minneapolis, Minn., $21,933. Noted Jan. 7.

Swimming Pool, etc. — Oakmont, Pa. — Oakmont Motor Boat Co., c/o J. T. Anderson, will build 125 x 325 ft. rein.-con. swimming pool, 110 x 216 ft. U shaped bath house, and 1,280,000 gal. filter plant, by separate contracts. $150,000. W. H. King, Ferguson Bldg., Pittsburgh, engr.

Tipple and Conveying System—Williamson, W. Va.—Portsmouth By-Products Co., tipple and conveying system, to Link Belt Co., Huntington Park and Nicetown St., Phila., Pa., $250,000.

Foundation — West Palm Beach, Fla. — See "Buildings — Commercial under Proposed work."

Wharf—Lake Charles, La.—Bd. Comrs. Harbor & Terminal Dist., creosoted timber wharf with 2 railroad tracks, to Banta & Mautersbaugh, Lake Charles, $165,497. Noted Jan. 28.

Electrical Wiring—New Orleans, La.—S. Stone, Jr., archt., 714 Union St., wiring 18 story Masonic Temple, St. Charles and Perdido Sts., to Freeman-Barlow, Inc., 713 St. Charles St., $78,765. Noted Oct. 15.

Foundation—Indianapolis, Ind.—Trustees Indiana World War Memorial, Indiana World War Memorial Bldg., St. Clair and Meridian Sts., foundations for Central Shrine Indiana World War Memorial Plaza, Meridian, Pennsylvania, Michigan and Vermont Sts., to E. C. Strathmann Co., 4220 Central Ave., $289,000. Noted Jan. 7.

Boiler Settings — Detroit, Mich. — Pub. Lighting Comn., 174 East Atwater St., boiler settings for municipal power house, Morrell St., to Combustion Eng. Co., 51 Broad St., New York City, $239,500. Engrs. est. $235,000. Noted Jan. 28.

Generators—Decatur, Ill.—City Council, two 625 kw. steam turbine generators and excitors, 2 new condensors and auxiliaries, also switch board panel, to Allis-Chalmers Co., West Allis, Milwaukee, Wis., $51,825. Noted Feb. 4.

Transmission Line — Wisconsin — See Materials under Wausau, Bids Desired."

Rein.-con. Wall—St. Louis, Mo.—Bellefontaine Cemetery Assn., Security Bldg., 1,000 ft. rein.-con. wall, 50 ft. high, along edge cemetery, West Florissant Ave., to St. Louis Contg. Co., 4425 Clayton Ave. Engrs. est. $40,000.

Transmission Line — Oklahoma — Oklahoma Gas & Electric Co., 112 North Bway., Oklahoma City, will build electric transmission line from Stillwater to Perkins and to sand pit south of Perkins, by day labor. $35,000. Byllesby Eng. Co., 231 South La Salle St., Chicago, Ill., engrs.

Oil Reservoir — Tracy, Calif. — Southern Pacific R.R., 65 Market St., San Francisco, 1,100 ft. oil reservoir, 600 ft. wide, 30 ft. deep, 3,000,000 bbl. capacity, to Bent Bros., 418 South Pecan St., Los Angeles.

Materials

PROPOSED WORK

Sand Grit—Long Island City, N. Y.—M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., rejected bids Jan. 29, 5,000 cu.yd. sand grit and 23,000 tons steam ashes. Noted Feb. 4.

Road Oil — Kewanee, Ill. — Wethersfield and Kewanee Twps. plan to purchase 100,000 gal. road oil. at $0.66 per gal. J. Mayhew, highway comr.

Road Oil—Rio, Ill.—Rio Twp. plans to purchase and spread 60,000 to 70,000 gal. road oil. A. Robertson, Rio, highway comr.

BIDS DESIRED

Asphaltic Cement—St. George, N. Y.—Feb. 24, by J. A. Lynch, pres. Richmond Boro, Boro Hall, 300 tons asphaltic cement; 100,000 gal. bituminous road surfacing material; 276,000 gal. asphaltic macadam binder for hot application; 1,100 cu. yd. concrete and paving sand; 2,600 cu.yd. 1½ in. and 450 cu.yd. ¾ in. broken stone, 500 cu.yd. screenings; 3,800 cu.yd. 1½ in. and 225 cu.yd. ¾ in. broken stone, 225 cu.yd. screenings; 1,850 cu.yd. trap rock screenings; 1,650 cu.yd., 700 cu.yd. and 1,850 cu. yd. pea gravel for Dists. 1, 2, 3 respectively.

Crushed Stone, etc. — Freehold, N. J. — Mar. 3, by Bd. Freeholders Monmouth Co., Court House, crushed stone, slag and gravel, etc. for road work during 1926. G. K. Allen, Jr., Red Bank, engr.; adv. E. N.-R. Feb. 18.

Railroad Crossing Frogs, etc.—Newark, N. J.—Feb. 20, at office T. L. Raymond, mayor, City Hall, railroad crossing frogs, curb boxes, 30 in. c.i. pipe, specials, etc.

Stone, etc.—Newark, N. J.—Feb. 23, by City Council, 2,000 tons 1½ in. and 500 tons ¾ in. stone, also, 2,000 tons stone screenings.

Pig Lead—Phila., Pa.—Feb. 23, by Dept. Pub. Wks., Bureau Water, 50,000 lb. pig lead, Contr. 794.

Cast Iron Pipe, etc.—Laurel, Miss.—City in market 16 ft. length 6 and 8 in. Class B, c.i. pipe without prepared joint, also fire hydrants.

Gravel — Louisiana — See "Streets and Roads."

Gravel — Logansport, La. — Mar. 2, by State Hy. Comn., Baton Rouge, 5,691 cu.yd. washed and screened gravel, f.o.b. here, for Federal Aid Project 152 C, De Soto Parish.

Stone and Cement, etc.—Cleveland, O.—Feb. 19, by City, 8,500 tons crushed stone, 4,000 tons binder stone, 12,000 bbl. Portland cement, 10,000 sacks lumnite cement, 200,000 gal. road oil, 7,500 tons paving sand and 15,000 tons asphalt sand.

Road Oil—Arcola, Ill.—Street and Alley Comn. taking bids 20,000 gal. road oil spread on streets. O. R. Twiford, mayor.

Road Oil, etc.—Two Rivers, Wis.—Feb. 23, by R. Biehl, city mgr., 1 carload each road oil and tarvia.

Wire, Insulator, etc.—Wausau, Wis.—F. Nolte, purch. agt. Wisconsin Valley Electric Co., 206 3rd St., taking bids wire, insulators, wooden poles, cross arms, etc. for approximately 40 mi. transmission line from Wausau to Antigo. Work will be done by day labor. Private plans.

Road Oil—Anaheim, Calif.—City in market 2,400 bbl. road oil. E. B. Merritt, city clk.

Pipe, etc.—Oroville, Calif.—See "Excavation, Drainage, Irrigation, Levees, River and Harbor."

Asphalt Cement, etc.—Hamilton, Ont.—Feb. 24, by S. H. Kent, chn. Bd. Control, addressed to F. Treleaven, mayor, City Hall, asphalt cement, broken stone, limestone dust, vitr. and concrete sewer pipe, asphaltic sand, gravel, c.i. pipe, etc.

Asphalt, etc.—Ottawa, Ont.—Feb. 23, by Bd. Contract, asphalt, asphaltic filler, lead pipe, pig lead, sand, stone, castings, road oil, vitr. and concrete sewer pipe, etc., for Dept. Supplies. A. F. Macallum, City Hall, engr.

CONTRACTS AWARDED

Macadam Binder — Long Island City, N. Y. — M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., 350,000 gal. macadam binder and 600,000 gal. road oil for cold application, to Standard Oil Co. of New York, 23 Bway., New York City, $23,884 and $37,560 respectively. Noted Feb. 4.

Sand Grit—New York, N. Y.—H. Bruckner, pres. Bronx Boro, Crotona Park, Tremont and 3rd Aves., 10,000 cu.yd. sand grit, to Ames Building Material Co., 3437 Kingsbridge Rd., $16,300. Noted Feb. 11.

Road Oil—White Hall, Ill.—City Council, 60,000-100,000 gal. 60 to 75% asphalt road oil, to Iowa Road Building Co., 417 10th St., Des Moines, Ia., at $0.0534 per gal. Noted Jan. 28.

See proposal advertisements on page 120, Advertising Section.

Consider These Features

1. Made of pure remelted pig iron—solid, round, vertically cast. Contain no scrap whatever.
2. Made in lengths of three feet three inches.
3. Pipe screw into each other. One turn takes up three inches.
4. Standard Corrugations. Tests many times as strong as plain pipe.
5. One man handles and installs it.
6. It lasts forever, yet is as cheap as ordinary structures.
7. Each piece is uniform in thickness.

Why Cast Iron for Culvert Pipe?

Wood decays, refined iron or steel rusts, clay or earthenware disintegrates, concrete cracks from frost; but culvert pipe cast from pure remelted Alabama Pig Iron lasts forever.

Spiral Corrugated Cast Iron Culvert Pipe made by the American Casting Company never needs replacement. Installation is easy. One man without special tools or help can assemble an ordinary size culvert in a matter of minutes. The sections screw into each other and maintain perfect alignment even where unsupported.

The first cost is no more than temporary structures but the final cost of American Cast Iron Culvert is infinitely less.

Our bulletins give complete information and also describe American Cast Iron Headwalls for use with this pipe. You should have the facts. A line from you will bring them to your desk.

AMERICAN CASTING COMPANY

Birmingham, Alabama

CONSTRUCTION NEWS

Engineering News-Record, Feb. 25, 1926

Some of the Week's Large Projects

AMONG the announcements for the current week of proposals, bids desired and received and contracts awarded, are the following big jobs:

Proposed Work

Passenger Station, Buffalo, N. Y., New York Central R.R. plans building, $12,000,000.

Apartment, New York, N. Y., Beresford Corp. having plans prepared, $3,800,000.

Schools, Atlanta, Ga., plans bond election, $3,500,000.

Mills, Buffalo, N. Y., Great Lakes Portland Cement Co. having plans prepared, $3,000,000.

Cement plant, Davenport, Ia., Dewey Portland Cement Co. plans plant, $3,000,000.

Road improvement, Brownsville and Cameron Cos., Texas, plan road improvement, $1,750,000 to $4,000,000.

Road work, Arkansas, State Hy. Dept. making preliminary plans, $2,500,000.

Sewers, Atlanta, Ga., plans bond election, $2,000,000.

Power and irrigation work, Austin, Tex., State Bd. Water Engineers making preliminary surveys, $2,000,000.

Electric Generating Plant, Brooklyn, N. Y., Brooklyn Edison Co. plans plant, $2,000,000.

Church, Hotel, and Theatre, Kansas City, Mo., Linwood Blvd. Christian Church having preliminary sketches made, $2,000,000.

Theater and office, Dallas, Tex., Loew's Theatres, Inc., plans building, $2,000,000.

Bridges, Miami, Fla., city voted bonds for 5 bridges, $1,800,000.

Hotel, Pittsburgh, Pa., Pittsburgh Pennsylvania Hotel Corp. having plans prepared, $1,500,000.

Apartment, Buffalo, N. Y., H. J. Cook, et al, having preliminary plans prepared, $1,225,000.

City Hall, Atlanta, Ga., city plans bond election, $1,000,000.

Temple, Hartford, Conn., St. John's, Hartford, Lafayette, Tuscan, Blue Lodges plan temple, $1,000,000.

Bids Wanted On Big Jobs

Flood prevention, Hidalgo Co., Hidalgo, Texas, takes bids soon for flood prevention, $1,620,000.

Levees, Cameron Co., Brownsville, Texas., soon takes bids, $1,500,000.

Courthouse, Bexar Co., San Antonio, Tex., Mar. 5, takes bids, $1,000,000.

Transformer plant, St. Louis, Mo., American Brown Boveri Co. purchased 10 acres and soon takes bids for building, $1,000,000.

Large Contracts Let During Week

Land development, St. Augustine, Fla., D. P. Davis Properties to Foundation Co., New York City, $8,000,000 to $10,000,000.

Office, San Francisco, Calif., Hunter-Dulin Co. to separate contracts, $3,000,000.

Office, theatre and stores, Brooklyn, N. Y., H. E. Witteman will build 14 story building; work done by separate contracts, $1,200,000.

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Section of 9 miles 30-in. and 36-in. pipe laid with LEADITE

LEADITE, like cast-iron pipe, has proven its durability.

LEADITE has been successfully tested and used for over 30 years for jointing all sizes of cast-iron bell and spigot water mains from 4 in. to 60 in. in diameter, under all pressures and conditions encountered in water-works construction.

Thousands of miles of pipe have been laid with LEADITE.

The most prominent water-works engineers, superintendents and contractors specify and use LEADITE on their work, because it is durable, economical and efficient.

LEADITE saves at least 75%.

LEADITE is the pioneer Self-Caulking Material for c.i. Pipe

Be Sure It Is LEADITE and Accept No Imitations

THE LEADITE COMPANY, Inc.
1512 Land Title Building, Philadelphia, Pa., U. S. A.

Where Traffic or Business Demands Quick-Hardening, Strong Concrete

Time is an important consideration on many sidewalk, paving and other jobs. Traffic or business often demands that the improvement be placed in service at the earliest possible moment.

For such work you can, with standard *Universal* cement, the same quality *Universal* you have always used, obtain quick-hardening, strong concrete in *3 days* by using simple methods that thousands of laboratory tests and actual construction experience prove will give the desired results.

Detailed information on this time-saving concrete made with standard *Universal* cement gladly furnished on request to

Universal Portland Cement Co.

Chicago Pittsburgh Minneapolis Duluth Cleveland New York

Concrete for Permanence

Waterworks (Continued)

stokers, $40,000; two air preheaters, $20,000; coal and ash handling equipment, $68,000; all installed at new waterworks at Howards Bend, St. Louis Co. E. E. Hall, City Hall, dir.

Co., Springfield, $211,000; Div. G, Jacksonville Beach Sewers, 42,200 ft. 15- to 39-in. sewers, also Town Branch syphon and connections with Oakridge, Amos Branch, Oak Knolls, Country Club and other sewers, to Sangamo Constr. Co., Springfield, $312,500. Grand total $792,764. Noted Jan. 7.

Calif., Los Angeles—Rein.-con. storm drains in Melrose Ave. between Citrus Ave. and Poinsetta Pl., to Ballis & Petros, 1350 West 4th St., $26,680. Noted Dec. 24.

Waste Disposal

PROPOSED WORK

Fla., Miami—Voted $400,000 bonds, additional incinerators, etc. Noted Jan. 14.

Bridges

PROPOSED WORK

Ga., Atlanta—Election Mar. 24, $1,000,000 bonds, for viaducts. W. Sims, mayor. Noted Jan. 21.

Fla., Miami—Voted $1,800,000 bonds, 5 bridges, one at or near Northwest 2nd St., one Northwest 12th Ave., one Northwest 17th Ave., one Southwest 1st St., and other Southeast 2nd Ave., all over Miami River. Noted Jan. 14.

Tennessee — State Dept. Highways & Wks., Nashville, plans bridge over Wolf River, on Memphis-Bristol Highway, Shelby Co. To exceed $25,000. C. N. Bass, acting comr.

Tenn., Fayetteville — Lincoln Co. and State Dept. Highways & Pub. Wks., Nashville, plan bridge over Elk River, near here. County to appropriate $20,000 and State $40,000 towards cost. C. N. Bass, acting comr.

Tenn., Nashville—Davidson Co. election Aug. 4, $1,000,000 bonds, bridge over Cumberland River near Old Hickory.

Kentucky — State Hy. Dept., Frankfort, plans one 275 ft. steel and five 50 ft. concrete approach span bridge over Kentucky River at Camp Nelson, Jessamine and Garrard Counties, two 162 ft. steel and nine 40 ft. approach span bridge over Levisa Fork of Big Sandy River, Pike Co.; and two 124 ft. span steel deck girder bridge over Big Clifty Creek, Grayson Co., all above to have 20 ft. roadways. E. N. Todd, highway engr.

Montana — Mineral Co. (Superior), election Mar. 9, $55,000 bonds 3 main and 4 approach span approximately 425 ft. steel bridge. State Hy. Comn., Helena, engr.

See proposal advertisements on page 132, Advertising Section.

In laying INDEPENDENT Pipe, the bottom half of the joint is sealed on the INSIDE—the top half on the OUTSIDE. Perfect joints are possible in a deep, narrow trench, as illustrated at right.

Tight, Smooth Pipe Joints

Easy to Make—Even in Deep, Narrow Trenches

IN some sewer pipe, the joint is the "weakest link," but in INDEPENDENT Pipe, it is the strong point. The recessed joint, found only in INDEPENDENT Reinforced Concrete Sewer Pipe makes it possible to construct strong, smooth, tight joints with a minimum of time, labor and material.

As each unit is fitted, a stiff cement mortar is trowelled into the recess of the upper half OUTSIDE the pipe and into the recess of the lower half INSIDE the pipe. This quickly makes a perfect, permanent joint, with a clean, smooth interior, and a uniform exterior.

The trench need be excavated only wide enough to receive the pipe. No flaring bell ends—no extra excavation. Remember—the joints are sealed half-way around on the OUTSIDE and half-way around on the INSIDE. This feature is especially valuable in laying pipe in wet, muddy or other difficult soil conditions.

Phone, wire or write us for quotations on your concrete pipe requirements.

INDEPENDENT

Reinforced Concrete Pipe

Bridges (Continued)

Ark., Fulton — State Hy. Dept., Little Rock, plans rein.-con. bridge, here. $500,000. R. C. Limerick, highway engr.

Tex., Abilene — Making plans rein.-con. and steel bridge over Raney and Lytle Creeks. $96,000. L. C. McCanlies, Abilene, co. engr.

Tex., Franklin—See "Streets and Roads."

Tex., Groesbeck — See "Streets and Roads."

Tex., Palestine—Anderson Co. (Palestine) and Cherokee Co. (Rusk) making plans 0.91 mi. timber pile bridge across Trinity River, here. $54,600. E. W. Davis, Palestine, co. engr.

Tex., Quanah—See "Streets and Roads."

Ont., Forest Hill—Plans 66 ft. concrete and steel bridge on Millbrook Ave. or Lonsdale Rd. $70,000. James, Proctor & Redfern, 36 Toronto St., Toronto, engrs.

Ont., Toronto — City Council plans removing present bridge and constructing approximately 300 ft. concrete and steel bridge, on Huntley St. $127,000. R. C. Harris, City Hall, engr.

BIDS DESIRED

West Virginia—See "Streets and Roads."

South Carolina — Mar. 16, by State Hy. Dept., Columbia, one 180 ft. steel swing span bridge on reinforced concrete pile pivot pier across Santee River, Charleston-Georgetown Counties, on State Route 40, Federal Aid Project 39-B. State Highway Engineer, Columbia, engr.

Fla., Tampa—Mar. 30, by City Comn. at office city clk., City Hall, bridge over Hillsborough River, at Fortune St. R. D. Martin, city engr. Strauss Bascule Bridge Co., 307 North Michigan Ave., Chicago, Ill., consult. engr.; adv. E. N.-R. Feb. 25.

Alabama—Mar. 10, by State Hy. Comn., Montgomery, 240 ft. double leaf simple trunion bascule bridge being channel span of concrete bridge (now being constructed) across Tennessee River at Decatur, on State Aid Project 63, Limestone and Morgan Counties, 660,000 lb. structural steel, 25,000 lb. metal, 60,000 lb. operating machinery, 104,000 lb. c.i. balancing blocks, etc. W. A. McCalla, highway engr.

Louisiana—Mar. 30, by State Hy. Comn., Baton Rouge, Little River Bridge steel and concrete, and roadway approaches on Alexandria-Jena Highway, Federal Aid Project 164-B, LaSalle and Grant Parishes. W. B. Robert, Reymond Bldg., Baton Rouge, engr.

Tennessee—See "Streets and Roads."

Tennessee—Mar. 12, by State Dept. Highways & Pub. Wks., Nashville, **(S. A. P. means State Aid Project and F. A. P. means Federal Aid Project)**, 2 span 26 ft. earth filler rein.-con. arch bridge over Dry Fork Creek near Edenwold, S.A.P. 325-A, Davidson Co.; 2 concrete deck girder bridges and approaches over Little Trummel Creek and adjacent overflow channel, S.A.P. 127-C, also 2 concrete deck girder bridges and approaches over Lick and Bledsoe Creeks, S.A.P. 326-A, Sumner Co.; 5 rein.-con. bridges over 20 ft. span between Ellendale and Arlington, F.A.P. 36-C, Shelby Co.; 5 rein.-con. bridges over 20 ft. span between Union City and Kentucky State line, F.A.P. 64-A, Obion Co.; 3 rein.-con. bridges between Wartburg and Pilot Mountain, S.A.P. 300-C, Morgan Co.; 3 rein.-con. bridges over 20 ft. span between Morrison and Hawkins Co. line, S.A.P. 324, Hamblin Co.; 1 rein.-con. bridge over 20 ft. span between Etowah and Monroe Co. line, S.A.P. 322, McMinn Co. C. N. Bass, acting comr.

Indiana—Mar. 9, by J. D. Williams, State Hy. Comn., Indianapolis, **(S. R. means State Road, s.g. means steel girders, and s.t. means steel truss)**, two 84 ft. s.g. over Pennsylvania R.R. Traction, and two 150 ft. s.t. over County and Stucker Cr., on S.R. 1-D, Scott Co.

Ill., Chicago — Mar. 3, by South Park Comrs., 57th St. and Cottage Grove Ave., 432 ft. steel temporary bridge with 40 ft. roadway and 20 ft. walk, north of 11th Pl., L. White, ch. engr. Grant Park.

Neb., Bloomfield — State Hy. Dept., Lincoln, taking bids new 700 ft. concrete bridge buttressed by willow matresses over Niobara River, on Federal Aid Rd. 280-B, here. H. L. Cochran, Lincoln, state engr.

BIDS RECEIVED

Alabama—State Hy. Comn., Montgomery, Feb. 10, 425 ft. steel superstructure over Coosa River, State Aid Project 41, Cherokee Co., from Vincennes Bridge Co., Vincennes, Ind., $54,631, engrs. est. $61,567; 431 ft. bridge on Town Creek Rd., State Aid Project 101, Lawrence Co., from G. A. Thompson, Macon, Ga., $31,892, engrs. est. $32,532; 485 ft. bridge on Seale-Girard Rd., State Aid Project 50-B, Russell Co., from McCoy & Garrett, Lafayette, $31,193, engrs. est. $35,000; 1,800 ft. bridge on Federal Aid Project 150, Tuscaloosa Co., from Peterson & Ernhart, Montgomery, $77,928, engrs. est. $101,209. Noted Jan. 21.

Indiana — J. D. Williams, dir. State Hy. Comn., Indianapolis, **(e. e. means engrs. est.)** Feb. 16, bridge over Little Blue River, F. A. 58-B, Crawford Co., and one over Patoka River F. A. 58-D, Orange Co., Contr. 60, from Brown & Cunningham, English, $39,569 e. e. $41,170; bridge over Baltimore & Ohio R.R. tracks, F. A. 59 Sect. 3 Scott Co., Contr. 61, from J. F. Beggs & Co., Scottsburg, $29,386 e. e. $36,972; bridge over Otter Creek, F. A.-76-A1, and one over Spring Creek, F. A.-76-A2, Vigo Co., Constr. 62, from J. W. Dougherty & Sons, Framesburg, $52,112 e. e. $50,883; bridge over Lick Creek, F. A. 80, Fayette Co., Contr. 63, from Hoosier-General Constr. Co., Connersville, $7,932 e. e. $9,137; bridge over Indian Creek, S. 12 I-496, Owen Co., Contr. 64, from W. H. Grammer & Son, Evansville, $13,618 e. e. $14,659; bridge over Turkey Creek, S. 25-C-478, LaGrange Co., from J. E. Sweet & Sons, Woodburn, $8,697 e. e. $8,797; bridge over Plum Creek, S-31-E-399, and one over east branch Plum Creek, 31-E-400, Putman Co., Contr. 66, from Wasnidge & Leonard, Jasonville, $11,850 e. e. $13,396; bridge over Little Brady Creek, S-39-A-58, one over Lick Creek, 39-A-494, and one over Grassy Creek, 39-A-495, Marion Co., Contr. 67, from Kernodle & Fulwider, Lebanon, $22,093 e. e. $28,106. Noted Feb. 4.

Calif., Oakland—Supervs. Alameda Co.—Reconstructing steel bridge on Webster St. over Estuary, here, from J. H. Tillman, 310 East Cabrillo Blvd., Santa Barbara, $149,000 (complete in 120 days) and $134,000 (complete in 150 days). Noted Feb. 4.

CONTRACTS AWARDED

Pa., Phila.—Dept. Pub. Wks., Bureau of Engineering, new 60 x 60 ft. steel and rein.-con. bridge under railroad tracks at Rising Sun Ave., to G. Dobbin, 1020 South 47th St., $90,320. Noted Feb. 4.

Florida — State Rd. Dept., Tallahassee, constructing 9 bridges between Bowling Green and Brownsville, Project 648-B, Hardee Co., to J. S. Walton & Co., Bradenburg, Ky. $75,662. Noted Jan. 14.

Fla., St. Augustine—See "Unclassified."

O., Cleveland—Cleveland Union Terminal Co., c/o O. P. and M. J. Van Sweringen, Marshall Bldg., piers 2,000 ft. steel and concrete bridge over Cuyahoga River, to J. Gill & Son Co., Bulkley Bldg., $500,000. Noted Aug. 20.

Ia., Sigourney—See "Streets and Roads."

Missouri—State Hy. Dept., Jefferson City, to Kelly & Underwood, Granby, three 20 ft. rein.-con. slab spans, etc. over McDougal Branch, Newton Co., $4,140; to R. M. Daviess & Son, Salisbury, one 30 ft. rein.-con. deck girder span, etc. over Pipes Creek, Howard Co., $6,057; to Graham Bros., Leeds, one 40 ft. rein.-con. deck girder span, etc. over Mams Creek, Audrain Co., $4,895; to K. MacFarland, Kansas City, three 45 ft. rein.-con. deck girder spans, etc. over Sulphur Creek, Howard Co., $13,096; to O. H. Schmidt, St. Joseph, four 20 ft. rein.-con. slab spans, etc. over Turkey Creek overflow $6,496, three 20 ft. rein.-con. slab spans, etc. over Turkey Creek $4,649, three 30 ft. rein.-con. deck girder spans, etc. over Elk Creek $10,430, and one 40 ft. rein.-con. deck girder span, etc. over Little Turkey Creek, $5,625, all foregoing in Linn Co.; to J. P. Sparks, Kirkwood, two 8 ft. rein.-con. slab spans, etc. over stream $4,941, two 25 ft. rein.-con. deck girder spans, etc. over Fraziers Creek $5,728, one 30 ft. rein.-con. deck girder span, etc. over Wards Creek $3,776, and one 40 ft. rein.-con. deck girder span, etc. over Bounds Creek $5,031, all foregoing in Wayne Co.; to Nevada Constr. Co., Nevada, two 10 ft. rein.-con. slab spans, etc. over stream $1,983, one 10 ft. rein.-con. slab span, etc. over stream $845, two 12 ft. rein.-con. slab spans, etc. over stream $2,077, one 60 ft. steel truss span, etc. over Robinson Creek $7,980, two 80 ft. steel truss and two 40 ft. rein.-con. deck girder spans, etc. over Clear Creek $22,358, all foregoing in Vernon Co.; to D. C. Horton, Fort Smith, Ark., two 10 ft. rein.-con. slab spans, etc. over stream $1,436, two 30 ft. and one 40 ft. rein.-con. deck girder spans, etc. over Panther Creek $5,393, both in St. Clair Co.; to M. E. Gillioz, Monett, two 8 ft. rein.-con. slab spans, etc. over stream $1,529, one 20 ft. rein.-con. slab span, etc. over stream $3,917, one 20 ft. rein.-con. slab span, etc. over branch of Turkey Creek $4,080, one 45 ft. rein.-con. deck girder span, etc. over Turkey Creek $6,453, one 45 ft. and two 30 ft. rein.-con. deck girder spans, etc. over Bear Creek $7,824, all foregoing in Wayne Co., three 20 ft. rein.-con., slab spans, etc. over Castor River overflow $4,654, one 140 ft. steel truss span, etc. over Castor River, $14,232, and two 140 ft. steel truss spans, etc. over Castor River $28,177, all in Bollinger Co.; to R. H. Harper, Constr. Co., Chillicothe, two 10 ft. rein.-con. slab spans, etc. over stream $2,326, fifteen 20 ft. rein.-con. slab spans, etc. over Big Parsons overflow $21,858, three 20 ft. rein.-con. slab spans, etc. over Hickory Creek $4,792, three 30 ft. rein.-con. deck girder spans, etc. over Big Parsons Creek $7,457, three 30 ft. rein.-con. deck girder spans, etc. over Little Parsons Creek $6,184, ten 20 ft. I-beam spans, etc. over Locust Creek overflow $9,334, ten 20 ft. I-beam spans, etc. over Locust Creek overflow $9,349, one 80 ft. steel truss and twelve 20 ft. I-beam spans, etc. over Locust Creek overflow $18,220, one 80 ft. steel truss and ten 20 ft. rein.-con. slab spans, etc. over Muddy Creek $20,543, one 80 ft. steel truss and four 20 ft. rein.-con. slab spans, etc. over Locust Creek overflow $15,415, and eight 20 ft. I-beam spans, etc. over Muddy Creek overflow $7,642, all foregoing in Linn Co.; to Finley Constr. Co., Nebraska City, Neb., one 80 ft. steel truss span, etc. over Contrary Creek, Buchanan Co., $9,904; to C. H. Atkinson Paving Co., Watertown S. D., one 20 ft. rein.-con. slab span, etc. over West Dog Creek, Daviess Co. $7,766, and one 72 ft. timber bridge on Sta. 225 plus 70, over No. 11, De Kalb Co., $1,495. Grand total $330,086. Noted Feb. 18.

Ark., Siloam Springs—See "Streets and Roads."

Tex., San Antonio—Bexar Co., 3 rein.-con. bridges one 215 ft. one 86 ft. and other 150 ft. long with two 125 ft. approaches, in Precinct 1, to Lehr & Aikin, 812 Builders Exch. Bldg., $75,185. Noted Jan. 7.

Okla., Mounds — State Hy. Dept., Oklahoma City, 2 span 116 ft. steel truss bridge on concrete piers, Creek Co.; here, 23 tons truss steel, 16.4 tons reinforcing, etc., to E. T. Fike & Co., Nebraska Bldg., Tulsa, $23,957. Engrs. est. $26,000. Noted Jan. 21 under "Oklahoma."

Dams

PROPOSED WORK

Tex., Austin—State Bd. Water Engineers, Austin, making preliminary surveys 1 large and several smaller dams on Colorado River, to produce power development and irrigation supply, above here. $2,000,000 or more. Address State Bd. Water Engineers.

Railways

PROPOSED WORK

Florida — City of Miami voted $350,000 bonds, extending tracks, etc. in Miami. Noted Jan. 14.

Saskatchewan—Canadian Natl. R.R. Co., 230 St. James St., Montreal, Que., soon takes bids 44 mi. track through Turtleford, $1,571,000; also for Dunblane-Central Butte Branch, $1,000,000. C. S. Gzowski, 230 St. James St., Montreal, Que., ch. constr. engr.

CONTRACTS AWARDED

Michigan — Dept. Street Railways, St. Jean and Shoemaker Aves., Detroit, H. U. Wallace, genl. mgr., 250 tons girder rail, to Lorain Steel Co., Johnstown, Pa., at $71 per ton, total $17,750.

Excavation, Drainage, Irrigation, Levees River and Harbor

PROPOSED WORK

Arkansas—Pocket Cypress D. D. 1, Pulaski and Jefferson Counties, making preliminary plans lateral ditches, No. 1, Daugherty Lake Old Levee Canal, 9,216 ft. long, incl. 16,560 cu. yd. excav.; No. 2, Daugherty Lake to Pike, 600 ft. long, 1,810 cu.yd. excav.; No. 2-A, 1,000 ft. long, 3,870 cu.yd. excav.; No. 3, 8,000 ft. long, 2,925 cu.yd. excav.; No. 4, 4,620 ft. long, 9,369 cu.yd. excav.; No. 5, 5,600 ft. long, 11,061 cu.yd. excav.; No. 6, 4,000 ft. long, 8,730 cu.yd. excav. E. M. Fever, chn.

Ark., Newport—D. D. 14, c/o Jackson Co. Court, making preliminary plans 200,000 cu.yd. excav. in drainage ditches, etc. Bowman-Morrow Eng. Co., 201 Court House, engrs.

Tex., Brownsville — Cameron Co. soon takes bids portion of levees, etc., along

See proposal advertisements on page 132, Advertising Section.

INDUSTRIAL

THE CRANE THAT STAYS YOUNG

THE ordinary crane ages rapidly. A regular diet of tough work and occasional doses of abuse, assure the average crane a hard life and sometimes a premature death. But the INDUSTRIAL type DC crawling tractor crane, shovel and dragline is a master of old age. Here's why:

All castings are steel. The shafts are of forged steel of ample size and are accurately ground. The gears are all accurately cut or ground and fitted by hand. All functions are controlled by large, easily-engaging friction clutches. Bronze collars are provided behind each bevel gear and the wearing surfaces of all thrust bearings are separated by bronze washers.

The tractor belts are made up of heavy, high carbon, heat treated, cast steel shoes of overlapping design, which present a smooth, continuous bearing surface to the ground. The rollers in the tractor belts are of the self-cleaning type. They are large, making the machine easier to propel. The large, wide roller path reduces internal stresses and strains to a minimum. A Zerk-Alemite high pressure lubricating system is supplied which provides for ample lubrication to all running parts.

There are no chains in the propelling mechanism. Two independent trains of spur and bevel gears lead from powerful friction controls to the tractor belts through two concentric vertical propelling shafts at the axis of revolution. The INDUSTRIAL gear drive is high up out of the dirt with ample clearance underneath, and the gears are designed to withstand the strains of full power application at any time. The operator controls the steering easily from his position on the machine.

You don't have to coddle INDUSTRIALS. Treat 'em rough,—they like it. All parts defy hard usage. They will withstand enormous strains. Owners are insured against breakage by crystallization, overwork, indigestion—everything except dynamite and violation of our directions as to operation.

Why not buy an INDUSTRIAL type DC.—a young crane that stays young? They are powered either with steam, gasoline, electricity or fuel oil engine of the Diesel or semi-Diesel type. We will consider it a pleasure to send you our booklets describing the type DC in detail.

INDUSTRIAL WORKS

BAY CITY MICHIGAN

Excavation, Drainage, Irrigation, Levees, River and Harbor (Cont.)

Rio Grande River for flood prevention. $1,500,000 bonds available. W. O. Washington, Brownsville, engr.

Tex., Hidalgo—Hidalgo Co. soon takes bids portion of 150 mi. flood prevention project along Rio Grande River. $1,620,000 bonds available. P. S. Devine, Hidalgo, co. engr.

Tex., Rockport City—County Navigation Dist. soon takes bids 55,000 cu.yd. dredging, timber bulkhead, etc., in Aransas Co. $125,000. F. M. Percival, Rockport, engr.

Calif., Riverside—Moreno Mutual Irrigation Co., Citizens Natl. Bank Bldg., made plans 31,000 ft. 24 in. riveted steel and concrete pipe line, also 2,500 ft. short tunnel. G. G. Holyoke, 203 Citizens Natl. Bank Bldg., engr.

Calif., Terra Bella — Terra Bella Irrigation Dist., made plans 2,800 ft. 18 in. 14 gauge, 500 ft. 10 in. and 500 ft. 8 in. 16 gauge soil proof water pipe in district.

Ont., Westminster—Twp. Council making plans 7 mi. draining and dredging. $50,000. F. W. Farncombe, Dominion Savings Bldg., London, engr.

BIDS DESIRED

New Jersey—Mar. 12, by Bd. Commerce & Navigation, State House, Trenton, redredging about 40,000 cu.yd. inland waterway from Cape May to Bayhead, Swains and Richardsons Channels, Cape May Co. V. Gelineau, dir.; adv. E. N.-R. Feb. 25.

New Jersey—Mar. 12, by Bd. Commerce & Navigation, State House, Trenton, V. Gelineau, dir., dredging from wharf at Leeds Point to point in Great Bay 600 ft. easterly from Oyster Creek, Galloway Twp., Atlantic Co.; adv. E. N.-R. Feb. 25.

Ia., Ft. Dodge—Mar. 2, by Bd. Supervs. Webster Co., cleanout of Drain 5, and laterals incl. 74,553 cu.yd. excav., etc. J. W. Martin, co. aud.; adv. E. N.-R. Feb. 25.

Minn., St. James—Mar. 10, by J. E. Setrum, aud. Watonwan Co., constructing Judicial Ditch 23, main line 9,750 lin.ft. 8- to 24-in. Branches 1 to 9 (inclusive) 19,050 lin.ft. 6- to 24-in. tile, etc. E. P. Meyer, I.O.O.F. Bldg., Mankato, engr.

BIDS RECEIVED

O., Cleveland—From Great Lakes Dredge & Dock Co., Williamson Bldg., dredging (1) Cuyahoga River (2) under and around bridges, (a) inner dump (b) outer dump, (1a) $58,500 (1b) $80,800, (2a) $12,710 (2b) $15,210. Noted Feb. 4.

CONTRACTS AWARDED

La., Shreveport—W. A. Kerley, secy. Caddo Levee Dist., Caddo Parish, improving drainage Black Bayou from Houston-Vivian Highway to Huckalogs Bridge, etc., to J. R. Johnson, Texarkana, Ark., at $0.14 per cu. yd., and $490 clearing mile. Noted Dec. 10.

Calif., Los Angeles—City Water & Power Comn., 500,000 cu.yd. canal excav., to Callahan Constr. Co., California Bldg., $0.14 per yd.

Streets and Roads

PROPOSED WORK

Conn., Hartford—Plans asphalt on concrete or concrete paving 5,000 ft. New Britain Ave. from Fairfield, to Newington Aves. $105,400, 2,000 ft., Elm St. from Main to Trinity Sts. $34,380, 2,000 ft. Blue Hills Ave. from Westbourne Parkway to Plainfield St. $30,250, 4,500 ft. Asylum St. from Woodland to Prospect Aves. $72,100, 2,000 ft. Franklin Ave. from Maple Ave. to Benton St. $44,400. R. N. Clark, Hartford, engr.

Conn., New Haven—Plans grading, paving, etc., Fitch St. from Hamden to Westville, 80 ft. $73,100. E. Nettleton, New Haven, city engr.

N. Y., Kenmore (mail Buffalo)—Plans concrete widening 5 mi. Elmwood and Kenmore Aves., 80 and 99 ft. To exceed $40,000.

New Jersey—Middlesex Co. (New Brunswick), plans improving 3 mi. Woodbridge-Rahway Reformatory Rd. $145,000. W. F. Buchanan, Perth Amboy, engr.

N. J., Bound Brook — Somerset Co. (Somerville), plans paving 4 mi. Easton Turnpike and Easton Ave., here. $190,000. O. Smith, Jr., Somerville, engr.

N. J., Phillipsburg — Warren Co. (Belvidere) plans improving 5 mi. Lincoln Ave. and Phillips-Belvidere Rd., here. $220,000. H. Vetter, Belvidere, engr.

Pa., Pittsburgh—Soon takes bids grading, curbing and paving Breckenridge St. between Reed and Morgan Sts., 38 ft. $68,000. Dept. Pub. Wks., ch. engr.

Fla., Miami — Voted $3,200,000 bonds, widening and extending various streets. Noted Jan. 14.

Miss., Starkville—Oktibbeha Co. election Mar. 2, $450,000 bonds improving various roads.

Tennessee—State Dept. Highways & Pub. Wks., Nashville, making surveys improving 6 mi. Henderson-McNairy Co. line Rd., Chester Co. C. N. Bass, acting comr.

Tennessee—State Dept. Highways & Pub. Wks., Nashville, plans probably concrete paving 4.5 mi. Dyer-Rutherford Rd., Gibson Co.; improving 10 mi. Chattanooga-Cleveland Rd., Hamilton Co.; and 7 mi. Ellendale-Bartlett Rd., Shelby Co. C. N. Bass, acting comr.

Tenn., Nashville — Plans grading and macadam surfacing 4th, Dakota, 53rd, Nevada, Richland and Dudley Aves. To exceed $25,000. W. W. Southgate, City Hall, engr.

Tenn., Nashville — Davidson Co. plans grading and surfacing 8 mi. Belleview-Linton Rd. C. Akers, Court House, co. engr.

Kentucky — State Hy. Dept., Frankfort, rejected bids Feb. 8, grading, etc. 3.59 mi. Richmond-McKee Rd., Federal Aid Project 129-B, Madison Co.; and holding in abeyance grading, etc. 4.064 mi. Columbia-Greensburg Rd., Federal Aid Project 143-A, Adair Co. E. N. Todd, highway engr. Noted Feb. 18.

Kentucky — State Hy. Dept., Frankfort, takes bids probably in April, grading, etc. 11.5 mi. Hazard-Whitesburg Rd. Knott Co., 10 mi. Jackson-Hazard Rd. Breathitt Co., and 9.5 mi. Livermore-Beech Grover Rd., McLean Co.; grading and gravel surfacing 7 mi. Owensboro-Stanley-Ohio River Rd., Daviess Co.; surfacing 5 mi. Pacio-Pates-Ohio River Rd., Daviess Co.; reconstructing and surfacing 11.75 mi. Danville-Liberty Rd., Lincoln Co., and 11.5 mi. Maynesville-Germantown Rd., Mason Co., all 24-28 ft. wide. E. N. Todd, highway engr.

See proposal advertisements on page 132, Advertising Section.

Two-Sided Value

FIRST a generation of trouble-free service from one surface, then lifting and replacing *"bottom-side up"* on a renewed base, and fifteen to twenty-five years more resistance to traffic —*that's* just one of the reasons why vitrified brick asphalt-filled, makes the most economical pavement a community can select.

For facts and figures taken from official public records proving this remarkable salvage value of the vitrified brick pavement, write for free book *"TWO-SIDED VALUE."* Your copy will be gladly forwarded by return mail.

Pave with VITRIFIED **Brick** PAVEMENTS

HANDY-ANDY

THE BIG LITTLE *PULLER* FOR CONTRACTORS

Truck mired? Just unship HANDY ANDY, rig it up, run a 7/8-in. wire cable to the truck and ONE MAN will move it!

HANDY ANDY should be part of the equipment of every motor truck you operate. For this compact, husky, all steel PULLER will not only keep your truck in service, but can be used for 1000 and 1 other odd jobs. It will work in the closest quarters.

It's built for you contractors—not just "adapted." It's made in hand or tractor-operated types, and it has the Waldron reputation squarely behind it.

Details? Write us and we'll tell you ALL about HANDY ANDY by return mail.

Manufactured by the

JOHN WALDRON CORPORATION
NEW BRUNSWICK, N. J.

CONSTRUCTION NEWS

Engineering News-Record, Mar. 4, 1926

Some of the Week's Large Projects

AMONG the announcements for the current week of proposals, bids desired, and contracts awarded, are the following big jobs:

Proposed Work

Water and power development, Niagara Falls, N. Y., Lower Niagara River Power and Water Supply Co. plans power and water development, $35,000,000.

Office, New York, N. Y., New York Central Railroad Co. having plans prepared, $16,000,000.

Power plant, St. Louis, Mo., Union Electric Light & Power Co., plans to expend $11,000,000 in construction.

Y. M. C. A. Cleveland, O., Y. M. C. A. having surveys made, $4,000,000.

Railroad, Illinois, Pennsylvania R.R. Co., plans 10.3-mi. double track, $4,000,000.

High school, Louisville, Ky., Bd. Educ. plans high schools, $3,500,000.

Cement plant, Davenport, Iowa, Dewey Portland Cement Co., having plans prepared, $3,000,000.

Hotel and restaurant, Atlantic City, N. J., Childs Co., having plans prepared, $2,500,000.

Paving, Texas, Beaumont-Jefferson Co., plan bond election for paving 90-mi., $2,500,000.

Parkway, New York, Westchester Park Comn. plans extended Bronx River Parkway, $2,000,000.

Cement plant, Seattle, Wash., Washington Portland Cement Co., plans plant, $2,000,000.

Factory, St. Louis, Mo., Koken Co., plans factory, $2,000,000.

Roadwork, Clinton, Iowa, Clinton Co., plans 33-mi. road work, $1,500,000.

Sea Wall, Gulfport, Miss., Harrison Co., plans bond election, $1,400,000.

Bids Wanted On Big Jobs

Drainage, Baltimore, Md., Pub. Impvt. Comn. soon takes bids, $7,500,000.

High school, Chicago, Ill., Mar. 16. Bd. Educ. $4,000,000.

Hotel, Chicago, Ill., Kissman & Hirschfeld, archts. takes bids in March, $3,000,000.

Dredging, Galveston, Tex., U. S. Engineers Office takes bids about June 1, $3,000,000.

Piers, Poughkeepsie, N. Y., Mar. 30, State Dept. Pub. Wks., $2,145,535.

Dock, Superior, Wis., Mar. 12, Great Northern R.R. Co., St. Paul, Minn., $1,000,000.

Large Contracts Let During Week

Office, New York, N. Y., M. Natanson to G. Richard Davis, $6,000,000.

Subway, New York, N. Y., Bd. Transportation to La Rocca Constr. Co., $4,680,064.

Theatre, store, apartment, Waukegan, Wis., W. G. Burnett to J. J. Redding & Co., $1,200,000.

Theatre, Omaha, Neb., A. H. Blank Theatre Co. to Seldon-Breck Co., $1,000,000.

Warehouse, Houston, Tex., Southern Pacific R.R. Co. to Dwight P. Robinson Co., $1,000,000.

Hotel, Denver, Colo., Points Hotel Co. to H. Stenmark, $1,000,000.

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Jointing Water Mains

Laying 20-in. c. i. water mains with LEADITE joints thru rough and mountainous country.

Whether you are building an entirely new system or making an extension, laying large or small mains, you will save time, money and labor by using LEADITE.

In making a LEADITE joint NO CAULKING is necessary. Just yarn the joint and pour it full of molten LEADITE; it is an easy and quick operation.

LEADITE allows you to lay more pipe per day. This means getting water into the line without delay.

The quicker you get water to the consumer, the sooner the line produces revenue.

LEADITE makes the work easier on the men by eliminating much of the drudgery of pipe laying. You know what this means in the cold of winter and the heat of summer, and in bad trenches.

The varied applicability of LEADITE makes it the ideal material for jointing cast iron B. & S. water mains.

You will use LEADITE sooner or later as its advantages cannot help but appeal to you favorably.

Familiarize yourself with LEADITE now.

LEADITE does not corrode or rust.

Users know LEADITE makes a good joint.

LEADITE joints improve with age.

LEADITE has been successfully tested and used for over 30 years.

Thousands of miles of pipe jointed with LEADITE are in service.

The up-to-date water works man specifies and uses LEADITE.

LEADITE saves at least 75%

LEADITE is the pioneer self-caulking material for c. i. pipe

Be Sure It Is LEADITE and Accept No Imitations

THE LEADITE COMPANY, Inc.
1512 Land Title Building, Philadelphia, Pa., U. S. A.

Waterworks

PROPOSED WORK

Miss., Biloxi—See "Unclassified."

Miss., Okolona—Soon takes bids 100,000 gal. steel tank on 125 ft. steel tower. A. C. Rowe, city clk.

O., Columbus—Franklin Co. soon takes bids 20,760 ft. 6- to 16-in. c.i. mains in Clinton Twp., Impvt. Dist. 2, $54,000, and 11,820 ft. 6- to 12-in. c.i. mains in Franklin Twp., Impvt. Dist. 79, $28,000; 2,800 ft. 8 in. and 340 ft. 6 in. extension sewers, etc. in Clinton Twp. Impvt. Dist. 2, $4,700. E. G. Bradbury, 406 Court House Annex, co. engr.

Mich., Warren — Making plans waterworks, incl. mains, connections, and pumping equipment. $53,000. G. H. Ruhling & Co., 16549 Woodward Ave., Highland Park, engrs.

Ill., Collinsville—Defeated $40,000 bonds, waterworks improvements. Noted Jan. 7.

Ill., Grayslake—Village Clerk takes bids about Mar. 5, water and sewer extensions in various streets. $25,000. Marr, Green & Co., 400 North Michigan Ave., Chicago, engrs.

Ill., Wilsonville (R. Sta. Dorchester) — Making preliminary plans waterworks and distribution system, incl. several miles 4- to 8-in. c.i. mains, etc. $50,000. W. A. Fuller Co., 1917 Ry. Exch. Bldg., St. Louis, Mo., engrs.

Wis., Whitefish Bay—W. Volkman, village clk., making plans extending 6.5 mi. c.i. mains in various streets. T. F. Buckley, Village Hall, engr.

Ia., Dubuque—Plans 500,000 gal. rein.-con. circular reservoir, 85 ft. diam., 12 ft. deep, with rein.-con. slab cover, also 42 x 140 ft. rein.-con. slab cover for present reservoir. Engineer not selected.

Nebraska—Omaha Metropolitan Utilities Dist. plans approximately 10 mi. mains between Omaha and Ft. Crook. $50,000-$75,000. T. A. Liesen, City Hall, Omaha, engr.

Neb., Beatrice — Election soon $25,000 bonds, 2 m.g. reservoir. C. E. Thornburg, Beatrice, engr.

Mo., Savannah—Election Mar. 9, $60,000 bonds, impounding reservoir and filtration plant, etc. J. M. Shikles & Co., 708 New York Life Bldg., Kansas City, engrs. Noted Oct. 29.

Mo., Webster Groves (Ind. br. St. Louis) —Election Mar. 16, $150,000 bonds, rein.-con. reservoir and extending mains in various streets.

Tex., Houston—Election soon $1,000,000 bonds improving water supply. J. C. McVea, city engr.

Tex., Nacogdoches—Voted $50,000 bonds, waterworks improvements. Address W. I. Baker, mayor. Noted Jan. 7.

Okla., Kaw City — Making preliminary plans waterworks extensions, incl. mains, pumping equipment, etc. $20,000. Grant, Fulton & Letton, 505 Bankers Life Bldg., Lincoln, Neb., engrs.

Wash., Bellingham — City Water Dept., J. B. McMillan, supt., plans mains in South Bellingham. $78,000.

Wash., Tacoma—City Water Dept., plans replacing 2,600 ft. wooden stave gravity pipe line from Green River with 52 and 54 in. steel pipe. $66,000. Noted July 30.

Calif., Beaumont — Beaumont Irrigation Dist., plans election $25,000 bonds, drilling wells, purchasing pumps and constructing pipe line. C. R. Sumner, H. W. Hellman Bldg., Los Angeles, engr.

Calif., Beverly Hills—Plans to purchase two multiplex type, electric, direct connected booster pumping units, complete with motors. B. J. Firminger, city clk.

Calif., Orange — Plans election $215,000 bonds, improving water system. J. B. Lippincott, Central Bldg., Los Angeles, consult. engr.

Calif., Redwood City—City plans to purchase 2,000 lin.ft. 6 in., and 6,000 lin.ft. 4 in. c.i. Class B water pipe, standard weight, bell and spigot, not less than 12 ft. lengths and not more than 16 ft. lengths, also four 6 in. and sixteen 4 in. c.i. tees. W. A. Price, city clk.

Calif., Rio Vista—Plans election $16,250 bonds, c.i. pipe system, and $13,500 bonds, to purchase new pump and gas engine.

Calif., Riverside — Making plans 42 in. reinforced pipe line, 12 m.g. reservoir, and 30 in. steel pipe line connecting reservoir to existing mains. $350,000 or more. A. P. Campbell, city engr. Noted Jan. 7.

Calif., Walnut Creek — Plans election $25,000 or more bonds, purchase privately owned water system, approximately $6,500, and balance, extensions and improvements.

Que., Quebec—Plans aqueduct extension. $90,000. W. D. Baillarge, Quebec, engr.

Que., Shawinigan Falls—Plans extending actual waterworks to Lee Hetres Ward. $38,000. J. H. Valiquet, Shawinigan Falls, engr.

Ont., Chatham—Plans replacing existing steam pumps used as stand by units with gasoline driven 3 stage centrifugal pumps. $10,000-$15,000. C. H. Fuller, City Hall, engr.

Ont., Grimsby — Town Waterworks Comn. plans new 1,000 x 1,500 ft. steel intake pipe with flexible joints. $15,000.

Ont., Hamilton—City Council plans replacing waterworks steam driven pumps with gasoline driven equipment. W. McFaul, City Hall, engr.

Ont., Owen Sound—Pub. Utilities Comn., C. Gordon, City Hall, plans waterworks chlorinating system. $5,000.

Ont., Toronto — Plans equipment at waterworks plant for removal chlorine taste from water supply. $32,262. R. C. Harris, City Hall, engr.

Ont., Toronto—Making plans 2,000 ft. 16 in. c.i. main connecting main on Macpherson Ave. with main on Wrentham Pl., $35,000; also 2,600 ft. 20 in. c.i. main connecting between mains on St. Clair Ave. and Cottingham Rd., $58,142. R. C. Harris, City Hall, engr.

Ont., Toronto—Scarborough Twp. soon takes bids 1,000 gal., 3 stage centrifugal pump with 100 hp. electric motor. $7,500. R. Harrison, 1361 Kingston Rd., engr.

Ont., Wallaceburg—Town Council, C. B. Jackson, clk., plans to purchase 100 waterworks meters. $1,500.

Ont., Windsor—City Waterworks Comn. plans steam driven emergency pump and enlarging pumping station. $25,000. M. E. Brian, City Hall, engr.

Sask., Saskatoon — Plans 2 oil driven pumps and generator in pumping station, also replacing present steam driven standby pumps in station. $40,000. G. D. Archibald, city engr.

BIDS DESIRED

N. Y., Brooklyn—Mar. 11, by Park Bd., Arsenal Bldg., Central Park, 5th Ave. and 46th St., New York City. F. P. Gallatin, pres., vitr. and c.i. drains at Atlantic Ocean Terminus of Ocean Parkway, here.

N. Y., Yonkers—Mar. 22, at office Westchester Co. Park Comn., 72 West Pondfield Rd., Bronxville, recirculating, filtering and sterilizing equipment plant in filter room in connection with outdoor swimming pool, Tibbetts Park, here, Contr. 79. J. Downer, ch. engr.; adv. E. N.-R. Mar. 4. Noted Feb. 11 under "Unclassified."

Pa., Mount Union — Mar. 10, by C. R. Gracey, secy. Boro Council, Municipal Hall, 4,500 ft. 12 in. c.i. pipe in Singers Gap to proposed storage reservoir. D. W. Dillman, Altoona Trust Bldg., Altoona, engr.

D. C., Wash.—Mar. 26, at office Washington Suburban Sanitary Comn., Evans Bldg., New York Ave. N. W., watermains and sewers, Contrs. 58- W & S 59-W & S. R. B. Morse, Hyattsville, Md., ch. engr. of dist.; adv. E. N.-R. Mar. 4.

N. C., Kinston — Mar. 10, by Executive Com. Caswell Training School, alterations and additions to boys dormitory, incl. pump house, reservoir, water system, 2 centrifugal pumps, 1 fire pump of 1,000 gal capacity per minute, etc. Benton & Benton, Wilson, archts.

Fla., White Springs—Mar. 8, by Town Bd. Bond Trustees, improving waterworks and sewerage systems, etc. Main Eng. Co.,

See proposal advertisements on page 151, Advertising Section.

Better Concrete in 3 Days

Engineering News-Record Editorial Explains High Early Strength Concrete

Concrete with a "3-day strength of over 2500 pounds has been attained," says *Engineering News-Record,* February 18, p. 266, in an editorial on the new methods for obtaining high early strength concrete as announced by the Universal Portland Cement Co. "And that strength," continues the editorial, "obviously is high enough to permit liberties of form removal and of use far beyond anything possible with concrete as ordinarily produced."

This quick-hardening, strong concrete is obtained in *3 days* with standard *Universal* cement, the same quality *Universal* as ordinarily used. Furthermore, by using these methods, you not only get strong concrete quickly, but in addition you get concrete that is much better and much stronger forever after.

Detailed information on this time-saving concrete made with standard *Universal* cement gladly furnished on request to

Universal Portland Cement Co.

Chicago Pittsburgh Minneapolis Duluth Cleveland New York

Concrete for Permanence

Waterworks (Continued)

112 Baker St., Daytona Beach, engrs.; adv. E. N.-R. Mar. 4.

Ill., Shreveport — See "Contracts Awarded."

Ill., Warsaw—Mar. 31, by E. Ziegler, city clk., waterworks improvements, incl. 250 g.p.m. rapid sand filter plant, with pumps, motors, etc., 2,500 ft. 4 and 8 in. c.i. pipe, 100,000 gal. tank on tower, etc. $30,000. E. Flad & Co., 1312 Chemical Bldg., St. Louis, Mo., engrs.

Iowa, Ohlowa—Mar. 12 (extended date), by J. P. Moor, city clk., waterworks, Sect. 1, 35,000 gal. or 50,000 gal. tank on 100 ft. tower to balcony, erected on foundation; Sect. 2, 11,016 ft. 4- to 8-in. Class "B" c.i. McVane precalked joint c.i. or DeLavaud Class "150" c.i. pipe; Sect. 3, 4,220 ft. 2 in. galvanized or c.i. pipe; Sect. 5, 8 or 10 in. well, approximately 200 ft. deep; Sect. 6, single or two stroke deep well pump, 45 g.p.m. at 30 crank r.p.m.; Sect. 7, one 7½ or 10 hp. 3 phase, 220 volt, 1,200 r.p.m. A.C. motor; Sect. 8, labor and material to lay pipe and set hydrants, valves, etc.; Sect. 9, labor and tools, pipe fittings and material, etc., to install pump and motor; Sect. 10, furnishing labor, tools, etc., for pump house. Noted Jan. 28.

Mont., Wolf Point — Mar. 22, by City, deep well turbine equipment; adv. E. N.-R. Mar. 4.

Mo., Marshfield—Mar. 9, by City Clerk, complete waterworks and distribution system. $55,000. Gantt-Baker Co., 1116 West Main St., Oklahoma City, Okla., engrs. Noted Feb. 4.

Mo., Maryville—See "Streets and Roads."

Tex., Abilene—Mar. 12, by City Comn., 500,000 gal. elevated water tank. O. K. Hobbs, city engr.; adv. E. N.-R. Mar. 4.

Tex., Amarillo—Mar. 9, by J. D. Bartlett, city mgr., Abilene, municipal water supply system, here, for City. $75,000.

Tex., Floresville — Taking bids waterworks improvements. $40,000. F. E. Hess, Floresville, engr.

Okla., Pond Creek—City in market 350 g.p.m. centrifugal pump direct connected to 100 hp. Marine type gasoline engine for waterworks plant. J. H. Asher, mayor.

Calif., Mount Shasta (mail Weed)—Mar. 12, by City Trustees, extending waterworks, 4,200 cu.yd. excav., 12,500 ft. 10 in. pipe with fittings, one 100,000 gal. or one 200,000 gal. tank, etc. Former bids rejected. H. B. Ream, city engr. Noted Jan. 23.

Calif., San Diego — Mar. 22, by A. H. Wright, city clk., 8 mi. mains from El Capitan dam site to Lakeside Twp., and 17 mi. mains from Lakeside Twp. to University Heights reservoir, 30 and 36 in. c.i. B. and S., 32 and 36 in. lock bar steel or 34 and 38 in. double and triple riveted steel pipe, etc. F. A. Rhodes, city engr. T. A. Mills, assistant engr.

Ont., Leamington—Mar. 6, by A. Hairsine, clk. Mersea Twp., 80 hp. Diesel engine on concrete foundation with standard equipment, at East Marsh Pumping station. $15,000-$20,000. J. J. Newman, Davis Blk., Windsor, engr.

Ont., Niagara Falls—Mar. 10, by B. Carr, engr., City Hall, 5 m.g. capacity electrically driven centrifugal pump, for Water Comrs.

BIDS RECEIVED

N. Y., Buffalo—Commissioner Pub. Wks., Feb. 18, from Mueller Co., Decatur, Ill., corporation cocks, $1,663; from R. E. Wood & Co., 400 Chestnut St., Phila., Pa., one hundred 5 ft. hydrants, $7,250; from Reading Steel Casting Co., Inc., c/o Amer. Chain Co., Inc., 929 Connecticut Ave., Bridgeport, Conn., two hundred seventy-seven 6- to 16-in. iron body, bronze mounted, heavy hub end, double gate valves, $9,484; from J. B. Clow & Sons, 201-299 North Talman Ave., Chicago, Ill., 6- to 26-in. c.i. pipe, $48.90 per ton, and 6- to 26-in. fittings, $95 per ton; from U. S. Cast Iron Pipe & Fdry. Co., 957 East Ferry St., 6- to 16-in. pipe at $48.50 per ton, 36 in. pipe $48 per ton, and special castings at $98 per ton. Noted Feb. 11.

O., Cincinnati—Director Pub. Serv., 1,253 tons c.i. pipe and 15 tons special castings for water distribution system in Duck Creek Rd., Burk and Bevis Aves., from U. S. Cast Iron Pipe Co., Addyston, $57,546. Engrs. est. $55,000.

CONTRACTS AWARDED

Mass., Wayland — Bd. Selectmen waterworks, to General Contg. Co., Bath, Me. Engrs. est. to exceed $15,000. Noted Jan. 28.

N. Y., Long Island City—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Ely Ave., Sunswick, 47th Sts., etc. also in 60th Ave., Dartmouth Sts., etc. 2nd Ward, to Norton & Rigney, 137th St., Richmond Hill, $6,666 and $4,944 respectively. Noted Feb. 25.

N. J., New Brunswick—City Comn., 7,000 lin.ft. 6- to 8-in. pipe, also fittings, to R. D. Wood Co., 400 Chestnut St., Phila., Pa., at $51 per ton and $0.065 per lb. respectively.

Md., Baltimore — Bd. Awards, c.i. pipe and fittings for Bureau Water Supply, to R. D. Wood & Co., 400 Chestnut St., Phila., Pa., $75,131. Noted Feb. 11.

Md., Baltimore—Mayor and City Council, electrical equipment for addition to Montebello filters, to H. E. Crook Co., 28 Light St., $32,671. Noted Feb. 25.

La., Morganza — Crude oil engine and pump, to Fairbanks-Morse Co., 608 Magazine St., New Orleans, $1,778; concrete machinery foundations, concrete reservoir, pumping station, pipe line, etc., to P. J. Montgomery, Kaplan, $4,610, 25,000 gal. tank on tower, to Chicago Bridge & Iron Co., 37 West Van Buren St., Chicago, Ill., $2,785; 1,000-1,200 ft. deep well, to Gray Artesian Well Co., Pensacola, Fla., at $3.50 per ft.; 2,680 ft. 4 in. c.i. pipe and 6,600 ft. 2 in. steel pipe, etc., to Dixie Mill & Supply Co., 901 Tchoupatoulas St., New Orleans, $3,091.

La., Shreveport — Kansas City Southern R.R., Kansas City, Mo., will build water pumping station, incl. approximately 9,000 lin.ft. pipe, etc., here, by day labor. $27,000. A. W. Reece, Kansas City, Mo., ch. engr.

Tenn., Knoxville—City Council, to J. M. Dunn & Son, Bway. and Depot Sts., waterworks improvements, Sects. A, B, C and D, $585,000; to Burford, Hall & Smith, Atlanta, Ga., Sect. G $126,007, Sect. H $35,416, Sect. I $4,337, Sect. J $13,650, Sect. K $3,411, Sect. L $4,885, Sect. M $5,049; to M. P. Baird & Co., Phila., Pa., Sect., Q $67,500; to Pittsburgh Des Moines Steel Co., Curry Bldg., Pittsburgh, Pa., Sect. R $3,388; to Ludlow Valve Mfg. Co., foot of Adams St., Troy, N. Y. and Michigan Valve Mfg. Co., Detroit, Mich., Sect. S, $25,405; to U. S. Cast Iron Pipe & Fdry. Co., Burlington, N. J., Sect. T, $67,388; to Simplex Valve & Meter Co., 722 Race St., Phila., Pa. Sect. U, $4,785; to Tennessee Armature & Motor Wks., 211 West Cumberland Ave., Sect. V, $3,675; to Warner Serv. Co., Knoxville, Sect. W, $5,175. Grand total $955,071. Noted Jan. 21.

O., Cincinnati—For 16- to 36-in. vertical and horizontal by-pass valves to water distribution system, to Michigan Valve & Fdry. Co., 3631 Parkinson St., Detroit, Mich., $12,235; 1,310 tons 6- to 36-in. c.i. pipe for mains in Central Parkway from 8th and Eggleston Sts. to Findlay St., to U. S. Cast Iron Pipe Co., Addyston, $67,211. Noted Feb. 18.

O., Cincinnati — Comrs. Hamilton Co., Water Supply Line 7, Dist. 1 (Silverton-Contr. 1), 3,400 ft. 16 in. c.i. pipe, etc., to Crumley, Jones & Crumley Co., 906 Main St., $26,206. Engrs. est. $24,000. Noted Jan. 21.

Wis., Racine — Bd. Water Comrs., City Hall, general construction filtration plant, to Peterson-Colwell Co., Inc., 646 Builders Exch., Minneapolis, Minn., $177,681; venturi meters, to Simplex Valve & Meter Co., 30 North Michigan Blvd., Chicago, Ill., $1,425; c.i. pipe, to Lynchburg Fdry. Co., 122 South Michigan Ave., Chicago, Ill., $9,884; wash water tank, to Grover Corp., 28 East Jackson Blvd., Chicago, Ill., $4,635; and wash water pumps, to Amer. Well Wks., 38 South Dearborn St., Chicago, Ill., $742. Grand total $194,367. Noted Feb. 11.

Wis., Wauwatosa—Bd. Pub. Wks., A. V. Brigham, secy., to Layne-Bowler Wisconsin Co., 425 East Water St., Milwaukee, boring artesian well 1,000 ft. to 1,700 ft. more or less in depth, 24 in. casing at $25 per ft., 18 in. $13, 12 in. $8, remaining depth $6 per ft., installing 24 in. casing $9 per ft., 18 in. $14, and 12 in. $7. Noted Feb. 4.

Mo., St. Louis—G. J. Dietz, supply comr., to U. S. Cast Iron Pipe & Fdry. Co., Bessemer, Ala., 1,260 ton 20 in. and 800 tons 36 in. pipe at $45.40 per ton f.o.b. St. Louis, total $93,524; and to Natl. Cast Iron Pipe Co., 2700 North 25th St., Birmingham, Ala., 30 tons 3 in. c.i. pipe $56.50, 50 tons 4 in. $50, 576 tons 6 in. $46, 20 tons 8 in. $46, and 440 tons 12 in. $46, total $56,390. Noted Feb. 18.

Mo., St. Louis—For 20 unit 80 m.g.d. capacity filtration plant, to McCormack Combs Constr. Co., 318 North 8th St., $715,903. Noted Dec. 24.

Tex., Port Arthur — City Comrs., City Hall, pumps for purification plant, to Dayton-Dowd Co., Quincy, Ill.; motors, to General Electric Co., River Rd., Schenectady, N. Y.; filters, to Roberts Filter Mfg. Co., Darby, Pa. Engrs. total $80,000. Noted Dec. 31.

Colo., Ft. Collins — E. A. Lawber, city engr. and W. Keirsted, consult. engr., 11,656 ft. trench and water mains, to Lock Joint Pipe Co., 1716 California St., Denver, $83,678.

Ont., Belle River—Village, general contract excavation and laying 1,650 ft. 16 in. steel mains in various streets, to S. S. Carnahan, Amherstburg; pipe and flexible joints, to J. Ingles Co., Strachan Ave., Toronto. Engrs. est. $15,000. Noted Aug. 27.

Sewers

PROPOSED WORK

Md., Baltimore—Pub. Impvt. Comn. soon takes bids Gwynns Run Diversion Drain, 4,800 lin.ft. 12½ ft. x 11½ ft., concrete and brick, horseshoe shaped. $7,500,000. M. J. Ruark, City Hall Annex, sewerage engr.

D. C., Wash.—See "Waterworks."

Miss., Biloxi—See "Unclassified."

O., Akron—W. F. Peters, dir. Pub. Wks., soon takes bids 3,755 ft. 8- to 30-in. vitr. sewers in Riverside Dr. et al. $27,300, and 6,600 ft. in Glenwood Ave. et al. $35,900; 4,700 ft. 8- to 36-in. in Diagonal Rd. et al. $38,800; also 1,700 ft. 24 in. in Hawkins Ave. 5, $28,900. J. E. Root, Municipal Bldg., engr.

O., Columbus—See "Waterworks."

O., Hamilton—Making plans 2½ mi. 36 in. storm sewer in Ross Ave. from Lawn Ave. to Miami River, known as Ross Ave. Relief Sewerage System. $85,000. W. Willard, City Hall, engr.

Mich., Flint — Plans storm sewers in various streets, $128,850; also sanitary and intercepting sewers, $136,220. H. C. McClure, engr.

Wis., Madison—W. Winckler, city clk., making plans 6- to 16-in. sewer in Linden Hill Sewer Dist. $25,000. Engineer not selected.

Wis., Whitefish Bay — W. Volkmann, village clk., made plans 5 mi. sanitary and 1.5 mi. storm sewers in various streets. T. F. Buckley, village engr.

Ia., Hastings — Plans election $140,000 bonds, sewerage system. Engineer not selected.

Ia., Oelwein — City Clerk takes bids about Mar. 15, 90 x 170 ft., trickle beds for sewage disposal plant, $55,000-$60,000. J. A. Dunkle, Webster City, engr. Noted Dec. 31.

Mo., Excelsior Springs — Election in spring $35,000 bonds, sewage disposal plant, etc. Noted Sept. 10.

Ark., Conway—Making preliminary plans disposal plant and sewer extensions in annex to Sewer Dist. 1. Parkes Eng. Co., Citizens Bank Bldg., Pine Bluff, engrs.

Calif., Gilroy—Made plans 11,100 ft. 8- to 12-in. vitr. sewer, etc., in various streets. C. E. Sloan, Santa Fe Bldg., San Francisco, engr.

Calif., Palo Alto—Made plans improving Cowper St., Santa Ynez, California and Nevada Aves., etc., 3,420 lin.ft. vitr. sanitary sewer, 1,780 lin.ft. 12 in. concrete storm drains, 2,695 ft. 4 and 6 in. c.i. water pipe, etc. J. F. Byxbee, Jr., city engr.

Calif., San Fernando—Made plans sewers in Sanitary Dist. 1, 56,151 lin. ft. 8- to 18-in. vitr. or cement pipe, 120 ft. 8- to 16-in. c.i. pipe, etc., to exceed $80,000; also sewers in Sanitary Sewer Dist. 2, $60,000 or more. Black & Veatch, Ferguson Bldg., Los Angeles, engrs. Noted Feb. 25.

Calif., Whittier — See "Streets and Roads."

Ont., New Liskeard—Town plans 2 sewage pumps, electrically operated in connection with sewage disposal works. $5,000. J. I. Dixon, town clk.

Ont., Startford — Plans North Shore Trunk Sewer, 3,500 ft. brick or concrete pipe. $40,000. A. B. Manson, City Hall, engr.

Ont., Toronto—East York Twp. making plans 1,260 ft. 12- to 18-in. vitr. tile sewers in Donlands Ave., $15,112; also 1,355 ft. 12 in. sewer in Doncaster Ave., $13,423. G. R. Jack, 443 Sammon Ave., Toronto, engr.

B. C., Burnaby—Making plans lateral sewers in various locations. $80,000. E. Smith, Edmonds, Burnaby, engrs.

BIDS DESIRED

N. Y., Buffalo—Mar. 12, by Commissioner Pub. Wks., 425 ft., 8½ x 8½ ft. rein.-con. overflow sewer on piles, in Bailey Ave. across old Buffalo River. $25,000. C. E. P. Babcock, Municipal Bldg., engr. Noted Feb. 25.

Pa., Phila.—Mar. 10, by Dept. Pub. INDUSTRIAL

SHOVEL CRANE DRAGLINE

A FIFTY-MAN-POWER

MASTERPIECE

THIS INDUSTRIAL crawling tractor crane, shovel and dragline is producing 50-man-power results in handling the heavy loads of industry. It is cutting deep into the high costs of manual material-handling and recovering a buried treasure of non-productive dollars. The type DC is a masterpiece of design and construction. Its outstanding superiority is guaranteed by America's pioneer crane builders. Over fifty years of untarnished business integrity and highly specialized skill and experience form its background.

This INDUSTRIAL has a greater field of usefulness in industry than any other material-handling equipment on the market today. With but one basic machine, it is a full-fledged locomotive crane, power shovel and dragline and vastly superior to any other equipment designed specifically for only one of these three services. The source of power is optional—it may be steam with a high-pressure boiler, gasoline with a powerful engine, electric from plug-in connection, full Diesel or semi-Diesel.

As a crane with clamshell bucket, lifting magnet, hook and block, wood grapple or pile driver leaders, this DC will supplant manual effort at tremendous savings. As a power shovel or dragline, it has no equal.

These three machines are offered for but little more than the price of any one of other make. Think of the vast saving in capital investment!

Write today for your copy of Book 120-A.

INDUSTRIAL WORKS
Bay City, Michigan

MAGNET GRAPPLE CLAMSHELL PILE DRIVER

Sewers (Continued)

sewers in Tacony Creek Park between Tacony Creek and Rising Sun Ave. and Rising Sun Ave. between Chew and Clarkson Aves., etc. G. H. Biles, dir.

D. C., Wash.—Mar. 12, at office Washington Suburban Sanitary Comn., Evans Bldg., New York Ave. N. W., c.i. manhole frames and covers, listed in Contr. 55. R. B. Morse, Hyattsville, Md., ch. engr.; adv. E. N.-R. Mar. 4.

N. C., Charlotte—Mar. 10, by Bd. City Comrs., sewers in various streets. E. Read, city clk.; adv. E. N.-R. Mar. 4.

Tenn., Johnson City — See "Streets and Roads."

Fla., White Springs—See "Waterworks."

O., Kent—Mar. 10, by Comrs. Portage Co. (Ravenna) sanitary sewer in Longemere St. west of here. $25,000.

Mich., Pontiac—Mar. 12, at office H. A. Maurer, city clk., City Hall, constructing N. W. Trunk Sanitary Sewer, etc., Contr. 3. J. R. Pollock, city engr.; adv. E. N.-R. Mar. 5.

Ill., Barrington — Mar. 16, by Village, Village Hall, disposal station, 12- to 60-in. vitr. tile and concrete sewers in various streets. $300,000. Suhr, Berryman & Peterson, 105 North Clark St., Chicago, engrs.

Ill., Chicago—Mar. 18, by E. Wallace, clk. Sanitary Dist. of Chicago 910 South Michigan Ave., Ninth Branch Sewage Pumping Station, Div. "AA," 3 synchronous motor driven centrifugal pumping units, each 75 cu.ft. per second capacity and 5 with 300 cu.ft. per second capacity and appurtenances complete f.o.b. as near station as possible; also North Side Sewage Treatment Works, Div. "S" Alternate A, four 500 hp. water tube boilers, complete with automatic traveling grate stokers, etc., Alternate B, four 500 hp. water tube boilers complete with mechanical oil burners, etc. at North Side Sewage Treatment Wks.

Wis., Cudahy—Mar. 6, by J. H. Fowles, secy. Metropolitan Sewerage Comn., 508 Market St., Milwaukee, Sect. 4 Cudahy Sewer, 4,910 ft. 36 in. concrete pipe, 7,315 ft. special section concrete sewer, 665 vertical ft. standard and 270 vertical ft. drop manholes, etc. T. C. Hatton, c/o owner, engr.

Wis., Milwaukee—Mar. 6, by Dept. Pub. Wks., R. E. Stoelting, comr., storm sewers in 26th St., 1,333 ft. 7 ft. 6 in. and 1,345 ft. 7 ft. monolithic sewer tunnel, 3 manholes approximately 121 ft. deep, 1 standard gauging chamber, etc. J. Schwada, City Hall, engr.

Ia., Audubon—Taking bids disposal plant, incl. filter and Imhoff tank, 12,000 ft. 18 in. outlet, etc. $60,000. W. E. Buell & Co., 206 Davidson Bldg., Sioux City, engr. Noted Feb. 4.

Minn., St. Paul—Mar. 9, by A. E. Eggert, city purch. agt., approximately 6,000 ft. 12- to 30-in. and 813 ft. 48 in. sewer, etc., for Maryland-Como Sewerage System, Contr. B. $50,000. G. M. Shepard, city engr.

S. D., Sioux Falls — Mar. 25, by City Commissioners, sewage treatment plant and appurtenances for Divs. A, B, C, D and E. A. A. Chenoweth, 226 Paulton Blk., consult. engr.; adv. E. N.-R. Mar. 4.

Mo., Kansas City—Mar. 24, by Bd. Pub. Wks., City Hall, Accessory Sewers 1 and 2 to Blue River Sewer, etc. Black & Veatch and E. M. Stayton, Mutual Bldg., consult. engrs.; adv. E. N.-R. Mar. 4. Noted Feb. 4.

BIDS RECEIVED

Pa., Phila.—Dept. Pub. Wks., Bureau of Engineering, Feb. 24, from A. Mattia, 310 North 65th St., branch sewers in Atlantic St. between Gaul and Belgrade Sts. $15,718, Erdrick St. between Napfle and Hartel Sts. $24,467, Pickwick St. between Salmon and Thompson Sts. $3,846; from Vattieri & Pontarelli, 523 Rising Sun Lane, Gaul St. between Tioga and Venango Sts. $15,954, Hartel and Meriden Sts. between Franklin and Erdrick Sts. $24,559, and Lycoming St. between M and N Sts. $26,259; from McIntyre Constr. Co., 6811 North Franklin St., Miller St. between Atlantic and Venango Sts. $16,517, Cottman St. between Rowland and Sackett Sts. $12,014, Lansing St. between Franklin and Walker Sts. $26,128, and 58th St. between Gibson and Elmwood Sts. $4,491; from J. Moss, 1652 Wakeling St., Cheltenham St. between Frontence and Loretto Sts. $4,773; from A. Bonitatibus, 300 West Mt. Pleasant Ave., Edgewood St. between Gibson and Eastwick Sts., $5,666; from A. Parna & Son, 752 South 10th St., 45th St. between Sansom and Walnut Sts. $3,170, and Theodore St. between 69th and 70th Sts., $5,830; from A. Di Sandro & Son, 3906 North 5th St., Markland St. between Hunting Park and Lycoming St., $8,999; from Pastore & Co., 5903 Woodland Ave., Millick St. between Gibson and Eastwick Sts., $6,228; from F. Buckins, 4050 Kensington Ave., N St. between Luzerne St. and Hunting Park, $24,895; from A. Frunzi, 536 High St., Silverwood St. between Fountain and Delarm Sts., $14,064; from De Mayo Bros., 817 South Hutchins St., Spangler St. between Allegheny and Clearfield Sts., $9,069; from P. Pinciatti, 4103 Roosevelt Blvd., Vankirk St. between Loretto and Oxford Sts., $22,083; from O'Neill Co., 127 East Mermaid St., main sewer in Sanger St., $27,814; from C. G. Centrone, Bailey Bldg., Aramingo Ave., $39,989; and from Acchione & Caruso Paving Co., sewers and pumping station equipment for south of Pattison Ave. and west of Broad St. $66,262, also sewers and pumping station south of Packer and west of Broad Sts. $37,305. Noted Feb. 18.

O., Cleveland — Bd. Comrs. Cuyahoga Co. sewer in Snow Rd., from Gantose Constr. Co., Columbia Bldg., $49,739.

Wis., Milwaukee — J. H. Fowles, secy. Metropolitan Sewerage Comn., 508 Market St., Feb. 13, two 2,500 g.p.m. motor driven float controlled centrifugal pumps, for Mud Creek low level sewage booster station, Villard Ave., from Amer. Well Wks., 112 North Bway., Aurora, Ill., $8,570. Noted Feb. 4.

Calif., Glendale—City Council, Feb. 18, from A. G. Giebisch, Virgil Walk, Long Beach, sewer in Sewer Dist. 2, 8,281 ft. 10 in. vitr. pipe $1.95 per ft., 80 ft. 10 in. pipe encased $2.60, 58,840 ft. 8 in. vitr. pipe $1.60, 46 ft. 8 in. encased $2.10, etc. total approximately $165,605. Noted Jan. 21.

Calif., Los Angeles—For 10,024 ft. 6 in. rein.-con. and 10,125 ft. 8 in. vitr. clay sewer in June St., from M. Chutuk, 1506 Pleasant Ave., $23,237. Engrs. est. $25,535.

Calif., Oakland—From W. J. Tobin, 527 Santa Ray Ave., sewer in Webster St. between 12th and 20th Sts., 126 lin.ft. 24 in. vitr. pipe $4.40, 2,960 lin.ft. 18 in. $3.40, 799 lin.ft. 15 in. $2.74, 573 lin.ft. 12 in. $2.17, 628 lin.ft. 10 in. $1.73, 207 lin.ft. 10 in. vitr. pipe conduit $1.73, etc. Noted Feb. 4.

Calif., Richmond—A. C. Faris, city clk., 23,570 ft. 6- to 10-in. vitr. sewer, etc., in Costa, Rheem Sts., etc., and 30,159 ft. 6- to 10-in. vitr. sewer, etc., portions of Howard North Sts., etc., from L. L. Page, 728 Bissel Ave., $15,667 and $19,398 respectively. Noted Feb. 18.

CONTRACTS AWARDED

Ill., Niles Center—Village Clerk, Howard Ave. Sewer, vitr. tile and concrete pipe, etc., to N. Santucci, Oak Park, $701,953.

Ill., East St. Louis—See "Streets and Roads."

Wis., Wauwatosa—Bd. Pub. Wks., A. V. Brigham, secy., to A. H. Koch, 2917 Grand Ave., Milwaukee, 8 in. vitr. sewers in Albert St. $758, Aberdeen Court $1,064, and Pleasant St. $341, to Ribbens Bros., Mayville, Richmond Court $924, and Rogers Ave. $676; to Mierswa Constr. Co., 1619 Oregon St., Oshkosh, East North Ave. $325; to G. E. Zimmermann, 3402 Grand Ave., Milwaukee, East North Ave. $21,186. Grand total $25,274. Noted Feb. 4.

Wis., Milwaukee — Dept. Pub. Wks., monolithic concrete storm sewers in Sect. 4, to Wenzel & Henoch Constr. Co., 498 27th St., $204,582; Sect. 5, to J. Brogan & Sons, 211 Grand Ave., $102,786; Sect. 6, to M. Synovitz, 944 2nd Ave., $138,217; Lake St., to Mierswa Constr. Co., 1619 Oregon St., Oshkosh, $6,438; also St. Paul and 22nd Sts., to P. & L. Co., Edgewater Ave., $11,844 and $1,241 respectively. Grand total $465,008. Noted Feb. 25.

Ark., Little Rock — See "Streets and Roads."

Calif., Los Angeles—Constructing Sect. 2 Arroyo de la Sacatella storm drainage system, to W. F. Peck, Hollywood Security Bldg., $764,765. Noted Feb. 18.

Calif., Los Angeles—Sewer in Milton Ave. between Melrose and 3rd Sts., to M. J. Simonovich, 727 Alpine St., $74,061, engrs. est. $75,621; also Burnside Ave., to J. Chutuk, 343 Wilcox Bldg., $26,681, engrs. est. $27,124. Noted Feb. 25.

Waste Disposal

PROPOSED WORK

Ont., Walkerville—Bd. Pub. Wks., A. J. Stephens, chn., plans concrete and brick garbage incinerator with furnaces, etc. $25,000-$40,000. Noted Jan. 28 under "Streets and Roads."

BIDS DESIRED

Calif., Long Beach—C. D. Windham, city engr., taking bids incinerator. $75,000 or more. R. D. Van Alstine, city engr.

Bridges

PROPOSED WORK

North Carolina—State Hy. Dept., Raleigh, plans rein.-con. bridges and culverts on Project 398, Robeson Co. $32,000, Project 591, Rockingham Co. $45,000, and Project 6690, Rowan Co. $42,000. C. M. Upham, Raleigh, engr.

North Carolina — State Hy. Dept., Raleigh, rejected bids Feb. 8, rein.-con. bridge on Project 303, Bladen Co. $27,700. Will readvertise. Noted Feb. 11.

Ga., Wrightsville — See "Streets and Roads."

Miss., Biloxi—See "Unclassified."

Mich., Flint — Plans bridge over Flint River connecting Harrison and Clifford Sts. with 2nd Ave. and Payne St. $125,000. H. C. McClure, city engr.

Ill., Mount Carmel — State Dept. Pub. Wks. & Buildings, Div. Highways, Springfield, plans rein.-con. bridge across Wabash River, Wabash Co., here. F. T. Sheets, ch. engr.

Ia., Toledo—See "Streets and Roads."

Minnesota and Wisconsin—R. C. Buck, Inc., engrs., 15-16 U. S. Natl. Bank Bldg., Superior, Wis., making plans and take bids about Apr. 1, 3,600 ft. steel bascule bridge, incl. 2 spans opening upward at center, 30 ft. approach at each end, etc., over St. Louis River, connecting Duluth, Minn., and Superior, Wis., for Arrowhead Bridge Co., 522 Lyceum Bldg., Duluth, Minn. $500,000.

Minn., Duluth — Duluth, Missabe & Northern R.R., W. H. Hoyt, Duluth, ch. engr. and Duluth & Northern Pacific R.R. Co., St. Paul, H. E. Stevens, ch. engr., plan 4 concrete bridges on Beck's Road Blvd. connection. $45,000.

Missouri — State Hy. Dept., Jefferson City, making plans three 80 ft. steel truss spans, etc., on road from Lamar west, Barton Co.; two 10 ft. and two 12 ft. rein.-con. slab spans, etc., over stream, one 20 ft. rein.-con. slab span, etc., over south fork Deer Creek, one 30 ft. rein.-con. deck girder span, etc., over north fork Deer Creek, one 40 ft. rein.-con. deck girder span, etc., over Mackafish Branch, also one 60 ft. steel truss and two 30 ft. rein.-con. deck girder spans, etc., over Marmon Fork, all foregoing in Bates Co.; two 12 ft. and one 24 ft. rein.-con. slab span, etc., over McKinney Branch, one 20 ft. rein.-con. slab span, etc., over Smith Branch, three 20 ft. rein.-con. slab and one 45 ft. rein.-con. deck girder spans, etc., over Richland Creek, all in Callaway Co.; three 24 ft. rein.-con. slab spans, etc., over Green Valley, four 40 ft. rein.-con. and one 140 ft. steel truss spans, etc., over James River, Christian Co.; two 80 ft. steel truss and two 30 ft. rein.-con. deck girder spans, etc., over Petite Saline, Cooper Co.; two 45 ft. rein.-con. deck girder spans, etc., over Wild Cat Creek, Douglas Co.; three 100 ft. rein.-con. open spandrel spans, etc., over Sac River, Greene Co.; two 10 ft. rein.-con. slab, etc., over Kaolin Branch, Iron Co.; four 12 ft. rein.-con. slab, one 40 ft. and one 45 ft. rein.-con. deck girder spans, etc., over Heart Grove Creek, and two 12 ft., rein.-con. slab spans, etc., over Mouse Creek, all foregoing in Jackson Co.; one 80 ft. steel truss and two 35 ft. I-beam spans, etc., over Blackwater River, also one 80 ft. steel truss and four 35 ft. I-beam spans, etc., over Blackwater D. D., all in Johnson Co.; one 40 ft. rein.-con. deck girder and two 20 ft. rein.-con. slab spans, etc., over stream, Lewis Co.; four 22 ft. rein.-con. slab spans, etc., over Frederick Creek, Oregon Co.; two 12 ft. rein.-con. slab spans, etc., on Sta. 459 plus 12, two 30 ft. rein.-con. deck girder spans, etc., on Sta. 380 plus 90, and one 30 ft. rein.-con. deck girder span on Sta. 521 plus 27, all in Polk Co.; three 30 ft. rein.-con. deck girder spans, etc., over Beeler Creek, Texas Co.; and three 24 ft. rein.-con. slab spans, etc., over Willow Branch, Vernon Co. B. H. Piepmeier, ch. engr.

Mo., Carthage—City and State Hy. Dept., Jefferson City, making preliminary plans rein.-con. viaduct to carry State Highway over railroad tracks. $225,000. City, state and railroads appropriate toward cost. This corrects report in Feb. 18 issue under "Joplin, Mo."

Mo., Springfield — Plans election soon, $390,000 bonds, rein.-con. viaduct, Grant Ave.; $310,000 bonds for Robberson St. viaduct, and $200,000 bonds Benton St. viaduct.

Ark., Cody (mail Hulbert) — Arkansas City and State Hy. Dept., Little Rock, making plans 167 ft. vertical lift span bridge, Crittenden Co., near here. To

See proposal advertisements on page 151, Advertising Section.

The only reason that

there are not more miles of improved roads at your service, is the brutally excessive annual cost of maintaining and repairing inferior pavements already laid.

Keeping old roads open is the leak through which your tax-dollars are pouring.

Those communities in which vitrified brick pavements were laid 20, 25, 30 and 35 years ago are the fortunate ones. Many of those streets and roads have not yet cost the tax-payers a dollar in repairs. In numbers of instances those veteran brick pavements have outlasted two and three successive nearby pavements built of other materials.

Don't let this upkeep and maintenance leak continue into the future. Advocate to your neighbors, friends and business associates *vitrified brick*—the pavement that outlasts the bonds.

For facts and figures to support your arguments, let us send you official data and information collected from public records.

Thompson, Macon, Ga., $31,892, e. e. $32,532; 1,800 ft. bridge on Federal Aid Project 150, Tuscaloosa Co., to Peterson & Ernhart, Montgomery, $77,928, e. e. $101,209; 485 ft. bridge on Seale-Girard Rd., S. A. P. 50-B, Russell Co., to McCoy & Garrett, Lafayette, $31,193, e. e. $35,000. Grand total $195,644. Noted Feb. 25.

O., Dayton — G. F. Baker, dir. Pub. Serv., two 95 ft. span half through steel girder bridge encased in concrete, 24 ft. roadway, two 7 ft. sidewalks over Wolf Creek, at Williams St., to E. F. Smith, Summit St., $77,950. Noted Feb. 4.

Illinois—See "Streets and Roads."

Ia., Denison—Crawford Co., 140 ft. high truss bridge, 20 ft. with 40 ft. I-beam approach spans, etc., on Federal Aid Project 232-E, to Snyder & Johnson, Humboldt, $25,900. Noted Feb. 18.

Texas and Mexico—Eagle Pass & Piedras Negras Co., 1st Natl. Bank Bldg., Eagle Pass, twenty 25 ft. I-beam trestle, three 150 ft. and two 72 ft. riveted steel truss span bridge across Rio Grande River, between Eagle Pass, Tex., and Piedras Negras, Mexico, to Pioneer Constr. Co., 101 New York Life Bldg., Kansas City, Mo. $202,003.

Okla., Wetumka — Hughes Co., steel over Canadian River, 3 mi. from here, to Yeocum, Gaines & Mackey, Oklahoma City, $62,000; and steel bridge over Wewoka Creek, 4 mi. from here, to H. Cowens, Wetumka, $56,000.

Washington—State Hy. Dept., Olympia, replacing existing temporary structures with one 126 ft. steel, two 82 ft. and one 55 ft. concrete I-beam spans, etc., between Chehalis and Cowlitz, Chehalis, & Cascade R.R. tracks, on State Rd. 1, Lewis Co., to D. Nygren, 3216 Government Way, Seattle, $53,545. Noted Jan. 28.

Calif., Oakland — Alameda Co. reconstructing steel bridge over Estuary, on Webster St., here, to J. H. Tillman, 310 East Cabrillo St., Santa Barbara, $149,000. Noted Feb. 25.

Dams

PROPOSED WORK

Nev., Lovelock — Lovelock Water Users Assn., plans election $1,200,000 bonds, Oreana Dam 1 on Humboldt River earth fill type, 1,585 ft. long. 100 ft. high to irrigate more than 30,000 acres. King & Malone, Cheney Bldg., Reno, engrs. Noted Nov. 12.

Tex., La Grange — See "Excavation, Drainage, Irrigation, Levees, Dam, River and Harbor."

Railways

PROPOSED WORK

Illinois—Pennsylvania R.R. Co., Broad St. Sta., Phila., Pa., W. G. Coughlin, ch. engr., plans 10.3 mi. double track from Altamont to Brownstown, 12.7 mi. from Pierron to St. Jacobs and 22 mi. from Casey to Montrose, here. $4,000,000.

Nebraska—Chicago, Burlington & Quincy R.R. Co., A. W. Newton, ch. engr., 547 West Jackson Blvd., Chicago, Ill., making plans improving tracks, and roadbed, also enlarging roundhouse, in Omaha. $1,250,000.

Ontario—Windsor Hydro-Electric Railways, Windsor, plan double tracking Ouellette Ave. and Wyandotte St., etc., in Windsor. $1,000,000. A. Fairley, c/o owner, engr. Noted Dec. 17.

Ontario—Canadian Natl. R.R. Co., C. S. Gzowski, ch. engr., 231 St. James St., Montreal, Que., plans relaying approximately 50 mi. 100 or 110 lb. rails between Chatham and Windsor. $750,000.

Ontario—Hydro-Electric Power Comn. of Ontario, 190 University Ave., Toronto, plans constructing larger loops in downtown district of Windsor; also purchase 12 new electric street cars. $250,000. F. A. Gaby, c/o owner, engr.

CONTRACTS AWARDED

Massachusetts — Boston & Albany R.R., F. B. Freeman, ch. engr. North Sta., Boston, 4 mi. main track incl. 7 or 8 culverts, and 1 bridge, from Warren to West Warren, to New England Constr. Co., 274 Main St., Springfield. Engrs. est. $250,000.

Excavation, Drainage, Irrigation, Levees River and Harbor

PROPOSED WORK

Illinois—Dept. Purchases & Construction, State House, Springfield, rejected bids Jan. 5, Brandon Road Pool, incl. 202,000 cu.yd. excav., 150,000 yd. concrete and 2,000,000 lb. steel and iron, at Joliet. Work may be readvertised. Noted Jan. 14.

Wis., Milwaukee—See "Buildings—Commercial."

Tex., LaGrange — Colorado River Impvt. Assn., A. J. Ellers, pres. plans forming irrigation district embracing portions of Bastrop, Fayette, Colorado, and Wharton Counties, and constructing dam across Colorado River. $5,000,000-$10,000,000. Engineer selected soon.

Nev., Lovelock—See "Dams."

Calif., Whittier—See "Streets and Roads."

BIDS DESIRED

New Jersey—Mar. 16, by Morris Canal & Banking Co., Dover, reconstructing and dismantling Sects. 58-85 Morris Canal from Port Morris to Boonton, Morris Co. H. B. Kummel, State Office Bldg., Trenton, genl. engr.

N. J., Newark—Mar. 10, by Dept. Pub. Affairs, City Hall, T. L. Raymond, dir., 500,000 cu.yd. dredging and 30,000 cu.yd. rock removal, in City Channel, Port Newark Terminal; adv. E. N.-R. Mar. 4.

La., Hammond — Mar. 25, by Comrs. Tangipahoa D. D. 1, H. Carrol, secy., dredging 69 mi. canals and laterals, incl. 2,600,000 cu.yd. excav.; also 3 concrete and 33 timber bridges. E. G. Frieler, Hammond, engr.

La., Shreveport—Mar. 26, by State Bd. Engineers, New Courthouse, New Orleans, widening and deepening 15 mi. Kelly Bayou from Arkansas state line to Black Bayou; also for bank protection at White Hall plantation, for Caddo Levee Dist. $70,000.

Ind., Peru—Apr. 5, by Bd. Comrs. Peru Flood Control Dist., Cole Blk., concrete wall with sluiceways, gates, etc. L. E. Roberts, Old Post Office Bldg., ch. engr.; adv. E. N.-R. Mar. 4.

Wis., Milwaukee—Van Ryn & De Gelleke, archts., 114 Grand Ave., taking bids excavating for 2 story and basement, 60 x 110 ft., 65 x 250 ft., and 66 x 83 ft., brick and tile school, plain foundation, Hartford Ave., for Milwaukee University School, 560 Bway. $400,000.

CONTRACTS AWARDED

New Jersey — Hudson Co. (Jersey City) Mosquito Extermination Comn., Trust Co. of New Jersey Bldg., Bergen and Sip Aves., Jersey City, 75,000 ft. (more or less) drainage ditches, and clearing 150,000 ft. (more or less) old drainage ditches, on salt marsh meadows, Hudson Co., etc., to J. D. Manahan, 921 Bergen Ave., Jersey City.

Fla., St. Augustine — Bd. Trustees Reclamation of Marsh or Submerged Lands, 10,000 ft. rein.-con. bulkhead, to P. T. Cox Contg. Co., 154 Nassau St., New York City, N. Y., $250,000. Noted Jan. 28.

Fla., Tampa — Council, dredging deep water channel, to R. A. Perry, Tampa, $799,990.

Ala., Mobile — Mobile Bay Bridge Co., Meaher Bldg., dredging, fills and riprap on Mobile-Baldwin Co. bridge, to J. Jacobson, Galveston, Tex., $403,500. Engrs. est. $410,000. Noted Jan. 21.

Streets and Roads

PROPOSED WORK

Conn., Hartford — Plans widening, etc., Windsor Ave., from Capen to Main Sts., $150,000; also improving 8 to 10 mi. New Britain Ave. from Connecticut Blvd., Elm, Holcomb, Hudson, State and Franklin Sts. $375,000. R. N. Clark, city engr.

New York — Westchester Co. Park Comn., 72 West Pondfield Rd., Bronxville, plans extending Bronx River Parkway, from Kensico Dam through Valhalla to Mt. Kisco, and to Peeskill and Bear Mountain Bridge Route. $2,000,000. J. Downer, c/o owner, ch. engr.

Quarrying Curbstone

Wedges in place ready to split

The Split

On the way to the cities

For curbing— "granite lives forever"

No curbing material is as strong and everlasting, unchangingly durable as massive, even-textured, natural *granite*. It is not expensive. Its widespread distribution makes it the lowest cost curbing material available. And it lasts for generations — its first cost is *final*. It is not chipped or broken. *It lives forever,* enhancing the appearance of both sidewalk and roadway. Write your nearest granite quarry—you will be promptly supplied with data on the various styles and qualities of granite for curbing, insuring the maximum of durability with the minimum outlay.

The Most Economical Curb

The most economical curb is one whose depth is three times its width.

Best modern practice demands that (1) the head of the curb be either pointed or pean-hammered, and that (2) the face and back of the curb be quarry-split.

Booklet "Granite Street Construction" will be sent on request.

The Granite Paving Block Mfgrs. Assoc. of the U.S. Inc.

Streets and Roads (Continued)

New Jersey—State Hy. Dept., Trenton, plans concrete paving approximately 1 mi. Stuyvesant Ave. from Whittlesey Rd. to State Hospital, $70,000. W. G. Sloan, Trenton, highway engr.

N. J., Bradley Beach—Plans curbing, constructing bulkhead and graveling Bradley Blvd. from Main St. to Ocean Ave. $70,000. N. Rogers, Asbury Park, engr.

N. J., Bridgeton—Cumberand Co. plans concrete paving 6 mi. Bridgeton-Port Norris Rd. $265,000. W. M. Sharp, Bridgeton, engr.

N. J., Camden—State Hy. Comn., Trenton, plans constructing 4 mi. Crescent Route, approach to new river bridge, here, Camden Co. W. G. Sloan, Trenton, highway engr.

N. J., Red Bank—Monmouth Co. (Freehold), plans paving 3½ mi. Red Bank-Homedell Rd., here. $150,000. G. K. Allen, 60 Broad St., Red Bank, engr.

Pa., Pittsburgh—Soon takes bids grading, curbing and paving Hodgkiss St. between Stayton and Superior Aves., $39,000, and Bensonia Ave. between Shiras St. and Mackinaw Ave., 33 ft. $30,000. City Dept. of Pub. Wks., City County Bldg., engrs.

W. Va., Williamson—City and Mingo Co. soon take bids paving 1 mi. or more various streets. $40,000. P. M. Burton, Williamson, co. engr.

North Carolina—State Hy. Dept., Raleigh, plans clearing, grading and topsoiling 7.595 mi. Project 574, Moore Co., $38,000; grading and concrete or asphalt paving 2.86 mi. Project 9060, Buncombe Co. $86,000, 7.881 mi. Project 112, Camden Co. $236,000, and 6.041 mi. Project 6690 $180,000; clearing and grading 13.361 mi. Project 685, Stanly Co. $67,000, 11.11 mi. Project 591, Rockingham Co. $51,000, 11.509 mi. Project 480, Wake Co. $65,000, 10.505 mi. Project 398, Robeson Co. $65,000, 11.553 mi. Project 244, Jones Co. $80,000, and 8.34 mi. Project 135, Halifax Co. $45,000. C. M. Upham, Raleigh, engr.

North Carolina — State Hy. Dept., Raleigh, plans clearing, grubbing and grading 20 mi. Project 270 from Sampson Co. from Cumberland Co. line to Clinton. $140,000. C. M. Upham, Raleigh, engr.

North Carolina — State Hy. Dept., Raleigh, rejected bids Feb. 8, clearing, grading and topsoiling 12 mi. Project 303, Bladen Co. $75,000. C. M. Upham, Raleigh, engr. Noted Feb. 18.

Ga., Jasper—Pickens Co. voted $100,000 bonds, constructing roads.

Ga., Toccoa—Stephens Co. election soon $200,000 bonds constructing roads.

Ga., Wrightsville — Johnson Co. voted $200,000 bonds, constructing roads and bridges.

Miss., Biloxi—See "Unclassified."

Miss., Gulfport — Harrison Co. making preliminary plans Warrenite, etc., paving Beach Highway and Porter Ave. Election soon $175,000 bonds for same. W. S. Hawkins, co. engr.

Miss., Ripley — Tippah Co. voted $100,000 bonds, improving roads in Dist. 1; and $150,000 bonds, roads in Dist. 2. Noted Jan. 14.

Louisiana—State Hy. Dept., Baton Rouge, soon takes bids graveling 22 mi. highway from Lake Providence to Jackson Ferry Bridge across Bayou Macon, State Project 45, East Carroll Parish. W. B. Robert, Reymond Bldg., Baton Rouge, engr.

Tennessee—State Dept. Highways & Pub. Wks., Nashville, making surveys improving 15 mi. Ripley-Haywood Co. line Rd., Lauderdale Co., and 7 mi. Mosheim-Hawkins Co. line Rd., Greene Co. C. N. Bass, acting comr.

Tenn., Clarksville — Plans improving 2 mi. various streets. $25,000.

Tenn., Dyer — Plans probably concrete paving various streets. To exceed $25,000. L. E. Elkins, mayor.

Tenn., Madisonville — Monroe Co. plans improving 10 mi. Tellico Plains-Coker Creek Rd. $25,000.

Tenn., Ripley—Plans probably concrete paving various streets. To exceed $25,000.

Ky., Paducah—McCracken Co. election Apr. 17, $500,000 bonds, improving various roads. H. L. Meyers, genl. chn.

O., Akron—W. F. Peters, dir. Pub. Serv., soon takes bids grading, cindering and walks, etc. on 55,000 sq.ft. Stanton Ave. et al., $23,500; also 8,000 sq.ft. Sheck St., $6,600. E. A. Kemmler, Municipal Bldg., engr.

O., Canton—Stark Co. plans grading and gravel widening Brester-Canal Fulton Rd. $52,000. A. M. Wise, Canton, engr.

O., Chesepeake—City Council soon takes bids widening and paving 3rd Ave. $47,000. J. J. Paull, mayor.

O., Cleveland—Plans grading and paving with (a) brick (b) asphalt (c) concrete, etc., 514 ft. Spring St. from Grant Ave. to Cleveland Ave., 46 ft., (a) $6,243 (b) $5,585; 612 ft. Olive St. from Westmoor Ave. to Brinker Ave., 24 ft., (a) $10,518 (b) $7,874; 20,079 ft. Columbian Ave. from Sullivant Ave. to Mound St., 26 ft., (a) $48,930 (b) $38,932; 638 ft. Palmetto Ave. from Westmoor to Brinker Aves., 24 ft., (a) $15,089 (b) $11,870; 322 ft. alley west Hawkes Ave. from State St. to alley north Town St., 16 ft., (a) $2,679 (c) $2,433; 740 ft. alley west Belvidere Ave. from 4th alley north Sullivant Ave. to 3rd alley north Sullivant Ave., 20 ft., (a) $6,824 (c) $6,100; 515 ft. alley west Avondale Ave. from State to Town Sts., 16 ft., (a) $3,628 (c) $3,240; 346 ft. alley north Bellows Ave. from Davis to Souder Aves., 16 ft., (a) $2,662 (c) $2,408; 1,131 ft. alley west 22nd St. from 1st alley north Long St. to 4th alley north Long St., 15 and 20 ft., (a) $7,939 (c) $6,991. R. H. Simpson, city engr.

O., Cincinnati — Plans grading, curbing, guttering and sheet asphalt paving 31,500 sq.yd. Central Parkway from Bway. to 12th St. (Sect. 1), $543,481; 36,000 sq.yd. Central Parkway from 12th St. to Mohawk (Sect. 2), $504,940; 12,500 sq.yd. Central Parkway from Brighton to Mohawk (Sect. 3), $200,976; and 60,000 sq.yd. Central Parkway from Brighton to Ludlow Ave. (Sect. 4), $1,714,643. F. Raschig, City Hall, engr.

O., Cincinnati—Hamilton Co. plans tar bound macadam paving 105,400 sq.yd. Section Rd. from Cincinnati-Dayton Rd. to Cincinnati-Zanesville Rd. $70,230. E. A. Gast, Court House, engr.

O., Dayton — Plans stone curbing, and brick on concrete paving 2,700 ft. Findlay St. from 3rd to Canal Sts., $50,000; also brick on present concrete repaving 2,000 ft. Forest St. from River Neal Sts., $20,000. J. F. Hale, city engr.

O., Marietta—Soon takes bids brick on 7 in. rein.-con., asphalt filter paving Putnam St. $91,015. F. H. Mautz, Marietta, engr. Noted Dec. 3.

Mich., Flint — Plans paving 28 streets, $349,920; and sidewalks on various streets, $50,000. H. C. McClure, city engr.

Mich., Holland—Plans paving 2 mi. various streets. $217,889. J. Zuidema, city engr.

Ill., East St. Louis — Soon takes bids grading, curbing and 8 in. concrete paving, etc., 6 blocks North 3rd, Illinois and St. Louis Aves. $69,400. W. McK. Brown, City Hall, engr.

Ill., Farmington—City and Farmington Twp. take bids in March, 18 car loads road oil on various streets and roads. F. Sutton, highway comr.

Ill., Geneseo — Takes bids in spring or early summer grading and rein.-con. paving 21,000 sq.yd. Main and Oakwood Sts. J. A. Bryan, City Hall, engr. Noted Dec. 10.

Ill., Knoxville — C. Wymon, highway comr., takes bids in May 4 or 5 car loads road oil on various streets in Knox Twp.

Ill., Mount Carmel—Making preliminary plans improving 38 mi. various roads, 38,000 cu.yd. gravel, etc. $107,000. D. A. McClung, supt. County Highway Dept.

Ill., Rockford — Plans grading, curbing and concrete paving 10 blocks West St., 30 ft. $57,880. B. C. Harvey, City Hall, engr.

Wis., Beaver Dam—W. A. Gergen, city clk., making preliminary plans concrete and various types paving approximately 10,000 sq.yd. York, East 3rd and Haskell Sts. To exceed $25,000. E. B. Parsons, 419 North Washington St., Watertown, engr.

Wis., Madison—W. R. Winckler, city clk., plans rein.-con. or asphalt paving Curtiss Pl., Washington, Thornton and Sherman Aves., Wirth, Delphion, Givinnett and Haven Courts, Regent, Knickerbocker, Bryon, Bashford, Oak, Garrison, Marquette, Union, Broom, Superior, Langdon, Lake, Doty, Garfield and Pond Sts. $394,000. Engineer not selected.

Wis., Tomahawk—H. G. Bell, city clk., plans rein.-con. paving, etc. 38,000 sq.yd. 4th St., Wisconsin and Tomahawk Aves. E. B. Parsons, 419 North Washington St., Watertown, engr.

Ia., Cedar Rapids—L. J. Storey, city clk., takes bids about Mar. 25, grading, curbing, guttering and concrete paving 6,472 cu.yd. Bowling St. Noted Dec. 3.

Ia., Clinton—Clinton Co. plans grading, bridging and concrete paving 33 mi. various roads, 18 ft., for period of 3 years. $1,500,000. E. Lorenzen, Clinton, co. engr.

Ia., Ottumwa—Wapello Co. election Mar. 16, $1,000,000 bonds, improving various sections Roads 8, 13 and 98. H. E. Hansell, Court House, engr.

Ia., Toledo — Tama Co. plans grading, bridging and gravel surfacing 150 mi. various roads, and paving 25 mi. primary system. $900,000. L. W. Croft, Toledo, co. engr.

Kan., Independence — Montgomery Co. making plans bituminous macadam surfacing 1.191 mi. Havana-Niotaze Rd., 18 ft. To exceed $25,000. H. K. Hibbard, Independence, engr.

Kan., Iola—Allen Co. plans grading and concrete surfacing, etc., 4.036 mi. Federal Aid Project 328-A, 18 ft. A. R. Stroup, Iola, co. engr.

Mo., Kansas City—Making plans 5,170 ft. concrete curbing, 1,250 sq.yd. bituminous macadam and 8,200 sq.yd. 7 in. concrete paving in front of Memorial Park. $32,000. P. McGeeharn, city engr.

Kan., Newton—Harvey Co. plans grading and concrete surfacing, etc., 4.053 mi. Federal Aid Project 329-A, 18 ft. A. Hay, Newton, co. engr.

Kan., Olathe—Johnson Co. making preliminary plans brick or concrete paving 5.157 mi. Midland Trail, 18 ft., Federal Aid Project 315-B. E. J. Terrill, Olathe, engr.

Neb., Holdrege — Making plans curbing and paving, etc. 7,400 yd. various streets. To exceed $25,000. Black & Veatch, 700 Mutual Bldg., Kansas City, Mo., engrs.

Neb., Omaha—Plans widening, grading, curbing, paving, etc. 20th St. between Howard and Farnam Sts. $200,000. J. Koutsky, city comm.

Mo., Platte City—Election Mar. 16, $26,000 bonds, asphalt on concrete paving approximately 23,000 sq.yd. various streets. W. B. Rollins & Co., 521 Ry. Exch. Bldg., Kansas City, engrs.

Mo., Webb City—Election Apr. 6, $40,000 bonds, amiesite paving various streets.

Tex., Abilene—Taylor Co. making plans grading, bridging and paving 32.71 mi. State Highway 30, through Taylor Co., 18 ft. $453,400. L. C. McCanlies, Abilene, engr.

Tex., Anderson — Grimes Co. making plans grading and bridging 10 mi. Navasota-Conroe Highway. $30,000. O. A. Seward, Jr., Navasota, engr.

Tex., Anson — Jones Co. making plans gravel surfacing 15.39 mi. Highway 18, $52,000; also 9.68 mi. Highway 30, $26,000. J. W. Puckett, Stamford, engr.

Tex., Beaumont—Jefferson Co. election soon $2,500,000 bonds, hard paving 90 mi. roads not improved. B. F. Shipley, Beaumont, engr.

Tex., Beeville—Making preliminary plans asphaltic paving 21 blocks St. Marys St. from Southern Pacific R.R. tracks to Courthouse and intersecting streets off Washington St. $35,000. Address Mayor.

Tex., Coleman — Coleman Co. making plans bituminous surfacing 61 mi. highways through county, 18 ft. $250,000. G. E. Franklin, Eastland, div. engr.

Tex., Denison—Election Apr. 6, $50,000 bonds paving various streets. C. E. Haydon, Denison, engr.

Tex., Dickens—Dickens Co. making plans grading, bridging and gravel surfacing 3.4 mi. Highway 18. $25,000. J. W. Alger, Dickens, engr.

Tex., Franklin—Robertson Co. making plans hardsurfacing 9 mi. Highway 6 between Calvert and Hearne. $200,000. L. A. Peterman, Hearne, engr.

Tex., Galveston — Galveston Co. plans rein.-con. paving 21 mi. Highway 6 between La Marque Crossing and League City, 18 ft. $400,000. C. C. Washington, Galveston, engr.

Tex., Groesbeck — Limestone Co. making plans grading, bridging and 9 in. waterbound macadam with 2½ in. block base and 1 in. asphalt topping 3½ mi. Highway 7, Mexia-Teague Rd., $146,000; 4.92 mi. Highway 14, west from Mexia toward Wortham, $226,800; 2¾ mi. Highway 14 between Mexia and Groesbeck, $117,500, all 18 ft. H. Boyette, Mexia, engr.

Tex., Groesbeck—Limestone Co. making plans grading, bridging and 9 in. waterbound macadam, 2½ in. block base and 1 in. asphalt topping 8.8 mi. Mexia-Waco Rd., Highway 7. $385,000. H. Boyette, Mexia, engr.

Tex., Kaufman—Kaufman Co. made plans rein.-con. paving 10.74 mi. Highway 40 between Brushy Creek and Dallas Co. line, 9 ft. $154,600. S. J. Treadway, Terrell, engr.

Tex., Palestine — Anderson Co. making plans gravel surfacing 10.75 mi. Highway 43, 18 ft. $29,700. E. W. Davis, Palestine, co. engr.

Tex., Quanah—Hardeman Co. making plans grading, bridging and concrete paving 7.56 mi. Highway 5 extending east from Quanah city limits, 18 ft. $284,500. J. B. Nabors, Quanah, engr.

Okla., Fairview—Plans grading and concrete paving 26,600 sq.yd. Central, Bway., F and East Railroad Sts., Dist. 3. $76,000. H. G. Olmstead, 2230 West 18th St., Oklahoma City, engr.

Okla., Morrison — Making preliminary plans concrete paving 9,600 sq.yd. Main St.

See proposal advertisements on page 151, Advertising Section.

What's Back of Your Paver?

A STRING of trucks fighting their way through traffic, interfering with your grading, getting stalled in soft going—and running 'way behind schedule.

Or have you profited by experience and hauled your aggregates in advance and built stockpiles. Then you can short-haul your batches on close schedule and without interference.

For your stockpile loading you will profit most by using Haiss Loaders with Precision Measuring Hoppers. They have that simplicity of design which is the highest development of engineering excellence. They do more work per dollar invested.

Ask for our booklet "Feeding the Paver" and you'll get some profit-making suggestions.

***Plan to* Use Your Haiss Loader for**

Streets and Roads (Continued)

$30,000. T. D. Noonan, mayor. Engineer not announced.

Okla., Red Oak — Making preliminary plans grading and concrete paving 8,870 sq. yd. Main St. $28,000. J. G. Hanell, mayor. Engineer not announced.

Wash., Hoquiam—Election soon $96,000 bonds, paving Emerson Ave.

Calif., Coronado—Made plans curbing and 4 in. bituminous macadam paving Pomona and Miguel Aves., etc. To exceed $25,000. W. T. Clark, city clk.

Calif., Glendale—City Trustees soon take bids improving Canyon Dr., etc., 162,109 sq.ft. concrete paving, 176,415 sq.ft. grading, etc. J. F. Johannsen, city engr.

Calif., Lodi—Making plans paving, etc. portions of Lockeford, Stockton Sts., etc. $35,000. L. F. Barzellotti, city engr.

Calif., Los Angeles — Los Angeles Co. plans improving 114th St. between Hawthorne Blvd. and Western Ave., 17,399 cu.yd. excav., 290,467 sq.ft. Willite paving, 306,775 sq.ft. disintegrated granite sub-base, etc., to exceed $95,000.

Calif., Pomona—Making plans improving Hamilton Blvd., etc., 268,000 sq.ft. 5 in. oil macadam paving, 14,000 sq.ft. guttering, 7,400 ft. curbing, etc. F. C. Froedhe, city engr.

Calif., San Diego—San Diego Co. plans improving Ramona-Julian Highway, 68,053 sq.yd. 5 in. concrete paving, etc., approximately $300,000; streets in Talmadge Park 1, 22,936 sq.yd. 1½ in. on 2½ in. asphaltic concrete paving; Talmadge Park 2, 16,665 sq.yd. 4 in. concrete paving, etc. E. R. Childs, Court House, engr.

Calif., San Diego—San Diego Co. made plans improving University Ave. and Chollas Rd., 16,181 lin.ft. cement curbing, 77,924 cu.yd. excav., 40,109 sq.yd. 1½ in. asphaltic concrete on 5 in. concrete paving, etc.; also Arizona, Collier, Hamilton, Oregon and Idaho Sts., 25,263 sq.yd. 1½ in. asphaltic concrete on 4 in. concrete paving, etc. F. A. Rhodes, City Hall, engr.

Calif., Salinas—Making plans 5 in. concrete paving portions of Lake and Sausal Sts. $25,000. H. Cozzens, city engr.

Calif., Stockton—San Joaquin Co. made plans improving Jacobs Rd. 338, 1,400 tons 2½ in. course gravel, 1,050 tons top course, 1½ in. gravel. F. E. Quail, Stockton, co. surv.

Calif., Whittier — Made plans improving Philadelphia St. between Tract 7381 and Worsham Dr., 189,200 sq.ft. grading, 78,764 sq.ft. 6 in. and 110,435 sq.ft. 5 in. concrete paving, 13,854 lin.ft. concrete curbing, 39,911 sq.ft. concrete walks, 6,800 lin.ft. 6 in. and 1,351 lin.ft. 4 in. sewers, 13,000 cu.yd. excav., 3,000 cu.yd. fill, etc. To exceed $70,000. M. R. Bowen, city engr.

Ontario—Dept. Pub. Highways, Parliament Bldgs., Toronto, plans improving provincial highways in Kent Co. $60,000. R. M. Smith, 110 University Ave.; Toronto, engr.

Ontario—Dept. Pub. Highways, Parliament Bldgs., Toronto, plans macadam or concrete paving 8.95 mi. Longwoods Rd., $268,000; and surface treating 9.4 mi. Longwoods Rd., $8,460, in Kent Co. R. M. Smith, 110 University Ave., Toronto, ch. engr.

Ont., Chatham—Kent Co. plans grading, graveling, concrete and macadam paving various roads. $220,500. W. D. Colby, Harrison Hall, engr.

Ont., Cobourg — Northumberland and Durham Counties, plan macadam, concrete and gravel surfacing various roads. $90,000. G. Greer, County Bldg., engr.

Ont., Hamilton — Making plans curbing, guttering and asphalt on concrete paving 6,500 sq.yd. Cameron Ave. $27,540. W. L. McFaul, City Hall, engr.

Ont., Oshawa — Ontario Co. plans concrete paving approximately 1 mi. Simcoe St. from city limits northward to intersection of Five Points Rd. $25,000-$30,000. D. J. Kean, County Bldg., Whitby, Ont.

Ont., Ottawa — Ottawa Suburban Road Comn., 279 Carling Ave., Ottawa, soon takes bids paving 9 mi. March Road, about 12 mi. west of here. $35,000. A. K. Hay, 279 Carling Ave., engr.

Buda-equipped Barber-Greene ditcher

On to Florida

In Florida, where everything is labelled "rush," development work must be finished with speed and dispatch.

The Barber-Greene ditcher shown here was used in opening gas main trenches through coral rock in Florida. This machine worked out so well—saving time and cutting costs—that the Barber-Greene Company received orders for five more Buda-equipped ditchers to be used in Miami on similar work.

Contractors who must get their work done on time insist on Buda-powered equipment. Buda power plants range in size from 20 to 87 Horse Power. Write for a copy of our power plant bulletin.

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

16-in. c. i. B&S water main laid with LEADITE joints, tested to 195 lbs. water pressure.

Pipe Joint Knowledge

LEADITE is recognized to be the best material for making joints in cast iron bell and spigot water mains by thousands of water works men thruout the world.

Water works men who keep a check on their systems and make water waste surveys know that their pipe lines laid with LEADITE are tight.

Their experience with LEADITE has proven to them that LEADITE joints improve with age, and that the joints do not corrode or rust.

They know that LEADITE has been successfully tested and used for over 30 years.

They know LEADITE will flow around a 60-in. pipe just as easily as it does around a 4-in. pipe; size does not make any difference. They know LEADITE fills every crevice of the joint.

They know LEADITE eliminates the expense and drudgery of caulking.

They know the simplicity, economy and efficiency with which LEADITE can be used.

Give LEADITE a fair trial and convince yourself of its merit and many advantages.

Join the LEADITE users.

The up-to-date water works man specifies and uses LEADITE.

LEADITE saves at least 75%

LEADITE is the pioneer self-caulking Material for c. i. pipe

Be Sure It Is LEADITE and Accept No Imitations

THESE reports are grouped under each class (water-works, sewers, etc.) and under each stage of the work (proposed, bids desired, etc.), according to the following geographic sections: New England, Middle Atlantic, South, Middle West, between Mississippi and Rocky Mountains, Far West, and Canada.

Where name of official is not given inquiries should be addressed to City Clerk, County Clerk, or corresponding official.

Waterworks

Proposed Work

Mass., Amesbury—Plans additional water supply and filtration plant. $150,000 appropriated. Engineer not selected.

Mass., Falmouth — Plans 300,000 gal. standpipe, $32,000; pumping engine (Fall), $38,000; and 4- to 12-in. pipe lines $91,000, additional work $40,000. Richardson & Gay, 220 Devonshire St., Boston, consult. engrs.

Mass., North Adams — Plans water meters. $10,000 appropriated.

N. J., Paulsboro—Boro Council plans 2 pumping stations and new standpipe. $150,000. Engineer not selected.

Pa., Ebensburg — Plans filtration plant. $45,000. Hudson & Myron, 802 Wabash Bldg., Pittsburgh, engrs.

Pa., Liberty—Plans complete distribution system, standpipe and supply. $40,000. Hudson & Myron, 802 Wabash Bldg., Pittsburgh, engrs.

Pa., McKeesport — Making plans additional supply line from Monongahela intake. $250,000. Hudson & Myron, 802 Wabash Bldg., Pittsburgh, engrs.

Pa., Port Vue (McKeesport P. O.)—Plans improving waterworks, incl. tank, pipe lines and appurtenances, etc. $40,000. Hudson & Myron, 802 Wabash Bldg., Pittsburgh, engrs.

Pa., Saltsburg — Plans filtration plant. $25,000. Hudson & Myron, 802 Wabash Bldg., Pittsburgh, engrs.

Pa., Tarentum — See "Buildings — Industrial."

Fla., Ft. Meade — Voted $35,000 bonds, extending mains in various streets. Noted Jan. 21.

Fla., Key West—Bd. Trustees Monroe Co., Water Supply Dist., C. D. Stearns, chn., wants proposition for engineers for securing fresh water supply for Key West and other Keys, either by constructing pipe line from Mainland or granting of franchise for supplying the water.

Fla., Perry — Election Mar. 16, $25,000 bonds extending waterworks. C. L. Brandow, mayor.

Fla., Pompano—Election Mar. 16, $100,000 bonds, waterworks. L. E. Raines, city clk.

Miss., Webb — Plans election $35,000 bonds, new waterworks. H. A. Mentz, Hammond, La., consult. engr.

O., Cleveland—See "Sewers."

O., Hamilton — Service Director, City Hall, in market 1 centrifugal water pump for booster station. $10,000.

Ill., Christopher — Takes bids in April, 4.25 mi. 4 in. c.i. mains, etc., in various streets. $36,800. C. B. Mautz, Benton, engr.

Ill., Harvard — Making plans rein.-con. storage reservoir, 60 ft. diam., 10½ ft. deep, rein.-con. slab cover. Mead & Seastone, Journal Bldg., Madison, engr.

Wis., Beloit—Beloit Water, Gas & Electric Co., A. Dobson, mgr., plans drilling well, 1,000 ft. deep and 2 m.g. capacity, for additional water supply, also 1,000 g.p.m. pump. $25,000. Engineer not selected.

Kan., Eldorado—Election Mar. 16, about $450,000 bonds, new dam across Willow Creek, pumps, pipe line filter plant improvements, etc. Black & Veatch, 701 Mutual Bldg., Kansas City, Mo., engrs. Noted Jan. 7.

Kan., Girard — Plans water softening plant. To exceed $5,000.

Kan., Hillsboro—Election Mar. 16, $102,600 bonds, waterworks. F. E. Devlin, Bitting Bldg., Wichita, engr.

N. D., Crosby — Election Apr. 5, $35,000 bonds, waterworks. O. Woolfrey, city aud. Noted Feb. 25.

N. D., Mandan—Election Mar. 15, $165,000 bonds, improving waterworks, incl. filtration plant and extending mains, etc. Noted Jan. 28.

Mo., Chaffee — Election Apr. 6, $60,000 bonds, drilling artesian well, new electrically driven pumping unit, 4 and 6 in. c.i. mains, extension to sewerage system. F. R. Nohl, resident engr. C. E. Smith & Co., Ry. Exch. Bldg., St. Louis, consult. engr.

Mo., Norborne — Plans election $80,000 bonds, waterworks and sewerage system.

Mo., Seymour — Plans election $30,000 bonds, complete waterworks and distribution system.

Tex., Nacogdoches—Voted $50,000 bonds, waterworks improvements. Addressed W. I. Baker, Nacogdoches, mayor.

Tex., O'Donnell — Voted $27,500 bonds, complete waterworks. Devlin Eng. Co., Amarillo, engrs.

Tex., St. Jo—Made plans 5 mi. 4- to 8-in. mains, new deep well, 50,000 gal. tank on 100 ft. tower $55,000. Douglas & Davenport, c/o Ward Bldg., Wichita Falls, engrs.

Tex., Seagoville — Voted $30,000 bonds, complete waterworks. Municipal Eng. Co., 1107 Athletic Club Bldg., Dallas, engrs.

Okla., Achille—Making preliminary plans new waterworks. $20,000. J. G. Crossley, mayor. Engineer not selected.

Okla., Altus—Soon takes bids new water supply from Wichita Mountains at Lugert and main extensions. Benham Eng. Co., Gumbel Bldg., Kansas City, Mo., consult. engrs. Noted Nov. 26.

Okla., Antlers—Making preliminary plans settling basin and filter equipment. $17,500. C. E. Stephenson, mayor. Engineer not announced.

Okla., Blair — Made preliminary plans new waterworks, connecting with Altus supply. Election soon $65,000 bonds for same. Benham Eng. Co., Gumbel Bldg., Kansas City, Mo., engrs.

Okla., Collinsville — Election Mar. 11, $81,000 bonds, new pumps and power plant extensions, etc. Holway Eng. Co., Wright Bldg., Tulsa, engrs. Noted Dec. 10.

Okla., Eldorado — Making plans waterworks and paving various streets. Benham Eng. Co., Gumbel Bldg., Kansas City, Mo., consult. engrs.

Okla., Fairmont — Making preliminary plans new waterworks. $18,000. J. J. Gordon, mayor. Engineer not selected.

Okla., Salina—Voted $45,000 bonds, new waterworks. C. E. Lindsay, mayor. Engineer not announced.

Calif., Burlingame—Plans election $225,000 bonds, improving and extending water system.

Double-Quick Concrete

Engineering News-Record Comments Editorially on Quick-Hardening Concrete

"Thus we have in 3 days a concrete workable and usable which is as strong as normal 28-day concrete," says an editorial in *Engineering News-Record,* February 18, p. 266, in commenting on the quick-hardening concrete made with standard *Universal* cement, the same quality *Universal* as regularly used.

The methods for obtaining this concrete are easily understood but to get best results must be applied with care, cautions *Engineering News-Record,* and adds that "the series of tests on which the Universal company is basing its campaign are well authenticated."

Detailed information on this time-saving concrete made with standard *Universal* cement gladly furnished on request to

Universal Portland Cement Co.

Chicago—Pittsburgh—Minneapolis—Duluth—Cleveland—New York

Concrete for Permanence

Waterworks (Continued)

Calif., Garden Grove — Voted $50,000 bonds, mains, etc. in various streets for Garden Grove Water Works Dist. 3. Noted Dec. 31.

Calif., Laguna Beach — Making plans deep wells and pumping plants in Santa Ana River basin, 12 mi. pipe line from Santa Ana River basin to district lands, one 1½ m.g. and three 100,000 gal. reservoirs. J. B. Lippincott, Petroleum Securities Bldg., Los Angeles, engr.

Calif., Monticeto—Monticeto Water Dist. plans election bonds to exceed $100,000, constructing Mono Dam.

Calif., Redlands—Plans election bonds to exceed $350,000, additional water facility improvements.

Ont., Oshawa—Plans electrically driven 2 stage pump at waterworks plant. $4,000. W. C. Smith, Municipal Bldg., engr.

Ont., Toronto—Plans 3,500 lin.ft. 20 in. c.i. mains between main on Boulevard Dr. and main on Pearson Ave. $55,467. R. C. Harris, City Hall, engr.

Sask., Eston—Canadian Natl. Ry., 230 St. James St., Montreal, Que., making surveys 13 mi. pipe line from Saskatchewin River to here. $250,000. C. S. Gzowski, Montreal, ch. constr. engr.

B. C., Chilliwack — Elk Creek Waterworks Co., Ltd., H. Ryall, pres., New Westminster, making plans storage dam and watermains in Dunville Creek, near here. $30,000. A. H. Turvey, engr.

Bids Desired

Mass., Holyoke — Mar. 19, by Water Comrs., 53,000 ft. 20 in. pipe for Ashley ponds line. P. J. Lucey, City Yard, engr.

N. Y., Long Island City—Mar. 12, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, mains in Denton Dr., 57th Rd., Anna and 113th Pls., Carhart, Herrick, Lotus and Wilton Aves., Locust, 32nd, 33rd, and 92nd Sts., here.

N. Y., New York — Mar. 12, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains, transferring taps, rearranging connections, and setting additional valves and hydrants in Battery Park, Riverside Dr., River Rd., 5th, 9th, Payson, St. Nicholas, 7th and 12th Aves., Church, Dyckman, East, Sickles, West, East 57th and West 193rd Sts.

Tenn., Knoxville — Mar. 15, by City, 38,400 ft. 16- to 30-in. trunk water mains under Tennessee River. F. W. Albert, engr.

O., Akron — Mar. 23, by A. S. Helpbringer, purch. agt., 825 tons Class "B," 190 tons Class "C," 15 tons Class "D" 4- to 16-in. c.i. pipe, and 50 tons 6- to 16-in. standard special castings. M. P. Tucker, Municipal Bldg., engr.

O., Cincinnati—Mar. 18, by Director Pub. Serv., 10,800 ft. 6- to 36-in. c.i. mains, etc. in Central Parkway from 8th St. and Eggleston Ave. to Findaly St. $60,000. C. O. Sherrill, City Hall, engr.

O., Cleveland—Mar. 17, by Bd. Comrs. Cuyahoga Co., 3,300 ft. 6 and 8 in. c.i. mains in Impvt. Dist. 158, also 18,000 ft. 8 and 12 in. c.i. mains in Impvt. Dist. 452. $75,000. F. Williams, Courthouse, engr.

O., Cleveland—Mar. 19, by City, mains in Rosewood Ave. S. E., Greenway Rd. N. W., East Blvd. S. E., Harvard Blvd., S. E., Brighton Ave. S. W., Mortimer Ave. S. W., Wayland Ave. S. W., Ira Ave. S. W., Leella Ave. S. W., West 155th, 134th, 135th, 136th, 137th, 138th and 139th, also East 116th and 130th Sts. To exceed $15,000. R. Hoffman, City Hall, engr.

O., Dayton—Mar. 12, by Comrs. Montgomery Co., 5,455 ft. 4- to 8-in. c.i. mains, 5,400 ft. 6 ft. to 10 ft. trenching, etc., in Bway. Dist. $30,000. P. E. Borchers, U. B. Building, co. sanitary engr.

Mich., Detroit—Mar. 23, by Bd. Water Comrs., 6.683 mi. c.i. mains in various streets, Contr. 1926-4; 7.923 mi. Contr. 1926-5; and 7.727 mi. Contr. 1926-6. G. H. Fenkell, 176 East Jefferson Ave., genl. mgr. Noted Nov. 12 and Dec. 10, 1925, Jan. 28 and Feb. 4.

Mich., Warren — Mar. 15, by F. Licht, village clk., water distribution system, incl. 60,000 gal. elevated steel tank, 20,100 lin.ft. 4- to 8-in. c.i. pipe, etc. G. H. Ruhling & Co., 16549 Woodward Ave., Detroit, engr.

Ill., Chicago—Mar. 15, by City, Room 406, City Hall, 3 in. velocity water meters at Meter Shops, 3148 South Sacramento Ave. A. A. Sprague, comr. Pub. Wks.

Wis., Kenosha—Mar. 15, by C. M. Osborn, city mgr., 6,910 ft. galvanized iron pipe for Park Dept. Water Supply System.

Ia., Des Moines — See "Contracts Awarded."

Minn., Fairmont — Mar. 15, by H. J. Waite, secy. Water & Light Comn., 1 each 1,000, 1,500 and 2,500 g.p.m. motor driven centrifugal pumps. C. Foster, 512 Sellwood Bldg., Duluth, engr.

Minn., St. Paul—Mar. 15, by G. J. Ries, aud. Ramsey Co., constructing and equiping brick pump house.

Minn., Waite Park — Mar. 29, by L. A. Cleall, village recdr., waterworks and distribution system, incl. cistern, wells, pump house, pumping machinery, tank and tower. $20,000. S. S. Chute Court House, St. Cloud, engr.

Tex., Abilene — Mar. 19, by Bd. City Comrs., water purification plant. O. K. Hobbs, city engr.; adv. E. N.-R. Mar. 11.

Wash., Puyallup — Mar. 18, by A. R. Shevland, secy. North Hill Water Co., pumping plant, incl. water collecting system, pump house, and pumps, distribution system, 8 mi. mains, reservoir, 30,000 gal. wood stave tank on 20 ft. timber tower, etc. Miller Eng. Co., Burke Bldg., Seattle, engrs.

Bids Received

N. Y., Brooklyn — N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, Mar. 5, mains in De Kalb, Forbell, Foster, Georgia, Levonia Aves., and Avenues S and T, etc., here, from Dragonetti Contr. Co., 1123 Clinton Ave., New York City, $11,470. Noted Feb. 25.

N. Y., Long Island City—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York City, Mar. 5, mains in 22nd and 45th Drs., 22 Rd. Hopkins, Washington and 60th Aves., etc., here, from S. Gallucci & Sons, Inc., 38 Railroad Ave., Corona, $4,389. Noted Feb. 25.

N. Y., New York — P. J. Dooling, comr. Purchase, Municipal Bldg., Mar. 5, c.i. pipe and special castings, from J. Fox & Co., 233 Bway., $105,420; and wet connection sleeves and valves, from A. P. Smith Mfg. Co., 111 Norman St., East Orange, N. J., $43,275, all above for Dept. Water Supply, Gas & Electricity. Noted Feb. 25.

N. Y., Potsdam — Municipal Bd., C. E. Haywood, chn., Feb. 25, four 2,000,000 g.p.d. rein.-con. mechanical filters, clear well, etc. for waterworks, from Shephard Constr. Service, Inc., 423½ South Salina St., Syracuse, $80,000. Noted Feb. 4.

Pa., Phila.—Dept. Pub. Wks., Bureau of Water, Mar. 3, small pipe lines, Contr. 796, from M. and J. B. McHugh, 892 North Markoe St., $95,685; electrical receiving equipment for Queen Lane Booster Station, Contr. 799, from Keystone State Piping & Equipment Co., 2849 Germantown Ave., $34,750.

Md., Baltimore—Bd. Awards Mar. 3, laying mains for Bureau Water Supply, from Ligon & Ligon, 2 East Lexington St., $59,856. Noted Feb. 25.

Colo., Ft. Collins — Improving waterworks **(a)** wood and concrete pipe **(b)** wood and steel pipe **(c)** concrete pipe **(d)** steel pipe **(e)** c.i. pipe **(1)** Sect. B flow line **(2)** Sect. C flow line **(3)** distribution main, Sect. D **(4)** distributing reservoir **(5)** labor for distribution system, from A. K. MacKay, Sterling **(a1)** $351,711; from Wheelwright Constr. Co., 2476 Washington Ave., Odgen, Utah **(b1)** $340,016 **(b2)** $68,118; from Lock Joint Pipe Co., 1716 California St., Denver **(c1)** $354,030 **(a2)** $72,019 **(c2)** $75,337 **(c3)** $79,228; from Johnson & McElrovy, Ft. Collins **(d2)** $98,920; from J. Collier, Denver **(e3)** $111,675; from Babb & Reid, Denver **(4)** $69,946; from Palmquist & Crum, Denver **(5)** $29,743. Noted Feb. 4.

Wash., Seattle—Bd. Pub. Wks., Feb. 19, from Interstate Constr. Co., 1713 22nd Ave. S., mains in Melrose Ave. N., et al., 2,355 ft. 20 in. c.i. pipe $6.40 per ft., 1,215 ft. 30 in. $11.58, 20 ft. x 16 in. $3, etc. total $44,051. Engrs. est. $46,142.

Contracts Awarded

Pa., Phila.—Dept. Pub. Wks., Bureau of Water, City Hall, installing electrical equipment for Torresdale Pumping Sta., Contr. 797, to Acme Machine Co., 316 North 7th St., $112,096; switchboard, wiring, etc. for Torresdale Pumping Sta., Contr. 798, to H. Mayer Co., 103 Walnut St., $71,178; and 50,000 lb. pigiead, Contr. 794, to N. Tralter & Co., 36 North Front St., $4,710. Grand total $187,984. Noted Feb. 18.

Miss., Laurel—City, 7,500 ft. 8 in. and 17,000 ft. 6 in. c.i. pipe and fittings, to Amer. Cast Iron Pipe Co., Birmingham, Ala., $21,939; seven 8 in. and sixteen 6 in. valves, to Laurel Machine & Fdry. Co., Laurel, $4,430; 26 fire hydrants, and 2,000 lb. lead, etc., to Dixie Mill & Supply Co., 901 Tchoupitoulas St., New Orleans, La., $3,899. Grand total $30,328. Noted Feb. 4.

Miss., Moss Point—For 71,500 ft. 2- to 8-in. c.i. mains, to Natl. Cast Iron Pipe Co., Tarrant City, Birmingham, Ala., $41,673; hydrants, valves and boxes, to Dixie Mill Supply Co., 901 Tchaupitaulas St., New Orleans, La., $5,589; pumping equipment, to Fairbanks-Morse & Co., 608-14 Magazine St., New Orleans, La., $20,750; deep well, to Gray Artesian Well Co., Pensacola, Fla., $5,200; tank on tower, to Chicago, Bridge & Iron Wks., 37 West Van Buren St., Chicago, Ill., $5,575; also concrete reservoir and laying mains, to C. J. Montgomery, Kaplin, La., $39,339. Grand total $118,126.

Ill., Chicago — City, 5,600 tons 30- to 48-in. c.i. pipe, to U. S. Pipe & Fdry. Co., 128 South Michigan Blvd., Chicago, $48.15.

Ill., Lockport — Well, pumping station, etc., to Nash-Dowdle Co., 77 West Washington St., Chicago, $41,823. Noted Jan. 21.

Ill., Mundelein — Bd. Local Impvts., to C. M. Barker, Maywood, 4,400 ft. 8 in. mains at $1.85 per ft., 15,300 ft. 6 in. mains $1.45, four 8 in. valves $47, twenty-six 6 in. valves $33, and 44 hydrants $90.

Ill., Phoenix—Waterworks improvements, incl. c.i. mains, etc., to E. K. Ladd, Peotone, $147,396. Noted Aug. 6.

Ia., Des Moines—City will extend various size mains in various parts of city, by day labor. $175,000.

Minn., Cloquet—J. A. Parks, city clk., 2 wells, to Layne-Bowler-Chicago Co., 37 West Van Buren St., Chicago, Ill., about $20,000. Noted Sept. 24.

Minn., Minneapolis — F. S. Gram, city purch. agt., five thousand ⅝ in. water meters, to Natl. Meter Co., 1455 West Congress St., Chicago, Ill., at $9.50 each. Noted Feb. 11.

Minn., St. Paul — A. E. Eggert, city purch. agt., seventy-five 5 in. single steamer valves, compressor type fire hydrants, to Michigan Valve & Fdry. Co., Amer. Trust Bldg., Detroit, Mich., at $77.70 each; two thousand six hundred and forty 12 ft. lengths 6 in. c.i. pipe, to Amer. Cast Iron Pipe Co., 712 Plymouth Bldg., Minneapolis, $0.695 per ft. for mold cast pipe; and one thousand ⅝ in. water meters, to Badger Meter Co., 30th and Meinecke Aves., Milwaukee, Wis., $7.45 each. Noted Feb. 4.

Kan., St. Francis — Waterworks extensions, incl. 100,000 gal. elliptical type tank, to Chicago Bridge & Iron Wks., 37 West Van Buren St., Chicago, Ill., $8,080.

Okla., Frederick — City, 1 m.g. rein.-con. circular reservoir and storm sewers in various streets, to Gallamore Constr. Co., Cushing, $46,566. Noted Feb. 25.

Colo., Ft. Collins—City, filter plant, to Spotts & Malcolm, Loveland, $191,022. Noted Feb. 4.

Sewers

Proposed Work

Mass., Marblehead — F. R. Ireson, chn. Sewer Com., making preliminary plans main trunk line sewerage system from Flying Point to Little Harbor. $300,000 appropriated. F. A. Barbour, 1120 Tremont Bldg., Boston, engr.

Columbus Dispatch Building, Columbus, Ohio.

Brixment used exclusively

Dettling

BRIXMENT FOR PERFECT MORTAR

Unquestioned strength and permanent architectural charm of the wall are automatically assured when BRIXMENT is used for mortar. For every shipment of BRIXMENT has been subjected to rigid physical and chemical tests to insure more than the required strength in every part of the structure and a uniformity of tone and texture that will endure. No scaling of joints, no fading of mortar colors. These are some of the reasons why BRIXMENT is today more widely used than any mason's cement. Ask for further details describing its unusual strength, architectural adaptability and economy as a mortar material for masonry and stucco.

LOUISVILLE CEMENT COMPANY, *Incorporated*, LOUISVILLE, KENTUCKY

Wis., Muscoda—Grant Co. (Lancaster), plans 1,000 ft. single leaf bascule type bridge with bascule approach span, etc., over Wisconsin River, here. $180,000. C. H. Kirch, State Capitol, Madison, engr. Noted Mar. 19, 1925.

INDUSTRIAL

SHOVEL CRANE DRAGLINE

A FIFTY-MAN-POWER

MASTERPIECE

THIS INDUSTRIAL crawling tractor crane, shovel and dragline is producing 50-man-power results in handling the heavy loads of industry. It is cutting deep into the high costs of manual material-handling and recovering a buried treasure of non-productive dollars. The type DC is a masterpiece of design and construction. Its outstanding superiority is guaranteed by America's pioneer crane builders. Over fifty years of untarnished business integrity and highly specialized skill and experience form its background.

This INDUSTRIAL has a greater field of usefulness in industry than any other material-handling equipment on the market today. With but one basic machine, it is a full-fledged locomotive crane, power shovel and dragline and vastly superior to any other equipment designed specifically for only one of these three services. The source of power is optional—it may be steam with a high-pressure boiler, gasoline with a powerful engine, electric from plug-in connection, full Diesel or semi-Diesel.

As a crane with clamshell bucket, lifting magnet, hook and block, wood grapple or pile driver leaders, this DC will supplant manual effort at tremendous savings. As a power shovel or dragline, it has no equal.

These three machines are offered for but little more than the price of any one of other make. Think of the vast saving in capital investment!

Write today for your copy of Book 120-A.

INDUSTRIAL WORKS

Bay City, Michigan

MAGNET GRAPPLE CLAMSHELL PILE DRIVER

Bridges (Continued)

Tex., Abilene—See "Streets and Roads."

Tex., Benjamin—Knox Co. election Mar. 27, $70,000 bonds concrete and steel bridge across Brazos River. N. S. Kilgore, judge.

Nichols Concrete Pipe

Centrifugally Densified

Manufacturing Processes and Equipment Fully Patented

Lightness—achieved without sacrifice of strength. Density—concrete with the ideal water content, densified by centrifugal force, without separation of aggregates. Interior Finish—burnished to a glaze offering minimum flowage resistance. Reinforcement—circular, elliptical or any other desired shape—perfectly centered or placed as specified.

Nichols pipe are economically made in sizes from 18 in. up. They are suitable for sewers, drains, highway and railway culverts, water supply lines, irrigation and hydro-electric developments.

We are prepared to license and equip complete pipe plants or execute pipe contracts ourselves.

Nichols Centrifugal Products Corp.
8100 E. Jefferson Ave., Detroit, Mich.

Streets and Roads

Proposed Work

Mass., Amesbury—Plans concrete paving 1½ mi. Main St. $75,000.

AMERICA NEEDS MORE GARAGES IN HER CITIES

In Garage Design it's the Layout that Counts!

If you can plan 55 car spaces on what is otherwise a 50 car garage storage floor, you have made the owner a present of say $1200.00 a year for the life of the building. And, if it's a four story building, the sum is $4800.00 yearly, and every year.

When we ask that you permit us to suggest car storage layouts for a multi-floor building you have in prospect, we do so because our years of specialization have given us a skill that you can utilize to save your own time.

We'll also suggest where and how d'Humy Motoramps can be installed to best advantage. If d'Humy Motoramps are eventually incorporated in your final plans, a charge is made to the owner. Our service to you as Engineer and Architect, is without cost or obligation.

Every garage deserves a 100% layout for its size.

Let us see how near that mark our suggestion will come. It costs you nothing.

In setting the idea of erecting A GARAGE

it will be helpful for you to have a copy of "Building Garages for Profitable Operation." Ask for it as Catalog "N."

Are you receiving the monthly Garage Design Data Sheets? Would you like a set?

Creosoted Paving Blocks — Milwaukee, Wis. — Central Bd. Purchases, for 7,000 more or less sq.yd. creosoted paving blocks, to E. J. Stocking Co., 111 West Washington St., Chicago, Ill., at $2.09 per sq.yd. Noted Jan. 28.

TURBOTUBE—

ONLY Modine makes Turbotube—designed to new standards of performance and structural stability.

"Turbotube" combines all the advantages of high cooling capacity with new limits in strength, light weight and free, unrestricted water circulation.

It is for these reasons that Hart-Parr and the J. I. Case Plow Works have selected *Turbotube cooling for their tractors.*

Again, Modine's more than 15 years of progressive specialization on the special problem of radiation is serving industry in a better way.

MODINE MANUFACTURING CO.
RACINE, WISCONSIN

A—Turbotube-cooled Hart-Parr 16-30 H.P. Oil Tractor, product of the Hart-Parr Co., Charles City, Ia.

B—Turbotube-cooled 15-27 H. P. Wallis Tractor, made by the J. I. Case Plow Works, Racine.

1 to 1000 H. P.—Any Type—Tubular or Cellular (Spirex)—Sectional—Conventional Cast—Sheet Metal, or if preferred only cores or sections.

MODINE RADIATORS

CONSTRUCTION NEWS

Some of the Week's Large Projects

TRADE **"LEADITE"** MARK

Registered U. S. Pat. Office

Good Pipe Joints

Has it occurred to you why so many water works men are using Leadite for making joints in all sizes of cast iron water mains?

There are many sound reasons.

The most important reason is that experience has proven Leadite joints are good joints and improve with age.

The other reasons relate to saving in the cost of material and labor.

Leadite facilitates rapid completion of the work.

Leadite saves money from every angle of pipe laying.

Anyone can make Leadite joints; Leadite is very easy and simple to handle.

Yarn the joint, pour it full of molten Leadite, and the joint is finished.

If you have never tried Leadite, do not pass up a good thing without investigating it.

Give Leadite a trial.

Leadite resists electrolysis.

Leadite does not corrode or rust.

Leadite has been successfully tested and used for over 30 years.

Thousands of miles of pipe jointed with Leadite are in service.

The up-to-date water works man specifies and uses LEADITE.

Laying 36-in. c. i. Water Mains With Leadite Joints

LEADITE saves at least 75%

LEADITE is the pioneer self-caulking Material for c. i. pipe

Be Sure It Is LEADITE and Accept No Imitations

THE LEADITE COMPANY, Inc.
1512 Land Title Building, Philadelphia, Pa., U. S. A.

NO CAULKING
